*Close it, lock it, keep it safe — You'll find the right stuff right here.*

**A Automatic Flush Bolt for Metal Fire Doors.** For top and bottom in inactive leaf of a pair of coordinated doors. Used where inactive leaf is not required for exit purposes. Fits standard hollow metal doors. Flush bolt prep.

**B Manual Extension Flush Bolt for Metal Doors.** For top and bottom in inactive leaf of a pair of swinging fire doors. 6¾"H x 1"W, 12" rod, throw is 3/4". Mounting hardware included.

**C Residential Grade Flush Bolt.** Automatic holding of bolt in projected or retracted position. Diameter of bolt head is 1/2", throw is 1". Mounting hardware included.

**D Door Coordinator for Metal Fire Doors.** Use for coordinating the closing of active and inactive leafs where overlapping astragel is used. Use No. 4JG75 for doors 38" wide and under. Use No. 4JG74 for doors over 38" wide. Mounting hardware included.

**E F Heavy-Duty Surface Bolts.** No. 5U621 UL listed for fire doors. Rod is 1/4" x 3/4", projection is 1⅝", throw is 1⅜". Mortise strike and mounting hardware included. No. 5U620 accepts padlock.

**G Concealed Screw Surface Bolts.** Mortise strikes and mounting hardware included.

**H** thru **R** Door and Floor Stops feature non-marring rubber bumpers.

**H Heavy-Duty Wall Door Stop w/Holder.** Wood screw mounting hardware included.

**I Standard-Duty Concave Wall Door Stop.** Door knob hits stop without damaging or engaging lock. Drywall, anchor and screw mounting hardware included.

**J Concave Wall Door Stop.** Permits door knob to hit stop without damaging or engaging lock. Self-adhesive.

**K Compact Convex Wall Door Stop.** Sheet metal, screw, and rawl and brad nail mounting hardware included.

**L Residential Grade Rigid Door Stop.** Wood screw mounting hardware included.

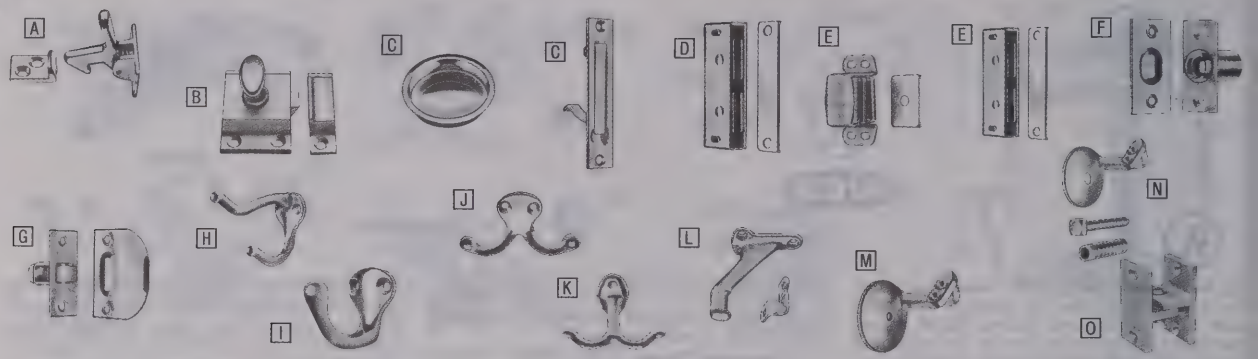
**M Residential Grade Flexible Door Stop.** Wood screw mounting hardware included.

**N Heavy-Duty Floor Stop w/Door Holder.** Expansion and lead shield mounting hardware included.

**O Floor Stop for Threshold or Undercut Doors.** Wood screw and plastic anchor mounting hardware included.

**P Floor Stop for Threshold Doors.** Wood screw and plastic anchor mounting hardware included.

**Q Hinge Pin Door Stop.** For hinged doors where wall or floor stops are not desirable. No. 4JG86 designed for narrow trim look. Both models fit on 1/4"-5/16" dia. hinge.



**R Door Holder.** Mounts on door, stainless steel spring release is foot operated. Rubber tip. Sheet metal screws included.

**S Door Silencer.** For metal frame doors. Absorbs impact when door is closed. Grey rubber. Needs mounting hole of 9/32". **10 per bag.**

# BUILDER'S HARDWARE

A **Elbow Catch.** Ideal for use in inactive leaf of cabinet doors. Surface mounting, hardware included. Plate is 1⅜W x 5/8"H, strike is 13/16" x 5/8".

B **Cupboard Latch.** Surface mounting, hardware included. Case is 1¾ x 1⅛".

C **Flush Pulls.** Mounting hardware included. Nos. 4JG45 and 4JG46 dimensions: inside dia. 2⅛", outside dia. 2⁷⁄₁₆", 7/16" deep; Nos. 4JG47 and 4JG48 dimensions: 3⅛H x 1⁵⁄₁₆W x 3/8"D.

D **Sliding Door Edge Pull.** Automatically returns lever flush with plate. Mounting hardware included.

E **Magnetic Catches.** Self aligning magnet for maximum pull. Mounting hardware included.

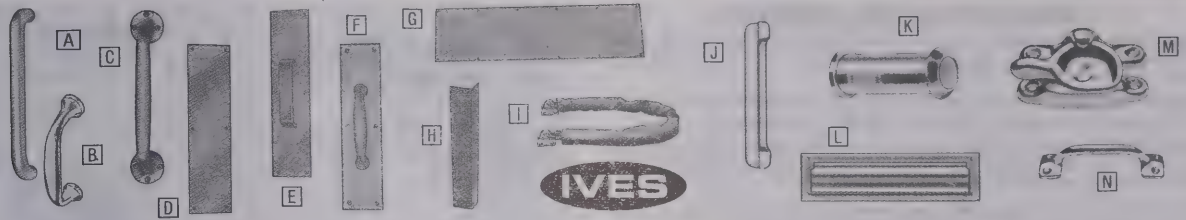
F **Adjustable Ball Catches.** For jamb installations. Adjustable door clearance and holding strength. Face plate dimensions: 2⅛H x 1"W; bore dimensions: 7/8 x 1¼". No. 4JG52 strike dimensions: 2⅛ x 1¹⁄₁₆", lip is 9/16" to center. Nos. 4JG53 and 4JG54 strike dimensions: 2⅛ x 1⅜", lip is 7/8" to center. Mounting hardware included.

G **Heavy-Duty Roller Catch.** Positive latching action, quiet nylon roller, adjustable tension. Face plate dimensions: 2¼ x 7/8"; bore dimensions: 3/4 x 1¾"; strike dimensions: 2¼ x 1⅝"; lip is 1³⁄₁₆" to center.Mounting hardware included.

H **Coat and Hat Hook.** Projection from wall is 3".

I **Wardrobe Hook.** Projection from wall is 1¹¹⁄₁₆".

J **Double Wardrobe Hook.** Projection from wall is 1⅛".



K **Ceiling Hook.** Projection from ceiling is 2¼".

L thru N **Fixed Handrail Brackets.** Mounting hardware included. Screws with No. 4JH01, screws and toggle bolt for hollow walls with No. 4JH02, screws and expansion shield for solid walls with Nos. 4JH03 and 4JH04. 4JH01 base to center of rail is 2⁷⁄₁₆". All others are 3⅛" base to center of rail.

O **Adjustable Handrail Bracket.** Mounting hardware included. Adjustable distance from wall, base to center rail, 1¾" to 2¼".

# MOWERS AND GAS CANS

## MULCHING LAWN MOWERS

**Dual/Triple Care System**—mulching baffle and side discharge grass deflector included on Nos. 3LC42 and 4LT46. 3.1 bushel rear bagging system also included on No. 3LC45.

**Heavy Steel Deck**—high vacuum 12-gauge deck and mulching blade lifts grass for cleaner, smoother cut and sure bagging.

**Zone Safety System**—extended rope start and handle safety control meet or exceed Consumer Product Safety Commission (CSPC) blade safety standards.

**Heavy-Duty Easy Folding Handles**—powder-coated with foam grip. Comes fully assembled in box; no set-up necessary.

**Briggs and Stratton Quantum Engine**—solid-state ignition, easy-pull recoil starter. No. 3LC45 has a 6.0 HP B&S Quantum I/C engine with cast iron sleeves; No. 4LT46 has 6.5 HP Briggs & Stratton Intek OHV engine.

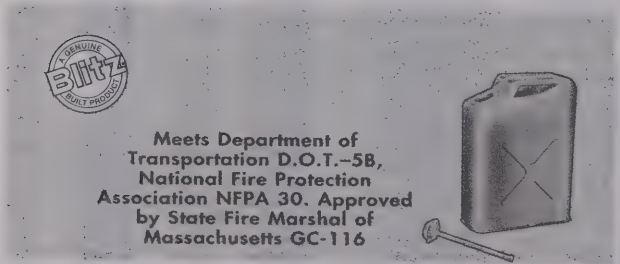
**Large 8 x 2" Ball Bearing Wheels**—includes hub caps and 9-position manual height adjustment from 1¼ to 3¼". Nos. 3LC45 has single lever height adjustment. No. 4LT46 has 14 x 2" ball bearing rear wheels.

**Optional 1.6 Bushel Grass Catcher**—for No. 3LC42, sold separately below.

**6-Speed Shift-on-the-Go Transmission**—No. 3LC45 has smooth differential action speed changes to handle varying terrain and grass conditions. Yard-Man by MTD brand.

### OPTIONAL BAG FOR YARD-MAN MOWERS

Side grass catcher for No. 3LC42 and other Yard-Man side-discharge mowers. Steel rod frame construction with 1.6 bushel black polyester bag. Meets ANSI nail test standards. Yard-Man by MTD brand (OEM-190-106).



**No. 3LC48.** Shpg. wt. 8.0 lbs. List $72.00. Each ..... **$65.00▲**

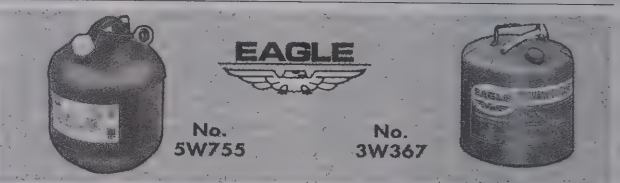
## HEAVY-DUTY JEEP STYLE GAS CAN



### 5 GALLON GAS CAN WITH SPOUT

**Bright red can** has a space-saving design for easy handling, stacking and storage. Preferred by construction contractors and landscapers. Blitz brand (11070S).

- **Includes 3/4" diameter, 12" flexible metal screw type spout**
- **Hand-crafted heavy-gauge steel**
- **Safely handles flammable liquids**
- **Leak-resistant, threaded screw type cap has built-in air vent—when cap is in place, vent hole is open for smooth pouring**

**No. 3ZC41.** Shpg. wt. 9.6 lbs. List $39.59. Each ..... **$36.80**
Lots 4 ..... **$33.59**

## POLYETHYLENE GAS CANS

High-density polyethylene cans are impact-resistant, non-rusting, and non-corrosive. Dome-shaped rounded body. Finger groove in bottom for easier pouring. Vent cap and flexible spout with built-in screen store on the can. **Not for diesel fuel.**

| Can Capacity (Gal.) | Eagle Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |

# LEAF BLOWERS

## PROFESSIONAL LEAF BLOWERS

### A LEAF BLOWER

**Powerful hand-held blower** provides blowing power comparable to small back-pack units. The 24cc, 1.0 HP engine delivers a 134 MPH blast of air. Suited for blowing leaves, yard clippings, dirt, debris and light snow. Long-life engine has two piston rings and chrome plated cylinder. Tanaka brand (THB-2500).

### B BACKPACK BLOWER

**Powerful 2.3 HP blower** delivers steady stream of air blowing at 218 MPH measured at end of tube. Use to clear parking lots, grounds, stadiums, and arenas. Anti-vibe system provides added comfort. Heavy-duty air filter prolongs engine life. Interlocked, swiveling blowing tube allows operator to clean hard-to-reach angles without shifting body position. Large capacity fuel tank provides longer operating time. Only 68dB at 3/4 throttle setting. Tanaka brand (TBL-505).

| Key | Blower Type | Engine Displacement | HP | Fuel Tank Cap. (fl. oz.) | Net Wt. | Air Flow/CFM | Air Speed MPH | | Stock No. | List | Each | | Shpg. Wt. |

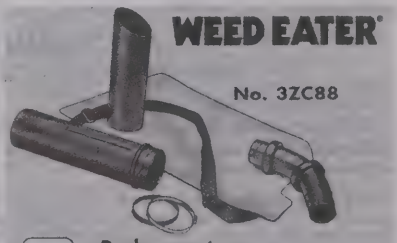
## LEAF BLOWERS/VACUUMS

### MULCHING VAC/LEAF BLOWER

**Lightweight blower, vacuum, and mulcher** in one unit. Quiet-running 22cc engine, with 165 MPH maximum air velocity. Vacuum attachment (included) mulches leaves and yard debris into compost-ready material—10:1 mulching reduction. Easily converts from blower to vacuum. Poulan Weed Eater brand (BV1650).



**No. 4JT89.** Shpg. wt. 11.0 lbs. List ..... $172.00.
Each ..... $155.00

### ELECTRIC LEAF BLOWER

**8.5 amp motor. 125 mph maximum air velocity.** 320 cubic feet of air per minute. 2-Speed airflow switch. Built-in cord retainer. Double insulated. UL Listed (E99077). Accepts optional vacuum kit No. 3ZC88. Weed Eater brand (2540).

**No. 3ZC87.** Electric Leaf Blower. Shpg. wt. 7.9 lbs. List $58.85. Each ..... $52.95

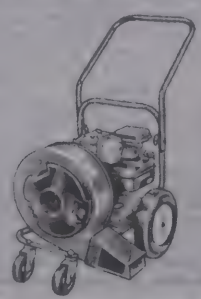
## LEAF BLOWER VACUUM KIT

Replacement Parts Available 1-800-323-0620

**Vacuum Kit** converts leaf blower into vacuum for leaves and debris. For use on Electric Leaf Blower No. 3ZC87. Includes vac bag, shoulder strap, and vacuum tubes. Weed Eater brand (VA-1905).

**No. 3ZC88.** Vacuum Kit.. Shpg. wt. 4.0 lbs.
List ..... $47.75.
Each ..... $42.95

## PROFESSIONAL OUTDOOR LEAF BLOWER



- **Delivers 200 MPH airstream**
- **Walk-behind model covers large areas**
- **Ideal for walks, parking lots and curbs**

**Produces powerful airstream** to push leaves and debris into piles for easy pickup. Used on lawns, parking lots, driveways and construction sites. Briggs & Stratton 5 HP, 4-cycle engine with recoil start. Adjustable chute deflector allows for controlled direction of the airflow. Full-rotation of the front wheels allows for easy maneuverability. 12 x 3" rear wheels allow for easy pushing. Engine-mounted throttle. Durable 1¼" diameter steel handle folds for easy storage. Red and black enamel finish. Yard Machines by MTD brand (24A-652C000).

**No. 3Z811.** Professional Leaf Blower. Shpg. wt. 119.0 lbs.
List ..... $505.00.
Each ..... $479.00▲

# LINE TRIMMERS AND BRUSH CUTTERS

## [A] AUTO-START™ GRASS TRIMMER/BRUSH CUTTER

- **Built-in battery and self-charging system**
- **Fully automatic BRAIN® trimmer head**
- **Bearing-supported 7mm solid steel drive shaft**
- **Removeable, rechargeable battery**

One-touch electric starting system eliminates the need for pull-starts. Auto-Start™ method provides instant starts at the touch of a button, while the BRAIN® trimmer head senses when more line is needed and feeds out the right amount of line. Bearing-supported 7mm solid steel drive shaft provides smooth, efficient power transfer from the engine to the trimmer head. Features a power-to-weight ratio that allows for the most amount of work to be done with the least amount of fatigue. Tanaka brand (AST-210).

## [B] CURVED SHAFT LINE TRIMMER

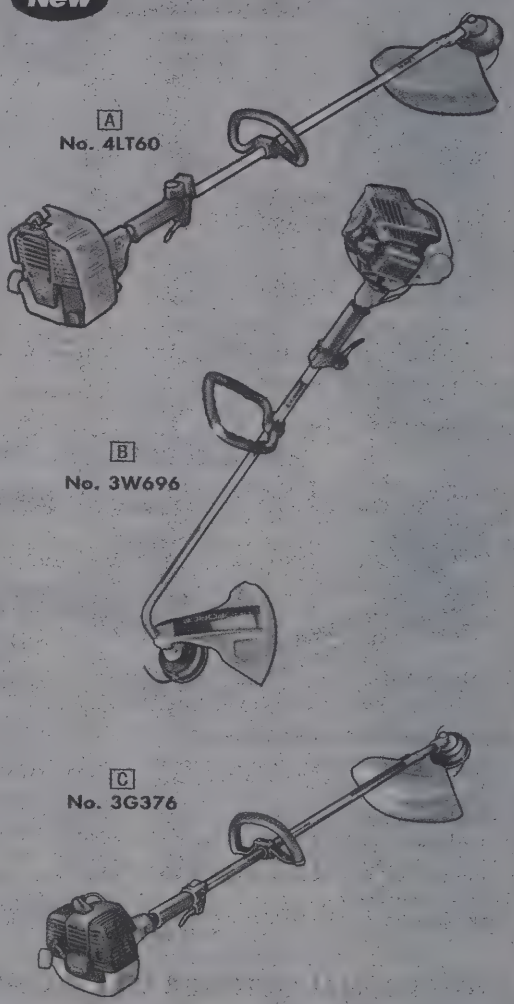
- **Lightweight, yet powerful**
- **Ergonomic curved shaft**
- **"The Brain" automatic line feed head**

**Features heavy-duty engine components** including anti-vibration technology and transistorized electronic ignition system. 1 HP, 2-cycle engine provides years of dependable performance. Lightweight model is ideal for cutting grass and weeds. Heavy-duty flex-cable drive is housed in curved sh<P>aft for exceptional control. "Brain" head auto-line trimmer head is standard as is a tool kit. Unit is not designed to use a brush cutting blade. Tanaka brand (TBC-4000).

## [C] STRAIGHT TRIMMER LINE TRIMMER/BRUSH CUTTER

- **Commercial duty**
- **Optional blade (No. 1R488 available below)**
- **The BRAIN™ automatic line feed head**
- **Sound Reduction System**

**Industrial/commercial-duty unit.** Use for trimming and edging around sidewalks, driveways, buildings, and bushes. Provides durable performance, ease of operation, and safety.



**High-torque 2-cycle air-cooled engine** features extended-life internal engine components, anti-vibration technology, high performance fuel and electronic ignition systems. Easy auto-rewind starting and servicability. 1.2 HP high-torque engine has two piston rings to maintain compression, reduces blow-by; large crank shaft ball bearings, needle bearings in heavy-duty forged connecting rod, and etched chrome plated cylinder. Sound reduction system reduces noise up to 40%.

**Heavy-duty engine mounted centrifugal clutch** transmits maximum power to gear-driven solid steel straight shaft, supported by five bearings. Generates approximately 20% more power than many competitive models. Other features include wide-radius safety guard, spark-arrester muffler, tool kit. The BRAIN™ line trimmer head automatically feeds proper amount of line; no need to pull out new line or bang head on ground to release more line. Change to optional metal blade No. 1R488 and clear fields of heavy brush and saplings up to 5" thick. Tanaka brand (TBC-250).

# LINE TRIMMERS/BRUSH CUTTERS AND HEDGE TRIMMER

**Weed Eater Gas Powered Line Trimmers** feature exclusive Tap-N-Go® line advance that lets the operator choose the length of line being fed to the cutting head. Use 0.080" cutting line. Totally enclosed 30cc engine (except No. 4JT90) with anti-vibration system. Heavy-duty Precision Clutch™. Weed Eater brand.

### A TRIMMER WITH BLADE

Powerful 24cc engine for trimming heavier grasses and weeds. 18" cutting path and ComforTouch anti-vibe handle for added comfort. Tap-N-Go line advance and heavy-duty precision clutch for quick, easy starts. Barrier handlebar, metal shield, padded shoulder strap, and 8" weed blade included.

### B WEED EATER XT LINE TRIMMER

Lightweight trimmer handles multiple jobs. 17" cutting path with a 48" curved shaft length. Converts from a trimmer to an edger with a push of a button. Features an easy-to-adjust handle. Powerful 24cc engine cuts with sturdy 0.080" line. Quick-snap spool replacement. Weed Eater brand.

### C YARD PRO BRUSH CUTTER

Sweeping 18" wide cutting path. 57" straight shaft length. 30cc cycle engine with heavy-duty automatic clutch makes for easier starting and operation. Comes with an 8" saw tooth brush blade, bull horn-style handle and shoulder strap for easy manuevering. Tap-N-Go® line advance keeps you working, not fussing.

### REPLACEMENT WOUND SPOOL FOR WEED EATER TRIMMERS

**No. 4LT59. Tap-N-Go® Replacement Wound Spool** for No. 4LT58 and 4LT58 Weed Eater trimmer/edgers. 40 ft. spool of 0.080" dia. line.

**No. 5W943 Tap-N-Go® Replacement Wound Spool.** 40 ft. spool of 0.80" dia. line.

### 400 FT. COIL PACK 0.080" NYLON REPLACEMENT LINE

**No. 5W945.** 400 ft. coil of 0.080" dia. universal nylon replacement line. Can be used on all Weed Eater brand line trimmers and any line trimmers using 0.080" dia. nylon replacement line. Strong, durable construction.

## HEDGE TRIMMER

- **Sound reduction system**
- **180° quick twist handle**
- **Professional duty**

**Portable and lightweight,** this design is well-suited for cutting hedges, bushes, vines, and small trees. It features Tanaka's Sound Reduction System™ which provides a quieter running engine. QuickTwist System enables the engine and blades to pivot within a 180° span, while the rear handle remains in an upright and comfortable position. Heavy-duty anti-vibration system greatly reduces fatigue. Unit has a reliable 1 HP engine with transistorized electronic ignition, diaphragm carburetion, centrifugal clutch system, spark arrest muffler, and 26" heavy-duty dual reciprocating blade movement. Tanaka brand (THT-2120).

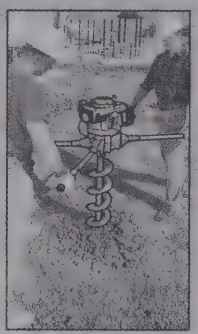
# POST HOLE DIGGERS AND EARTH AUGERS



## GAS-DRIVEN POST HOLE DIGGERS

A

No. 2Z014 (Shown with auger)

New

B

No. 4LV57 (Shown with auger)

General EQUIPMENT COMPANY

**GENERAL 2-YEAR LIMITED WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- **Ergonomic design for ease of operation**
- **Powerful, yet lightweight for extra control**

**Portable hole diggers** are well suited for light and medium-duty drilling projects such as fence posts, mail boxes, tree planting. Precision manufactured tolerances, heat treated shafts and gears, and over-sized bearings provide reliable long-term operation. Ergonomically designed handles enhance control by reducing operator fatigue. 2-cycle, air-cooled engines and spark arresting mufflers. Automatic, all-metal centrifugal clutches. Heavy-duty spur gear transmission. Sealed ball bearing output shaft. Transmissions are grease lubricated. **Augers not included.**

**Earth augers for No. 2Z014 and 2Z677 hole diggers sold separately, see Earth Augers listing below.** Augers dig down as deep as 30". By adding 15" auger extension No. 2Z683, a depth of 45" is possible. Depending on model, use 2 to 12" augers. Takes a 3-jaw chuck, No. 3M526, which converts it to a gas-powered drill.

### A SINGLE OPERATOR

Unique "Butterfly" operator handle reduces fatigue and provides greater control. Powerful 33cc, 1.6HP Tecumseh 2-cycle engine, and precision gear transmission. Accepts standard 30" length augers from 2 to 8" diameter.

20 oz. capacity fuel tank. 47 ft-lbs. maximum drilling torque. 1" diameter output shaft, spring return, finger grip throttle. General brand.

### B DUAL OPERATOR

- **Fully enclosed spur gear transmission**
- **All-metal centrifugal clutch with fully enclosed transmission**
- **Comfort-Flex composite material operator handle**
- **Magura® Twist grip throttle control**
- **1⅜" hexagon auger drive connection**

Gas-driven, 4-cycle post hole digger digs holes for fences, signs quickly and safely. Clutch internally mounted within the transmission, no external belts or chains. Gears lubricated constantly by transmission oil, extensding life and service of clutch. Mugura Twist grip throttle helps reduces stress and fatigue, increases control over machine. Hexagonal-shaped auger drive connection has longer life span over traditional square and round drive connections. General brand.

| Key | Digger Type | HP | Type | Engine Manufacturer | General Model | Stock No. | Each | Shpg. Wt. |

## PUSH TYPE VACUUMS

Parker®

No. 3Z803 5 HP

**The Parker VAC-35®** is a powerful, easy to operate walk-behind vacuum, well suited for cleaning up litter, debris, waste and leaf covered grounds.

**Aerodynamic design** for maximum airflow of 2,000 CFM which exceeds 70 MPH at the 30" wide intake housing. Nonsparking aluminum/magnesium impeller in steel-lined housing complete with anti-wrap protection. High-tech plastic technology reduces vibration, noise levels, and weight. Spin-Pak® safety deflector and debris packer protects operator while packing up to 19% more bulk material into 7.2 bushel mildew-resistant felt collector bag. Heavy gauge steel handles, chassis, and axles for maximum durability. Fully pneumatic 5 x 14" cleated tires and 3" dual swivel casters for easy maneuverability.

**No. 3Z803, 5 HP.** Briggs & Stratton 5 HP, 4-cycle engine with recoil starter, float type carburetor, easy access oil drain, handle mounted throttle control and shut-off. 3 quart fuel tank. Shipped without oil.

**No. 3Z804, 8 HP.** Kohler Magnum® cast-iron, 8 HP, 4-cycle engine. Added horsepower ensures big-job efficiency, longer life, and maintenance-free service. Equipped with recoil starter, engine throttle control and shut-off in easy reach of operator. 1¼ gallon fuel tank. Shipped without oil.

**Replacement Collector Bags.** Mildew-protected synthetic felt collector bag with 54" brass zipper.

## INDOOR/OUTDOOR VACUUM

Clarke

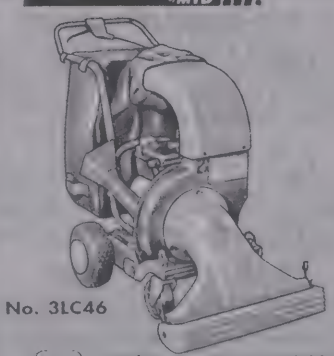
No. 7A143

**A powerful, easy-to-operate walk-behind vacuum** for cleaning up litter, debris, waste, leaves and sticks, both in and outdoors. Large adjustable up/down front swivel casters and 30" cleaning path make vacuum an efficient method for large area cleaning.

**Powered by industrial 6 HP Tecumseh engine.** Heavy-duty impeller picks up bottles, cans, sticks, leaves, etc. Trap door allows large debris to pass into the vacuum chamber. Nonrusting fan housing allows easy passage of debris to bag with a side zipper for easy disposal. Large 11 cu-ft. collector bag and large bicycle-type wheels.

Clarke brand (LV-30).

**No. 7A143.** Indoor/Outdoor Vacuum. Shpg. wt. 202.0 lbs. List $2105.00. Each .....$2000.00



## SELF-PROPELLED CHIPPER/SHREDDER/VACUUM

**Chute takes branches up to 2" diameter.** Shredder reduces yard debris 10:1 and greater. 24" vacuum draws 1200 CFM at 144 MPH. Features 5.5HP Tecumseh OHV engine with solid-state ignition, easy-pull recoil starter and 3-quart fuel tank. Rear drive transmission system connects engine to permanently lubricated direct chain drive. Lever control on handle. Welded steel frame, hardened cast steel self-cleaning screen, and thermoplastic vacuum nozzle.

**Adjustable vacuum intake height,** from 1/4 to 4¾". Lockable 6" front caster wheels provide easy maneuvering—anchors unit when on an incline. Features 10 x 3½" pneumatic tires, 3 bushel felt-lined nylon mesh bag for discarding mulch. Safety goggles and engine oil included. Optional 10-ft. hose with handle kit sold separately below. Yard-Man by MTD brand (24A-203B401).

**No. 3LC46.** Shpg. wt. 184.0 lbs. List $824.00. Each .....$699.00▲

YARD-MAN by MTD

No. 3LC46

### OPTIONAL HOSE KIT FOR CHIPPER/SHREDDER/VACUUM

**For No. 3LC46 and other Yard-Man self-propelled chipper/shredder/vacuums.** Flexible 4" dia. 10 ft. long hose, convenient handle and tapered nozzle to extend vacuum reach under decks, hedges and porches. Mounts easily to blower without tools. Yard-Man by MTD brand (OEM-290-005).

**No. 3LC49.** Shpg. wt. 12.0 lbs. List $90.00. Each .....$85.00▲

(▲)Net prices, not subject to discounts.

# GARDEN TRACTOR ATTACHMENTS

### A 42" TOW HEAVY-DUTY LAWN SWEEPER

Tow-behind model makes quick work of just about any pick-up task. Versatile enough for big and small jobs alike. Design makes dumping of debris easy. 12.0 cu-ft. hopper capacity. 4 - 12" diameter brush; 4.5:1 brush-to-wheel ratio. Infinite height adjuster, with semi-pneumatic tires.

### B HEAVY-DUTY BROADCAST SPREADER

Spreads granulated materials like seed, fertilizer, herbicide, and ice melters. Heavy gauge steel tubing frame with rust-proof polypropylene hopper and impeller. Approx. 175 lbs. granulated fertilizer capacity covering approx. 40,000 sq. ft. 10-12 ft. average spread width. Pneumatic tires, tow hitch.

### C COMMERCIAL TOW BROADCAST SPREADER

Heavy-duty broadcast spreader with hopper screen. Double stainless steel shut off plates allow narrow-to-wide dispersal pattern. 4-20 ft. dispersal with 50 lb. capacity poly hopper. 13 x 4" studded pneumatic tires. 3-way adjustable handle with positive On/Off control.

### D POLY LAWN ROLLER—PUSH OR TOW

Use for grooming lawns. Get rid of uneven ground caused from frost heaves or ground hogs and moles. Pack down newly seeded lawns or new sod. Roller measures 18 x 24"W. Filled roller weighs up to 250 lbs.

### E HEAVY-DUTY ROLLER

Use for grooming lawn. Measures 24" dia. x 36" wide. Heavy-gauge welded steel construction. 1" ID bearings. Standard pin type tow hitch with 17/32" hole. Fill with water for added weight. Filled roller weighs up to 640 lbs.

### F LAWN AERATOR

40" wide with 3" coring depth; approx. 3/4" diameter hole. Plug type, self-cleaning. Improves health and beauty of lawn by increasing oxygen supply to roots. Frame is all-steel, 25mm axle with ball bearings.

### G TINE-COMBO DE-THATCHER

Gently brings matted layers of thatch and large clippings to the surface for easy removal for a healthier lawn. Use with No. 5Z325 Lawn Aerator to attach for combination Thatcher/Aerator.

### H TINE DETHATCHER

Universal mount for tow-behind units. Improves health and beauty of lawn by loosening dead grass/thatch. All-steel frame, #10 spring steel tines, 3/16" diameter, 20 teeth.

### I 15 GALLON SPRAYER

Easy-grip handgun hose for efficient operation and control of liquid spray direction. Use for spot weed control or massive fertilization projects. 15 gallon capacity; 80" spray width with the boom; 1.4 GPM output. 12V/7A pump with fuse.

# BROADCAST SPREADERS

## [A] LIGHT-DUTY BROADCAST SPREADER

- 75-120 lb. Load Bearing, 1,900 cu-in. poly hopper
- 8-10 ft. 180° dispersal • 10" heavy-duty poly wheels
- Large, permanently lubricated, enclosed gears
- Plated steel axle and handle with nylon brushes
- Composite material non-rusting shutoff plate
- EarthWay brand (2050SU)

**No. 4HD56**. Shpg. wt. 14.0 lbs. List $72.05. Each ..... **$64.85**

## [B] HEAVY-DUTY COMMERCIAL BROADCAST SPREADER WITH HOPPER SCREEN

- 4 to 20 Ft. Dispersal with 50 lb. capacity poly hopper
- Super-duty gearbox • 13 x 4" pneumatic tires
- 3-way adjustable handle with positive On and Off control
- Double stainless steel shut off plates—allows narrow to wide dispersal pattern
- EarthWay brand (2150)

**No. 4HD57**. Shpg. wt. 26.0 lbs. List $180.75. Each ..... **$162.75**

## [C] PROFESSIONAL-DUTY BROADCAST SPREADER

- Rugged stainless steel frame, axle; high-impact molded hopper—100 lb. capacity • Super-duty gear box
- Ergonomic 3-way adjustable handle • With screen
- 4 greasable ball bearings • 13 x 5" Jumbo Turf Tires
- EarthWay brand (C24SS)

**No. 4HD62**. Shpg. wt. 33.0 lbs. List $462.30. Each ..... **$416.25**

## [D] PROFESSIONAL-DUTY BROADCAST SPREADER

- Polypropylene hopper and impeller for rust resistance; frame is constructed of heavy gauge steel tubing
- Flow handles located on handle
- 14" x 4" pneumatic tires for easy handling
- Vinyl hopper cover keeps contents dry and free of debris
- Easy-to-reach positive On-Off switch, calibrated flow rate control plate and guidelines located on handle of unit
- Agri-Fab brand (45-02101)

Spreads up to 125 lbs. of heavy-duty materials such as fertilizer, lime, ice melting compounds, and rock salt in a path that ranges from 10 to 12 feet, depending on forward speed, material, and flow setting.

**No. 3ZC22**. Shpg. wt. 45.0 lbs. List $196.00. Each ..... **$186.25**

## [E] SHOULDER BROADCAST SPREADER

- 25 lb. capacity with 8 to 16 ft. broadcast distribution
- Zippered cotton canvas bag has comfortable adjustable shoulder strap; molded handle for safety and stability
- Enclosed cast zinc gears with tough nylon bearings; oscillating shuttle to prevent clumping
- Hopper design assures all material will be broadcast
- Conveniently located flow handle with infinite settings
- Standing leg keeps spreader upright while filling
- EarthWay brand (2700A)

Lightweight shoulder spreader easily handles granular materials such as ice melts, fertilizers, seed and feed, delivers a very even broadcast.

**No. 1D886**. Shpg. wt. 5.0 lbs. List $43.78. Each ..... **$39.45**

## [F] PROFESSIONAL MANUAL SHOULDER-HELD BROADCAST SPREADER

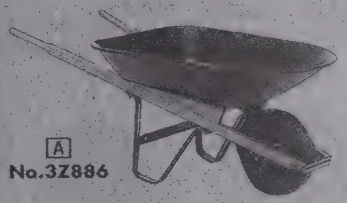
- 50 lb. Capacity poly hopper with zinc-plated tubular steel
- 3-Hole drop with twin-flow control adjusting plates
- 3-Position handle • EarthWay brand (3100)

**No. 4HD59**. Shpg. wt. 9.0 lbs. List $99.86. Each ..... **$89.90**

## [G] 20" DROP PATTERN SPREADER

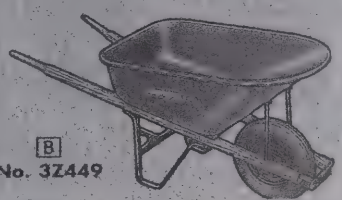
- Lightweight poly hopper holds up to 60 lb. capacity
- 10" Poly wheels and painted tubular steel frame
- Controls high on handle for operator ease
- Composite non-rusting shut off
- EarthWay brand (7300SU)

**No. 4HD61**. Shpg. wt. 12.0 lbs. List $61.75. Each ..... **$51.50**



## [H] SALT DEFLECTOR KIT

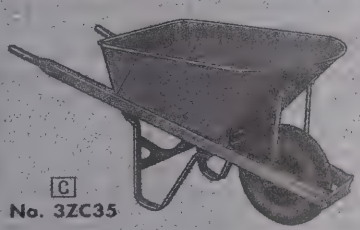
- Fits Nos. 4HD57, 4HD62, and 4HD58 (sold on page 2670)
- Converts lawn spreader into sidewalk or driveway salt spreader
- Heavy-duty plates not affected by salt or calcium chloride
- EarthWay brand (60166)



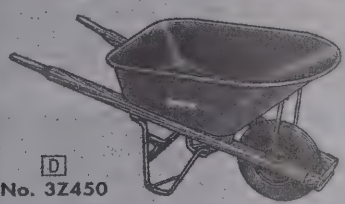
**No. 4HD60**. Shpg. wt. 2.0 lbs. List $42.18. Each ..... **$38.00**

# WHEELBARROWS AND MORTAR PANS

TRUE TEMPER



A
No.3Z886



B
No. 3Z449

Jackson

C
No. 3ZC35

D
No. 3Z450

## WHEELBARROWS

Well-suited for a variety of uses. Designed to dump or pour material quickly, efficiently and cleanly. Hardwood handles are extra strong and smooth. Undercarriage provides maximum strength, stability and lateral support. Heavy-duty wheel guard prevents sliding and slipping.

### A WHEELBARROW

- **4 cu. ft. heap capacity**
- **20-gauge steel construction with long-lasting finish**
- **13 x 4" pneumatic tire**
- **Lightweight, well-suited for a variety of lawn and garden applications**

### B CONTRACTOR WHEELBARROW

- **Drawn trays are pressed from 18-gauge steel**
- **1-pc. solid wood lacquered handles**
- **Ball bearings**
- **Long lasting, chip-resistant finish**
- **16 x 4" pneumatic, 2-ply rated tire**
- **Large curl for additional strength**
- **Well-suited for daily use in construction, landscaping, etc.**
- **6 cu. ft. heap capacity**

### HEAVY-DUTY CONTRACTOR WHEELBARROWS

- **16-gauge steel construction stand up years of daily use under demanding construction usage**
- **Large full tray provides maximum tray strength**
- **16 x 4" pneumatic, 2-ply rated tires**
- **Long lasting, chip-resistant finish**
- **Cross supports and leg brace for extra strength and stability**
- **Provide excellent balance to prevent accidental tipping and spillage**

C **No. 3ZC35** 5 cu. ft. heap capacity. Extra strong to handle concrete. Folded seamless tray combines 3 thicknesses of 16-gauge steel at each of the corners. Wire reinforced rim for extra strength. 1-pc. solid wood lacquered handles. Ball bearings.

D **No. 3Z450** 6 cu. ft. heap capacity. Drawn trays are pressed from 18-gauge steel. Large full curl for maximum strength. 1-pc. solid wood lacquered handles. Ball bearings.

| Key | Heap Capacity* Cu. Ft. | Tray Dimensions (In.) L | W | D | Tray Finish | Brand | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |

# ELECTRONIC INSECT KILLERS

## RESIDENTIAL LANTERN STYLE INSECT KILLERS

**Flowtron Electronic Insect Killers safely destroy a variety of light-sensitive flying insects.** No chemicals, sprays or poisons that are harmful to the environment or to which insects can become immune. Easy to install. Simply mount and plug in. Operate on 120 VAC. For outdoor use only.

**Long lasting, high intensity black light** provides maximum luring power to kill mosquitoes, moths, millers, gnats, flies, and mites. Electronically charged, self-cleaning vertical rod grid disposes of insects. Outer enclosure prevents harm to humans, pets, and wildlife, yet it allows bugs to fly through. Weatherproof Lexan top and body. Heavy-duty transformer provides reliable operation year after year. Killing grid voltage is 5600V at 9 MA. UL Listed (E51021); CSA Certified (LR88967). Meet EPCA standards. Flowtron brand.

**No. 2W545** has a U-shaped 40 watt black light for luring range up to 1 acre.

**No. 2W579** has two 40 watt U-shaped black lights for luring range of 1½ acres.

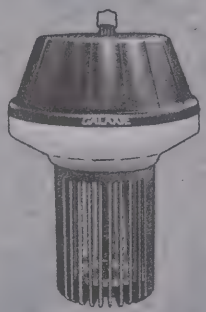
# ELECTRONIC BUG KILLER AND ACCESSORIES

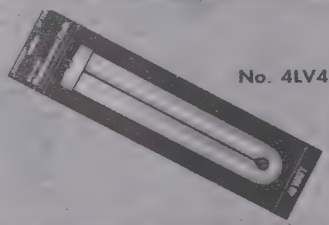


## GALAXIE® VACUUM-ACTION ELECTRONIC INSECT KILLER

- **Sucks in bugs that might not otherwise be destroyed**
- **Covers up to ¾ acre**
- **Rugged construction**
- **Environmentally safe**
- **Easy bulb replacement**

Mosquitoes tend to fly around conventional bug killers and avoid capture. This space-age axial fan develops 120 cu-ft. of air which passes through louvers to produce an air flow pattern that actually draw's mosquitoes and other flying insects into the unit's 5600 Volt killing grid. A patented non-clogging feature ensures clean, quiet, and effective kills. The tough polycarbonate housing won't rust, crack or fade. The outer enclosure protects children, pets, birds, and other wildlife from danger. There are no fogs, poisons, or chemicals to harm the environment. The large, 8" round diameter ultraviolet bulb has 30 watts of luring power and is long-lasting, yet easy to replace. Measures 10¾W x 14¼H x 10¾"D. Flowtron® brand (GAL-35).

**New No. 4LV50.** Shpg. wt. 7.2 lbs.
Each ..... $69.95



FLOWTRON® New

FLOWTRON®

New

No. 4LV49

## WALL BRACKET

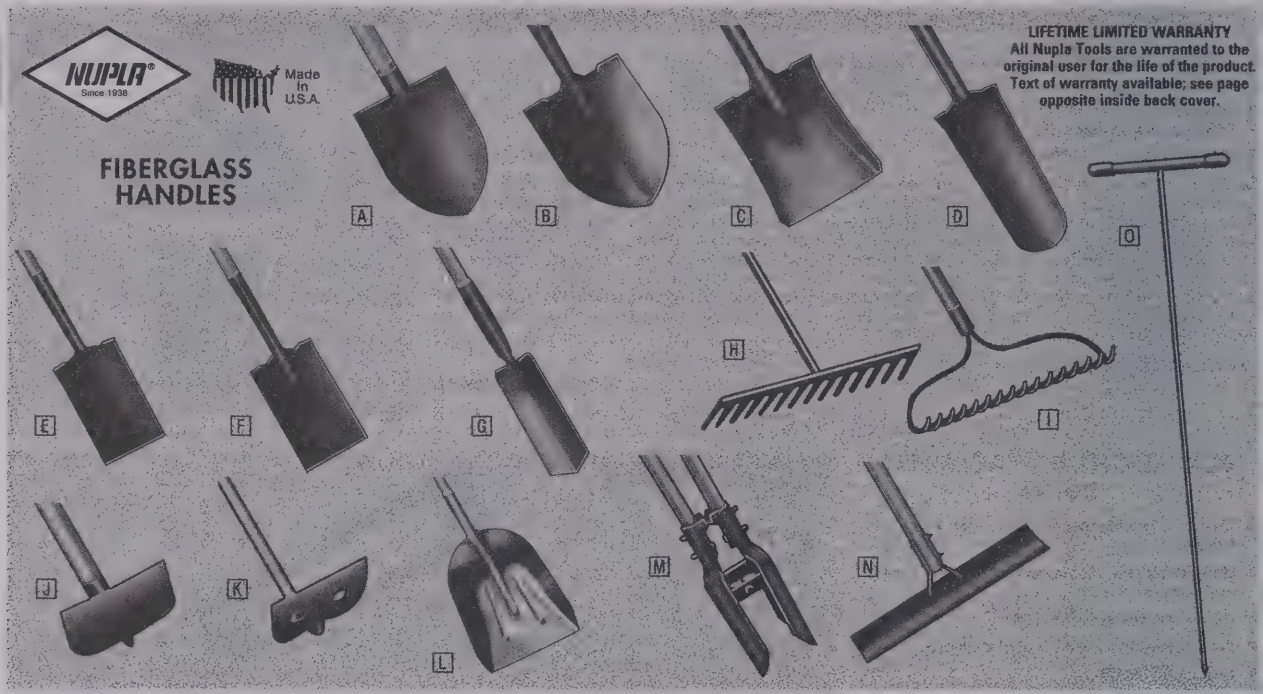
- **Weatherproof**
- **Durable, welded 1" steel construction**
- **Locking feature helps revent theft**

1" diameter steel tubing with a welded steel scroll features a unique locking feature that makes it hard to steal. Flowtron brand (SB300A).

**New No. 4LV52.** Shpg. wt. 0.7 lbs.
Each ..... $5.95

## MOSQUITO ATTRACTANT

- **Makes insect killer more effective in killing certain mosquitos and biting insects**
- **Effective for up to 400 hours**
- **Dimensions: 7½H x 5¼W x ½"D**
- **Flowtron brand (MA-1000)**



**New No. 4LV51.** Shpg. wt. 0.1 lbs.
Each ..... $4.95

## SUPPLEMENTAL FLY LURE

- **Attaches right onto the outer screen to provide 24 hours luring power**
- **Effective for 30 days**
- **Dimensions: 7½H x 5¼W x ½"D**
- **Flowtron brand (FA-5000)**

**New No. 4LV49.** Shpg. wt. 0.2 lbs.
Each ..... $2.95

# SHOVELS, SPADES, RAKES, HOES, POST HOLE DIGGER, AND SOIL PROBE

## POWER PYLON™

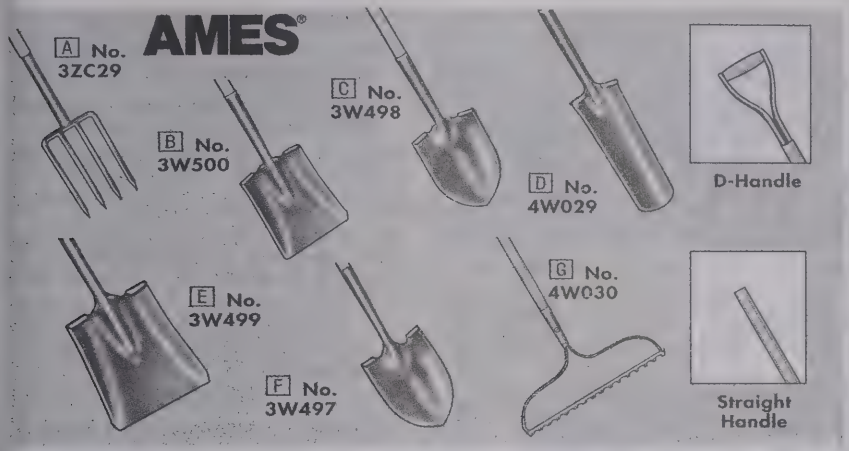
- Features ergonomic handle, full length step, solid back blade with large volume capacity
- Power Pylon one-piece construction eliminates weak link rivets for maximum strength

## REPLACEMENT HANDLE

- No. 3MD34 will fit all shovel blade styles

## E-SERIES®

- Ergonomic design for reduced fatigue
- Polypropylene outer jacket resists U.V. deterioration and protects user from splinters
- Resist industrial chemicals
- Easily cleaned of concrete, tar, etc.
- 100% weather-resistant



## PRO-TEC CLASSIC®

- Vinyl sleeve completely encapsulates fiberglass core eliminating splintering and abrasion
- Resist industrial chemicals and U.V. deterioration
- Easily cleaned of concrete, tar, etc.
- 100% weather-resistant

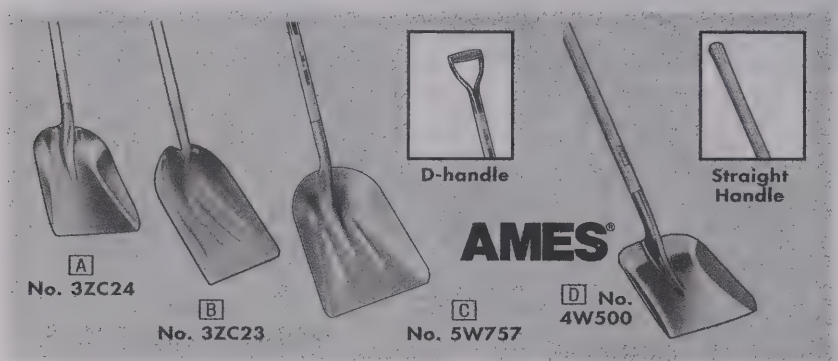
# POST HOLE DIGGERS, SCOOPS, AND RAKES



## POST HOLE DIGGERS

- **Make quick work of digging into hard, heavy gravel soils**
- **Tough, high carbon blades are bolted to 48" long hardwood handles**

**Heavy-Duty Hercules Post Hole Digger No. 3KV60** is built for extremely hard soils. Blades are 6¼" apart when fully opened. Blades riveted to steel frames.

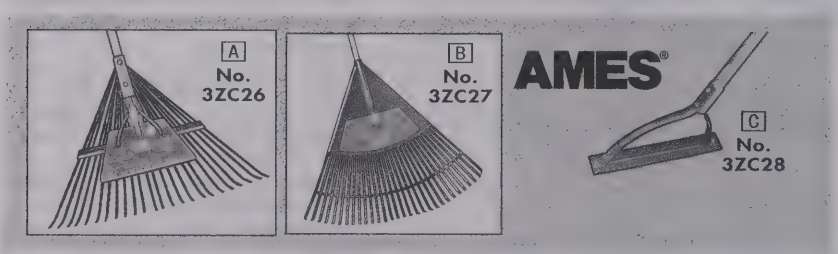
**Kodiak® General Purpose Atlas Post Hole Digger No. 3KV61** is built for general purpose digging. Blades are 5¾" apart when fully opened.

| Description | Distance Between Blade Tips (In.) | Handle Length (In.) | Ames Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **Heavy-Duty Hercules** | 6¼ | 48 | 17-061 | **3KV60** | $69.90 | **$41.95** | 11.0 |
| **General Purpose Atlas** | 5¾ | 48 | 17-057 | **3KV61** | 55.10 | **30.95** | 8.3 |

## SCOOPS

- **Excellent for handling larger loads of grain, feed, snow, dirt, coal, etc.**
- **Tough northern ash wood handles for extra strength and perfect balance**
- **Exclusive "Armor D" handle design completely encases a wooden "D" in the handle for maximum strength on Nos. 3ZC24 and 5W757**
- **Power "D" handle on No. 3ZC23**

**No. 3ZC24 #2 Eastern Pattern Steel Scoop** has streamlined, narrower blade.



**No. 3ZC23 #12 Grain Hog® Poly Scoop** has wide, ribbed blade for large loads. Made of durable poly for lightweight and corrosion resistance.

**No. 5W757 #12 Aluminum Scoop** has lightweight aluminum blade.

**No. 4W500 Square Street Shovel** combines wide area of a scoop with the control of a long-handled shovel.

| Key | Description | Blade Size (In.) | Handle Length (In.) | Handle Type | Ames Model | Stock No. | List | Each | Shpg. Wt. |

## ICE MELTING COMPOUND

Women-Owned Business

No. 4W973

| COMPARISON CHART FOR ICE MELTER PRODUCTS | Premiere | Salt | Potassium Chloride | Calcium Chloride |
|---|---|---|---|---|
| Metal Corrosion Inhibitors | x | | | |
| Anti-Caking Agents | x | | | |
| Safer on Vegetation | x | | | |
| Colored Product | x | | | |
| Safer on Skin | x | x | x | |
| Safer on Leather | x | x | x | |
| Safer on Carpets & Floors | x | x | x | |
| No Protective Clothing Needed | x | x | x | |
| Freezing Point | -8°F | -5°F | 12°F | -59°F |

- **Industrial strength formulation**
- **Granulated; won't cake up**
- **Helps increase surface traction**
- **Safer de-icer than calcium chloride**
- **Non-toxic when used as directed**

Premiere Ice Melter with its patented inhibitor system containing CMA (Calcium, Magnesium Acetate) offers a fast-acting, safer, effective ice melter. Premiere's de-icing capabilities result in a longer-lasting residual coating action and is effective to –8° F.

**No. 4W973.** 50 lb. cardboard carton.

K No. 5R820 Pruning Saw

L No. 4JV60 Short Cut Pruning Saw

### A 21" BOW SAW

Heavy-duty, welded steel tube. Smooth rust-resistant surface. Easy blade release. Blade rivets are permanently attached. Includes 21" Hard Point hardened Denmark steel blade.

### A 21" BOW SAW BLADE

Hard Point hardened Denmark steel. Replacement for use on 21" bow saws.

### B 30" BOW SAW

Heavy-duty, aggressive "American" style tooth for fast, smooth cutting. Hand guard offers protection from cuts and bruises. Hard point teeth last longer than conventional teeth.

### C 10" BLADE FOLDING SAW

Cuts cleaner with less scarring to trees. Starts and cuts without grabbing or binding. Easy to keep sharp. Blade folds into handle. Push-button safety latch locks blade.

### D ANVIL PRUNER

Power Lever cutting action. Chrome-plated steel handles with cushioned grips. Non-stick coated blade.

### E BY-PASS PRUNER

Non-stick coated steel blade. All-steel construction with chrome-plated body. Cushion grip, enclosed spring, and safety latch. By-Pass design provides a closer, cleaner cut without bruising.

### F GRASS SHEARS

Power Lever self-sharpening cutlery blades. Foam cushioned grips. Right or left hand safety latch. 5" blades. Patented Gator Blade serrations.

### G 8" HEDGE SHEARS

Four-pivot Power Lever action provides 50% more cutting power. 8" steel blades. Serrated top blade holds branches securely during cutting. Tubular steel handles with textured grips.

### H 10" HEDGE SHEARS

Power Lever cutting action, non-stick coated bottom blade. Stainless steel top blade. Serrated blade grasps and holds for improved cutting action. Lightweight fiberglass handles with cushioned grips. 10" blades.

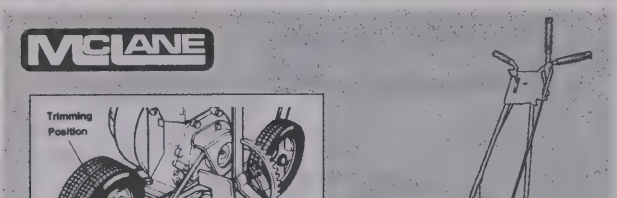
### I ANVIL LOPPER

Power Lever cutting action with non-stick coated carbon steel blade. Northern hardwood handles have 28" overall length. Adjustable/replaceable anvil. 1⅞" cutting capacity.

### J BY-PASS LOPPER

Dual-pivot compound Power Lever cutting action, providing 50% extra power. Focuses power where resistance is the greatest. Non-stick coated carbon steel blade. 2" cutting capacity. Ash handles with cushioned grips.

### K STRAIGHT DOUBLE-EDGE PRUNING SAW



Hardened, tempered blade. One edge has sharp crosscut teeth for finish stroke and barking; other edge has coarse "Champion" teeth for easy sawing in green wood. Natural hardwood handle with lacquered finish.

### L SHORT CUT PRUNING SAW

Fast, efficient cuts in green and wet wood. Razor sharp Short Cut teeth cut on both pull and push stroke. Comfortable hardwood handle. Curved for improved cutting leverage; flared for safety and control. Folds closed for safe, convenient storage.

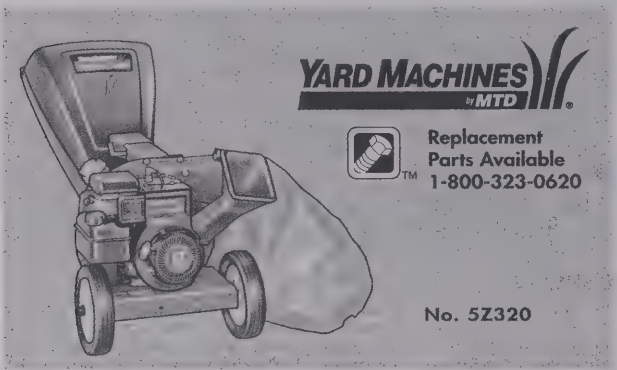
# EDGER/TRIMMER, CHIPPER/SHREDDER, AND POLE PRUNER



## EDGER/TRIMMER

- **Cutter assembly rotates 90° for edge or trimmer function**
- **8 cutting depths**

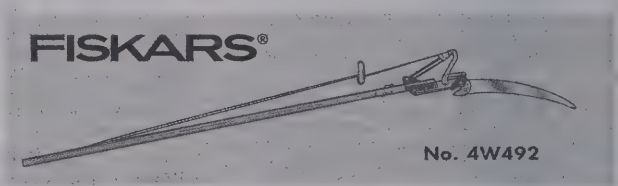
Powered by 3.5 HP Briggs & Stratton engine. Rugged, all-steel construction with 1/4 x 1¼" heavy cross-member frame. 4-wheel design for greater stability and control. Has 8" rim, ball bearing wheels with 2⅛" wide tires. Convenient lever control provides 8 depth selection plus clutch notch. Exclusive safety guard system has semi-enclosed blade guard with wide ricochet shield. Enclosed belt pulley guards. Blade is 2 x 9" spring steel 1075 material. Handle is 3/4" tubular, 14-gauge steel. Finish is powder coated, baked polyester for maximum chip and corrosion resistance. 6-position angle selector. McLane brand (801-3.5RP-CA).

**No. 3Z478.** Professional Edger/Trimmer. Shpg. wt. 64.0 lbs. List $423.95.
Each ..... **$299.00▲**

## CHIPPER/SHREDDER

- **5 HP Briggs & Stratton engine**
- **Handles 2" diameter branches**
- **Nylon bag included**

Powered by a 5 HP Briggs & Stratton engine. Three-stage chipping and shredding reduces leaves, branches, and limbs by a 10:1 ratio. The hopper can be lowered for rake-in shredding. The chipping arm will process branches up to 2" in diameter. Comes with 2.5 bushel nylon mesh bag for clean, convenient collection of discharged mulch. All blades and shredding knives are easily replaceable. Large 10 x 2.5" wheels for easy transport. Yard Machines by MTD brand (24A-462B000).



**No. 5Z320.** Chipper/Shredder. Shpg. wt. 161.0 lbs. List $625.00.
Each ..... **$529.00▲**

(▲) Net prices, not subject to discounts.

## POLE PRUNER

Telescoping fiberglass pole extends 6 to 12 feet and locks into place. Fully assembled 16" adjustable saw blade made of steel. Non-stick coated primary blade. Adjustable sliding hand grip. 1⅛" cutting capacity. Power Lever action with two pulleys. Fiskars brand (9235).

**No. 4W492.** Shpg. wt. 7.5 lbs. List $83.35.
Each ..... **$62.50**

## HEAVY-DUTY GAS ENGINE CHAIN SAWS

**18 and 20" Heavy-duty Chain Saws.** High performance yet lightweight. 2.8, 3.3, and 3.7 cubic inch engines are suited for the heavy-duty cutting jobs of farmers, forestry department crews and homeowners.

**Antivibration system** reduces cutting vibrations as much as 78% through use of vibration-dampening padded handlebar, vibration isolators, and counterbalanced crankshaft. Lets operator work longer with easier handling and less fatigue.

**Two-cycle, one-cylinder, air-cooled engine** with 100% needle or ball bearing construction, lightweight magnesium or aluminum components, and quiet tone USDA-FS approved spark arresting muffler. Fully adjustable all-position diaphragm carburetor isolated with fuel tank from engine for cooler running. Sprocket nose guide bar reduces friction and prolongs bar life.

**Moisture and dustproof solid state ignition** combines with automatic rewind starter and large pulley to provide fast, easy starting.

**Adjustable automatic oiling** provides lubrication to bar and chain for longer life. This professional feature allows adjustment for bar lengths and wood types.

**Safety Features:** All Poulan chain saws meet or exceed ANSI Standards and feature handguard, reduced kickback guide bar and low kick chain to reduce hazard to the operator. Wide handle spacing gives these saws excellent balance and handling characteristics. All units are UL Listed (SA6185).

### CHAIN SAW CARRYING CASE

- **Constructed of rugged black plastic**
- **Use with Nos. 6Z824, 6Z825 and 6Z826**

**No. 3ZC84.** Shpg. wt. 7.6 lbs. List .....$55.50.

## GAS ENGINE CHAIN SAWS

**16 and 18" Gas Engine Chain Saws.** Available in 2.1 and 2.3 cubic inch displacement with professional features for the weekend wood cutter.

**Verticle cylinder design** with SuperClean™ air filter system and gear driven automatic oiler. Inside the engine, the main bearings are ball type and all needle bearings are cogged. The large volume muffler and powerful high RPM engine allow for fast cutting and quiet operation. Sprocket nose guide bar reduces friction and prolongs bar life. Primer bulb for easy starting.

**Safety Features:** All Poulan chain saws meet or exceed ANSI Standards and feature handguard, reduced kickback guide bar, and low kick chain to reduce hazard to the operator. Wide handle spacing gives these saws excellent balance and handling characteristics. All saws are UL Listed (SA6185).

# CHAIN SAWS

## GAS ENGINE CHAIN SAWS

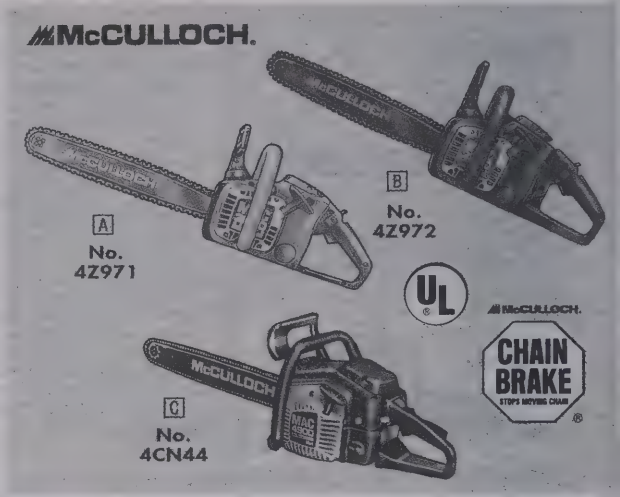
Designed to provide powerful performance, durability, and ease of operation under demanding circumstances.

**ENGINE**—2-cycle, 1-cylinder, air-cooled engine has solid state electronic ignition, hard chrome plated cylinder for fast, easy starts, longer engine life. All-position carburetor has externally adjustable high and low speed jets. No. 4CN44 incorporates vertical cylinder engine which produces less heat, more power.

**OPERATION**—Rear handle design with foot plate/hand guard provides balance, comfort, safety. Sprocket tip bar increases bar & chain life. Gear driven automatic oiler on Nos. 4Z971 and 4Z972 delivers even, dependable flow to bar and chain. No. 4CN44 features clutch-activated, adjustable automatic gear-driven chain oiler which delivers oil to bar & chain only while chain is moving.

**SAFETY**—Feature Flag-Style Chain Brakes®/Hand Guard, low kick-back chain, chain catcher, safety trigger, throttle latch and muffler shield to protect operator. McCulloch chain saws meet ANSI Code B175.1 (1991) safety standards. UL Listed. Muffler and spark arrestor screen are approved by United States Forest Service (USFS).

### A 14" CHAIN SAW



Lightweight, powerful saw handles home cutting chores such as trimming & shaping trees, cutting firewood, light carpentry.

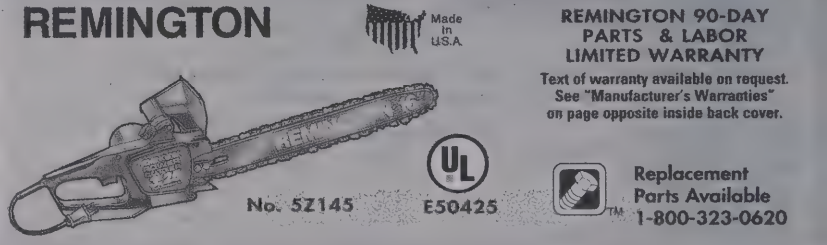
**• 2.0 cu-in. •14" sprocket tip bar •Flag-style Chain Brake®/hand guard • Gear-driven automatic oiler • Rear-handle design • Primer carburetor • Chrome-plated cylinder**

### B 16" CHAIN SAW

Power, lightweight balance and anti-vibration feature for medium-duty cutting applications.

**• 2.1 cu-in. •16" Sprocket tip bar • Flag-style Chain Brake®/hand guard •Anti-vibration system • Chrome chain •Gear-driven automatic oiler •Chrome-plated cylinder**

### C 20" PRO STYLE CHAIN SAW



Professional style includes vertical cylinder that produces less heat, more power with a slimmer design for better balance and handling.

**• 3.0 cu-in. • 20" replaceable sprocket tip bar •Vertical cylinder • Flag-style Chain Brake®/ hand guar • Pro-style anti-vibration/air cleaning system • Adjustable automatic gear-driven oiler • Solid state ignition/primer bulb • Hard chrome-plated cylinder • Bucking spike**

## ELECTRIC CHAIN SAWS

Lightweight, compact, electric chain saws are used by homeowners, landscape firms, and construction crews for felling trees, trimming limbs, and cutting firewood. Equipped with chrome tooth chain-cutting surface so the chain stays sharp longer. All models double insulated for protection against shock hazards, and include a 2-conductor cord set for operation on 115V, 60 Hz power. All models have a reduced kickback guide bar with low kick-back Oregon chain (3/8" pitch, .050" gauge), No. 4Z309 has a self-sharpening chain. All saws come with built-in bucking spike. Internal gear system is designed to prevent damage to motor if binding occurs. Manual oiler has 1¼ oz. capacity. Other design features include non-slip textured finish on main and auxiliary handles, cushion handgrip (except No. 4Z121), hard nose bar, safety trigger lock, and hand guard on both front and rear. Positive chain tension adjustment. UL Listed (E50425). Made in the USA. Remington brand.

**No. 4Z121.** 3.0 HP motor produces 5600 RPM no-load sprocket speed. 14" bar.
**No. 4Z309.** Same high-performance 3.0 HP motor as No. 4Z121, but features automatic chain sharpening at the push of a button. 14" bar. Fast, sharp chain.
**No. 5Z145.** 16" bar and 25% more power than models above. 3.25 HP high performance motor produces 6000 RPM no-load sprocket speed for fast, clean cuts.

# SAW CHAIN, SAW CHAIN LOOPS, AND BULK SAW CHAINS

OREGON® Xtraguard Low Kickback Chain 100 Ft. Reels

No. 5H869 Semi-Chisel Chain

## BULK SAW CHAINS

**Saw chain is fast-cutting and long-lasting.** Cutters and drive links are heat-treated chromium-nickel steel alloy. Rivets are double heat-treated high carbon steel. Xtraguard design reduces kickback and meets the kickback requirements of ANSI B175.1-1985, UL Classification 17R2.

**Economical alternative to saw chain loops.** Depending on bar length, 20 to 32 loops can be made from each 100 ft. reel. Approximate length of saw chain required is 2.7 times bar length. Requires use of Chain Breaker No. 3LC33 and Rivet Spinner No. 3LC34, sold on page 2688.

**Low profile, semi-chisel, and chisel cutter types.** Low profile chain No. 5H868 provides excellent all-around cutting performance. Well-suited for electric saws and gas saws up to 2.5 cubic inches and for bars up to 16" in length. Use semi-chisel chain No. 5H869 for fast, smooth reduced friction operation on saws 3 to 6 cubic inches and bars 16 to 30" in length. Chisel chain No.5H870 incorporates 0.325" pitch for professional high production 2.5 to 3.5 cubic inch chain saws and bars 11 to 20" long. Chain Type No. is stamped on each side link. Saw chain is packaged on 100 ft. reels. Each reel includes four packages of eight tie straps, eight preset tie straps, and eight guard links. Oregon brand.

| Pitch † (In.) | Chain Type | Gauge‡ (In.) | File* Size (In.) | Oregon Model | Stock No. | List | Each# | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 3/8 | Low Profile | 0.050 | 5/32 | U91VG-100U | 5H868 | $399.95 | $295.00 | 15.0 |
| 3/8 | Semi-Chisel | 0.050 | 7/32 | U72SG-100U | 5H869 | 433.30 | 345.00 | 20.0 |
| 0.325 | Chisel | 0.050 | 5/32 | U33SL-100U | 5H870 | 455.50 | 359.00 | 19.0 |

(*) For information purposes only. Files NOT included. To order chain saw files see page 1371.
(†) Pitch is determined by measuring distance between the centers of any three consecutive rivets and dividing by two.
(‡) Gauge is thickness of drive link measured at the tang. (#) 100 ft. reels. Includes four packages of eight tie straps, eight preset tie straps, and eight guard links.

## OREGON SAW CHAIN LOOPS

Smooth, fast cutting, hard chromed replacement saw chains stay sharp and provide long life. Equipped with guard link or slanted depth gauge to minimize kickback. Cutters have corners which are nearly square for maximum wood bite and smooth cutting action. To determine the proper replacement saw chain, check the replacement cross reference on pages 2687 and 2688. Oregon brand.

## REPLACEMENT BAR AND CHAIN

Combination replacement package features a sturdy chain and tough steel bar with low-kick Double Guard® nose. Unit may also be used to increase cutting capacity and efficiency of some existing chain saws by extending bar length. Simply purchase a larger size Oregon replacement unit. Fits many brand name chain saws. Bars for Homelite saws are drilled to accept Saf-T-Tip. To determine which combination replacement package to use with existing chain saw, check replacement guide. Oregon brand.

OREGON® No. 1R374

## OREGON REPLACEMENT BAR AND CHAIN ORDERING DATA

Comes complete with bar and chain. For additional replacement chains only, use appropriate Stock No. listed below.

## SURE SHARP™ CHAIN SAW SHARPENER

- **Heavy-duty steel construction**
- **Easy to use; no need to remove chain from bar**
- **Accommodates 5/32, 3/16, 7/32, and 1/4" file sizes (not included)**
- **Fits all chain saws**

Provides fast precision sharpening while chain is in place on bar.

One setscrew firmly attaches sharpener to bar. Positive grip on tooth being filed makes tool easy to use in field or shop. Precision calibration settings for all critical angles designed to sharpen chain to factory specifications. Unit painted to prevent rust. Sharpener dimensions: 2W x 4H x 7¾"D. Files **not** included. Files sold on page 1371. Oregon brand (23820).

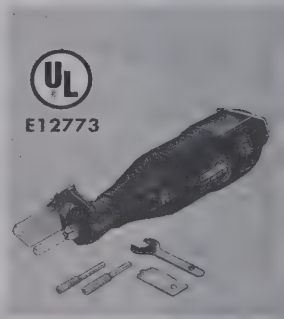
**No. 5H871.** Chain Saw Sharpener. Shpg. wt. 1.0 lbs. List .....$27.90
Each .....**$25.85**

## SAW CHAIN BREAKER & RIVET SPINNER

Used for making saw chain loops from bulk chains and chain repairs. Bolt holes for bench mounting. Handles 1/4, .325, 3/8, .404, and 1/2" pitch saw chains.

**Saw Chain Breaker No. 3LC33** drives rivets out of chain. Used to cut chain to correct length or replace worn rivets. Lever-operated cam action develops force needed for easy operation.

**Rivet Spinner No. 3LC34** produces tight, consistent, and smooth rivet spins for above pitch sizes. Equal pressure is applied by take-up handles while spinning to make rivet heads tighter. Minimizes risk of chain breakage.



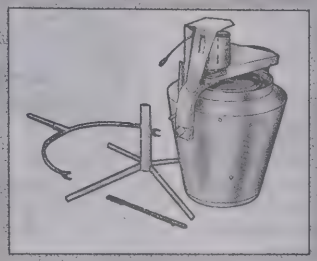
**No. 3LC33.** Saw Chain Breaker (24548). Shpg. wt. 5.0 lbs. List .....$54.95
Each .....**$54.95▲**

**No. 3LC34.*** Rivet Spinner (24549). Shpg. wt. 3.5 lbs. List $59.95
Each .....**$59.95▲**

(*)Limited Availability – contact local branch.

## CHAIN SAW SHARPENING TOOL KIT

- **Built-in sharpening guide assures cutting edge at proper angle**
- **Saw gauge shows where to set guide for every type of chain**
- **Fits comfortably in the palm of your hand—1⅞" dia.**
- **Includes Dremel electric sharpener with guide, 5/32, 3/16, and 7/32" aluminum oxide grinding wheels, two adjustment spacers, wrench, and chain guide**
- **6 ft., 2-conductor cord**
- **For AC operation only**



| No-Load RPM | Amps at 115V | Tool Length | Dremel Model | Stock No. | List | Each | | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **28,000** | 1.15 | 7.25" | 1277 | **1A194** | $71.04 | **$48.80** | ▲ | 2.0 |

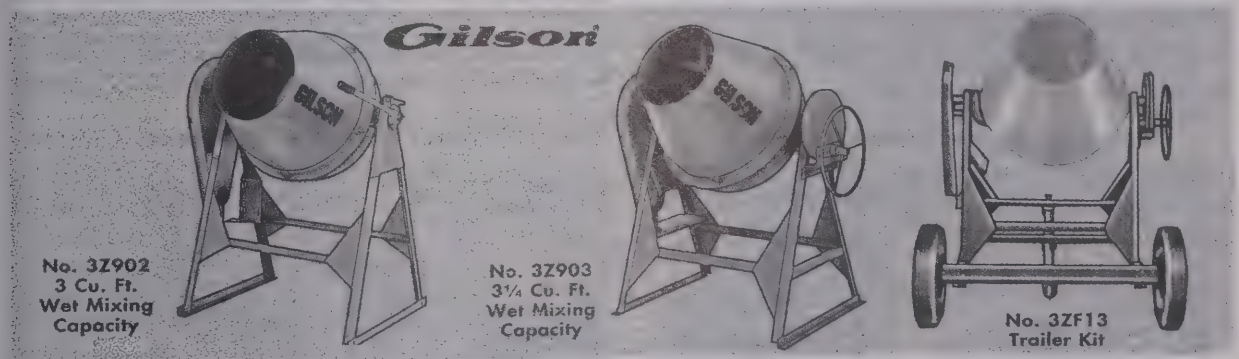
## PORTABLE UTILITY MIXER



Take utility mixer apart for easy transport and storage

**Portable Utility Mixer** has all-steel construction for long life and durability. Applications include mixing concrete, fertilizer, and feed.

- **Pedestal mounted for easy assembly and breakdown**
- **Includes 1/3 HP electric motor**
- **Mix up to 2 cu. ft. of concrete or up to 4 cu. ft. of dry material**
- **No tools required for assembly; set mixer on the 2-piece stand**
- **Easy to take apart for transport in truck or car trunk**
- **Easy to operate, unit is well-suited for rental and repair jobs**
- **Gilson brand (59005)**

**No. 3ZC33.** Shpg. wt. 165.0 lbs. List.....$875.00
Each.....**$841.00**

## STEEL DRUM MIXERS

No. 3Z902 3 Cu. Ft. Wet Mixing Capacity

No. 3Z903 3¼ Cu. Ft. Wet Mixing Capacity

No. 3ZF13 Trailer Kit

**Sturdy drum with replaceable cast-iron ring gear.** Welded steel frame and pulley for heavy-duty mixing applications. Alemite fittings at all lubrication points. Available with correct Dayton 1725 RPM, 115V, 60Hz, service factor 1.0, open dripproof, split-phase motor with V-belt, pulley and power supply cord.

### 3 CUBIC FEET CAPACITY MIXER

**5½ cu. ft. steel drum** has a wet mixing capacity of 3 cu. ft. Adjustable lever tilting mechanism locks drum in five positions. Bronze bearings, 41" inches long, 26" wide, 46" high. Available with Dayton 1/3 HP motor. See No. 7Z817 listed below.

### 3¼ CUBIC FEET CAPACITY MIXER

**6½ cu. ft. steel drum** has a wet mixing capacity of 3¼ cu. ft. Load balanced drum has easy pouring tilt wheel with band type brake to hold drum at any mixing angle. Tapered roller bearings. 41" long, 28" wide, 46" high. Available with Dayton 1/2 HP motor. See No. 7Z818 listed below.

### TRAILER KIT FOR STEEL DRUM MIXERS

**Converts stationary steel drum mixers** No. 3Z902, 3Z903, 7Z817, and 7Z818 to road-towable units. Gilson brand (69250A).

- **Includes axle, wheels, tow pole for 1⅞" ball, and mounting hardware**
- **4.80 x 8" high speed trailing wheels**
- **Set up for rear or side discharge of mix**
- **All-steel construction for durability**
- **Smooth-rolling pneumatic tires**
- **Easy to assemble**

**No. 3ZF13.** Shpg. wt. 80.0 lbs. List.....$500.00
Each.....**$469.00**

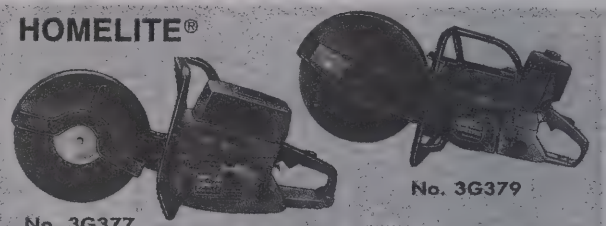
### GAS ENGINE CONVERSION KIT FOR CONCRETE DRUM MIXERS ABOVE

**Converts mixers to gas-powered unit.** Engine not included. Order No. 6Z471 separately. Includes steel engine hood, V-belt, and pulley. Fits Gilson 1½ to 3¼ cu-ft. mixers. Gilson brand (69211).

**No. 6Z177.** Shpg. wt. 40.0 lbs. List $240.00. Each.....**$228.00**



# CUTOFF SAWS AND PATCHING COMPOUNDS

## MULTIPURPOSE CUTOFF SAWS

**Homelite Multipurpose Cutoff Saws** cut concrete, asphalt, steel, aluminum, bronze, cast iron, and other construction materials.

- **Powerful 3.8 cu. in. (No. 3G377) or 5.4 cu. in. (No. 3G379), 2-cycle, air-cooled engine**
- **Exclusive universal arbor readily accepts 1", 22mm and 20mm diameter wheels**
- **Wraparound handle with strategically located vibration isolation reduces vibration, impact, and operator fatigue**
- **Triple air filtration system helps extend engine life. Unique design allows unit to be washed without covering the filter**
- **Simple, accurate, right-angle semi-automatic belt tensioner helps maintain proper belt tension for maximum belt life**
- **Reversible arm for inboard or outboard wheel mounting**

**HOMELITE®**

No. 3G379

No. 3G377

**Replacement Wheels For Cutoff Saws Available.**
**SEE PAGE 1606**

**Replacement Parts Available 1-800-323-0620**

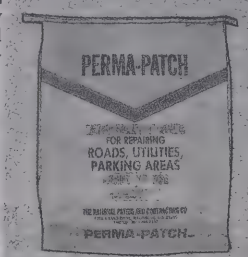
### No. 3G380 OPTIONAL WET CUTTING KIT

**Use with Nos. 3G377 and 3G379.** Offers longer abrasive and diamond wheel life. Installs on wheel guard with screw-on fittings. Use with water source from regular garden hose. Water is sprayed on both sides of wheel and on cutting surface to cool wheel, reduce wear. Homelite brand (A-49649).

**No. 3G380.** Shpg. wt. 2.0 lbs. List $105.00. Each ..... **$99.00**



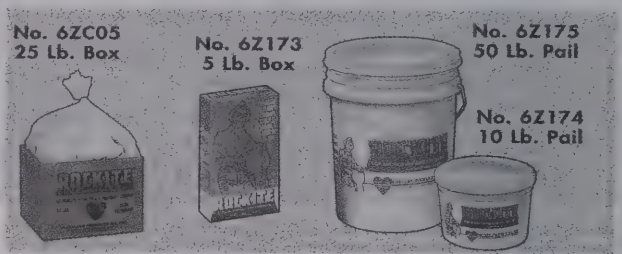
### No. 3G381 MULTIPURPOSE SAW DOLLY

**Use with Nos. 3G377 and 3G379.** Designed to fit Homelite brand 12" and 14" cutoff saws. Unit features fail-safe throttle control. Lightweight for easy maneuvering, especially where precision cuts or extended cutting is required. Homelite brand (05064).

**No. 3G381.** Shpg. wt. 10.0 lbs. List $235.00. Each ..... **$220.00**

## PERMA-PATCH PAVING MATERIAL

**Perma Patch Asphalt Paving Compound** rapidly, safely, and effectively patches potholes, utility cuts, and cracks or other parking area problems.

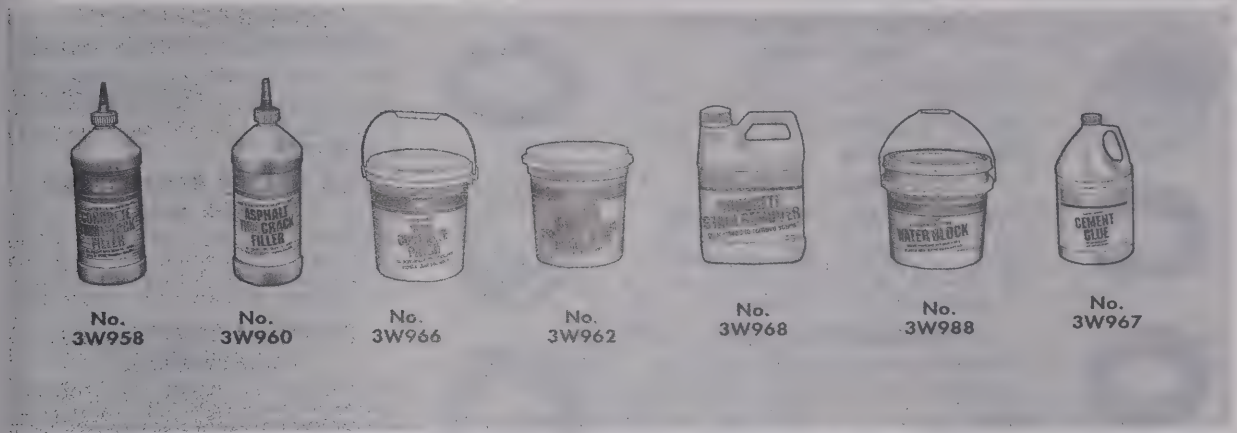


- **Bonds permanently to asphalt, concrete, steel, wood, and other hard surfaces**
- **Bonds equally well to dry, damp, or wet surfaces**
- **Use directly from bag; no mixing, heating, or special preparation needed**
- **Apply under any temperature or weather condition, including sub-freezing ambient road temperatures**
- **Pressure sensitive; cures faster under greater volumes of traffic**
- **1 bag fills a 6 sq. ft. area 1 inch high**
- **Compaction can be accomplished by hand tamping**
- **2-year shelf life**
- **60 lb. bag**
- **Black color**

**No. 3ZC17.** ❸ Shpg. wt. 60.0 lbs. List $23.45. Each ..... **$20.86**

❸ These products are covered by OSHA Hazard Communication Standard, Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

## ROCKITE® ANCHORING & PATCHING CEMENT



Used for applications such as anchoring bolts, buildings, partitions, machines, appliances, tools, railings, hardware, and posts to concrete and other masonry floors and walls. An expanding, fast-setting, pourable, hydraulic type cement. Has more than twice the strength of fully cured, conventional concrete. Flows easily into place when mixed with water to pourable consistency. Initial set within 15 minutes. Develops a compression strength of 4,500 lbs. per square inch within 1 hour. May also be used for patching concrete and other masonry floors and walls. One pound yields 18¾ cubic inches. 92 lbs. yields one cubic foot. Packaged in poly bags inside containers. Rockite brand.

| Size | Rockite Model | Stock No. ❸ | List | Each | Shpg. Wt. |

## CONCRETE THIN CRACK FILLER

Ready to use latex based product for easy, no-mess repairs less than 1/2" wide. Remains flexible. Adheres to all concrete areas. Gray color. 1 qt. plastic bottle. Set brand (080112124).

**No. 3W958.** ❸ Shpg. wt. 3.6 lbs. List .....$10.42.
Each .....**$8.65**

## CONCRETE WIDE CRACK FILLER

Convenient, self-leveling crack filler for rigid repairs over 1/2" wide. Takes tire traffic in 1 hour. 5 lb. plastic bottle. Set brand (051850324).

**No. 3W959.** ❸ Shpg. wt. 6.3 lbs. List .....$18.07
Each .....**$15.00**

## ASPHALT THIN CRACK FILLER

Convenient, self-leveling crack filler is ready to use for easy, no-mess repairs. For repairs less than 1/2" wide. Remains flexible. Black color. 1 qt. plastic bottle. Set brand (014112024).

**No. 3W960.** ❸. Shpg. wt. 2.5 lbs. List .....$10.05
Each .....**$8.34**

## ASPHALT WIDE CRACK FILLER

Convenient, self-leveling crack filler for rigid repairs over 1/2" wide. Suitable for heavy traffic areas. Takes tire traffic in 1 hour. Black color. 5 lb. plastic bottle. Set brand (051950324).

**No. 3W961.** ❸. Shpg. wt. 5.8 lbs. List .....$17.93
Each .....**$14.88**

## CONCRETE RESURFACER

Two-part masonry repair can be used on aged, spackled, or rough concrete level surface areas. Self-bonding, self-curing for thin (1/16 to 1/4"), lasting mortar and concrete surface repairs. 48 lb. plastic pail. Set brand (021101524).

**No. 3W989.** ❸ Shpg. wt. 48.0 lbs. List .....$66.25
Each .....**$55.05**

## VINYL CONCRETE PATCH

For thin masonry repairs (1/8" to 1/2") on walks, steps, walls, and bricks. Can also be used to restore, tuckpoint. All-around concrete repair. Self-bonding, permanent repairs. Just add water. 20 or 45 lb. plastic pail. Set brand.

**No. 3W966.** ❸ 20 lb. pail (023535024). Shpg. wt. 21.0 lbs. List .....$22.64.
Each .....**$18.80**

**No. 3W987.** ❸ 45 lb. pail (023557024). Shpg. wt. 45.0 lbs. List .....$30.02.
Each .....**$24.92**

## SPEED ROCK CONCRETE REPAIR

15-minute concrete repair mix and anchoring cement. Chemically based, impervious to water, road salt, or chemicals. For 1/2" to full depth patching and repair. High strength concrete repairs quickly and easily indoors or out. Self-bonding, self-curing. Takes foot traffic in 45 minutes. 10 or 45 lb. pail. Set brand.

**No. 3W962.** ❸ 10 lb. pail (051821024). Shpg. wt. 11.0 lbs. List $16.79. Each .....**$13.93**

**No. 3W963.** ❸ 45 lb. pail (051874524). Shpg. wt. 48.0 lbs. List $59.97. Each .....**$49.80**

## CONCRETE STAIN REMOVER

Guaranteed to remove stains. Removes oil, grease, and tire marks from concrete surfaces. 1 qt. plastic bottle. Set brand (0070513024).

**No. 3W968.** ❸ Shpg. wt. 2.1 lbs. List .....$14.33
Each .....**$11.89**

## CEMENT GLUE

Bonding additive improves strength and bond of cement mixes. Can also be added to waterblock for higher bonding strength to concrete and brick walls. 1 gal. plastic bottle. Set brand (021302424).

**No. 3W967.** ❸ Shpg. wt. 9.6 lbs. List .....$26.90
Each .....**$22.33**

## WATER BLOCK

Heavy-duty concrete coating forms a durable coating that beautifies walls as it waterproofs. Seals, protects, and waterproofs concrete, masonry, and brick walls. Paintable 158 sq. ft. coverage. White color. 35 lb. plastic pail. Set brand (033104124).

**No. 3W988.** ❸ Shpg. wt. 37.0 lbs. List .....$42.09
Each .....**$34.95**

## MASONRY STOPLEAK

Add water, form into ball, and force into the leak. Stops flowing and seeping water. Sets in 3-5 minutes. Use for leaking walls, dams, sewers, tunnels, basements, underwater repairs, and pools. 10 or 50 lb. plastic pail. Set brand.

**No. 3W964.** ❸ 10 lb. pail (026225124). Shpg. wt. 11.0 lbs. List $15.94. Each .....**$13.23**

**No. 3W965.** ❸ 50 lb. pail (026257024). Shpg. wt. 53.0 lbs. List $56.34. Each .....**$46.80**

## ORDER DIRECT FROM GRAINGER

**You can order directly from Grainger, call your local branch and place an order. To find the branch nearest you, check the Branch Locations listed in the front of this catalog. You can pick your order up or we'll ship it today.**

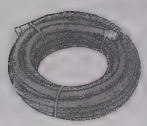
# WATER HOSE



## FLATLINE® REINFORCED VINYL HOSE

For pools, patios, campers, boats and RV's. USFDA-listed tube materials for drinking water safety. Drains automatically. Coils flat for storage. Non-corrosive nylon GRIPPER® couplings.

## COUNTRY CLUB® RT PROFESSIONAL DUTY HOSE

1" I.D., premium PVC hose. Flexible and lightweight. Industrial knit reinforcing for 450 PSI burst strength. For turf and nursery applications. Brass couplings.

## CONTRACTOR HOSE

Heavy-duty PVC construction for strength, flexibility, and abrasion resistance. Industrial style reinforcing. Brass couplings.

## WEATHER MASTER® REINFORCED VINYL HOSE

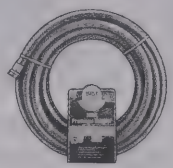
Strong 5-ply construction. All-weather tube. Dual reinforcing for excellent kink resistance. Non-corrosive nylon GRIPPER® coupling.

## EARTH QUENCHER® SOAKER HOSE

Drip irrigation style watering hose. Uses up to 70% less water than spray watering. Can be buried for direct underground soaking. Resists mold, fungal growth. Smooth cover.

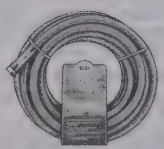
## SPRINKLER SOAKER® TRIPLE TUBE HOSE

100% vinyl hose for wide-area spraying or direct ground soaking. With stripes up, it waters like gentle rain; stripes down for soaking. Color blends with landscape. End coupled for connecting hoses in series.



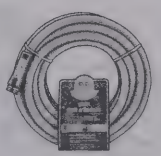
## COMMERCIAL DUTY REINFORCED RUBBER HOSE

Rubber cover resists oil, chemicals, abrasion, and weather. Withstands extensive hot water (200° F) use. Industrial knit reinforcing delivers 600 PSI burst pressure. Brass couplings.



## HOT WATER REINFORCED RUBBER HOSE

Withstands hot water use up to 200°F. Heavy-duty construction for maximum abrasion resistance. Industrial style reinforcing. Crush-resistant brass couplings.

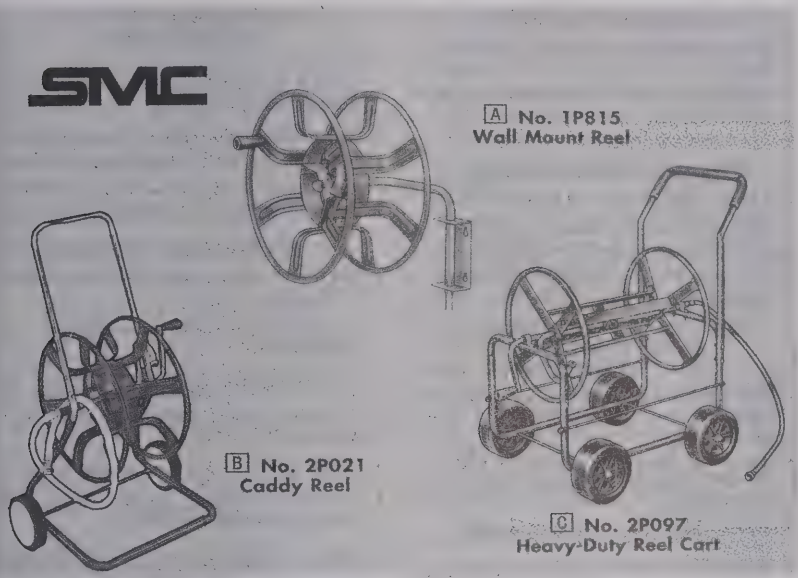


## PREMIUM REINFORCED RUBBER HOSE

Heavy-duty, all rubber construction. Handles hot water up to 160° F. High grade tube for great pressure capacity and flexibility. Dual radial reinforcing for maximum burst strength and kink resistance. SEAL-TITE™ brass coupling with permanent O-ring for leak proof use.

## PERFECT GARDENER® RUBBER/ VINYL REINFORCED HOSE

Special grooves in tube assure water flow even if hose is kinked. Premium rubber /vinyl striped cover for all-weather use. Dual spiral/knit reinforcing for high burst strength. Crush-resistant, machined brass couplings.



## SOFT & SUPPLE® RUBBER/VINYL HOSE

Heavy-duty 5-ply construction. Rubber/ vinyl cover provides excellent handling and flexibility. All-weather PVC inner tube offers optimum water pressure capacity. Dual reinforcing for maximum kink resistance.

(*) GHT = Garden Hose Thread. (†) Not intended for hot water. (‡) GPH = Gallons per Hour. (@) NPSH – National Pipe Straight Hose

## HOSE REELS

Extra large capacity. Heavy-gauge steel construction. Hold up to 200 ft. of 5/8" ID hose or 250 ft. of 1/2" ID hose, except commercial model which holds up to 350 ft. of 5/8" ID hose and 400 ft. of 1/2" ID hose. Come with connecting hose and water seal. Specialty brand.

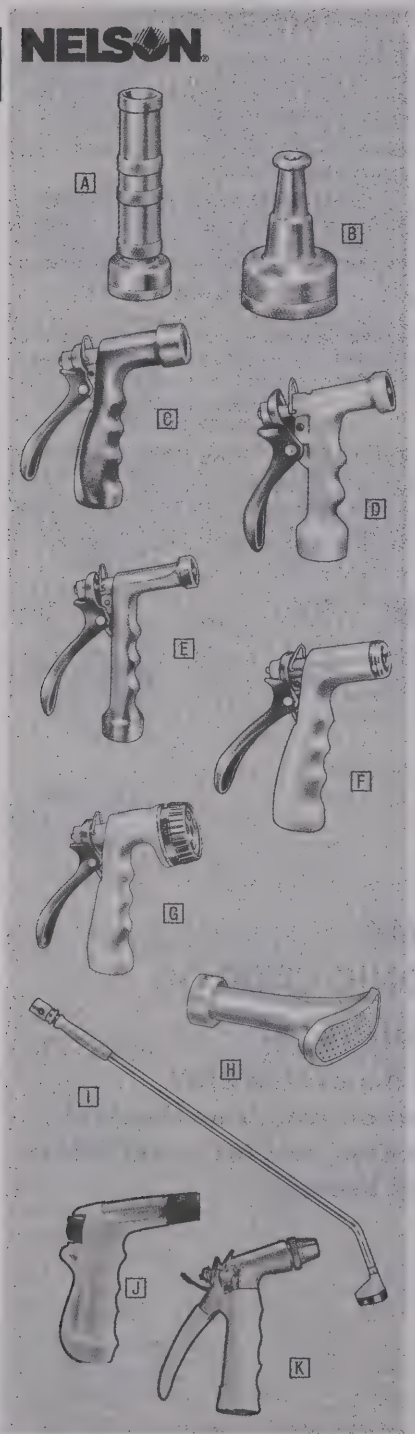
### A ALL STEEL WALL MOUNT REEL

Mounting bracket with two lock positions permit reel to operate parallel or perpendicular to wall. Green baked enamel finish.

### B ALL STEEL CADDY REEL

Front pull design for easy hose release and greater cart stability. Zinc plated cart handle and 7½" wheels. Green baked enamel finish.

### C ALL STEEL HEAVY-DUTY REEL CART



Flow through design, rugged 1" diameter steel frame, four 3"x9" heavy duty plastic wheels, and solid steel axles. Zinc plated handle with nylon foam grip can be mounted front or rear for rewinding preference. Green baked enamel finish.

# WATER NOZZLES

### A BRASS TWIST NOZZLE

- Self-centering 1-piece stem adjusts from fine spray to powerful stream
- 6.3 oz. rust-proof machined rod brass construction
- 3⅞" overall length

### B BRASS SWEEPER NOZZLE

- 1.3 oz. machined rod brass 2" long
- Straight-through design provides powerful non-adjustable stream
- Jet-force power; ideal for cleaning sidewalks, drives, siding, etc.

### C HOT/COLD INSULATED PISTOL GRIP NOZZLE WITH THERMO-GUARD™

- Large die-cast zinc body with brass stem and nut; glass-filled nylon handle
- Rated for temperatures up to 160°F (71°C) or pressures up to 100 PSI (6.9 bars)
- Adjustable from mist to powerful stream
- Thread guard for maximum protection

### D PISTOL NOZZLE

- Precision die-cast yellow color zinc body designed for smaller hands; comfort grip
- Adjusts from mist to powerful stream—clip locks nozzle open
- Glass-filled nylon handle

### E PISTOL NOZZLE

- Large precision die-cast green color zinc body with comfort grip
- Adjusts from mist to powerful stream-clip locks nozzle open
- Glass-filled nylon handle with brass stem and nut

### F INSULATED PISTOL NOZZLE

- Large die-cast zinc body with yellow contoured insulated grip—protects against cold water
- Adjustable from mist to powerful stream—clip locks nozzle open
- Glass filled nylon handle and threaded tip

### G INSULATED DIAL 5® PISTOL NOZZLE

- Large, die-cast zinc body with contoured insulated grip for comfort and cold water protection
- 5 patterns—flat spray, shower spray, jet stream, Halo™ spray and full On
- Brass stem and nut with glass filled nylon handle—clip locks nozzle open

### H FAN SPRAY NOZZLE

- Die-cast yellow color zinc body with brass face
- Soft spray for delicate watering applications

### I SPRAY NOZZLE WAND

- 36" aluminum handle with comfort grip; built-in shut-off
- Large impact-resistant plastic head
- 5 patterns—spray, gentle spray, flat spray, power jet, full open

### J INSULATED WATER SAVER NOZZLE

- Large die-cast zinc body with contoured rubberized insulated grip for cold water protection and rubber-protected spray tip with brass stem
- Memory spray tip adjusts from mist to jet and retains pattern until changed
- Water pressure dial controls exact water flow and turns from On to Off

### K INSULATED PISTOL GRIP NOZZLE

- Large chrome-plated die-cast zinc body with plastic insulating shield—protects against cold water
- Solid brass memory spray tip adjusts from mist to jet and retains pattern until changed
- Clip locks water On

# WATER SPRINKLERS

## A IMPULSE SPIKE SPRINKLER

- Full or part circle spray pattern with distance and density controls—90 ft. diameter maximum coverage
- Brass impact head with water-saver arm
- Series connections metal spike
- Brass swivel hose connection with washer

## B METAL STEP SPIKE

- Heavy-duty die-cast zinc construction
- 1/2" NPT connection with series connection base
- Use with Nos. 4KG89 and 4KG90 heads

## C STATIONARY SPRINKLER

- 30 ft. diameter maximum circular spray pattern coverage
- Durable die-cast zinc with aluminum face construction

## D IMPULSE SPRINKLER

- Produces rain-like spray which covers large area—90 ft. dia. max. coverage
- Brass impact head, full or part circle
- Water-saver arm and density controls
- Mounted on die-cast sled base
- Brass swivel hose connection with washer

## E IMPACT SPRINKLER HEAD

- 85 ft. full or part circle maximum coverage
- High-impact plastic construction with water-saver arm

## F IMPACT SPRINKLER HEAD

- 90 ft. full or part circle maximum coverage
- Brass and stainless steel construction with water-saver arm
- 1/2" NPT (M) threads—5/32" nozzle
- Diffuser pin and baffle arm adjust stream

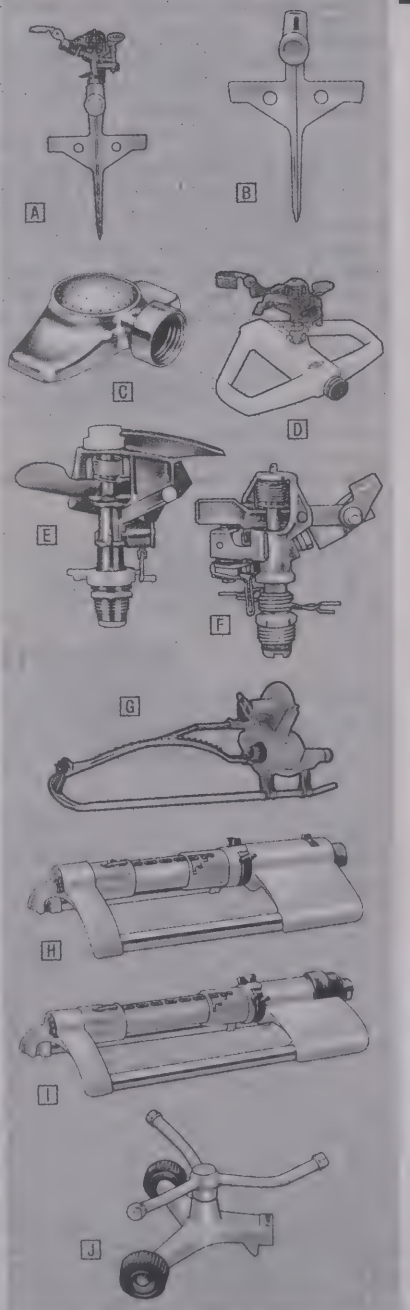
## G OSCILLATING SPRINKLER

- Dial-A-Rain coverage permits 59 separate positions
- 19 precision jet nozzles give maximum coverage of 55 x 66 ft. (3,630 sq. ft.) area
- Heart-shaped cam eliminates puddling and provides uniform coverage in all watering positions
- High-torque water motor operates with high or low water pressure
- Rust-proof metal housing has gold anodized spray and base tubes

## H OSCILLATING SPRINKLER

- Water flow and pattern width controls
- Adjusts from 72 to 3000 sq. ft. coverage
- Durable impact-resistant plastic with aluminum runners

## I OSCILLATING SPRINKLER



- Timer with built-in automatic shut-off and pattern width control collars
- Adjusts from 75 to 3600 sq. ft. coverage
- Durable impact-resistant plastic construction with aluminum runners

## J WHIRLING SPRINKLER

- 45 x 45 ft. maximum to 5 x 5 ft. minimum square pattern coverage
- Durable rust-proof metal construction

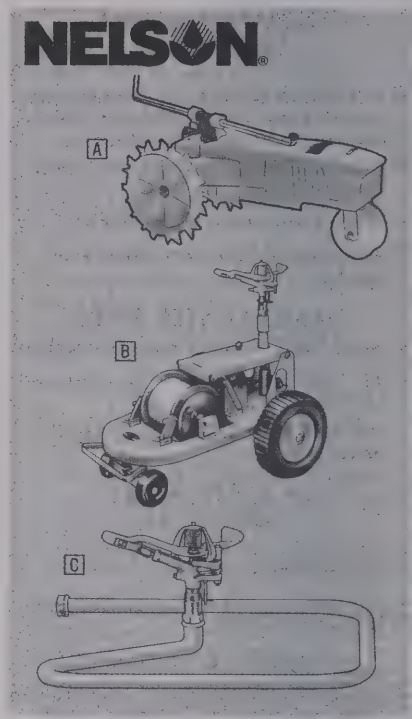
**DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

# LARGE AREA SPRINKLERS AND HOSE REPAIR KITS/ACCESSORIES

## COMMERCIAL-GRADE LARGE AREA SPRINKLERS

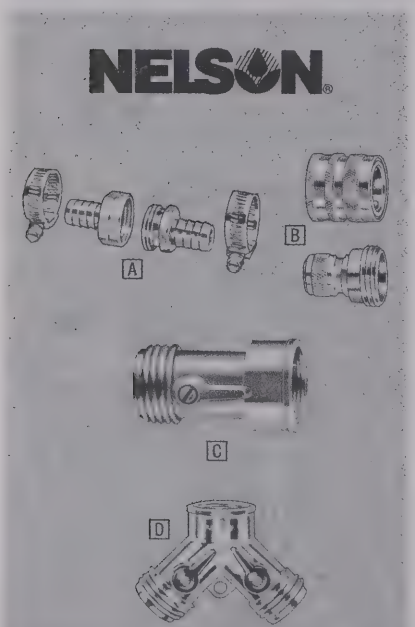
### A TRAVELING SPRINKLER



- 2 forward speeds for watering along hose path
- Adjustable arms provide coverage width from 15 to 55 ft. along 200 ft. length of hose
- 16,000 sq. ft. maximum coverage
- Die-cast iron body with rear wheel cleats for maximum tracking
- Shut-off ramp automatically stops sprinkler, shuts off water
- Brass garden hose connection

### B TURF TRAVELING SPRINKLER

- For athletic fields, parks, and other areas where cost and/or difficulty of installing underground system is too high
- Unit includes large brass impact head with 1/4" nozzle; requires 1" hose size
- Water-driven motor operates independently of sprinkler
- Adjust travel from 5 to 60 feet per hour
- Automatically shuts off when reaches end of non-kinking dacron cable
- Min. water pressure to unit—40 PSI with 48 PSI pressure required at hose inlet
- Coverage radius is 55 ft., sprinkler capacity is 11.5 GPM



### C LARGE AREA IMPACT SPRINKLER

- Allows 114 ft. dia. coverage
- Head has solid brass construction, heavy-duty retraction springs, 2 pre-installed nozzles, and a stainless steel diffuser screw
- Full or part circle patterns
- Powder coated tubular steel base • Sealed bearing prevents leakage
- For cold water use only with a 1" hose

| Key | Description | Nelson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| A | Traveling Sprinkler | 1865 | **5W751** | $107.70 | **$91.55** | 22.0 |
| B | Commercial Traveling Sprinkler | 8401 | **4KG96** | 1389.76 | **995.00** | 71.0 |
| C | Commercial Impact Sprinkler | 1641R | **4KG69** | 133.33 | **103.85** | 15.0 |

## WATER HOSE REPAIR KIT AND ACCESSORIES

### A HEAVY-DUTY BRASS WATER HOSE REPAIR KIT

- High quality rod brass construction
- Repairs plastic or rubber hose
- Stainless steel worm gear clamps included
- Female end includes live rubber washer
- No. 4KG68 complete coupling repairs 5/8" water hose; No. 4KG67 complete coupling repairs 3/4" water hose

### B 5/8" BRASS WATER HOSE QUICK-CONNECTORS

- Solid brass construction—connects hose instantly
- Push back collar for quick, leakproof connection
- For 5/8" water hoses only
- Female connector in No. 4KG98 complete coupling and female connector No. 4HK01 automatically shuts off water when disengaged

### C SINGLE WATER HOSE SHUT-OFF

- Has adjustable shut-off valve to control water flow
- Die-cast zinc construction
- For cold water use only

### D 2-WATER HOSE ADAPTER

- Allows use of 2 hoses from 1 faucet
- Chrome-plated zinc alloy casting is for cold water use only
- Adjustable shut-off valve for each hose connection

| Key | Description | Nelson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| A | 5/8" Brass Hose Repair | 1558B | **4KG68** | $7.22 | **$5.95** | 0.3 |

# AUTOMATIC WATER TIMERS AND PIPE AND HOSE THREAD CONNECTORS

## AUTOMATIC WATER TIMERS

### A AUTOMATIC WATER TIMERS

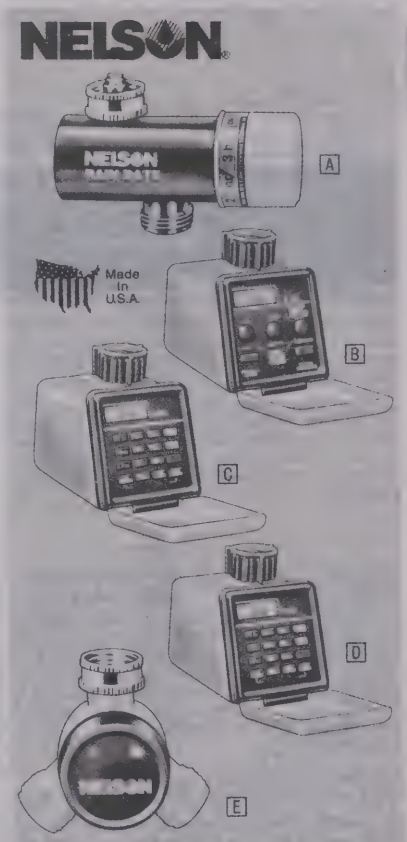
- Shuts water off automatically without wiring or batteries
- Set from 3 hrs. to 30 minutes
- Rugged plastic construction with brass coupling
- Compact unit swivels on faucet for easy access to controls

### B ELECTRONIC WATER TIMER

- Allows 2 watering cycles/day based on delay
- Digital LCD display
- Programs in 1 min. increments up to 30 min. and in 15 min. increments from 30 min. up to 4 hrs.
- Automatic repeat or skips up to 3 days between watering cycles
- Requires 2 C-size alkaline batteries (not included)

### C ELECTRONIC WATER TIMER

- Allows 4 watering cycles/day based on actual time
- Program from 1 min. up to 24 hours
- Automatic repeat or program to water every other day, every 3 days, or to skip any number of days up to 6 days
- 3 pre-programmed settings
- Timed manual mode
- Digital LCD display
- Requires 2 C-size alkaline batteries (not included)

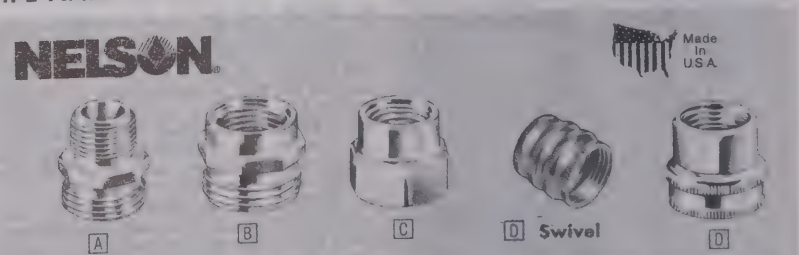


### D ELECTRONIC WATER TIMER

- Allows 6 watering cycles per day
- Program from 1 min. up to 24 hours
- Auto repeat or set to water every other day, every 3 days, or to skip any number of days up to 6 days; repeats a cycle of up to 7 days
- Mist cycle and 6 pre-programmed settings
- Timed manual mode
- Digital LCD display
- Requires 2 C-size alkaline batteries (not included)

### E HYDRAZONER

- Automatic water area switcher designed for use with timers such as Nos. 4KG93, 4KG94, and 4KG95
- Allows user to water two areas from one faucet and timer
- No wiring or batteries needed
- Small compact design made of rugged ABS/Polycarbonate material
- Swivel brass female connector
- Max. operating pressure 150 PSI; min. operating pressure 10 PSI



COLD WATER USE ONLY

| Key | Description | Nelson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| A | Automatic Water Timer | 5200 | 4KG91 | $15.56 | $11.95 | 0.3 |

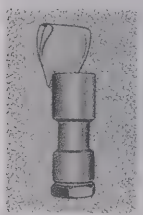
# PROFESSIONAL TURF AND AG DUTY SPRINKLING SYSTEM COMPONENTS

## TYPICAL INDUSTRIAL UNDERGROUND SPRINKLER SYSTEM

Design the sprinkler system that best meets your irrigation needs. The number and type of sprinklers on each line can vary according to the landscape needs in each area you plan to irrigate.

A **Sprinkler Pump** may be used to supply pressurized water from a stream, pond, lake, or shallow well for your irrigation system when a direct water hookup is not available. For lawn sprinkler pumps, see page 3137.

B **Backflow Preventer** prevents backflow when supply pressure falls below the system pressure. See page 3051.



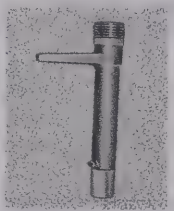
C **Brass Quick Coupler Valve** may be placed at or above ground level. Allows for full water flow when Quick Coupler Key is inserted. Designed for full pressure main line or lateral line.

D **Brass Quick Coupler Key** inserts into valve for water flow. Key is threaded and designed to be used with hose swivels or impact sprinklers.

E **Brass Hose Swivel** allows for water hose hookup and up to 360° rotation for hand watering and other special applications.

F **Heavy-Duty Brass & Stainless Steel Impact Sprinkler Head.** Full or part circle use; adjustable stream flow.

G **Heavy-Duty Brass & Stainless Steel Part or Full Circle Impact Sprinkler** designed for 20° to 340° or continuous 360° coverage.



### C BRASS QUICK COUPLER VALVES

Use with ground impact sprinklers or hose swivels for water hose access. Can be kept under constant pressure or valved in groups for zone control. West Ag brand.

**No. 3W728.** 3/4" coupler valve (V075-PL). Shpg. wt. 0.8 lbs. List $26.55. Each.....**$21.24**

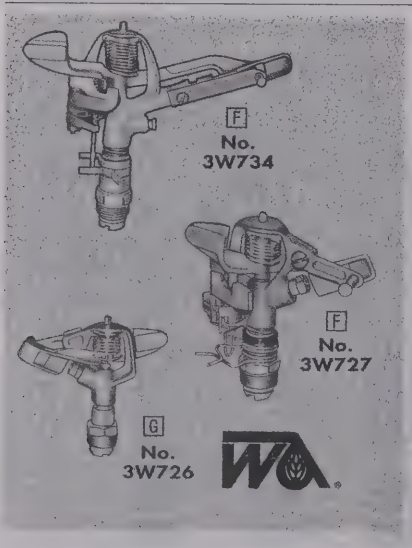
**No. 3W729.** 1" coupler valve (V100-PL). Shpg. wt. 1.9 lbs. List $39.86. Each.....**$31.90**

### D BRASS QUICK COUPLER KEYS

Heavy-duty cast brass single lug keys. Sizes vary to facilitate most sprinkler sizes. Also helps to prevent theft and vandalism. West Ag brand.

**No. 3W730.** 3/4" coupler key (C075). Shpg. wt. 0.8 lbs. List $17.75. Each .....**$14.20**

**No. 3W731.** 1" coupler key (C100). Shpg. wt. 1.2 lbs. List $36.72. Each .....**$29.40**



### E BRASS HOSE SWIVELS

When connected, allow for 360° hose rotation for hand watering and other hose applications. Fit standard 3/4" hose. Available in 2 sizes. West Ag brand.

**No. 3W732.** Fits 3/4" hose x 3/4" NPT (HS-075). Shpg. wt. 0.8 lbs. List.....$26.85. Each .....**$21.48**

**No. 3W733.** Fits 3/4" hose x 1" NPT (HS-100). Shpg. wt. 1.0 lbs. List.....$28.35. Each .....**$22.68**

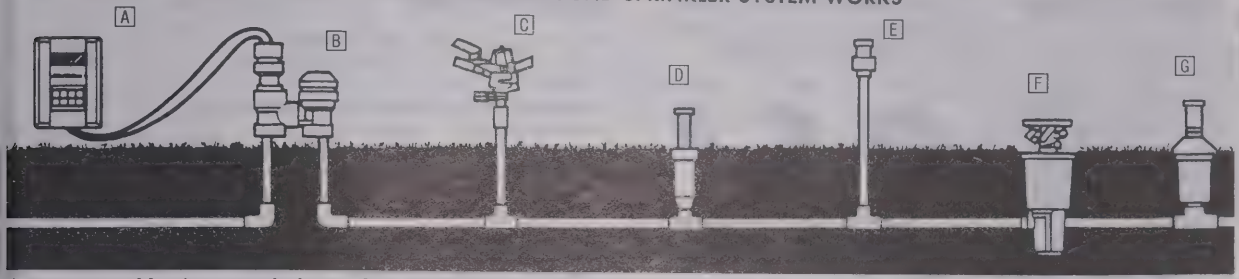
### F G IMPACT SPRINKLERS

**No. 3W726. 1/2" Full Circle.** For heavy-duty AG applications. Solid brass construction with stainless steel drive spring. West Ag brand (S90DFULL).

**No. 3W727. 1/2" Part/Full Circle.** For industrial and commercial turf, lawn & garden and general applications. Solid brass body and arm, stainless steel drive spring, and stainless steel trip collars. 20° to 340° arc or full circle. West Ag brand (S63D).

**No. 3W724. 1/2" Part/Full Circle.** For turf, lawn & garden applications. Solid brass body, silicon brass driver arm has patented spray grooves which decrease dry area in center of distribution. Stainless steel drive spring, trip collars, and trip assembly. 20° to 340° arc or full circle. West Ag brand (S90D).

**No. 3W725. 3/4" Full Circle.** For heavy-duty AG applications. Solid brass construction with stainless steel drive spring and sure-seal bearing assembly. West Ag brand (S2000).



**No. 3W723. 3/4" Part/Full Circle.** For large turf applications, commercial and highway maintenance, and farm irrigation. Solid brass construction, stainless steel drive spring, friction tip collars, and trip assembly. 20° to 340° arc or full circle. West Ag brand (S261DST).

**No. 3W734. 1" Part/Full Circle.** For fairway or field applications and dust control. Heavy-duty brass construction. Cast brass trip assembly; stainless steel friction trip collars. 20° to 340° arc or full circle. West Ag brand (S360BA).

# UNDERGROUND SPRINKLER SYSTEM COMPONENTS

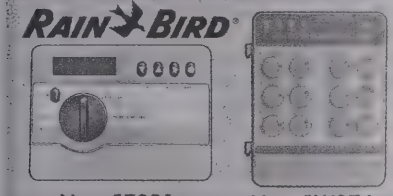
## HOW AN UNDERGROUND SPRINKLER SYSTEM WORKS

A programmable timer sends low voltage signals to an electric valve, supplying water to sprinklers for a set period of time. Sprinklers on each valve can be varied according to landscape needs in each part of a yard. One valve can control many sprinklers. One timer can control many valves/stations. The basic components of the sprinkler system, not including pipe and fittings, are listed at right.

A **Rain Clock Digital Timers.** Allows automatic watering every day.

B **Automatic Sprinkler Valves.** Constructed of noncorrosive thermoplastic. Solenoids encased in plastic housing to prevent rust.

C **Impulse Sprinkler Heads.** Full or partial circle coverage. Adjustable stream length.



D **Pop-Up Spray Heads.** Disappear into lawn when not in operation. Available in quarter, half, full or adjustable circle patterns.

E **Shrubbery Spray Heads.** For special plantings that require careful waterings.

F **Pop-Up Impulse Sprinklers.** Installed at ground level, pops up to water. For medium to large areas.

G **Pop-Up Rotor Sprinklers.** Full and part circle coverage. Closed case design for trouble-free performance.

RAIN BIRD

No. 5Z301 No. 3W974

### DUAL PROGRAM TIMER

- Flexible day schedule allows automatic watering every day, every other day, every third day, and so on
- Choose between 6 pre-programmed schedules or customize your own
- Water-conserving dual program enables two separate watering schedules, up to three starts each day
- 0-180 minute station timing
- Pump start output
- Rainbird brand (ISA-406)

**No.5Z301.** Automatic Timer. Shpg wt.1.8 lbs. List $98.25. Each .....$75.25

### DIGITAL SPRINKLER TIMER

- Create separate schedules for each station, up to 6 stations
- Automatic watering up to 3X per day
- Station watering time from 1 - 45 min. or up to 3 hours for slow drip
- Pause feature, manual on/off and rain switch give you added control and flexibility in watering schedules
- Large, easy-to-read LCD display
- Pump start output
- Rainbird brand (PC-506)

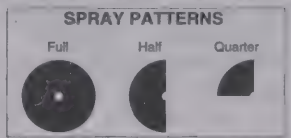
**No. 3W974.** Rain Timer. Shpg. wt. 3.0 lbs. List $93.35. Each.....$84.00

RAIN BIRD

No. 5Z297 No. 5Z299

- Valve bodies constructed of durable, noncorrosive thermoplastic with ultraviolet inhibitors
- All solenoids have PVC and acetal resin plastic housing to prevent rust
- Solenoid rating: 24 volts, 50/60 Hz, inrush: 0.30 amps, holding: 0.19 amps
- Rated at 125 PSI max. working pressure

**Sure Flow™ Automatic Anti-Siphon Valves** feature combination electric remote control valve and atmospheric backflow preventer in one unit. Meets I.A.P.M.O. and A.S.S.E. listing specifications. Easy-to-turn pressure-assisted flow control mechanism. Electric valves work with any standard 24 volt sprinkler timer. Comes in 3/4 and 1" sizes.



### B AUTOMATIC VALVES

**Automatic In-Line Valves** for city systems or pump systems where backflow protection is not required. In-line installation reduces pressure loss. Designed for underground installation. Operates automatically or manually with manual bleed screws. Reverse flow design reduces stress on diaphragm for dependable operation. Works with any standard timer. Comes in 3/4 and 1" sizes.

**Filtered Drain Valve** protects against freezing by automatically draining pipes when water is turned off. Unique two stage screening process. Valve prevents grit from siphoning back into pipes. Eliminates need for gravel drain. 1/2" MPT connection.

# UNDERGROUND SPRINKLER SYSTEM COMPONENTS

## RAIN BIRD® C IMPULSE SPRINKLER HEAD

No. 5Z285

Spray Pattern for Impulse Sprinkler Head No. 5Z287

- **Full circle or part circle coverage up to 82 ft. diameter**
- **50 ft. maximum spacing**
- **1/2" MPT**
- **25 to 50 PSI operating pressure with maximum 5.0 GPM output at 50 PSI, high gallonage output**

### BRASS IMPULSE SPRINKLER HEAD

No. 5Z285 has a brass body, bronze arm, and stainless steel trip assembly. Adjustable deflector controls stream length from 20 to 41 foot radius. Diffuser screw breaks water into smaller droplets. Precision Jet, PJ™ spray guide arm controls stream, stops side splash, saves water.

| Flow | Rainbird Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **High** | 25PJDA-C | **5Z285** | $27.25 | **$22.61** | 0.7 |

### PLASTIC IMPULSE SPRINKLER HEAD

Full circle or part circle coverage up to 82 foot diameter. Durable high-impact acetal resin plastic body and trip assembly with stainless steel trip lever. Diffuser screw adjusts stream length from 20 to 41 foot radius. Precision Jet, JP™ spray guide arm controls stream, prevents side splash, and saves water. 50 feet maximum spacing. 1/2" MPT connection. Rainbird brand (P5PJC).

**No. 5Z285.** Shpg. wt. 0.7 lbs. List $27.25. Each.....**$22.61**

**No. 5Z287.** Shpg. wt. 0.2 lbs. List $9.73. Each.....**$9.06**

## RAIN BIRD® F POP-UP IMPULSE SPRINKLERS

- **Full or part circle spray pattern**
- **Acetal resin plastic & stainless steel head**
- **Diffuser screw adjusts stream length**
- **Precision Jet, PJ™ spray guide arm controls stream, prevents side splash, saves water**
- **Gritproof bearing**
- **3" pop-up clearance**
- **Filled polypropylene plastic case 4⅛" dia., 8⅝"H, 1/2" female connection at side or bottom**
- **Nos. 5Z283 and 5Z284 have 25 to 50 PSI operating pressure with maximum 3.6 GPM output at 50 PSI**

No. 5Z283

**No. 5Z283**—has low gallon flow for more head per circuit, especially suited for low water pressure areas. Recommended spacing—25 to 43 ft. apart. "Mini Paw."

**No. 5Z284**—has medium gallon flow to reduce sprinkling time by watering at faster rate of flow. Recommended spacing—28 to 49 ft. apart. "Mini Paw."

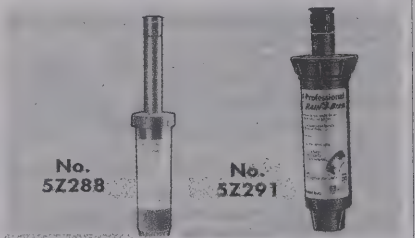
**No. 3W973**—has maximum gallon flow for fastest coverage. Five interchangeable, color-coded Matched Precipitation Rate Nozzles. No tools needed to change nozzles. Variable nozzle options provide for all gallonage flow with variable watering rate of 1.9 GPM to 8.4 GPM @ 60 PSI. Recommended spacing—36 to 54 ft. apart. "Maxi Paw."

| Flow | Rainbird Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Low** | LG-3 | **5Z283** | $29.79 | **$27.60** | 1.2 |
| **Medium** | MG-4 | **5Z284** | 29.79 | **27.60** | 1.0 |
| **Adjustable** | AG-5 | **3W973** | 34.03 | **31.80** | 1.2 |

### HEAD REMOVAL WRENCH

Wrench removes sprinkler head from case for cleaning or replacement for Nos. 5Z283, 5Z284 & 3W973. Rainbird brand (42064).

**No. 5Z303.** Head Removal Wrench. Shpg. wt. 0.4 lbs. List $8.19. Each.....**$5.85**



## D & E POP-UP AND SHRUBBERY SPRAY HEADS

RAIN BIRD®

**Plastic 2½" Pop-Up Spray Heads** feature exclusive cover ring that traps grit. Stainless steel spring ensures position retraction. Made of durable, high-impact PVC plastic. Can be spaced up to 15 feet apart. 1/2" female connection at bottom. Matched Flow Rate (MFR) nozzles ensure uniform coverage when patterns are mixed on the same circuit. MFR nozzles have corrosion-resistant stainless steel screws which regulate distance thrown up to 12 feet. Coverage patterns: quarter, half, full circle and adjustable

**Pop-Up Spray Heads** have a 4" pop-up clearance for normal grass. Accepts all 15 series MFR nozzles. Body labels are color coded by spray pattern. 4" overall length. Available in three spray patterns: quarter, half, full circle, and variable.

**Shrubbery Spray Heads** accept all series MFR nozzles. Adjustment screw regulates distance thrown up to 12 feet. Can be spaced up to 15 feet apart. 1/2" female pipe connection. Available in quarter, half, and full circle coverage patterns, end strip and center strip.

## G POP-UP ROTOR SPRINKLER

RAIN BIRD®

No. 3W975

- **Closed case rotor prevents dirt, sand, and other debris from getting inside**
- **Pattern adjusts from part to full circle**
- **Consistent rotation speed provides uniform coverage**
- **Water-lubricated drive mechanism provides quiet operation**

3.0 GPM nozzle provides maximum coverage. 3/4" inlet at bottom allows easy replacement to existing systems, spacing from 33 to 40 ft. apart. 4-9GPM @ 60PSI. Rainbird brand (TDR-2/R-50).

**No. 3W975.** Closed Case Rotor. Shpg. wt. 1.2 lbs. List.....$29.58. Each.....**$27.70**

# COMPRESSED AIR SPRAYERS

## STAINLESS STEEL SPRAYERS

**Constructed with high quality 304 Grade stainless steel** for maximum chemical resistance and easy cleaning. Electronically welded seams and overlapping tops add extra strength and durability. Comfortable carrying strap for easy handling.

### A COMPRESSED AIR SPRAYERS

**For use in a sanitary environment.** Ideal for cleaning, light degreaser, and other sanitary applications.

- **4½" open head for easy filling, mixing and cleaning**
- **Heavy-duty 9" brass pump for efficient pressurizing**
- **Brass plated shut-off assembly and 42" reinforced nylon hose**
- **No. 6Z169 has 12" solid brass extension wand and nozzle; No. 4W499 has 18" solid brass extension wand and nozzle**
- **No. 6Z169 has 2 gallon capacity; No. 4W499 has 3 gallon capacity**

### B PROFESSIONAL PEST CONTROL SPRAYER

For pesticide, herbicide, and fungicide applications, light cleaning and degreasing applications. Made with Viton® gaskets and O-rings for maximum chemical resistance and easy cleaning.

- **Twist-Lock D-grip handle incorporates a safety pressure-release feature**
- **Comes with a 48" hose and 18" brass extension wand with adjustable pattern nozzle—crack and crevice tip assembly included**
- **1 Gallon capacity**

### C PORTABLE PUMP CART SPRAYER

For commercial landscaping, nurseries, lumberyards, farms and vineyards for pesticide/herbicide applications, cleaning, sealing, and light-duty maintenance/chemical use.

- **Sturdy hand cart for maximum portability**
- **5.25 gallon usable capacity for large area applications**
- **Brass pump for quick, easy pressurizing**
- **10 Ft. reinforced nylon hose**
- **18" brass extension wand with adjustable cone nozzle**
- **Stainless steel tank detaches from steel tube frame for easy cleaning, storage**

## TRI-POXY SPRAYERS

**12-Step epoxy coating process** inhibits corrosion and rust on all interior seams, welds, walls, and bottoms. Tanks rinse clean to prevent cross-contamination of chemicals. Comfortable carrying strap for easy handling.

### D LIGHT-DUTY SPRAYER

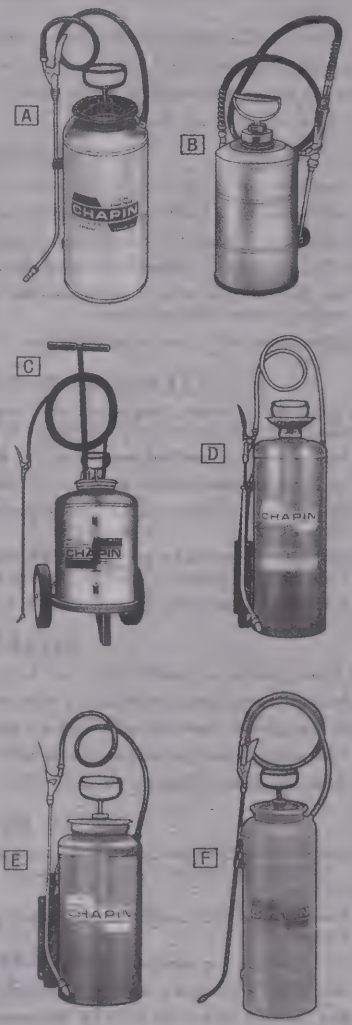
**Ideal for light industrial applications.** Uses include herbicides, pesticides, and sealants.

- **Wide mouth, funnel top for easy filling, mixing, and cleaning**
- **Brass plated shut-off assembly**
- **18" brass extension wand and adjustable cone nozzle**

### E LIGHT-DUTY SPRAYER

**Ideal for light/small construction applications.** Common uses include form oil and curing compound applications.

- **4½" open head tank for easy cleaning and filling**
- **Brass plated shut-off assembly**
- **18" brass extension wand and adjustable cone nozzle**



### F CONSTRUCTION-DUTY SPRAYER

**Ideal for all construction applications.** Common uses include form oil and curing compound applications.

- **4½" open head tank for easy cleaning, mixing, and filling**
- **Solid brass shut-off for corrosion protection**
- **24" brass extension wand and 1/2 GPM brass fan tip nozzle**
- **Heavy-duty brass threaded fittings—easy changing of hose, shut-off, or nozzle**

# COMPRESSED AIR SPRAYERS

## POLYETHYLENE SPRAYERS

**Durable high-density polyethylene construction** resists breakage, leaking, and chemical corrosion.

### [A] PREMIER POLYETHYLENE SPRAYER

**For light-duty jobs** and chemical maintenance applications.

- **High-density polyethylene construction resists breaking, leaking, and chemical corrosion**
- **Built-in relief valve and pressure gauge preset to release at 45 PSI**
- **Brass-plated shut-off with lock-on feature allows for continuous spraying**
- **Brass extension wand rotates 360°**
- **3 fan nozzle pack included**

### [B] INDUSTRIAL SPRAYERS

**For use with** form oils, curing compounds, and general light chemical use.

- **Serviceable polyethylene pump for efficient pressurizing**
- **Built-in relief valve and pressure gauge for added safety**
- **18" solid brass extension wand with 1/2 GPM brass fan tip nozzle**
- **No. 3ZC30 has Viton®-equipped seals and gaskets for maximum protection against chemical corrosion**
- **Both come with a comfortable carrying strap for easy handling**

### [C] CLEANING AND DEGREASING SPRAYERS

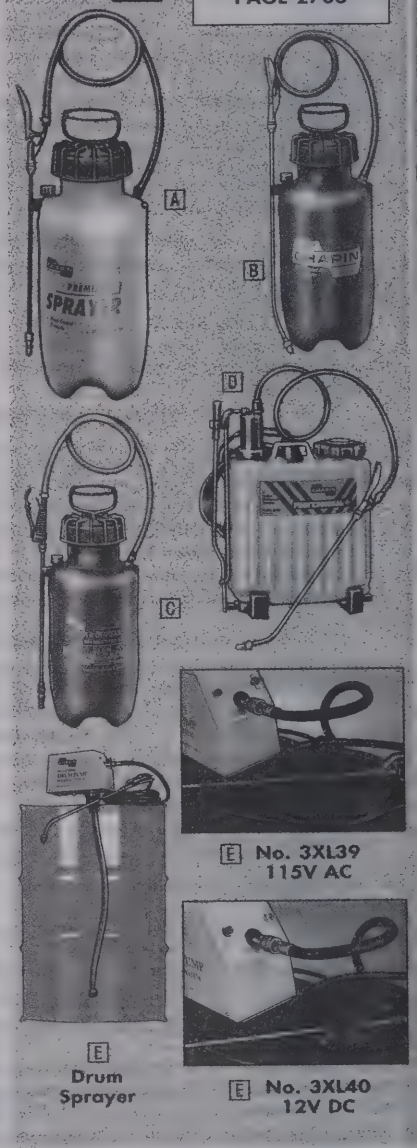
**For tough acid, solvent, degreaser, and stripping projects.** For cleaning concrete, masonry, engines, and janitorial/sanitation applications.

- **Serviceable polyethylene pump for efficient pressurizing**
- **Lock-off mechanism to prevent accidental discharge**
- **No. 3ZC31 features a 12" polyethylene extension wand with adjustable poly cone nozzle**
- **No. 3XL17 features an 18" polyethylene extension wand with adjustable poly cone nozzle—sprays coarse stream to a fine mist**
- **No. 3XL17 features a comfortable carrying strap for easy handling**

### [D] KNAPSACK SPRAYER

**For home garden, orchards,** and other farm and agricultural applications.

- **Poly piston pump for higher pressure and longer service**
- **Brass-plated shut-off with lock-on feature for continuous spraying**
- **18" solid brass extension wand with 2-part brass adjustable cone nozzle**
- **Nozzles attach directly to shut-off or extension wand**



### [E] DRUM PUMPS

**Dispenses chemicals from 5, 30, and 55-gallon drums.** For a variety of applications, from curing compounds, to form oils and sealant applications. Use with solutions with less than 30% solids.

- **Pressure control switch automatically shuts off when pump discharge valve is closed**
- **18" solid brass extension wand with two (0.5 and 1.0 GPM ) brass fan nozzles**
- **No. 3XL39 features an 8 ft, 3-cond. 115V AC power supply cord**
- **No. 3XL40 has a 20 ft, 12V DC power supply with battery clips**

DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

# TRAILER JACKS AND STAND

## INDUSTRIAL/AGRICULTURAL JACKS

Rolled Acme threads and steel anti-friction thrust bearings for smooth cranking and long cycle life. Top-wind handle (side-wind handle on No. 5W025) folds away for easy storage. 2000 and 5000 pound load capacities.

Nos. 5W025 and 5W026 A-frame jacks use optional caster wheel or foot support listed below. Nos. 5W027 and 5W028 come with heavy gauge zinc plated steel foot ensuring a strong base for lifting heavy loads on soft ground. No. 5W027 has snap ring mounting bracket, No. 5W028 has tubular mounting bracket.

| Load Capacity (Lbs.) | Overall Length Retracted (In.) | Gear Travel (In.) | Fulton Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **2000** | 20 | 14 | JA214S | **5W025** | $52.53 | **$42.05** | 12.0 |
| **5000** | 19.2 | 14 | JA514T | **5W026** | 44.84 | **35.90** | 11.0 |
| **2000** | 14.5 | 10 | 210TS11 | **5W027** | 58.93 | **47.20** | 13.0 |
| **5000** | 18.5 | 15 | 515TG15 | **5W028** | 76.87 | **61.50** | 16.0 |

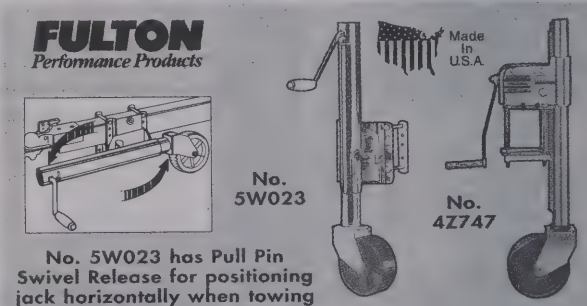
### WHEEL CASTER

Caster assembly with 6" rustproof polyolefin wheel for smooth easy rolling ground support on soft surfaces. Easily attach to Fulton jacks with 3/8" cross pin clip included. 1000 lb. static load capacity. Fulton brand (CE555).

**No. 5W029.** Fulton Wheel Caster. Shpg. wt. 4.5 lbs. List $27.30.
Each ..... **$21.84**

### SUPPORT FOOT

4 x 6" foot pad provides firm ground support for Fulton jacks on soft surfaces. Features 8" extension tube to provide same lift capability as Fulton caster. Zinc plated for corrosion protection. Easily attaches to jack with 3/8" pin and pin clip included. 2000 lb. load capacity. Fulton brand (F2000).



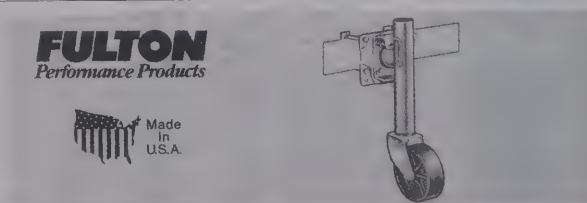
**No. 5W030.** Fulton Support Foot. Shpg. wt. 3.7 lbs. List $18.20.
Each ..... **$14.56**

## RV/MARINE TRAILER JACKS

Heavy-duty construction with zinc plated housing and tube to resist corrosion. Bolt to trailer tongues up to 3" wide x 5" high. Mounting bracket attaches to jack in minutes with common hand tools. Side wind handle.

**No. 4Z747 600 Lbs. Load Capacity Gear Jack** provides up to 24" lift with smooth operating rack and pinion gear system. Self-locking worm gear holds jack at desired level. 6" polyolefin wheel retracts along side of frame to prevent damage during towing. Made in U.S.A.

**No. 5W023 1000 Lbs. Load Capacity Screw Jack** provides up to 25" lift. Comes with 6" polyolefin wheel. Features unique pull pin swivel release that enables jack to swing up in seconds to horizontal position for towing. Factory assembled bolt on mounting bracket provides quick, easy installation. Made in U.S.A.



| Load Capacity (Lbs.) | Lift Range (In.) | Overall Ht. (In.) | Fulton Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **600** | 7-24 | 27 | TJ650 | **4Z747** | $75.59 | **$60.50** | 15.0 |
| **1000** | 15-25 | 23 | TJ1055 | **5W023** | 75.59 | **60.50** | 18.0 |

## TRAILER STAND

- **Swing-away operation**

Economical trailer stand has 350 pound load capacity. Bolts to trailer tongues up to 3" wide x 5" high, or may be welded on. Made in U.S.A. Fulton brand (TSC-350).

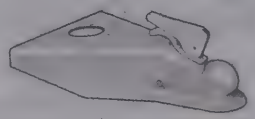
**No. 6Z176.** Shpg. wt. 9.0 lbs. List $47.86.
Each ..... **$38.30**

## FAS-LOK™ TRAILER COUPLER

**Nos. 2W698 and 2W699.** FAS-LOK™ couplings bolt to the trailer tongue and provide a simple hookup to a 1⅞" ball for Class I trailers, gross vehicle weight (GVW) up to 2000 lbs. or a 2" ball for Class II trailers, GVW up to 3500 lbs.

Safety latch prevents accidental uncoupling. Zinc coated finish. Made in U.S.A. Fulton brand.

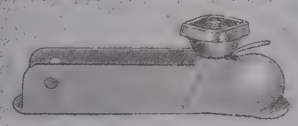
## A-FRAME COUPLER



**Nos. 5W232 and 3W749.** Coupling mounts to 50° A-frame. Used with Nos. 5W025 and 5W026 jacks. 2" or 2⅝" ball size. No. 5W232 is Class III, 5000 lb. with 2" ball size. No. 3W749 is Class IV, 10,000 lb. with 2⅝" ball size. Jack mounting hole 2.29" dia. Bolt and thread 3/8"-16 UNC. Prime painted finish. Made in U.S.A. Fulton brand.

| Class | Capacity GVW (Lbs.) | Ball Size (In.) | Tongue Width (In.) | Fulton Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| I | 2000 | 1⅞ | 3 | 11-300 | **2W698** | $16.73 | **$13.39** | 2.7 |
| II | 3500 | 2 | 3 | 22-300 | **2W699** | 24.46 | **19.57** | 4.1 |
| III | 5000 | 2 | 50° A-Frame | 33-305 | **5W232** | 36.75 | **29.40** | 5.6 |
| IV | 10,000 | 2⅝ | 50° A-Frame | 44-305 | **3W749** | 40.68 | **32.60** | 8.0 |

FULTON Performance Products — Made in U.S.A.



No. 2W698

No. 5W232

FULTON Performance Products — Made in U.S.A.

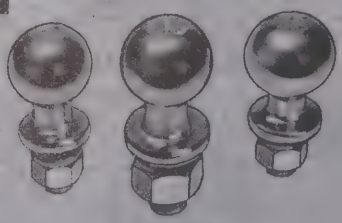
No. 5W233

## HAND WHEEL COUPLER

Heavy-duty hand wheel designed to screw down tight on ball. Must be fully engaged before towing. Preferred for rental and utility trailers. 2" ball size, 2⅞" wide channel. 5000 lbs. max. trailer GVW. Prime painted finish. Made in U.S.A. Fulton brand (308).

**No. 5W233.** Shpg. wt. 5.0 lbs. List.....$42.48.
Each.....**$34.00**

## TRAILER HITCH BALLS



**Solid Steel and Zinc Hitch Balls** are cold-formed and heat-treated for added strength. Steel balls have a chrome-plated surface that protects against corrosion and enables smooth operation with a coupler. Hitch balls are available in different sizes, shank diameters, and lengths to fit your specific draw bar or step bumper applications. All Reese hitch balls comply with Safety Specification and Requirements of VESC Regulations V-5. Hitch load rating must equal or exceed the trailer Gross Vehicle Weight Rating (GVWR). Reese brand.

### BALL COVER

Protects ball hitch when not in use.

**No. 4KD28.** Shpg. wt. 0.1 lbs. List.....$2.19.
Each.....**$2.08**

(*) When installing Reese hitch balls, torque all 3/4" shank balls to 120 ft. lb. Torque all 1" and 1¼" shank balls to 200 ft. lb.

# TOWING ACCESSORIES

## DRAW BARS

**Draw Bars** are attached to hitch receivers and hitch balls to complete the hitch assembly. Available in different drops and rises to assure level towing, prevent trailer sway.

**Class III Draw Bars** are 2" in dimension to match the hitch box opening on the trailer hitch receiver. Class II draw bar is 1¼" dimension.

**Adjustable Draw Bar** No. 4KD16 features a 5000/5000 lb. rating and has a 13½" total height adjustment and a 9" length. Adjusts easily by pulling pin and clip. No. 4KD17 is an additional ball mount insert that allows you to carry a second ball and slip it into the receiver when a quick ball change is needed.

**Pull Pin and Clip Assemblies.** For Class III, 5/8" diameter; Class II, 1/2" dia. For use with all Reese utility hitch bars. Reese brand.

**Hitch Pin Locks** are available in 1/2 and 5/8" diameters.

# TRAILER HITCHES AND STEP BUMPER HITCHES

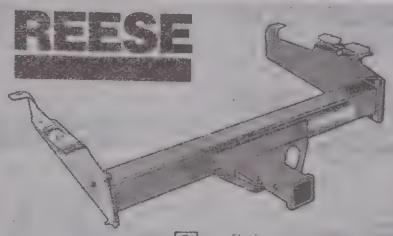
- **No welding required; bolts to frame**
- **Removable utility ball mount**
- **Easy to install with ordinary tools**
- **Instructions and hardware included**

Receivers adapt to different towing needs when used with different draw bars and hitch ball sizes (utility balls, pull pins, draw bars sold separately).

### A SPORT UTILITY HITCHES

Rated for 3500 lbs. towing capacity (Class II). Install easily to over 90% of pick-up trucks, vans, minivans, sport utility vehicles, and cars in use today (see selection guide below). Unique design provides custom fit and features 1¼" hitch box. No welding required; hitch bolts to vehicle frame rails.

### B PICK-UP AND UNIVERSAL TRUCK HITCH RECEIVERS

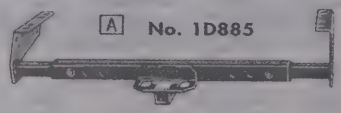


Features 2" hitch box and accepts a wide range of utility ball mounts. Bolts to pick-up frame rails and can be used for weight-carrying payloads of up to 6,000 lbs. (Class III); or add weight distributing accessory (not available through Grainger) and increase payload capacity to 10,000 lbs. (Class IV).

### B RECEIVER TRUCK HITCHES

For Ford Explorer and F150 pick-up. Ratings are: Explorer—6000 lbs. weight distributing, and 5000 lbs. weight carrying; F150—7500 lbs. weight distributing, and 5000 lbs. weight carrying.

### C PICK-UP STEP BUMPER RECEIVER/HITCHES



Hitches attach directly to existing pick-up truck step bumper for all domestic pick-up trucks. No. 4KD373 features an additional step, as well as three optional ball-mounting locations. One location is a traditional 2" receiver hole. No. 4KD74 is a traditional 2" receiver mount.

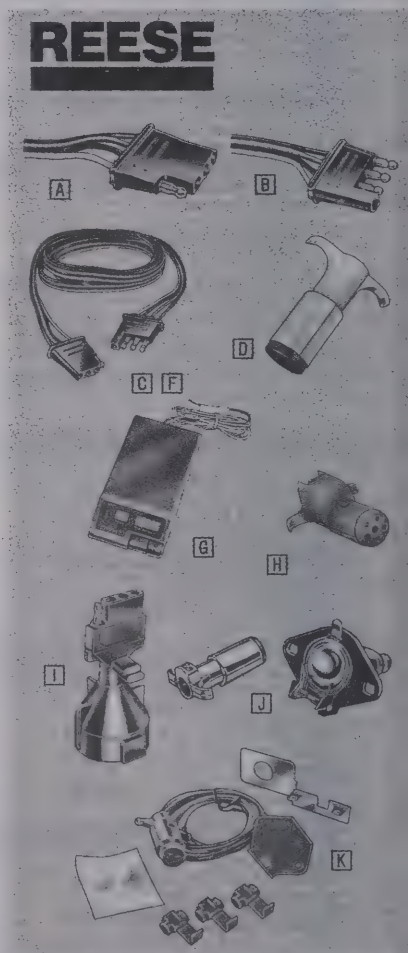
# TRAILER COUPLERS, LOCKS AND WIRING ACCESSORIES

## TRAILER COUPLER LOCKS

Replacement couplers to repair damaged trailer couplers.



## TRAILER COUPLER LOCKS

No. 4KD60 coupler lock inserts into the coupler and expands to make the coupler inoperable to prevent theft. No. 4KD43 is a padlock that locks the handle on the Fas-Lock style couplers to prevent opening.

## TRAILER WIRING ACCESSORIES

### A FOUR-WAY FLAT CONNECTOR

With 60" pigtail. Car end. Reese brand (74123).
**No. 4KD36.** Shpg. wt. 0.3 lbs. List $3.52. Each.....**$3.34**

### B FOUR-WAY FLAT CONNECTOR

With 12" pig tail. Trailer end. Reese brand (74124).
**No. 4KD37.** Shpg. wt. 0.8 lbs. List $2.29. Each.....**$2.18**

### C 4-WAY FLAT CONNECTOR

With 60" car and trailer ends. Reese brand (74125).
**No. 4KD38.** Shpg. wt. 0.5 lbs. List $3.62. Each.....**$3.44**

### D 6-WAY TRAILER END CONNECTOR

Round metal trailer end connector. Reese brand (74130).
**No. 4KD39.** Shpg. wt. 1.5 lbs. List $6.29. Each.....**$5.98**

### E 6-WAY CAR END CONNECTOR (Not Shown)

Round metal car end connector. Reese brand (74183).
**No. 4KD49.** Shpg. wt. 0.5 lbs. List $25.52. Each.....**$24.24**

### F 4-WAY FLAT CONNECTOR

With 24 ft. wire pigtail. Reese brand (74636).
**No. 4KD72.** Shpg. wt. 0.5 lbs. List $9.90. Each.....**$9.40**

### G BRAKEMAN DIGITAL READOUT ELECTRONIC BRAKE CONTROLLER

Solid state electronics. Can be mounted in any position. For two to eight brakes. Reese brand (74643).
**No. 4KD53.** Shpg. wt. 0.6 lbs. List $97.43. Each.....**$92.60**

### H 6-WAY ROUND TO 4-WAY FLAT ADAPTER PLUG

Reese brand (74605).
**No. 4KD68.** Shpg. wt. 0.1 lbs. List $9.33. Each.....**$8.86**

### I 7-WAY ROUND TO 4-WAY FLAT ADAPTER PLUG

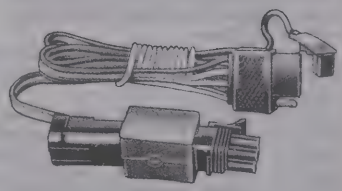
Reese brand (74607).
**No. 4KD69.** Shpg. wt. 0.2 lbs. List $9.33. Each.....**$8.86**

### J 6-WAY ROUND CAR AND TRAILER ENDS

With 48" of wire, wire taps, mounting brackets, and screws. Reese brand (74608).
**No. 4KD70.** Shpg. wt. 0.8 lbs. List $13.71. Each.....**$13.02**

### K 4-WAY ROUND KIT

With car and trailer ends, 48" of wire, wire taps, and mounting brackets. Reese brand (74611).
**No. 4KD71.** Shpg. wt. 0.3 lbs. List $8.48. Each.....**$8.06**



# T-CONNECTORS AND TRAILER ACCESSORIES

## T-CONNECTORS

T-connectors make quick work of wiring 4-way flat plugs to most of today's popular towing vehicles. No cutting, splicing, or taping necessary. Simply connect into the vehicle's factory wiring harness.

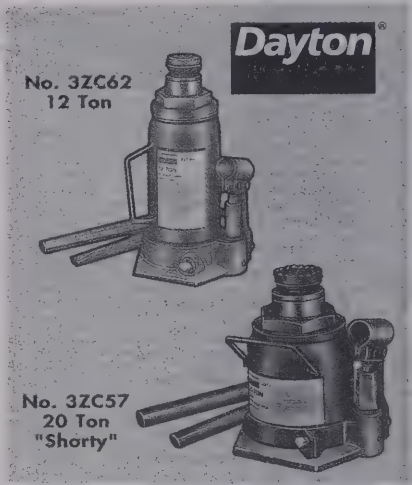
### ORDER DIRECT FROM GRAINGER

**You can order directly from Grainger, call your local branch and place an order. To find the branch nearest you, check the Branch Locations listed in the front of this catalog. You can pick your order up or we'll ship it today.**

# HYDRAULIC BOTTLE JACKS

- **Durable baked gray enamel finish**
- **Machined and polished cylinder walls insure straight lifts, preventing uneven wear**
- **Heat treated adjustable extension screw with cleated lift saddle prevents slippage**
- **Patented bypass mechanism protects hydraulic cylinder from over pumping**
- **Can be used vertically (not upside down) or at any angle to not more than 5 degrees from vertical position. Can also be used horizontally or vertically in appropriately designed fixtures**
- **Bottle jacks with lifting capacity of 12 tons and over have carrying handle for convenient moving or positioning**
- **1-Year Limited Warranty**

### Nos. 3ZC56 AND 3ZC57 12 AND 20 TON "SHORTY" SERIES



Well suited for working where height limitations are a problem. Applications include industrial, agricultural, construction, and automotive lifting, pushing, bonding, and straightening.

### No. 3ZC64 30 TON

For extra heavy-duty applications which include bridge construction, renovation, house moving and hydraulic presses.

**All Hydraulic Bottle Jacks in this listing are manufactured to meet the safety guidelines of the American National Standard Institute. ANSI/ASME PALD1B**

**Replacement Parts Available 1-800-323-0620**

# TELESCOPING HYDRAULIC BOTTLE JACKS

For lifting automotive, farm, marine, industrial, and construction vehicles. Jacks can be used vertically (not upside down) or at any angle to not more than 5 degrees from vertical position. Can also be used horizontally or vertically in appropriately designed fixtures. High-tonnage jack with handle accommodates moving and positioning. Telescoping bottle jacks provide a high lift with a minimum collapsed height. Jacks have low operating force. Hydraulic cylinder is protected by a safety by-pass system to prevent overloading and ram overtravel. Meets ANSI/ASME PALD 1B.

| Lifting Capacity (Tons) | Saddle Height (In.) Lowered | Raised | Extension Screw (In.) | Base Size (In.) | Stock No. | Each | Shpg. Wt. |

# HEAVY-DUTY HYDRAULIC JACKS

- **Heavy-duty construction meets or exceeds ANSI standards**
- **Tapped, solid machined steel base accepts hydraulic pressure gauge**
- **Extension screw allows low pick up height adjustment**
- **May be used vertically (not upside down) or at any angle not more than 5 degrees from vertical position. May also be used horizontally or vertically in appropriately designed fixtures**

## 1½, 3, 5, 8, AND 12 TON JACKS

**Applications include construction,** industrial, agricultural, and automotive lifting, pushing, bending, and straightening. Centered pump and ram for balance and easy positioning. Ribbed base adds extra strength. Hydraulic bypass circuit prevents ram overtravel.

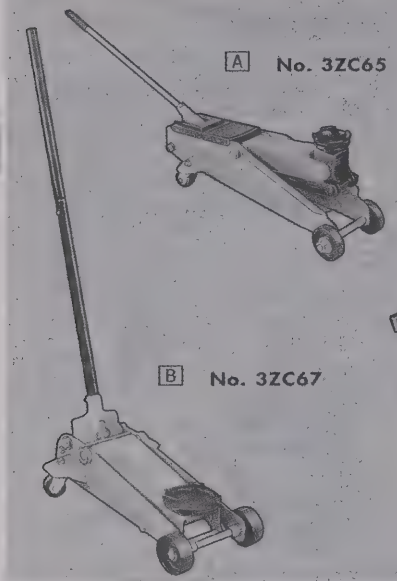
**Low profile 12 ton model No. 6Z990** is suited for jobs requiring power at a low pick up point.

### 1-YEAR LIMITED WARRANTY

**Lincoln warrants jacks for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## 20 TON JACKS

**Designed for use on** large industrial and heavy equipment applications. Hydraulic bypass circuit prevents ram overtravel. Low profile model No. 6Z991 is suited for jobs requiring power at a low pick up point. Wide base for stable operation.



## 30 AND 50 TON JACKS

**For extra heavy applications** such as house moving, bridge construction, renovation, and hydraulic presses. Two speed operation—speed to contact/power to lift. Heat treated lifting head. No. 5Z157 has swing-out carrying handles.

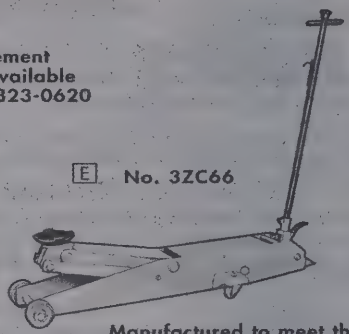
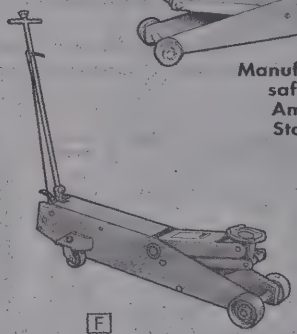
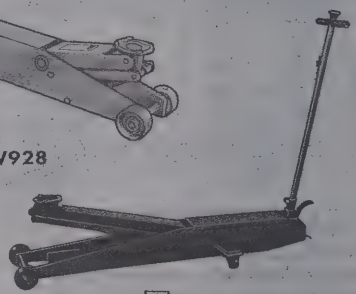
# HYDRAULIC SERVICE JACKS



Dayton®



Replacement Parts Available 1-800-323-0620



Manufactured to meet the safety guidelines of American National Standards Institute ANSI/ASME PALD 10B

## A B C GARAGE JACKS

- **Ideal for most general purpose lifting requirements; provides safe and stable load handling**

A **No. 3ZC65 2½ Ton Floor Jack** features a one-piece lift arm with dual leveling mechanism and reinforced flanged side frames for added strength under load. Patented safety bypass system prevents overextension and accidental overloading. Double swivel saddle and heavy steel casters allow safe, easy positioning.

B **No. 3ZC67 2½ Ton Heavy-duty Garage Jack** with unique twist gear mechanism gives metered control throughout lifting range. Hydraulic system is internally protected from overpumping and overloading. One-piece reinforced arm with heat treated pivot pins and steel swivel saddle provide safe high lifts.

C **No. 3W926 3 Ton High Output Garage Jack** is specially constructed to maintain a low center of gravity under heavier loading conditions. Extra thick, rigid side frame with exceptionally wide stance prevent distortion and twisting on uneven surfaces. Load limiting device prevents internal damage to powerful hydraulic system.

**1-YEAR LIMITED WARRANTY**
Dayton Electric Corporation warrants jacks for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside

## D E F LONG CHASSIS JACKS

- **Ideal for lifting heavy trucks, buses, agricultural and construction equipment with hard to access lift points**

**4, 5, and 10 Ton Long Chassis Service Jacks** have extended reach for safely lifting oversized loads. Units operate from either the multi-position T-style handle or quick action high ratio foot pedal. Load release knob is conveniently located on top of handle. Oversize industrial steel roller bearing casters allow ease of movement and positioning. Safety bypass mechanism protects hydraulic ram from overextension damage while an internal load limiting device prevents accidental overloading.

## G HIGH LIFT SERVICE JACK

- **Extra high lift design features for use in body repair shops and truck repair center**

Used for lifting part of a total vehicle. Applications include use in automotive, truck, farm, industrial, and construction. Equipped with a built-in by-pass safety device to prevent damage to jack from overpumping. Internal safety valve prevents damage to jack from overloading.

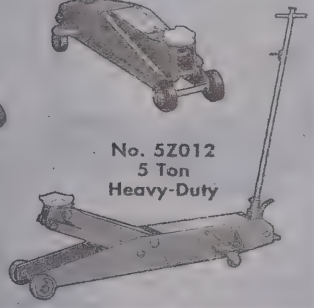
# HYDRAULIC SERVICE JACKS

Winner LINCOLN AUTOMOTIVE



No. 4Z922
2 Ton
Heavy-Duty

Replacement Parts Available 1-800-323-0620

No. 4Z921
2 Ton Compact

No. 5Z012
5 Ton
Heavy-Duty

**1-YEAR LIMITED WARRANTY**

Lincoln warrants jacks for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Manufactured to meet the safety guidelines of American National Standard Institute. ANSI/ASME PALD-1B-1991**

Durable hydraulic service jacks lift cars, light trucks, farm machinery and other vehicles. Feature hardened steel saddle. Pumping action on handle raises saddle; twist of handle lowers saddle. Winner Series from Lincoln.

**No. 4Z921 Compact, 2 Ton Hydraulic Service Jack.** Heavy gauge welded steel frame with rolled edges for added strength. Hardened steel saddle. Heavy-duty reinforced lifting arm. Bypass valve protects hydraulic unit from overpumping. 18⅝" wheel base for extra stability.

**No. 4Z922 Heavy-Duty, 2 Ton Hydraulic Service Jack.** Built for professional in-shop or road service. Short, easy-handling chassis for working in tight quarters. Full 90° pumping arc for fast lifting. Automatic overload valve protects cylinder. Features oversized forged saddle and wide stance with low center of gravity for extra stability.

**No. 5Z012 Heavy-Duty, 5 Ton Hydraulic Service Jack** has long chassis to reach under vehicles with a large overhang. Foot pedal brings saddle up to load quickly. Big forged saddle is easy to spot. Automatic overload valve protects cylinder. Handle locks in three positions for easier moving and convenient storage.

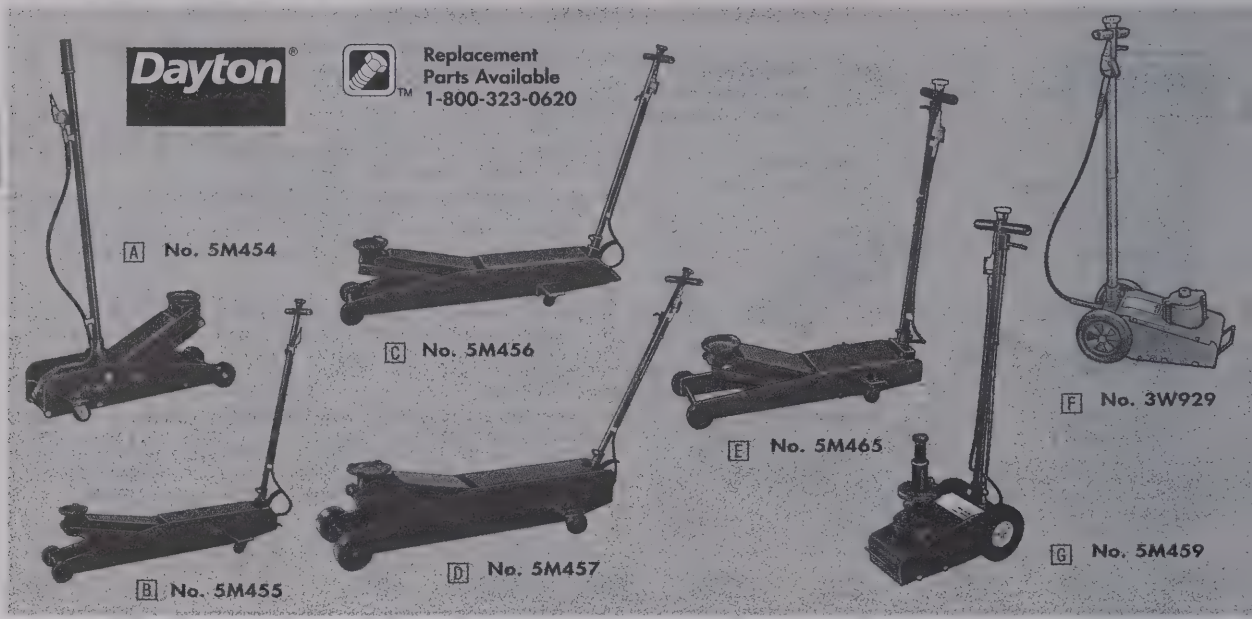
| 75 | 10,000 |

No. 3ZC03
10 Ton Air-Operated

Replacement Parts Available 1-800-323-0620

- **Extra long handle and chassis for easy positioning under low overhangs**
- **Sealed hydraulic unit and oil filter screen keeps out dirt, grit, and grime**
- **Automatic valve prevents overloading**
- **Full swivel rear casters for easy positioning**
- **Heavy-duty construction meets or exceeds ANSI standards**

**No. 5Z159 Heavy-Duty 2 Ton Hydraulic Service Jack.** Wide stance for stability under load. Dual return springs assure longer seal life. Removable split handle for easy transportation and compact storage. Flanged sideplates increase strength, resist twisting.



**Nos. 5Z160 and 3ZC02 Heavy-Duty 4 to 10 Ton Hydraulic Service Jacks.** Ideally suited for most automotive, agricultural, and repair facilities. Dual pump action provides speed to contact the load and power to lift it. Handle adjusts to three pumping positions. Large handle knob provides fine load release control. T-handle permits easier maneuvering. Extra strong, unitized steel sideplates resist twisting.

**No. 3ZC03 Heavy-Duty 10 Ton Hydraulic/Air-Operated Service Jack** has all features of the heavy-duty 4 to 10 ton hydraulic service jacks listed above. In addition it can be air or manually operated.

# AIR-ASSISTED HYDRAULIC SERVICE JACKS

## SERVICE JACKS

### A B C D AIR/MANUAL HYDRAULIC SERVICE JACKS

Used for lifting part of a total vehicle (i.e., one wheel). Applications include use in automotive, truck, farm, industrial and construction. Features a powerful air motor for lifts of rated load, and conventional foot pumping and handle pumping. Jacks are equipped with a built-in by-pass device to prevent damage to jack from overpumping. An internal safety valve prevents damage to jack from overloading. Meets ANSI/ASME PALD 10B.

### E AIR/MANUAL LOW CHASSIS SERVICE JACK

Same features as air/manual hydraulic service jacks, above. For automobiles with ground effects packages and trucks with low body construction. Meets ANSI/ASME PALD 10B.

**1-YEAR LIMITED WARRANTY**

**Dayton Electric Corporation warrants jacks for one year. Text of warranty available on request. See "Manufacturer's Warranties" on page opposite inside back cover.**

## TRUCK JACKS

### F 22 TON AIR-OVER HYDRAULIC TRUCK JACK

**Compact, low profile design for maximum access.** Unit fits easily between the wheels of a tandem axle vehicle. Two-speed action of air-assist motor quickly raises saddle to lift point and then powerlifts load to desired height. Uses standard coupler hook-up to a shop compressor with air regulator control lever handle conveniently located. Pressure relief valve is located on top of handle for metered control and load height adjustment. Reinforced air hose is resistant to chemicals and temperature extremes. Oversized rubber wheels allow easy maneuvering under the lift load. Safety bypass mechanism protects hydraulic system from accidental overload. Meets ANSI/ASME PALD 10B.

### G 22/35 TON AIR HYDRAULIC AXLE JACK

**Provides quick, effortless lifts of rated capacity loads.** For lifting automotive, low clearance bus, farm, marine, industrial, and construction vehicles. Features powerful air motor and stamped steel frame construction with steel base. First ram piston has a capacity of 35 tons, second ram piston has capacity of 22 tons. Double ram design allows jack to have low saddle height of 8" while maintaining the same maximum lifting height as a comparable single ram design. Meets ANSI/ASME PALD 10B.

LINCOLN

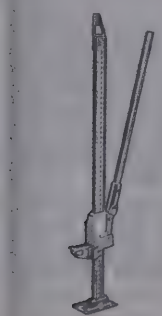
No. 5Z330 Air/Hydraulic Service Jack

## 20 TON AIR/HYDRAULIC SERVICE JACK

**For use on trucks,** construction equipment, and agricultural equipment; low height for lifting loaded trailers and trucks by the axle. Compact size makes it easy to transport and store.



**Extension screw permits** pick up height adjustment from 9½ to 12".

**Patented "Speed-Pak"** provides quick, effortless lifts with air power.

**Automatic valve prevents overloading.** Large semi-pneumatic tires for mobility.

**Air pressure for rated capacity:** 140 PSI (75 PSI for 19,700 lb. load). **Handle length:** 50". Lincoln brand.

Lincoln warrants jacks for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## HIGH-LIFT UTILITY JACK

- **Heavy-duty, cast iron construction meets or exceeds ANSI standards**

**For lifting, pulling, clamping, and spreading** on tractors and four-wheel drive vehicles. Low pick up with lifting nose 4½" from bottom of base plate.

**4" long lifting nose** for safe, positive contact with load. Adjustable top clamp clevis can be moved to any position on the upright steel standard for clamping operations.

**Exposed working parts** for easy cleaning and lubing. Safety shear pin prevents loading jack beyond rated capacity. Upright steel standard can be reversed for longer wear. Automatic operation lowers load step-by-step. Lincoln brand.

# ENGINE STANDS & TRANSMISSION JACK

## AUTOMOTIVE ENGINE STANDS

- Heavy-gauge tubular construction
- 4 Heavy-duty industrial steel bearing casters for easy maneuvering
- H-shape design on No. 3W931, U-shape design for added stability and load centering on No. 3ZC70
- Head swivels 360° with an adjustable locking mechanism
- Adapter arms hold engine secure for head and shaft removal
- Quickly disassembles for storing or transporting
- Extra long handle with rubber grips for easy rotation of engine
- Slotted arm adjustment makes attachment easy
- Rugged gray enamel finish, and heat treated bolts for lasting performance
- Provides easy service access to auto, truck, marine, generator and air compressor engines
- 1-Year Limited Warranty

## AIR/MANUAL HI-LIFT TRANSMISSION JACK

- Provides quick, effortless lifts of rated capacity loads
- Lifting transmissions, differentials of automotive, farm, marine vehicles
- Features powerful air motor, stamped steel frame construction with steel base
- Jack can be operated by air or with manual foot pedal
- Air pressure requirement at rated capacity: 90-175 PSI
- Saddle has side and tilting angle adjustment to fit onto different shapes of various transmissions, differentials
- Hydraulic cartridges installed in pneumatic and manual operating oil circuit provide overload protection
- Oil by-pass mechanism offers stroke limitation of ram piston
- Metered release valve assures precise adjustment of saddle height and smooth lowering of load
- Meets ANSI/ASME PALD 2

| Capacity (Lbs.) | Saddle Low (In.) | Saddle Height (In.) | Stock No. | Each | Shpg. Wt. |

LINCOLN

No. 5Z167 1/2 Ton Capacity

No. 5Z158 1/2 Ton Capacity

Replacement Parts Available 1-800-323-0620

No. 3ZC01 1 Ton Capacity

## AIR/HYDRAULIC HIGH-LIFT TRANSMISSION JACK

- 1000 lb. capacity; 75" max. lift height
- Air provides fast, easy lift in first stage; hydraulics provide smooth, precise lifting in second stage
- Head can be tilted 10° side to side, 50° forward, and 20° backward for proper alignment of splines and bolt holes
- Heavy-duty construction meets or exceeds ANSI standards

Combines air and hydraulic power for maximum speed and accuracy. Widespread swiveling casters provide sure, smooth maneuverability. Four ratcheting brackets fit transmission pan flanges, hefty steel safety chain helps anchor transmission, and easy-to-grip knobs speed under-hoist transmission removal and installation allowing user to work faster. Air pressure for rated capacity: 90 PSI. 36H x 41L x 41"W. Lincoln brand.

## HEAVY-DUTY HYDRAULIC TRANSMISSION JACKS

- 1000 or 2000 lb. capacities
- Head can be tilted side to side, forward and backward for proper alignment of splines and bolt holes
- Easily adjusts to 0.030" or less
- Heavy-duty construction meets or exceeds ANSI standards

DIMENSIONS

- No. 5Z158: 33L x 20W x 5½"H
- No. 3ZC01: 50½L x 29½W x 10"H

Handles passenger car and truck automatic transmissions. Fits front wheel drive transaxles and many air-cooled VW engines. Smooth hydraulic operation permits precise raising and lowering. Four adjustable load support arms swivel to fit around all transmission pan flanges. Double pump handle allows jack to be operated from either side. Four full swivel ball bearing casters for easy maneuverability. Wide support base provides stability under load. Lincoln brand.

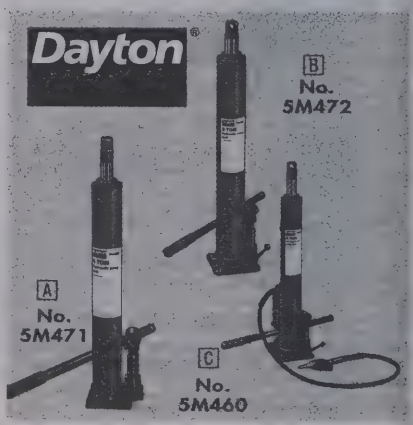
## HYDRAULIC CRANE JACKS



- Used in engine cranes for lifting automotive, marine, and industrial engines
- Comply with all applicable safety standards including safety valve and travel limit requirements

## AIR/MANUAL HYDRAULIC CRANE JACK

- Minimum 90 PSI required to lift rated capacity loads
- Manual function allows for normal operation anywhere, even without air supply
- Recommended air supply—90-150 PSI at 7.8 CFM, 3HP recommended

# HYDRAULIC CRANE AND CRANE JACKS

## 2 TON HYDRAULIC CRANE

**1-YEAR LIMITED WARRANTY**

Winner warrants cranes and crane jacks for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- For convenient lifting and transportation of automotive and truck engines or transmissions. Also useful in industrial applications for machining, rebuilding, and maintenance jobs
- Heavy gauge structural steel tube construction for maximum lifting strength
- 4 Position telescoping boom
- 4 Ball bearing casters with steel wheels for easy rolling
- Extendable legs for greater stability
- Metering-type release provides precise, controlled lowering of load
- Built-in tray for tools and small parts
- Adjustable length chain and hook assembly to wrap around and lift large objects

# TRUCK CRANE, WHEEL DOLLY, AND VEHICLE END LIFT

## PICK-UP TRUCK CRANE

Designed to help lift, load, unload, and position cargo too heavy for manual lifting. Can lift 500 lbs when installed onto a 1/2-3/4 ton capacity pick-up truck, and 750 lbs when installed onto a 1 ton capacity pick-up truck when using 12V, bi-directional 10,000 lb rolling load capacity winch with remote control. Control rate of descent is accomplished using a high torque motor, vented disk brake with double-action calipers, metal/organic pads, and 12 ft of durable weather-resistant 1/4" aircraft cable.

| Capacity | Hook Height (In.) Min. | Hook Height (In.) Max. | Boom Length (In.) | Base Size (In.) | Store Height (In.) | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 500 lb for 1/2 - 3/4 Ton Truck<br>750 lb for 1 Ton Truck | 0 | 67½ | 37 | 15¾ x 15¾ | 54 | 5M473 | $626.00▲ | 171.0 |

## HEAVY-DUTY HYDRAULIC WHEEL DOLLY

- Heavy-duty construction meets or exceeds ANSI standards
- Designed for easy removal, installation, and handling of dual wheels and large single wheels. Handles up to 52" diameter tires and wheels
- Load leveler aids alignment and reduces risk of damaged bearings, grease seals, and anti-skid sensors
- Hydraulic lifting power makes operation easy
- Carriage rollers, with self-lubricating bearings, allow tire rotation for easy lug alignment
- Four rollers guide carriage for smooth vertical lifting; two full swivel ball bearing casters for easy positioning
- Wide frame and lifting carriage enhance stability
- Built-in tool and parts tray

LINCOLN

**1-YEAR LIMITED WARRANTY**

Lincoln warrants wheel dollies for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## AIR-OPERATED VEHICLE END LIFT

- Designed for heavy-duty high lifting of cars, trucks, and buses, in service stations, garages, industrial plants and truck and bus maintenance garages
- Dual hydraulic dampers provide smooth operation and safety restraint if load is suddenly removed
- 2-stage air valve permits lifting and speed selection
- Spring-loaded front caster permits base to contact ground under load for excellent stability and support
- 10-position lifting saddles assure maximum grip and load contact
- Telescoping lifting arms facilitate lift position and compact storage

### 1-YEAR LIMITED WARRANTY

Lincoln warrants jack for 1 year. Text of warrant, available on request. See "Manufacturers' Warranties on page opposite inside back cover.

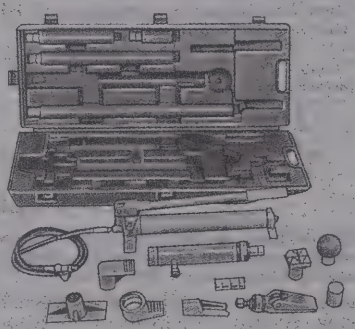
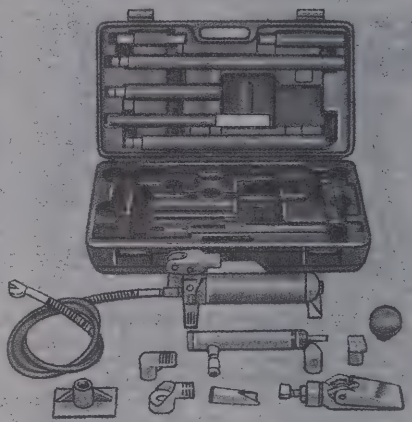
# HYDRAULIC RAM SYSTEMS AND AIR HYDRAULIC PUMP



## 4- AND 10-TON HYDRAULIC RAM SYSTEMS

**KITS FEATURE:**



- Hand pump assembly with hose
- Heavy-duty spreader ram
- 2¾" rubber head
- Rubber faced flat base
- Ram toe and plunger toe
- Chrome plated long life ram plunger
- Serrated saddle
- Wedge head
- 90° combination head
- Easy, snap together assembly
- Kits come with a custom fitted, rugged blow molded storage case with carry handle. No. 3ZC69 has wheels for easy movement
- Safety overload protection mechanism to prevent ram and cylinder damage

## AIR HYDRAULIC PUMP

Foot- or hand-operated air hydraulic pump which operates on air pressure of 90-175PSI. Pump is used in applications where oil operating of 10,000PSI is required, such as presses, rams, and hose crimping machines. Volume of oil 61.03 cu-in. Two mounting slots on each side permit installation in more permanent locations. During use, pump does not "idle", but functions only upon demand. Internal valve will hold loads if pressure is turned off. 16¾L x 6W x 6⅝"H. Dayton brand.

**No. 5M458.** Shpg. wt. 13.0 lbs. List $385.65. Each.....**$261.25▲**

# HYDRAULIC REPAIR KITS AND MAINTENANCE SET

## 4- AND 10-TON HYDRAULIC REPAIR KITS

Made to American dimensions. Snap-lock heavy-walled extension tubes and other accessories snap together in seconds without pins or threading. Compact, lightweight pumps deliver 4 or 10 ton pressure (depending on model) with a few easy strokes. Pump automatic overload protection helps prevent damage to rams and equipment. Long stroke rams reduce need for frequent set-up changes. Winner Series by Lincoln.

**BOTH KITS INCLUDE:**

- **Pump, ram, and 6 ft. hose**
- **Plunger and ram toes**
- **Wedge**
- **90° combination head**
- **Male connector**
- **Serrated saddle**
- **Hydraulic spreader**
- **Rubber padded flat base**
- **Molded case**

### 4-TON KIT

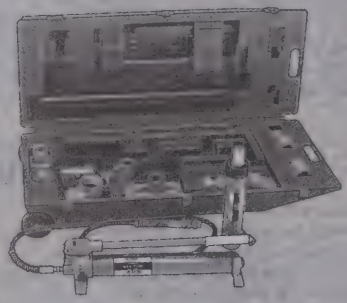
**Includes:** 3, 6, 8½, 16½, and 19½" set-up length extension tubes (overall length 1½" longer) and 2¾" rubber padded heads. Ram has approximately 4⅞" stroke. (H67700).

**No. 4Z925.** 4-Ton Repair Kit. Shpg. wt. 57.0 lbs. List $256.00. Each.....$213.50▲

### 10-TON KIT

**Also Includes:** 4, 10, 18, and 27" set-up length extension tubes (overall length 2" longer) and 3" rubber padded heads. Ram has approximately 6" stroke. (H68075).

**No. 1ZC02.** 10-Ton Repair Kit. Shpg. wt. 88.0 lbs. List $329.00. Each.....$297.00▲



(▲) Net prices, not subject to discounts.

Winner LINCOLN AUTOMOTIVE

**CAUTION: Hydraulic jacks should not be used for supporting raised loads. Garage or jack stands positioned under the load is highly recommended while performing service and when raised loads are left unattended.**

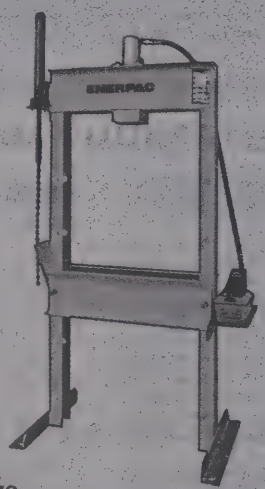
### DON'T DELAY... ORDER FROM GRAINGER NOW!

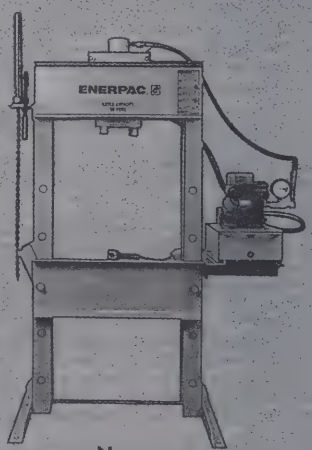
**Place your order with your local Grainger branch, and you'll be assured of prompt service, technical support, and our "No Hassle" return policy on any product ordered.**

## HEAVY-DUTY INDUSTRIAL HYDRAULIC H-FRAME PRESS SETS



- **H-frame presses are designed for general maintenance, intermittent use**
- **Complete set includes the H-frame press, cylinder, pump, hose, load gauge and gauge adaptor**
- **Heavy-duty welded frame minimizes flex under load, lasting longer than bolted or pinned-style frames**
- **The adjustable work bed is supported by pin support holes, 10" apart**

**Convenient roller head design** allows the cylinder to move across the upper frame and lock in place for off-center pressing jobs. Presses include a cylinder mounting block to allow the cylinder to be mounted into the H-frame while allowing side-to-side movement of the cylinder. The 25, 50, and 100-ton presses include the "Hydra-Lift" system, which uses an 18" stroke hydraulic jack to adjust the press bed height. It is safer and takes less time and effort than hand cranks or winches.



**Presses include** a pump mounting bracket to support the pump at the side of the H-frame. No. 3KD84 includes a two-speed hand pump (No. 4Z481); No. 3KD83 also includes a two-speed hand pump (No. 6W462). Nos. 3KD79, and 3KD80 both include the Turbo air hydraulic pump (No. 1Z907). The electric pumps on Nos. 3KD82, and 3KD81 are both 1.5 HP pumps with a 5-gallon reservoir and a 10-foot remote control pendant.

25 Ton Max. Includes Hydraulic Pump

- **15 or 25 ton capacities**
- **Available with or without hydraulic jacks**
- **Choice of Dayton, Lincoln, or Enerpac hydraulic jack combinations**
- **10 table positions**

**Feature rugged welded construction,** rigid steel channel framing, and adjustable press bed having one set of arbor plates with two cutouts to accommodate a variety of shaft sizes.

**Spring loaded jack cage** automatically retracts ram when jack valve is open.

### Nos. 7Z820 and 7Z821

Hydraulic presses include a Dayton brand hydraulic jack.

### Nos. 7Z371 and 7Z372

Hydraulic presses include a Lincoln brand hydraulic jack.

### No. 7Z985

Hydraulic press includes an Enerpac brand hydraulic hand pump, cylinder and hose assembly.

### No. 7Z986

Hydraulic press includes an Enerpac brand air powered hydraulic pump, cylinder and hose assembly.

## H-FRAME LESS HYDRAULIC JACK OR PUMP

| Frame Capacity (Tons) | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|
| 15 | 3Z915 | $939.00 | 240.0 |
| 25 | 3Z916 | 939.00 | 412.0 |

## H-FRAME PLUS HYDRAULIC JACK

| Max. Jack Capacity (Tons) | H-Frame Model | Hydraulic Jack Brand | Hydraulic Jack Stock No. | Stock No. | Each | Shpg. Wt. |

# 15- AND 35-TON HYDRAULIC PRESSES

- **Designed for industrial, automotive, and general press shop work**
- **For the removal of gears, axle and drive shaft bearings, universal joints, pulleys, wrist pins, and other press jobs**
- **Use for bending, straightening, or press applications**
- **Multiple position worktable can be vertically adjusted by hand crank**
- **Hydraulic system has built-in gauge and pressure release valve**
- **Not intended for use as a hold-down fixture for assembly work**

# BATTERY CHARGERS, TESTERS AND JUMPER CABLES

- Rugged steel cases; No. 4KC93 has thermoplastic case
- Color-coded ammeters (except No. 4KC93)
- Convenient carrying handle (except No. 4KC93)
- For 120V, 60 Hz operation
- Automatic reset circuit breakers protect against overload or reversed connection damage
- Large clamps grip securely to top or side battery terminals
- UL and C-UL Listed (E34452)

Dayton

E34452 E34452

A No. 4KC93

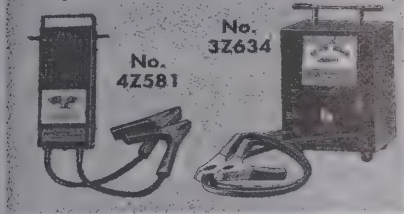
B No. 2Z197

## 6 & 12 VOLT MANUAL BATTERY CHARGERS

### A 1 AMP

- 1 amp charge rate for 6 or 12 Volt batteries
- Ideal for small engine batteries (motorcycles, snowmobiles, and riding mowers) that can be damaged if charged at more than two or three amps
- Also for warming larger automotive batteries overnight for improved cold-weather starting

### B 6/2 AMP



- 6 amp/6 Volt for cars and tractors with 6 Volt systems
- 6 amp/12 Volt for cars, trucks, and vans
- 2 amp/12 Volt for motorcycles, snowmobiles, and riding mowers

Must be unplugged when charge is complete to prevent damage to battery. Tapers to 1/2 of rated output as power builds in battery.

| Key | UL Rated Amps 6V | 12V | 24V | Taper To Amps | Manual (M) | Average Charge Time in Hours 6V | 12V | 24V | AC Cord | Primary AC Amps Input | Overall Dimensions (In.) Width | Height | Depth | Stock No. | List | Each | Shpg. Wt. |

- Tests 6 and 12 Volt batteries
- Does not draw electrolyte from battery

Dayton

## 100 AMP LOAD TYPE BATTERY TESTER

- Compact design
- Color coded voltmeter, scaled 1 to 16 volts
- 100 amp rated clamps and selector switch
- Tests charging and starter systems
- Tests batteries to 1000 cold cranking amps
- 12½H x 6½W x 3½"D

No. 4Z581. Shpg. wt. 5.0 lbs. List.....$79.81.
Each.....$63.85

## 200 AMP LOAD TYPE BATTERY TESTER

- Temperature compensation
- Tests battery performance level, battery percent of charge, and vehicle charging and starting systems
- 200 amp rated clamps and selector switch
- Detects short circuits
- Tests batteries to 1000 cold cranking amps
- 12½H x 9W x 7¾"D

No. 3Z634. Shpg. wt. 11.0 lbs. List .....$238.75.
Each.....$191.00

## CAROL® PROBOOST SLIMCLAMP™ BOOSTER CABLES

- SlimClamp™ provides easy access for hard -to-reach top and side post batteries
- Tangleproof® and flexible in extreme cold
- Built-in positive/negative identification
- For 6 and 12 Volt systems

### A STANDARD-DUTY CABLES

- 400 max. amps
- Twintron® PVC jacketed cable remains flexible to -20°F
- Copper coated contacts
- For 6 and 12 Volt systems

### B HEAVY-DUTY CABLES

- 500 max. amps
- Vutron® cable resists chemicals, acids, oil, grease, cuts and abrasions
- Remains flexible to -58°F
- For 6, 12, 24, and 48 Volt systems

# MANUAL & AUTOMATIC BATTERY CHARGERS

- Rugged steel case
- For 120V, 60 Hz operation
- Color-coded ammeters
- Convenient carrying handle
- Automatic reset circuit breakers protect against overload and reversed connection damage
- Large clamps grip securely to top or side battery terminals

## MANUAL 6 & 12V BATTERY CHARGERS & ENGINE STARTERS

Manual battery chargers must be unplugged when charge is complete to prevent damaging battery. Chargers taper to approx. 1/2 of rated output as power builds in battery.

### A 10/2/55 AMP

- 10A, 6V for cars, light trucks, tractors with 6V systems
- 10A, 12V for cars, light trucks, tractors and vans with 12V systems
- 2A, 12V for motorcycles, snowmobiles, and riding mowers
- 55A engine starting power; spins engine after several minutes of pre-charging

### B 15/2/100 AMP

- 15A, 6V for cars, light- and medium-duty trucks, tractors with 6V systems
- 15A, 12V for cars, light-, medium-duty trucks; tractors, vans with 12V systems
- 2A, 12V for motorcycles, snowmobiles, and riding mowers
- 100A engine starting power; spins engine after minimal pre-charging

### C 30/2/150 AMP

- 30A, 6V for cars, light & medium duty trucks, tractors with 6V systems
- 30A, 12V for cars, light trucks, and tractors with 12 volt systems
- 2A, 12V for motorcycles, snowmobiles, and riding mowers
- 150A engine starting power; spins engine after several minutes of pre-charging

## AUTOMATIC COMPLETE CUT-OFF 6 & 12V BATTERY CHARGER AND ENGINE STARTERS

**For deep-cycle and conventional batteries. 12V settings** turn charger's output off completely at full charge. If battery discharges for any reason, charger will resume charging until full charge is reached again. For extended charging periods and maintaining batteries in storage. Manual 6V settings provided for added versatility. Red light indicates reverse hook-up; green light indicates battery has reached full charge and charging has stopped.

### D 10/2/55 AMP

- Manual 10A setting for 6V charging applications
- 10A, 12V for cars, light trucks, and tractors with 12 volt systems
- 2A, 12V for motorcycles, snowmobiles, and riding mowers
- 55A engine starting power; spins engine after several minutes of pre-charging

### E 15/2/100 AMP

- Manual 15A setting for 6 volt charging applications
- 15A, 12V for cars, boats, RVs, light- and medium-duty trucks, tractors, and vans with 12 volt systems
- 2A, 12V for motorcycles, snowmobiles, and riding mowers
- 100A engine starting power; spins engine after minimal pre-charging

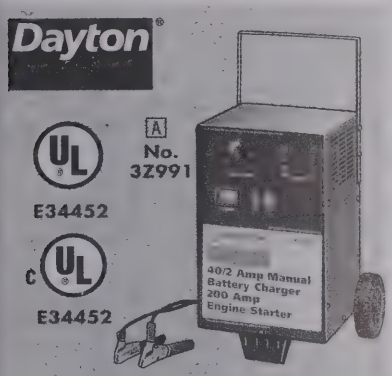
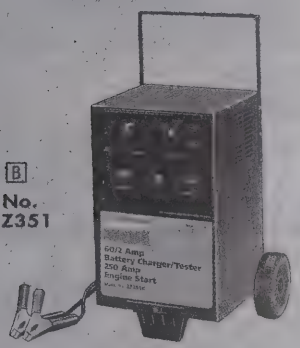
## AUTOMATIC 12 & 24 VOLT COMPLETE CUT-OFF BATTERY CHARGER

### 10A/12V, 5A/24V

- For deep cycle or conventional batteries
- 10A/12V for cars, boats, RVs, light trucks, and vans
- 5A/24V for golf carts, tractors, wheelchairs, stand-by power plants, and other 24 volt applications
- Red light signals reverse hook-up; green light indicates battery has reached full charge and charging has stopped

**Automatic complete shut-off chargers turn** output off completely at full charge. If battery should discharge for any reason, battery charger will resume charging, until full charge is reached. For extended charging periods and maintaining batteries in storage. *Works on only 12 volt setting.*





| UL Rated Amps 6V | 12V | 24V | Taper To Amps | Manual (M) Automatic (A) | Average Charge Time in Hours 6V | 12V | 24V | AC Cord | Primary AC Amps Input | Overall Dimensions (In.) Width | Height | Depth | Stock No. | List | Each | Shpg. Wt. |

*Lift it, start it, pull it with these shop-tested tough products.*

# COMMERCIAL WHEEL-TYPE BATTERY CHARGER & ENGINE STARTERS

C
No.
4KC94

For heavy-duty use in service stations, maintenance shops, farms, fleets, or garages.

FEATURES

- For 120 Volt, 60 Hz operation
- Multiple charge rates and voltages for various applications
- 2-hour timer
- Automatic reset circuit breaker protects against overload
- Heavy-duty rectifiers withstand power surges
- Color-coded meters
- 6 ft. (1.82m), 3-cond. cord
- Sawtooth clamps ensure good connection to top or side battery terminals
- Adjustable height handle
- Large wheels roll easily on rough or uneven surfaces
- Rugged steel cabinet
- UL and C-UL Listed (E34452)

## A 340/2/200 AMP

- 40 amp charge rate for 6 and 12 Volt, heavy-duty batteries
- 2 amp charge rate for small motorcycle-type batteries
- 200 amp engine start assists vehicles with weak batteries
- 2-hr. timer shuts off charger when time is up

## B 60/40/250 AMP WITH TEST

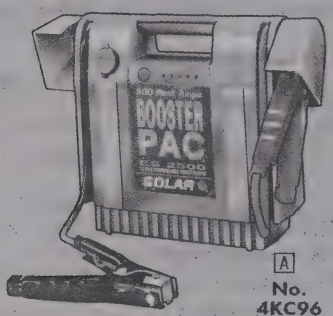
- 60 amp charge rate for 6 and 12 Volt, heavy-duty batteries
- 40 amp charge rate for most 12 Volt automotive and marine batteries
- 2 amp charge rate for small motorcycle-type batteries
- 250 amp engine start assists vehicles with weak batteries
- 2-hr. timer shuts off charger when time is up
- Test feature indicates battery percent-of-charge level, charging system performance, and problem battery conditions, such as shorted or sulfated batteries

## C 0-to-60/250 AMP, MANUAL-TO-AUTOMATIC WITH TEST

**Infinite charge control rate.** Select any rate from 0 to 60 amps for 6 and 12 Volt, lead-acid battery charging applications.

**Manual to automatic charging.** Set timer for up to 2 hours to begin charging at a higher rate. When time is up, charger automatically switches to a 15 amp automatic mode. When full charge is reached, charger shuts off output, but will turn on again if battery discharges.

- 250 amp engine start assists vehicles with weak batteries
- Test feature indicates battery percent-of-charge level, charging system performance, and problem battery conditions, such as shorted or sulfated batteries
- Red light signals reverse hook-up; green light indicates battery has reached full charge and charging has stopped
- Comes with tubular multi-height handle and rubber-tired wheels



## D 6/12/24 VOLT FLEET CHARGER

- 60 amp charge rate for 6 and 12 Volt, heavy-duty batteries
- 40 amp charge rate for most 12 Volt automotive and marine batteries
- 30 amp charge rate for 24 Volt batteries
- 225 amp engine start to assist vehicles with weak batteries
- 2-hr. timer shuts off charger when time is up

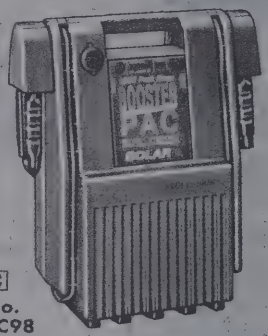
# PORTABLE BATTERY BOOSTERS



## BOOSTER PAC

A
No. 4KC96

B
No. 4KC97

C
No. 4KC98

## PORTABLE BATTERY BOOSTERS & DC POWER SOURCES

- Portable, cordless, rechargeable
- Powerful enough to start engines
- No need for second vehicle or booster cables
- Carry along in car, truck, or boat
- For farmers, tow truck operators, and service facilities
- Power 12 Volt devices such as spotlights, air compressors, radios, TVs, cellular phones, coolers and car vacs; take along camping, fishing, hunting, boating—sealed battery won't leak or spill
- Charge level lights indicate remaining power
- Heavy-duty cables and clamps grip to top or side terminals
- Safety holster prevents clamps from making unwanted contact; rotate 90° for easy storage
- Compact design features durable, non-corrosive thermoplastic case with built-in carrying handle

Charger continues to charge from any household outlet (120V, 60Hz). Nos. 4KC96 and 4KC98 include power extension cord to charge from 12V vehicle lighter socket.

### A 12V BOOSTER PAC

- 900 peak amps; 250 cranking amps to help start vehicles with weak batteries
- 17 ampere hour battery
- 1/2 amp charger and power extension cord included

### B 24V HEAVY-DUTY BOOSTER PAC

- 24 volt power for 24 volt starting, and DC power applications
- 900 peak amps; 250 cranking amps to help start vehicles with weak batteries
- Heavy-duty clamps with recessed jaws for added spark protection
- 3/4 amp charger included

### C 12V HEAVY-DUTY BOOSTER PAC WITH POLARITY PROTECTION

- 1200 peak amps; 600 cranking amps to help start vehicles with weak batteries
- 40 ampere hour battery
- Heavy-duty clamps with recessed jaws for added spark protection
- 1.5 amp charger and power extension cord included

Polarity protection prevents current flow if connected to battery in reverse. Also prevents clamps from sparking if accidentally touched together. Green light signals correct hook-up, red light warns of reverse hook-up.

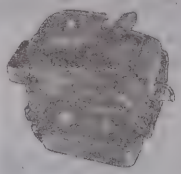
# AIR-COOLED, 4-CYCLE GASOLINE ENGINES

- Rotation CCW, facing shaft
- Maintenance-free electronic ignition

### GENERAL PURPOSE ENGINES

Feature horizontal keyed shafts suitable for applications such as driving air compressors, pressure washers, augers, pulley-driven pumps, concrete equipment, and hydraulic equipment.

### MIXER ENGINES



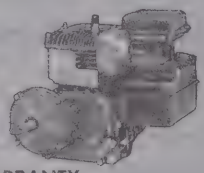
Feature integral gear box which provides PTO shaft speed of 600 RPM (6:1 reduction). Used in cement mixer and diaphragm pump applications.

### PUMP ENGINES

Feature threaded shafts suitable for mounting pump impellers.

### GENERATOR ENGINES

Feature tapered tapped shafts for mounting up to generator heads.



Standard Series Vertical Shaft Engine No. 4Z688

BRIGGS & STRATTON

Industrial Plus Series Horizontal Shaft Engine No. 3Z905

Standard Series Horizontal Shaft Engine No. 4Z686

Replacement Parts Available 1-800-323-0620

**STANDARD SERIES LIMITED WARRANTY**

Briggs & Stratton warrants all standard 2-18 HP engines installed on lawn mowers, riders, edgers, tillers for 2 years consumer use, 90 days commercial use within the U.S.A. and Canada. 1 year and 30 days, respectively, for areas outside the U.S.A. and Canada. All other standard 2-18 HP engines are warranted for 1 year consumer, 90 days commercial. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**I/C SERIES AND INDUSTRIAL PLUS SERIES LIMITED WARRANTY**

Briggs & Stratton warrants all Industrial/Commercial engines for 2 years consumer use, 1 year commercial use. Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite inside back cover.

# STANDARD SERIES GASOLINE ENGINES

# GENERATOR SELECTION GUIDE

**A generator must be properly sized** for the load it will be called upon to handle. Electric motors are particularly difficult for a generator because starting an electric motor requires 2 to 3* times its nameplate amperage or wattage.

While electricity supplied by an electric power company has essentially infinite surge capacity (limited only by the circuit protection provided), a generator is limited by the engine horsepower and inertia of the rotating parts. Thus, a current surge of short duration can be supplied by a generator, but a current demand of longer duration, such as a heavily loaded motor starting a high inertia system, can overload a generator possibly damaging both the generator and motor. A 3450 RPM air compressor motor is a prime example of this type of load.

For this reason, when determining the power your generator is to provide, it is important to calculate electric motor requirements at 3* times the running watts to compensate for the surge needed to start the motor. With this in mind, the following guidelines can be helpful in selecting the right size generator for your application.

**1.** Total the wattages of all small appliances, tools and light bulbs to be operated at the same time. Most appliances have labels showing wattage (if volts and amps are given: volts x amps = wattage). For example, you may wish to operate the following equipment:

| | |
|---|---|
| Electric heater | 1000 Watts |
| Eight 100-watt light bulbs | 800 |
| **TOTAL** | **1800 Watts** |

**2.** Next determine volt-amperes (wattage) requirement of electric motors to be operated (e.g. furnace blower motor 1/3hp), remembering that the starting requires 2 to 3* times the nameplate or running (rated) watts. Thus, if running watts of the motor is 600, multiply the number by 3 to determine max. VA needed.

Running = 600 Watts

Starting = 600 x 3 = **1800 Max. VA**

**3.** Total watts and VA in Steps 1 and 2 to get total requirements:

**4.** To allow for anticipated future needs or use of extra equipment, add 25% to total in Step 3.

**5.** See performance data charts at bottom of each generator listing for the unit that meets your total load criteria. For example, a generator that provides at least 4500 max. VA and 4000 watts which meets the load requirement for the example above. A 3000-watt generator should not be selected because it does not have enough max. VA to start the electric motor load.

NOTE: The starting (max.) VA can also be determined by referring to the Motor Code Listing which indicates starting KVA per horsepower (see chart below).

| | Running 1800W | Starting 1800 |
|---|---|---|
| Step 1 | | |
| Step 2 | + 600 | + 1800 |
| Step 3 | 2400W | 3600VA |
| + 25% | + 600 | + 900 |
| Step 4 | 3000W | 4500VA |

NOTE: If more than one motor is to be started, start one motor at a time and always start the largest first. If trying to take the entire load of the generator from a single receptacle, be sure ampere rating of receptacle is not being exceeded.

NOTE: Make sure the extension cords used with generators are properly sized for load and cord length. Otherwise, excessive voltage drops and generator loading may result and cause excessive heating of portable power tools.

(*) Some motors can require as much as 5 to 6 time their normal amperage. Check the motor code listing to be sure.

## TYPICAL ELECTRIC TOOL AND APPLIANCE WATTAGES

Note: This chart is provided to suggest typical values. Actual wattages may be significantly higher or lower depending on age, size, make, and condition of appliance.

| Equipment | Running Watts | Maximum VA |
|---|---|---|
| Light bulb (100W) | 100 | 100 |
| Radio | 150 | 150 |
| Fan | 200 | 600 |
| Television | 400 | 400 |
| Refrigerator (conventional) | 400 | 1200 |
| Furnace fan—1/3 HP with blower | 600 | 1800 |
| Vacuum cleaner | 600 | 1800 |
| Sump pump—1/3 HP | 700 | 2100 |
| Refrigerator/freezer combination | 800 | 2400 |
| 6" Circular saw | 800 | 2400 |
| Floodlight | 1000 | 1000 |
| 1/2" Drill | 1000 | 3000 |
| Toaster coffeemaker | 1200 | 1200 |
| 14" Chain saw | 1200 | 3600 |
| Water well pump—1/2 HP | 1400 | 4200 |
| Hot plate range (per burner) | 1500 | 1500 |
| 10" Circular saw | 2000 | 6000 |
| Water Heater (storage-type) | 5000 | 5000 |
| Electric oven | 10,000 | 10,000 |

## MOTOR CODE LISTING

| G | 5.6- 6.3 | P | 12.5- 14.0 | | |

## RECOMMENDED EXTENSION CORDS FOR USE WITH GENERATORS & PORTABLE ELECTRIC TOOLS

It is important to use extension cords of adequate current carrying capacity when utilizing a generator to operate portable electric tools. Undersized cords result in excessive voltage drops and additional power plant loading. This also causes excessive heating of the portable tool because voltage drop reduces tool capaci-

**DEVILBISS AIR POWER COMPANY LIMITED WARRANTY**
Generators warrantied for one year for consumer use and 90 days for commercial use. Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite inside back cover.

Repair Service Available at Most Locations-Contact Your Local Branch™

**GENERATORS:**

- Alternator with brushless design for long life, skewed laminations for low distortion power
- 7-gallon tank for extended run time
- 120/240V, 60 Hz
- Circuit breaker protection
- Vibration reducing rubber isolators standard

**ENGINES:**

**Nos. 3MK72 and 3MK73**

- Briggs & Stratton Gen Power
- Low oil shutdown system
- Large air cleaner
- Recoil start with compression release
- Cast-iron cylinder sleeve
- Solid-state ignition

**No. 3MK74**

- Briggs & Stratton Vanguard V-Twin (OHV-overhead valve engine)
- Electric start/auxiliary recoil start with compression release*
- Durabore™ cast-iron cylinder sleeve
- OilGuard™ low oil shutdown system
- Full pressure lubrication system
- Electronic ignition

(*) Battery not included, 12VDC, Group #U1, Minimum 32 Amp hour recommended

# PROFESSIONAL-DUTY PORTABLE GENERATORS

Onan®

FREE DELIVERY on orders of $900 or more
See Freight Policy

No. 3W744
6000 Max. VA

Shown with Optional Wheel Kit No. 3W940

Replacement Parts Available
1-800-323-0620™

Onan® Pro Series Generators provide quiet dependable power in the most demanding conditions. Ideal for jobsite use or for emergency power. Up to 13 hours of run time on one tank of gas. High performance Onan overhead valve engine (OHV) and wide range of premium features are standard on these units. CSA Certified (LR91388).

**GENERATORS:**

- Full protective cradle of 1" steel tubing
- Voltmeter
- Full power switch
- Twist-lock® receptacles
- Solid state voltage regulator
- 12V DC battery charger with cables
- Large fuel tank for longer run time
- Full featured, recessed control panel prevents accidental damage
- Two 120V 15 amp ground fault circuit interrupt (GFCI) outlets

**ENGINES:**

- Onan Overhead Valve Engine (OHV)
- Low oil shutdown with indicator light
- Idlematic Automatic idle control
- Combination electric and manual start
- USDA Forest Service approved, spark arresting muffler
- Full pressure lube on Nos. 3W743 and 3W744
- 1995-1998 Carb-Emissions Certified
- Full flow, spin-on type oil filters on Nos. 3W743 and 3W744

Repair Service Available at Most Locations-Contact Your Local Branch™

## OPTIONAL WHEEL KIT

**No. 3W940.** Onan (410-1166). Shpg. wt. 35.0 lbs. List.....$264.00. Each .....$225.00

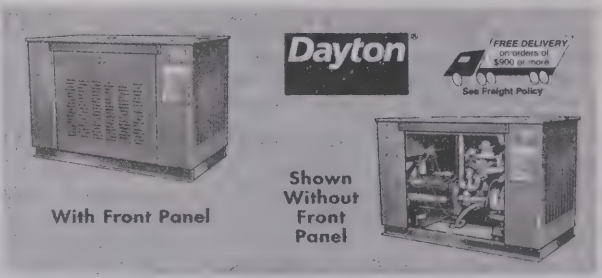
# STANDBY GENERATOR POWER SYSTEMS

**Dayton standby generator power systems** produce emergency electric power during utility power failures to keep essential heating/cooling systems, pumps, lighting, and office equipment operating. Applications include homes, commercial businesses, greenhouses, farms, industrial plants and remote communication buildings.

### GENERATORS



- **Housed in a weather-resistant, sound dampening, all-metal enclosure (included with generator)**
- **Designed for outdoor use only as a permanently installed, standby power source**
- **Includes muffler, battery rack, cables, and trickle charger**

**Generators require an automatic transfer switch** to ensure that vital electric loads are maintained without manual intervention. When a complete power loss or brown-out condition exists, generator cranks, starts and transfers specific load circuits to generator output. Transfer switch re-transfers voltage back to utility source when normal power is restored. Switch is mounted indoors near incoming electrical distribution panel.

**Also requires the use of a 12V, automotive-type storage battery**, not included. See chart below for proper battery size.

**Note:** Not for use as a primary power source or in any mobile-type application. Not operable at 50 Hz. See Generator Selection Guide for sizing assistance.

**Replacement Parts Available 1-800-323-0620**

### POWER SYSTEM

- **Automatic engine start/stop**
- **Automatic 7-day exerciser–ensures system is running satisfactorily by physically running generator for 20 min./week**
- **Overspeed, low oil, high temp., low coolant level shutdown, anti-overcrank devices–protect the engine from damage from extended usage**
- **Battery charger–keeps the engine starting circuit ready**
- **Main circuit breaker–protects the generator from overload**
- **Hour meter–monitors operating time for scheduled preventive maintenance**

**Engines can be fueled with either natural gas or LP.** Air-cooled engines provide up to 8000 watts of power, while liquid-cooled engines can provide up to 40,000 watts of power. A strict maintenance schedule of oil/filter changes, filter checks, tune-ups, and battery checks is required to ensure safe and reliable operation of generator.

**Units should be installed by a qualified electrician or contractor.** Installation may require local permits for gas piping, concrete foundation, electrical inspection and approval. Check with local building codes prior to beginning installation.

## 40kW GENERATOR CIRCUIT BREAKER SELECTION GUIDE

| Volts | Amps | Phase | Square D Model | Stock No. |
|---|---|---|---|---|

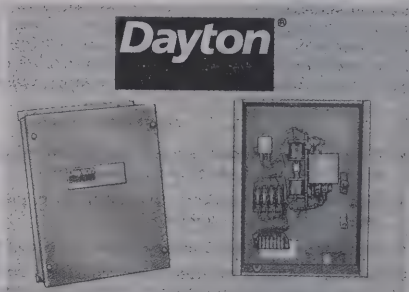
(*) Uses only one of the switches listed. See Transfer Switches for ordering information.

# AUTOMATIC TRANSFER SWITCHES



- **7-day exerciser clock starts engine every seven days at preselected time**
- **Line failure, under voltage, and generator frequency sensing**
- **For use with 2-wire starting systems**

**Dayton automatic transfer switches** prompt the automatic start-up of a standby generator and the line switching necessary to provide a smooth transition from utility to generator power.

**This crucial part of a standby generator** power system can sense the partial or total loss of utility power. It automatically exercises the generator every seven days, which keeps the generator ready for emergency start-up. The switch also provides protection for the generator by removing the possibility of utility power backfeed into the generator, limiting rapid intermittent start-up and shut-down, prolonging the life of the power system.

**These switches should be installed** by a qualified electrician or contractor, and may require local permits and inspection. UL Listed (1008), at 480V or less.

**Replacement Parts Available**
**1-800-323-0620**

Residential Switch
No. 4LM40

Commercial Switch
No. 5W911

# MANUAL TRANSFER SWITCHES

## RESIDENTIAL SWITCH

- **Easy to install and operate**
- **6 one-pole, 120V circuit or one two-pole 240V circuits plus 4 one-pole circuits**
- **15 amp max. load per circuit**
- **40 amp max. combined load**
- **L14-20P receptacle**
- **5000 watt max.**
- **Prewired flexible conduit**

**Connects portable or standby generator** to residential load center safely and quickly.

**Allows manual transfer of individual loads** to prevent overloading generator. Transfers loads of emergency circuits separately, only as needed.

**Required in many areas** to reduce the chances of backfeeding electric power to the utility lines.

**Installs in less than an hour,** without pulling the electric meter or installing a sub-panel. UL Listed (E80469). NEMA 1 enclosure.

**Replacement Parts Available**
**1-800-323-0620**

## COMMERCIAL SWITCH

- **For use with PTO, towable, or standby generators**
- **Single-phase, double throw**
- **200 amp, 250V rating**
- **200 amp auxillary contacts**
- **Multiple load lugs standard**
- **Ample wiring space for most typical installations**

**A fast, safe way to transfer loads** between commercial power and auxilary power from generators.

**Double throw switches** feature the exclusive spring-tension design and also provide snap action of contacts, so loads may be switched between sources with minimum interruption.

**Quick-make, quick-break design** minimizes contact arcing and prolongs contact life. Snap-action and floating contacts provide a positive and complete self-cleaning contact, preventing excessive contact heating.

**Lightweight, corrosion-resistant aluminum enclosures** for wall mounting. Corrosion-resistant operating handles prevent jamming due to rust. NEMA 3R oversized enclosures provide ample wiring space.

**All switches** feature lugs for aluminum or copper conductors. Wall mounting hardware included. UL Listed (E80469).

# POWER TAKE-OFF GENERATORS

- 1800 RPM
- Quick disconnect plugs
- Greater surge power
- Voltmeter visible to shaft side
- Compact design
- V/F voltage regulation 1%
- Nos. 3W954 and 3W955 single-phase operation. No. 3W956 single or three-phase operation

**Dayton PTO generators** are designed as a standby electrical power supply primarily for farm and poultry applications. Utilizes the power take-off from tractors, bulldozers, or trucks as the prime mover. Units are equipped with a new gear box ratio design that operates at 1800 RPM for longer life, quieter operation, and smoother running.

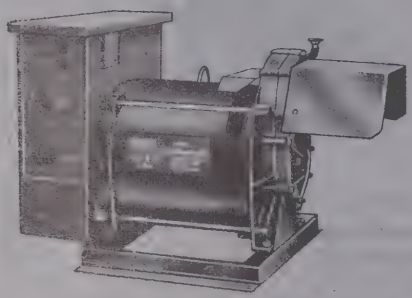
**Designed with solid state frequency** compensated ±1% voltage regulation. Provides optimized fast response to changing load conditions.

**Alternators provide** reliability and long life. Revolving field alternators are wound with fully insulated and self-ventilating characteristics.

**Rustproof sheet metal** with baked enamel finish. All sheet metal parts have electrostatically applied zinc coating that enhances paint adhesion and provides protection against rusting.

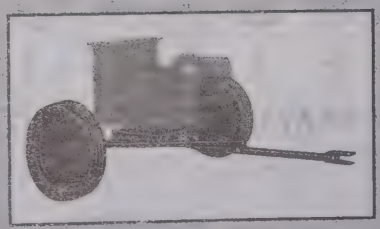
**Main line circuit breaker** is capable of handling the full output capacity of the systems while still protecting the unit.

**Easy access control panel** with a rear mounted voltmeter. Units include a lifting eye, rodent screen, and recessed drip resistant control panel.



## TRAILER KIT

For use with Nos. 3W954, 3W955, and 3W956. Made of steel. Large durable tires. Assembly required. Dayton brand.



**No. 3W957.** Shpg. wt. 262.0 lbs. List $980.95. Each ..... $853.00

- 5-years warranty on 3W954 and 3W955
- 1-year warranty on 3W956

# BELT-DRIVEN GENERATORS AND EMERGENCY STARTING GENERATORS

## BELT-DRIVEN GENERATORS

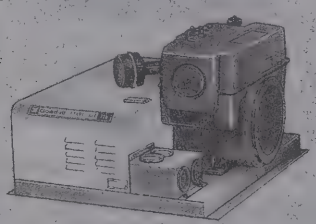
No. 5W964
4000 Watts

Replacement Parts Available
1-800-323-0620

- **Rated 3600 RPM**
- **120 and 120/240V, 60 Hz single phase**
- **Clockwise or counterclockwise operation**

For continuous portable and standby power needs. Units may be belt-driven by small gas engine or used with original powered equipment such as pressure washers, steam cleaners, and sand blasters.

Double sleeved ball bearings and revolving armature design. Drive pulley not included.



Nos. 5W963, 5W964, and 5W965 have rugged, lightweight, compact design. Nos. 5W964 and 5W965 can be hard wired or can use outlets provided. No 5W965 contains a control panel with exterior circuit breaker and voltmeter.

## EMERGENCY HEAVY-DUTY STARTING UNIT GENERATORS

No. 4W169

No. 4W170

For Use On Trucks, Cars, Oil Rigs, & Commercial & Industrial Equipment

FREE DELIVERY on orders of $900 or more
See Freight Policy

- **Heavy-duty, emergency DC power safety starts vehicles**
- **Electric start and amp indicator for direct reading of output current**
- **Anti-vibration kit to reduce noise and vibration**
- **Use with 12V, 12/24V, or 24V ignition systems**
- **Positive starter with 12V electric start**
- **Includes two 30 ft. #2 gauge duplex welding cable with 500 amp clamps and canvas cover**
- **No. 4W169 has Kohler 16 HP, 4-cycle, cast-iron engine**
- **No. 4W170 has Briggs & Stratton 18 HP, twin cylinder aluminum, 4-cycle engine with cast-iron sleeves**

# GREASE GUNS AND ACCESSORIES

**All Guns Feature:**

- 4 Jaw coupler with ball check
- Heavy-duty one piece cast iron pump head eliminates "by-pass" common to pot metal or die cast heads
- Large threads for fast, easy grease reloading
- Heavy-duty double lipped rubber grease follower
- Heavy steel gauge knurled barrel for better grip and durability
- Closed loop plunger rod for better grip
- Plunger lock

A No. 6Y826

B No. 6Y829

C No. 6Y831

D No. 6Y828

E No. 6Y830

F No. 6Y836

G No. 6Y835

## A STANDARD TWO WAY LOADING LEVER GUN

- Removable plug for installing optional filler nipple
- 6" outlet pipe
- Develops up to 6,000 PSI
- Two way fill — standard cartridge, and bulk fill

**No. 6Y826.** Legacy (L1000). Shpg. wt. 3.5 lbs.
List $16.43. Each ..... $11.87▲

## A DELUXE THREE WAY LOADING LEVER GUN

- Filler nipple may be used as air bleeder valve
- 6" outlet pipe
- PVC hand grip
- Develops up to 6,000 PSI
- Three way fill — standard cartridge, bulk fill, and grease transfer pump

**No. 6Y827.** Legacy (L1100). Shpg. wt. 3.5 lbs.
List $18.45. Each ..... $17.82

## B ONE HAND, PISTOL TYPE, THREE WAY LOADING GREASING GUN

- Filler nipple may be used as air bleeder valve
- 6" outlet pipe
- Develops up to 6,000 PSI
- Removable ball check and spring — field repairable
- 3 way fill — standard cartridge, bulk fill, and grease transfer pump

**No. 6Y829.** Legacy (L1150). Shpg. wt. 3.5 lbs.
List $23.46. Each ..... $18.68

## C OIL SUCTION GUN

- Heavy-duty knurled barrel
- 16 oz. capacity
- Flexible vinyl hose
- Rugged design

**No. 6Y831.** Legacy (L1700). Shpg. wt. 2.0 lbs.
List $16.79. Each ..... $13.26

## D ADJUSTABLE OUTLET PIPE WITH COUPLER

- Locks in any position
- Rotates 360°
- Easy access for hard to reach fittings
- 1/8" MNPT fits any standard grease gun

**No. 6Y828.** Legacy (L2455). Shpg. wt. 0.3 lbs.
List $13.05. Each ..... $9.14

## E HYDRAULIC COUPLER

- 3 Jaw coupler
- Ball check type
- Narrow design, for use with hand equipment only
- 1/8" FNPT threads

**No. 6Y830.** Legacy (L2000). Shpg. wt. 0.1 lbs.
List $3.94. Each ..... $3.08

## F WHIP HOSE

- For use with all hand-operated guns
- H.D. wire braid/rubber hose
- 1/8" MNPT both ends
- 3000 PSI max. working pressure
- 13,000 PSI min. burst

| Length | Legacy Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 12" | L2200-GRA | 6Y836 | $8.64 | $6.14 | 0.3 |
| 18 | L2210-GRA | 6Y837 | 10.59 | 7.55 | 0.3 |
| 24 | L2220-GRA | 6Y838 | 14.61 | 10.93 | 0.4 |

## G WHIP HOSE WITH COUPLER

Includes No. 6Y836 12" whip hose with No. 6Y830 hydraulic coupler.

**No. 6Y835.** Legacy (L2205). Shpg. wt. 0.3 lbs.
List $10.59. Each ..... $8.05

## GREASE INJECTOR NEEDLE ADAPTER

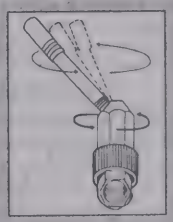
- For bolts and tight places
- For sealed bearings
- Fits standard grease gun coupler
- For use with hand equipment only

**No. 6Y832.** Legacy (L2100). Shpg. wt. 0.1 lbs.
List $5.17. Each ..... $3.41

## NEEDLE NOSE DISPENSER

- For a fine line of controlled grease
- 1/8" FNPT
- For use with hand equipment only

**No. 6Y833.** Legacy (L2110). Shpg. wt. 0.1 lbs.
List $7.12. Each ..... $5.65



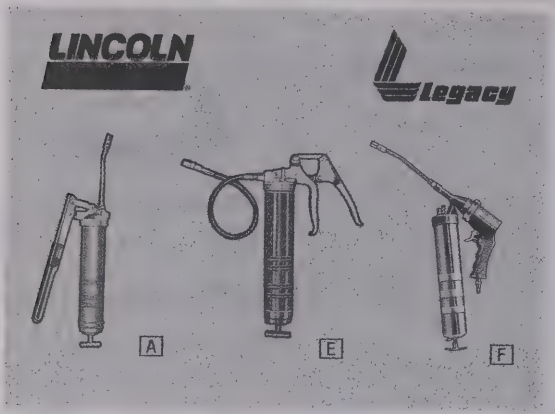
## NEEDLE NOSE ADAPTER

Same as No. 6Y833 but with locking sleeve adapter. Locks tightly onto hydraulic coupler.

**No. 6Y834.** Legacy (L2120). Shpg. wt. 0.2 lbs.
List $12.75. Each ..... $9.96

360° SWIVEL FITTING

**PLEWS**



- Swivels in full 360° circle with 12 position locks
- 45° fitting angle allows easy access to hard to reach grease fittings
- Grease coupler and extention pipe are included
- 1/8" female inlet allows easy assembly to standard grease guns
- Use with hand grease guns only

**No. 4F368.** Plews (05-057). Shpg. wt. 0.4 lbs.
List $22.68. Each ..... $12.72

(▲) Net Prices, not subject to discounts.

# GREASE GUNS

## GREASE GUNS

### A B C LEVER TYPE GREASE GUNS

A **No. 6Y888** is the standard lever grease gun with cast iron pump head.

B **No. 6Y889** is the same as No. 6Y888 except with handle grip and vent valve for purging air from gun and variable stroke, variable pressure feature.

C **No. 6Y892** is the same as No. 6Y888 except with 18" whip hose and end coupler.

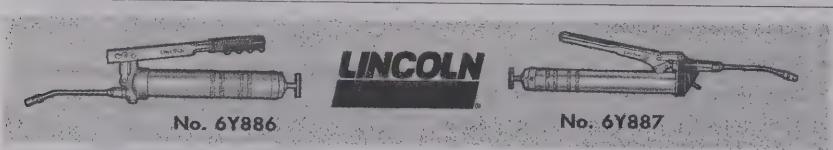
### D E PISTOL TYPE GREASE GUNS

**Nos. 6Y895 and 6Y894** are identical except for the nozzle extension.

D **No. 6Y895** comes with a 6" straight pipe nozzle extension.

E **No. 6Y894** comes with an 18" flexible hose nozzle extension.

### F AIR-POWERED GREASE GUN



F **No. 6Y885** Pistol type gun with rigid and flexible extensions. 40:1 ratio with air input range of 30-150 PSI. Legacy brand.(L1455-GRA)

**All Grease Guns Feature:**

- Cadmium plated gun head, toggle and handle assembly
- High gloss barrel finish
- Long lasting polyurethane paint
- Coupler included
- Two way filling—suction and cartridge

| Key | Lube Capacity | Extension (In.) | Length (In.) | Operating Pressure | Strokes for 1 oz. Output* | Model No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| A | 16 oz. bulk or 14½ oz. cartridge | 6 | 21¾ | 6000 | 33 | 1142 | **6Y888** | $25.50 | **$21.20** | 4.0 |
| B | | 6 | 21¾ | 6000 | 33 | 1148 | **6Y889** | 32.50 | **25.60** | 4.0 |
| C | | 18 hose | 21¾ | 6000 | 33 | 1147 | **6Y892** | 30.50 | **25.60** | 4.0 |
| D | 16 oz. bulk or 14½ oz. cartridge | 6 straight pipe | 15½ | 6000 | 33 | 1132 | **6Y895** | 37.95 | **33.25** | 3.4 |
| E | | 18 flex. hose | 15½ | 6000 | 33 | 1133 | **6Y894** | 39.95 | **35.45** | 3.5 |
| F | 14 oz. bulk or cartridge | rigid and flexible | — | 1500-6000 | NA | L1455 | **6Y885** | 79.07 | **69.90** | 4.0 |

(*) Using No. 1 grease at 70°F. Barrel diameter 2¼".

No. 6Y886 No. 6Y887

## HEAVY-DUTY GREASE GUNS

### HEAVY-DUTY DUAL PRESSURE GREASE GUNS

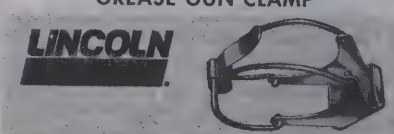
- Long life cast iron head
- Dual pressure—high or low—for light or heavy-duty greasing action
- Full pressure on short strokes—allows heavy greasing in tight places (develops full pressure with 1/4" minimum stroke)
- Extension swivels 360° • 3 way loading—cartridge, filler pump or bulk
- Grease resistant rubber handle grip provides comfortable, sure grip for positive pumping action

### HEAVY-DUTY HIGH PRESSURE AND VOLUME GREASE GUNS

- Toggle mechanism design—uses compound leverage for high pressure pumping
- All weather use—zinc plated gun barrel and handle, cast iron head, black enamel paint for rust and corrosion resistance
- Filler nipple for fast refill • Large capacity barrel

| Lube Capacity | Nozzle Extension (In.) | Overall Length (In.) | Maximum Pressure (PSI) | Number of Strokes for Output* | Lincoln Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **HEAVY-DUTY DUAL PRESSURE GREASE GUNS** | | | | | | | | | |
| **16 oz. Bulk or Cartridge (14½ oz.)** | 6 | 22⅞ | 7000 or 6000 | Low Pressure: 18 High Pressure: 33 | 1013 | **6Y886** | $78.50 | **$63.70** | 4.0 |
| **21 oz. Bulk or Cartridge (14½ oz.)** | 6 | 25¼ | | | 1145 | **6Y891** | 82.50 | **68.15** | 4.6 |
| **HEAVY-DUTY HIGH PRESSURE AND VOLUME GREASE GUNS** | | | | | | | | | |
| **21 oz. Bulk or Cartridge (14½ oz.)** | 6 | 27¼ | 7000 | 25 | 1035 | **6Y887** | 125.00 | **99.70** | 6.0 |
| **21 oz. Bulk or Cartridge (14½ oz.)** | 6 | 27¼ | 3000 | 9 | 1037 | **6Y890** | 127.50 | **102.95** | 7.0 |

(*) Lubricant output using No. 1 cup grease @70°F. Barrel diameter 2¼".

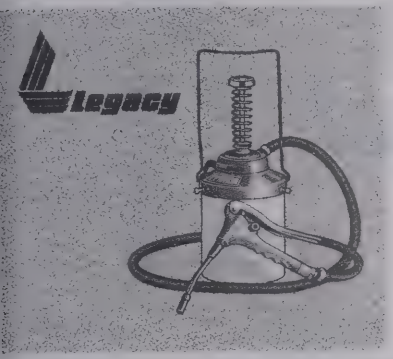


## PISTOL GRIP MINI-GREASE GUN

Handles on-the-spot lube requirements for trailers, boats, mowers, RV's, power tools, etc. All metal construction. Can be cartridge or bulk loaded (suction filled). 3 oz. capacity. Hand grip for easy lever action. Comes with 6" rigid extension and coupler. Lincoln brand (1138).

**No. 6Y893.** Shpg. wt. 1.9 lbs. List ..... $24.00.
Each ..... **$19.04**

## GREASE GUN CLAMP



Mounts on tractor, truck, machine or workbench holding grease gun for easy access when needed. Snap-latch cinches all 2¼" diameter barrel guns securely. Lincoln brand (82760).

**No. 6Y855.** Shpg. wt. 0.3 lbs. List ..... $9.40.
Each ..... **$7.34**

# MANUAL GREASE AND GEAR OIL PUMPS

## MINI-LUBE GREASE PUMP

- Performs like larger equipment with added portability. Fits 7 lb. (1 gal. US) container. Use No. 4F981 Mobilgrease® HP on page 2771
- Spring-load mechanism provides up to 30 shots before repriming
- Pressurite™ self - bleeding gun features push button controller either high volume or high pressure up to 10,000 PSI
- Flexible 6.5 ft. hose with 360° swivel
- Built - in strainer for clean grease delivery
- For use with grease up to NLGI No. 2
- Rubber edged follower plate.

**No. 4F984.** Legacy brand (K6). Shpg. wt. 0.9 lbs. List $248.28. Each ..... $169.75

## ARO®-PAK GREASE DISPENSER

- Portable, long-lasting grease supply suitable for on-the-spot vehicle/machinery maintenance
- Holds 5 lbs. and 40 PSI air prime for fast delivery
- Comes with 4 ft. of 1/2" I.D. hose and medium pressure control handle
- Delivers both NLGI #1 and #2 grease
- Develops up to 7500 PSI at control handle

**No. 4F317.** ARO brand (640110). Shpg. wt. 10.0 lbs. List $468.00. Each ..... $360.00

## ARO® GREASE AND GEAR OIL PUMPS • ARO is registered to ISO 9002

- Economical lubrication supply
- Fits 35 lb. pails
- Adjustable ratio delivers 1/4 oz. per stroke
- Comes complete with booster control handle, 10 ft. material hose, drum cover and follower plate

**No. 2P685.** ARO brand (611016). Shpg. wt. 24.0 lbs. List $510.00. Each ..... $460.75

### HAND-OPERATED FILLER PUMP

- 6:1 ratio provides fast filling
- Rugged, durable construction
- Fits 35 lb. pails
- Includes drum cover, follower plate and three grease gun adapters

**No. 2P777.** ARO brand (611406). Shpg. wt. 7.0 lbs. List $62.00. Each ..... $59.40

### 35 LB. PAIL GEAR OIL PUMP

- Fast, economical heavy oil supply
- Simple hand operation
- Heavy gauge metal drum cover
- 5 ft. material hose and dispensing nozzle included
- Adjustable ratio (2:1, 4:1, 7:1) for delivery at various speeds

**No. 2P776.** ARO brand (611170). Shpg. wt. 13.0 lbs. List $199.00. Each ..... $162.00

## LINCOLN

Replacement Parts Available
1-800-323-0620™

## FILLER PUMPS

### A 5 GALLON/35 LB. CLAMP-ON FILLER PUMP

Clamps to any 25-50 pound refinery container. Handles medium and light lubricants in any weather. Includes pump, filler socket, follower plate and ribbed steel drum cover. Rust resistant. Tube size: 1½".

### B 120 LBS. STATIONARY FILLER PUMP

For use with refinery drums with maximum head diameter of 14⅝" and overall height of 26⅝". Includes pump, filler socket and drum cover with one set of adjustable screws to accommodate variations in drum diameter. Delevers 1 oz. per stroke. Red enamel finish; black pump head and handle.

| Key | Container Size (Lb.) | Dimensions (In.) | Lincoln Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| A | 25 - 50 | 20 H x 12¼ W | 1296 | **6Y863** | $140.00 | **$89.10** | 7.0 |
| B | 120 | 26⅜ H x 14⁹⁄₁₆ Dia. | 500 | **6Y861** | 275.00 | **198.25** | 18.0 |

## ARO® INGERSOLL-RAND FLUID PRODUCTS

ISO 9002

No. 4F310

## HEAVY-DUTY AIR-POWERED GREASE GUN

- Heavy-duty spring, piston, and air valve provide long life in heavy service
- Heavy-duty construction provides additional protection from damage
- 5000 PSI "single-shot delivery" (150 PSI inlet)
- High pressure chamber has unique lapped fit piston which will not wear or fail as may occur with o-ring or seal
- Three fill methods—filler pump, cartridge, or suction
- Fills to a maximum 20 oz. capacity.

**No. 4F310.** Shpg. wt. 7.0 lbs. List ..... $385.00. Each ..... $318.00

# OIL DISPENSING AND TRANSFER EQUIPMENT

## GEAR LUBE DISPENSERS

Manually operated pumps which provide fast, clean refilling of differentials, gear cases and final drives. Smooth, easy pumping action (no crank or gears) dispenses all types of gear lubricants even in the coldest weather. Baked on enamel finish prevents rust and corrosion. Includes nozzle and 5 ft. hose.

### A 35 LB./5 GAL. PAIL GEAR LUBE DISPENSER

For 25-50 lb. original refinery containers. 12" I.D. clamp-on and carry style.

### B 120 LB./16 GAL. GEAR LUBE DISPENSER

For 120 lb. original refinery container. 15" I.D. drum cover style. Cast iron pump outlet body and handle provide durability. Non-totalizing meter registers in 1/4 pint gradations. Air expeller built into pump to prevent air from registering on meter. Roll-around base with large replaceable swivel casters provide ease of maneuverability. Drum not included.

| Key | Contain Size | Output* | Pump Tube Length | Lincoln Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| A | 35 lb. Pail | 1 oz. per stroke | 13" Below Drum Cover | 1293 | **6Y881** | $112.00 | **$102.35** | 7.0 |
| B | 120 lb. | 1 pt. per 7 strokes | 25¾" | 535 | **6Y899** | 551.00 | **517.50** | 36.0 |

(*) Using SAE 90 Gear Lubricant @ 70°F.

## BUCKET PUMPS

High pressure and volume bucket pumps for use with grease or oil. Compact and portable pumps dispense high pressure lubricant in any weather — even at 0°F.

### C 5 GALLON/35 LB. PAILS CLAMP-ON BUCKET PUMP

Fits 25-50 lb. original refinery container. Includes bucket cover, coupler, and follower plate.

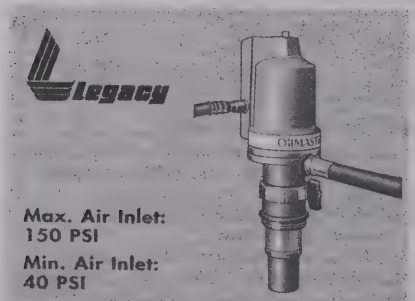
### D 30 LB. BULK SELF CONTAINED BUCKET PUMP

Comes with carrying handle and follower.

### E 40 LB. BULK SELF CONTAINED BUCKET PUMP

Comes with carrying handle and coupler.

## E LEVER ACTION TRANSFER PUMP



- **Neoprene seals resist wear and abrasive fluids**
- **Steel piston and foot valve for durability**
- **Black epoxy finish on pump body retards rust and corrosion**
- **Curved discharge spout with garden hose threads allows for convenient hose extension**
- **2-Piece telescoping suction tube fits 30-55 gal. drums**
- **Delivers 10 oz. of fluid per stroke**
- **Plews brand**

**No. 6Y857.** Shpg. wt. 5.5 lbs. List.....$56.99.
Each.....$33.40

| Key | Container Size | Max Pressure (PSI) | Hose Length (Ft.) | Dimensions (In.) | Output* | Lincoln Model | Stock No. | List | Each | Shpg. Wt. |

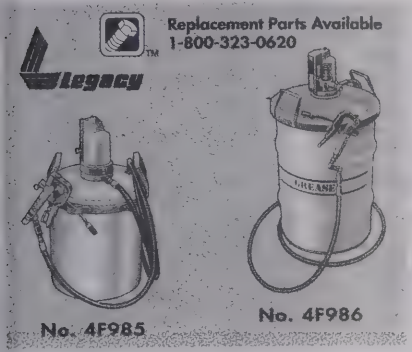
(*) Using #1 grease at 80°F.

## AIR OPERATED 5:1 RATIO OIL TRANSFER STUB PUMP

- **Nitrile Seals**
- **Use with engine oils, gear oils, hydraulic oils etc. up to SAE 140**
- **Output of 5 gallons per minute of SAE 10 150 PSI**
- **Corrosion resistant air motor (no air line oiler required) drives double acting reciprocating piston pump**
- **½" NPT(F) oil outlet**
- **Feature 2" bung adapter with 1" female oil inlet to fit kegs, drums, and bulk tanks**

**No. 4F989.** Legacy brand (T512).
Shpg. wt. 5.8 lbs. List $393.79.
Each.....$357.75

## SUCTION TUBE



Telescopic steel suction tube for 16-55 gallon drums or tanks up to 48" deep. 1"-20 UNEF male thread. Can be used with No. 4F989. Legacy brand (TB25S).

**No. 6Y643.** Shpg. wt. 0.8 lbs. List $28.32.
Each.....$26.85

## 50:1 AIR-OPERATED GREASE PUMPS

Replacement Parts Available 1-800-323-0620

No. 4F985 No. 4F986

- Corrosion resistant air motor (does not require air line oiler)
- For use with grease up to NLGI No. 2
- Maximum inlet pressure of 125 PSI
- Booster gun with 360° Z-swivel can produce up to 12,000 PSI to break through tough fittings
- 13 ft. grease hose included
- Requires a minimum of 2.5 CFM
- Rubber edged follower plate
- Containers not included

### No. 4F985 FITS STANDARD 35-40 LB./5 GALLON PAILS

**No. 4F985.** Legacy brand (P3). Shpg. wt. 18.0 lbs. List $761.25. Each ..... **$620.00**

### No. 4F986 FITS 120 LB./ 16 GALLON KEGS

**No. 4F986.** Legacy brand (P6). Shpg. wt.24.0 lbs. List $909.55. Each ..... **$744.00**

### 4 SWIVEL CASTER METAL DOLLY FOR 5 GAL. PAILS For Use with No. 4F985

**No. 4F987.** Legacy brand (TRS). Shpg. wt. 5.3 lbs. List $74.86.
Each ..... **$65.30**

### 4 SWIVEL CASTER METAL DOLLY FOR 16 GAL. DRUMS For Use with No. 4F986

**No. 4F988.** Legacy brand (TR6). Shpg. wt. 8.0 lbs. List $96.01.
Each ..... **$83.35**

LINCOLN

No. 6Y897 No. 6Y896

Replacement Parts Available 1-800-323-0620

## AIR-OPERATED GREASE PUMPS

High pressure grease pumps with 50:1 ratio. Include air coupler, heavy-duty high pressure control valve, swivel and rubber follower plate suitable for use with tapered plastic pails; 7 ft. hose.

### 35 LB. PAIL CLAMP-ON PUMP

For 25-50 lb. original refinery containers.

### 120 LB. PUMP

For 120 lb. original refinery container. Roll-around four caster base.

| Continer Size | Pump Tube Length | Lincoln Model | Stock No. | List | Each | Shpg. Wt. |

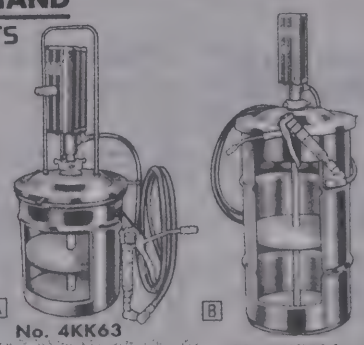
## THUNDER™ HIGH FLOW GREASE PUMP PACKAGES



- Ships complete including: pump, follower plate, drum cover, air coupler/connector, ten foot hose, and high-pressure gun (grease sold separately)
- Two distinct grease container models; 35 and 120 Lb. service
- Two distinct pressure/delivery pump models; 50:1, 60:1
- Stall-free, ice-free air motor design
- Excellent Flow Rates

# GREASE PUMP ACCESSORIES

## PUMP ACCESSORIES

### [A] LUBE ADAPTERS

#### 90° ANGLE LUBE ADAPTER

Eliminates need to remove front "deep dish" wheels for lubrication of tie rod ends and ball joints. Use to service cars, trucks, machines, and farm equipment.

#### RECESSED LUBE ADAPTER

Straight extension—use to lubricate recessed fittings where obstructions will not permit use of hydraulic coupler. Includes extension nozzle and locking sleeve.

#### 360° EXTENSION LUBE ADAPTER

7000 PSI maximum operating pressure. Includes 360° coupler for full swivel, 2" steel extension tube and locking sleeve.

### [B] NEEDLE NOZZLES

Nos. 6Y900 and 6Y856 allow operator to contact flush type or hard-to-reach hydraulic type fittings. No. 6Y856 comes with additional extension and locking sleeve.

### [C] HYDRAULIC COUPLER

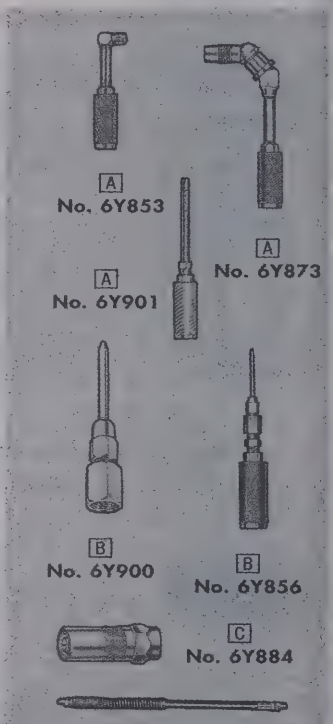
6000 PSI maximum operating pressure for No. 6Y884 and 7500 PSI maximum operating pressure for No. 6Y904. For use with all hydraulic type grease fittings. Small outside diameter permits easy contact with recessed fittings. Built-in ball check prevents leaks and lubricant back-up. Inlet 1/8" NPT female.

### [D] HOSE EXTENSIONS

For manually or air-operated grease guns. 4,500 PSI maximum working pressure. Coil spring provides non-slip, push-pull grip and prevents accidental "kinking" which could cause hose ruptures. 1/8" NPT male thread size. No. 6Y882 is 12" long. No. 6Y883 18" long.

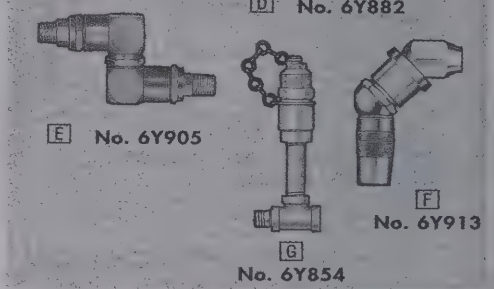
### [E] "Z" ROTATIONAL SWIVEL

Provides optimum gun movement flexibility, avoiding hose line kinks and twists.



No. 6Y905 universal swivel has 5000 PSI maximum operating pressure. Threads of 1/2"-27 male x 1/4" NPT male.

### [F] COUPLER ADAPTER



7000 PSI maximum operating pressure. Built-in 360° swivel rotation. Locks in eight 45° positions. Adjustable coupler section permits contact with fittings in reverse position. 1/8" NPT (F) inlet.

### [G] GUN FILLER ATTACHMENT

May be added to any Lincoln bucket pump. Permits fast, clean refilling of hand guns equipped with filler nipple. 3/8" NPT, inlet male, outlet female.

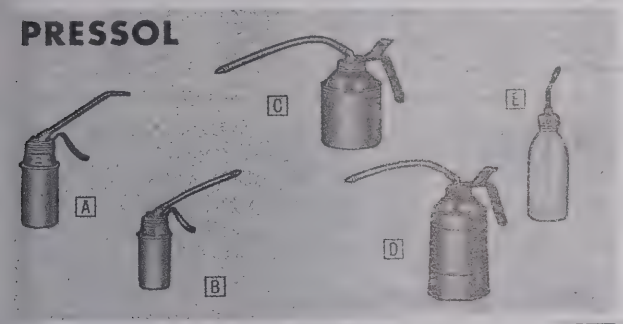
**No. 6Y864.** Shpg. wt. 1.7 lbs. List $61.50. Each ..... **$54.00**

# OILERS AND SPRAY LUBRICATOR/CLEANER



## OILERS

- Heavy-duty drawn steel construction; black epoxy coating with plated cap, spout and trigger
- Available in flexible or rigid spout styles
- Pistol oilers are for use in confined areas
- Flexible spout oilers have detachable tips with 10-32 threads and can be used for mounting hollow wire

| Key | Description | Capacity | Spout | Spout Length (In.) | Spout Tip | Plews Model | Stock No. | List | Each | Shpg. Wt. |

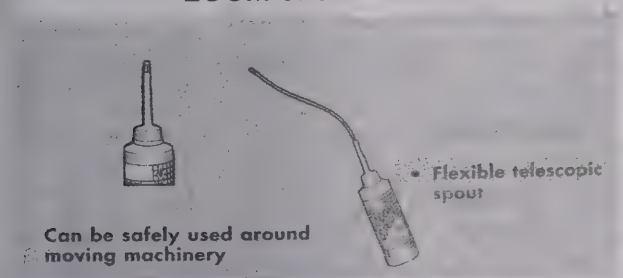
(*) Black epoxy coated cap.



## OILERS

Heavy gauge seamless steel bodies with oven baked, durable enamel finish to resist breaking and rust. Powerful force feed brass pump with two ball valves. Available in rigid or flexible spouts. Flexible spouts can be bent 360° for hard to reach places. No. 6Y750 is a plastic oiler with telescopic tube and brass spout with nozzle valve for leakproof storage.

| Key | Capacity | Spout Length (In.) | Type | Pressol Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

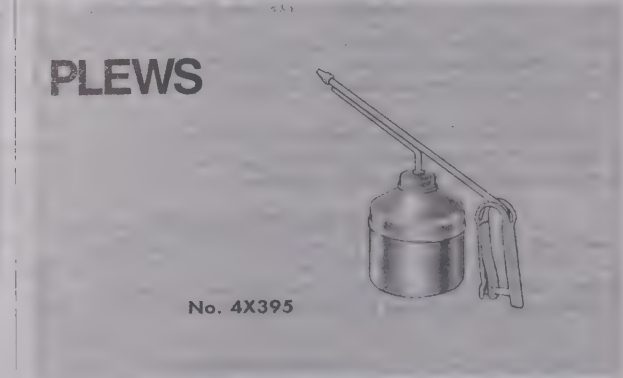
## ZOOM-SPOUT® OILER



- For use with electric motors (1/5 to 5 HP), bearings, bushings, heaters, blowers, fans, appliances, mechanical tools, air tools, etc.
- High quality multipurpose certified turbine grade oil
- Retractable telescopic tube reaches over 14½" from user's hand
- Flexible tube reaches hard to get spots

Superior quality, non-gumming, multipurpose genuine turbine grade oil. Features wetting agents and rust/oxidation/corrosion inhibitors in a paraffinic base. Effective operating temperatures up to 250°F. 4 fl. oz. Delshar brand.

**No. 4ZF11.** ❸ Shpg. wt. 0.3 lbs. List $2.49. Each ..... $1.49

## SPRAY LUBRICATOR/CLEANER

One quart capacity lubricator/cleaner for degreasing engines and equipment or applying various oils. Unit sprays light bodied cutting, penetrating, lubricating, and protective oils, and mild detergents. Clip-on spray unit attaches to standard air chuck (Speedaire No. 4X787). Plews No. 30-805.

**No. 4X395.** Shpg. wt. 1.5 lbs. List. $43.66. Each ..... $20.49

MSDS) are available. See page opposite inside back cover.

# OIL PUMPS AND ACCESSORIES

## THUNDER™ HIGH FLOW (OIL, ATF) PUMPS

- **Stall-free, ice-free air motor design**
- **Constructed with 50% fewer parts than most comparable pumps**
- **Pumps come equipped with a 2" bung adapter**
- **Low-noise, only 85-dbs.**
- **Excellent flow rates**

These portable lubrication pumps represent the latest in oil transfer technology. Their ice and stall-free air motor design is enclosed in a rugged housing that will withstand most working environments.

## CONVERTAFUNNEL™ FLOW CONTROL SYSTEM

This modular spout and funnel system lets you customize to meet your pouring needs for industrial chemicals* and oils.

(*) Chemicals compatible with these wetted materials are polypropylene, high density polyethylene (HDPE), and Viton® O-rings.

- **On/Off flow controller spout eliminates spills**
- **Add on 12" extensions to suit your needs**
- **All components are interchangeable**

# CONTROL HANDLES, CONTROL GUN, AND OIL METER

## HIGH PRESSURE CONTROL HANDLES

### A HIGH-PRESSURE CONTROL HANDLES

7500 PSI maximum operating pressure control valves for power-operated grease guns. Steel handle, body and guard bracket provide durability. Precision control inlet check valve provides ease of handle operation even with increase in pressure. Knurled handle for positive grip. Trigger guard prevents pinching. Reversible inlet check seat and hydraulic jaws provide extended life. No. 6Y877 comes with 6" extension nozzle and coupler.

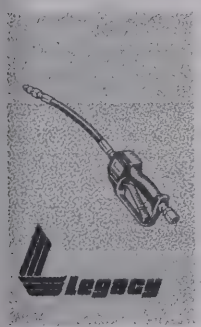
### B HIGH-PRESSURE GREASE CONTROL HANDLE

7500 PSI maximum operating pressure. Comfortable, "non-pinch" trigger. Features carbon steel construction, curved nozzle, coupler, and internal filter to avoid clogging.

### C BOOSTER GUN WITH SWIVEL

High pressure booster gun for air operated greasing system. Capable of doubling the pressure output of the pump — up to 12,000 PSI. Unlike a standard control handle a booster gun delivers extra pressure on demand for tough to grease fittings. Features 360° Z-swivel allowing easy rotation so hose does not get tangled. Great for use with hose reels. Handles up to NLGI 2 viscosity. Includes 1/4" NPT female inlet.

### D MEDIUM PRESSURE CONTROL HANDLE



2500 PSI maximum operating pressure. Light spring provides easy pull handle. Used with 14:1 ratio pump for filling cotton picker spindles.

| Key | Max. Oper. Pressure (PSI) | Inlet (In.) (NPT Female) | Outlet (In.) (NPT Female) | Mfr. | Mfr's Model | Stock No. | List | Each | Shpg. Wt. |

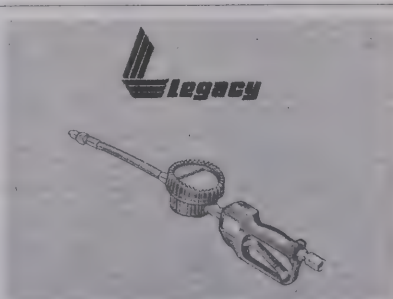
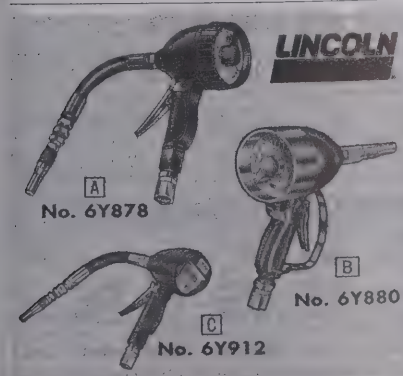
(*) Male Inlet, Adapter 3/8" Female If Removed

## LEGACY OIL CONTROL GUN



Oil control gun with 12" flexible extension and manual non-drip nozzle. Heavy duty forged brass body with tough nylon housing and trigger guard to prevent accidental dispensing. Smooth trigger operation. 2000 psi maximum operating pressure. 1/2" NPT female swivel inlet connection. Legacy brand (LCG90002).

**No. 6Y644.** Shpg. wt. 2.0 lbs. List .....$98.00.
Each .....**$91.60**



## DIGITAL OIL METER

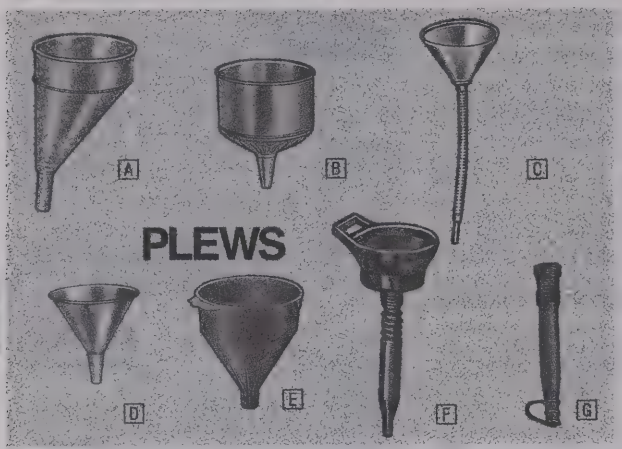
- **12" flexible extension with non-drip nozzle**
- **1000 psi maximum operating pressure**
- **Maximum viscosity SAE 240 oil**
- **Minimum flow rate 1, maximum flow rate 20 quarts per minute (with SAE 30 oil)**
- **1/2" NPT swiveling female hose inlet connection**
- **Push button calibration: pints/qts/gals/ltrs**
- **Accuracy ± .5%**
- **Resettable register**
- **3-year minimum battery life (field replaceable)**

5-digit LCD field calibratable oil meter registers in either pints, quarts, liters, or gallons and totals in either liters or gallons. Non-resettable totalizer displays up to 99,999 gallons or liters. Not suitable for use with chemicals, corrosive liquids or water. Powered by a lithium battery. Legacy brand (LCG90112).

**No. 6Y642.** Shpg. wt. 3.0 lbs. List .....$428.00.
Each .....**$380.75**

## METERING CONTROL HANDLES

### A & B ANALOG CONTROL HANDLES



Totalizing analog control handles have 1000 PSI maximum operating pressure. For oils, automatic transmission fluids, and antifreeze. Nos. 6Y880 and 6Y879 have preset countdown metering. 3½" diameter. Inlet/Outlet 1/2" NPT female. 1/2" male x 1/2" female swivel included.

### C DIGITAL CONTROL HANDLE

Easy to read digital display meter reads in .001 increments for precise measurement. Dispenses in pint, quart, gallon and liter increments. 1500 PSI maximum operating pressure. Ideal for dispensing motor oil, automatic transmission fluid, gear lube and other fluid lubricants. Powered by lithium battery.

# FUNNELS AND LIQUID MEASURES

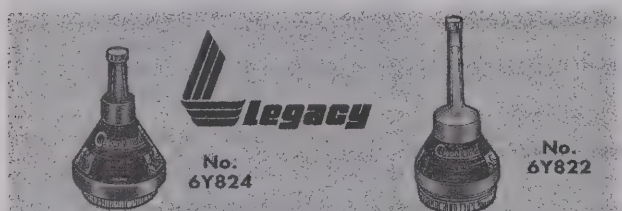
## FUNNELS

A **Offset Steel Funnel.** Heavy galvanized steel with screen. 6-qt. capacity (with blocked outlet). 14" H.

B **Standard Steel Funnel.** 8-qt. capacity (with blocked outlet). 11½"H. Galvanized steel with screen.

C **Utility Steel Funnel with Extension.** Heavy galvanized steel with flexible extension, safety strainer and tapered tip. All purpose fluid dispenser, not for use with acids.

D **Utility Tin Funnels.** Lightweight, general purpose funnels with 1 pint to 2-qt. capacities.



E **Plastic Funnel.** All-purpose polyethylene funnel is corrosion resistant. Fine mesh straining screen and hanging tabs. 6-qt. capacity.

F **Plastic Funnel with Detachable Spout.** Two-piece multipurpose funnel with detachable 12" flexible spout. Easy grip handle and strainer.

G **Easy-Pour Flex Spout.** Tough plastic flexible spout for automotive, marine, farm and home applications. Two thread sizes screw on most containers of motor oil, antifreeze, and windshield washer fluid. Stopper cap and hanging tab.

| Key | Description | Total Capacity | Flow Capacity* | Diameter (In.) | Plews Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| A | Offset Steel Funnel | 6 qts. | 6 qts. | 8¾ | 75-002 | **6Y798** | $39.79 | **$28.55** | 1.5 |

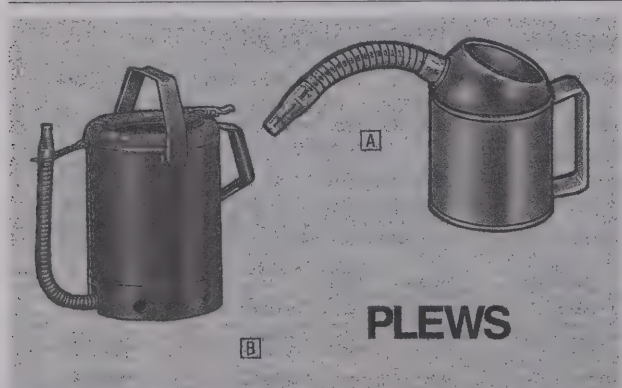
| G | Easy-Pour Flex Spout | — | — | — | 60-200 | **6Y804** | 3.79 | **2.00** | 0.1 |

(*) Flow capacity is determined by the volume of water which passes through a funnel in a predetermined time frame.



## CLEAN FUNNEL™

Funnels come with screw-on cap at each end to seal out harmful contaminants and prevent residue from leaking out during storage. Eliminates the need to clean prior to use.

## FILLERS, BATTERY CARRIER AND BATTERY TESTER

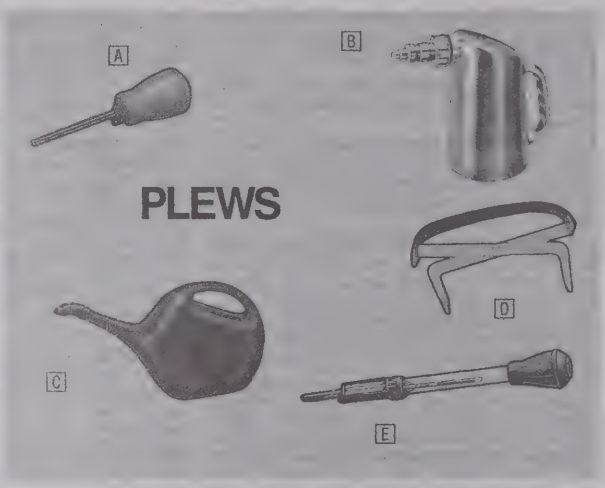
**A 6 Oz. Battery Filler.** For all fluids including battery acid. Rubber bulb remains pliable in cold weather. 6 oz capacity with 6" flex spout. Plews brand (75-033).

**No. 6Y814.** Shpg. wt. 0.3 lbs. List $7.37. Each ..... **$2.93**

**B 2 Qt. Battery Filler.** Shuts-off automatically to prevent overfilling. Heavy injected-mold body with double action shut-off valve to eliminate dripping. Plews brand (75-030).

**No. 6Y813.** Shpg. wt. 0.6 lbs. List $20.81. Each ..... **$10.77**

**C Radiator Filler.** Heavy-duty high density polyethylene won't freeze or crack in cold weather. 3 gal. capacity. Plews brand (75-025).



**No. 6Y812.** Shpg wt. 1.6 lbs. List $32.95. Each ..... **$17.39**

**D Battery Carrier.** Black baked epoxy powder paint finish steel jaws securely grip battery for lifting. Acid resistant non-conductive 17" PVC strap. Carries 6 and 12V side terminal or post batteries with one hand control. Plews brand (70-037).

**No. 6Y816.** Shpg wt. 0.7 lbs. List $15.42. Each ..... **$8.75**

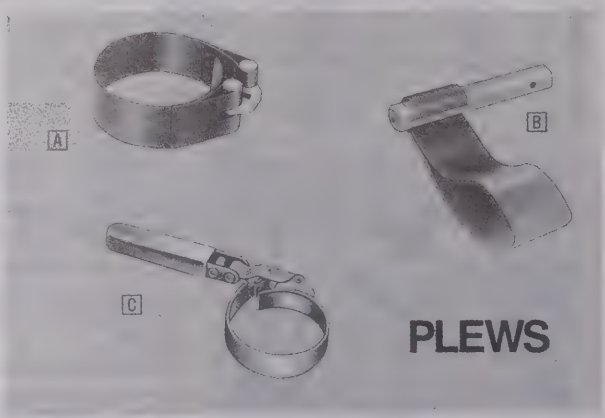
**E Professional Battery Tester.** Color-coded float accurately indicates all cell conditions at-a-glance. Thermometer permits compensated readings for all temperatures. Includes annealed glass body and float, acid-resistant bulb and tip. Plews brand (70-053).

**No. 6Y815.** Shpg wt. 0.3 lbs. List $17.28. Each ..... **$9.49**

## FILTER WRENCHES

**A Heavy-Duty Truck Oil Filter Wrench.** Low profile for heavy-duty use. Wide, tough steel band removes filters from 4 21/32 to 5 5/32" (118mm to 130mm).1/2" Drive. Plews brand (70-763).

**No. 6Y790.** Shpg. wt. 1.5 lbs. List $44.56. Each ..... **$33.45**



**B Strap Type Filter Wrenches.** Strong nylon web strap grips and holds filter tight. Adapts to any spin-on filter up to 6" in diameter. Universal applications. Use 1/2" sq. drive wrench. Oil-resistant vinyl strap. Plews brand (70-719).

**No. 6Y792.** Shpg. wt. 0.5 lbs. List $11.84 Each ..... **$10.26**

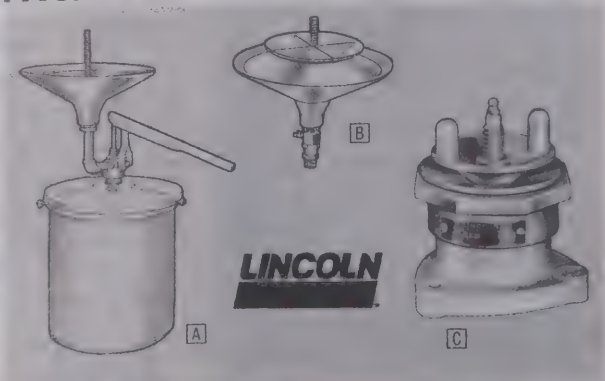
**C Swivel Filter Wrenches.** Swivel handle clears obstructions in hard to reach places. Oil resistant with vinyl grip. Steel construction with stainless steel band. Plews brand.

### SPECIFICATIONS AND ORDERING DATA

| Swivel Filter Wrench Size | Fits Filter Std. (in.) | Fits Filter Metric (mm) | Plews Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **Small** | 2 13/16-3 5/32 | 71-80 | 70-623 | **4F376** | $11.96 | **$7.95** | 0.7 |
| **Large** | 3 1/2-3 7/8 | 89-98 | 70-625 | **4F377** | 8.91 | **7.95** | 0.7 |
| **Truck** | 4 1/8-4 1/2 | 105-114 | 70-627 | **6Y791** | 8.91 | **8.79** | 0.8 |

## BEARING PACKERS

**A No. 6Y907 Wheel Bearing Packer** services bearings to 9½" with minimum 9 9/16" I.D. Includes adapter to service smaller bearings of 1 to 1¾" O.D. and follower plate. Unit clamps on 25 to 50 lb. original refinery container. Primes easily and pumps efficiently when using heavy greases at low temperatures. 21H x 2½"W. Red enamel finish on drum cover. Lincoln brand (102929).



**No. 6Y907.** Shpg. wt. 14.0 lbs. List $264.00. Each ..... **$226.50**

**B No. 6Y908 Bearing Packer Head.** For bench mounting or attachment to No. 6Y897 Powerluber. Services bearings 1¾" to 9½" O.D. with minimum 9/16" I.D. Accepts greases through fitting from high pressure control valve or hand gun. For bench mount, use 1/2" pipe flange. Lincoln brand (102891).

**No. 6Y908.** Shpg. wt. 8.0 lbs. List $155.50. Each ..... **$114.90**

**C No. 6Y909 Bearing Packer** services bearings with 5/8 to 1½" I.D. Bearing is flushed and packed by contacting fitting in packer head with power gun control valve or by high pressure hand gun. 4½"H x 4"W. Lincoln brand (816).

**No. 6Y909.** Shpg. wt. 3.6 lbs. List $123.50. Each ..... **$89.95**

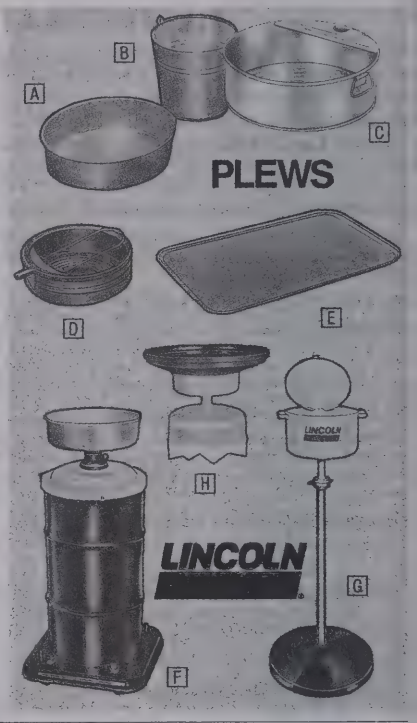
# DRAIN AND FLUID TRANSFER EQUIPMENT

## DRAIN AND DRIP PANS

**A 3½ GALLON UTILITY DRAIN PAN.** Seamless, full-drawn galvanized steel bottom for extra strength. 16D x 4"H.

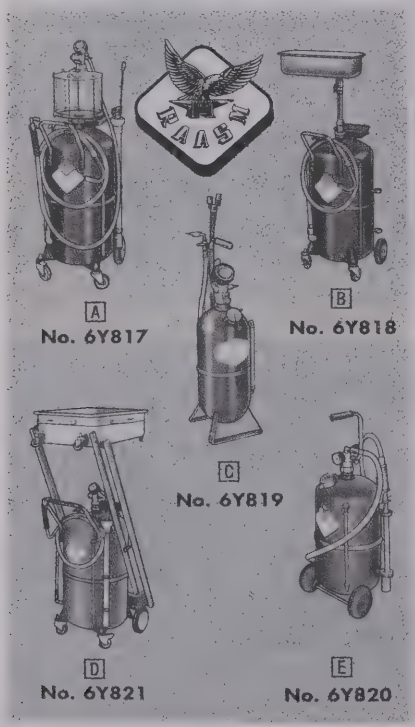
**B 12 QUART GARAGE PAIL.** Rust resistant galvanized steel metal construction. 11 Dia. x 10"H.

**C 6 GALLON RADIATOR DRAIN PAN.** Heavy-duty galvanized steel pan features rolled smooth edge and ribbed bottom for extra strength and anti-splash baffle to prevent spilling. 19D x 6"H.



**D 5 GALLON PLASTIC DRAIN PAN.** Tough polyethylene construction won't rust, dent or scratch. Pouring spout and handle allows easy spill-free pouring. Handle can be used to push pan under vehicle. Rolled edge helps prevent splashing and makes full pan easier to carry. 17.5 Dia. x 6"H.

**E DRIP PAN.** Constructed of rust resistant rugged galvanized sheet metal. Protects driveways, garage or automotive showroom floors from fluid droppings. Rolled edges for extra strength. 17½ x 25¾ x 1".



**F WASTE OIL DRAIN.** For use with 16 gallon (120 lb.) open top drum (not included). Float gauge indicates when drum is full. Includes 17" square rolling base with 2½" wheels for easy movement. Telescopic drain bowl adjusts from 42¾" to 70".

**G PORTABLE WASTE OIL DRAIN.** Lightweight, easy to maneuver. Latch trigger allows drain bowl to automatically lock at desired height. Bowl cover lid hinged for splash guard and bowl extension to catch oil flowing from hard to reach drain plugs. Spring actuated valve in drain bowl prevents leakage. Adapter bushing for draining bowl eliminates mess and clean-up. Large bowl assembly has 4.5 gallon capacity.

**H FUNNEL DRAIN PAN.** For use when a larger draining area is required. Molded plastic drain pan rests on top of waste oil drain No. 6Y902. Can be used with pedestal or portable drain devices with 6" or larger drain bowl. 24½"D bowl.

## FLUID TRANSFER EQUIPMENT

Portable tanks allow for easy transfer of oils, coolants, and other non-corrosive viscous fluids. Ideal for transferring either new or used oil from machine to bulk storage. Units come with 6 ft. transfer hose and site gauge to show tank fluid level. **NOT FOR USE WITH FLAMMABLE OR CAUSTIC LIQUIDS.**

**FOR MODELS THAT EXTRACT FLUIDS:**

Use shop air (115 psi) to depressurize tank allowing extraction of fluids. Comes with charge gauge indicating amount of available charge (vacuum).

**FOR MODELS THAT EVACUATE FLUIDS:**

Once tank is full, switch valve and charge tank (7 psi) to expel fluids.

### A EXTRACTOR/EVACUATOR

Self contained unit allows visual inspection of fluids before fluids are transferred to 24 gallon steel holding tank. Features automatic emptying of holding tank which minimizes leaks and spills. For marine, automotive, aircraft, and industrial applications. Comes with six probes/adapters for removing fluids.

### B EVACUATING OIL DRAIN

Features telescoping 3½ gallon capacity drain pan and 24 gallon steel holding tank. For use with lift or pit installations.

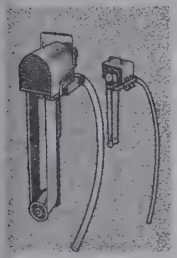
### C FLUID EXTRACTOR

4.2 gallon holding tank allows extraction of fluids. Requires manual emptying of holding tank. Comes with six probes/adapters for removing fluids.

### D MOBILE UNIVERSAL OIL CHANGER

Features 17 gallon, adjustable/hinged catch basin that can be used at floor level, with a lift, or in a pit. 30 gallon holding tank. For trucks and engines/machinery with larger fluid capacities. Comes with six probes/adapters for extracting fluids.

### E FLUID DISPENSER



Dispenses gear oils and other light viscosity fluids. 6.3 gallon rated capacity. Manual fill tank with no-splash funnel (provided). Comes with pressure gauge, 7 ft. hose and trigger control handle with built-in manual anti-drip valve.

# OIL SKIMMERS, MIST COOLING SYSTEMS, AND MICRO-DROP® DISPENSERS

## PORTABLE OIL SKIMMERS

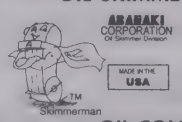
### HEAVY-DUTY PORTABLE OIL SKIMMER

Skims up to 6 GPH of oil from water. Keeps coolants, wash water, and waste water free of tramp oils. Elevates oil into drum discharge. Handles fluctuating fluid levels, high heat and harsh environments. Rated for continuous duty. Portable units are easily set up or can be permanently mounted. Use a 2" wide (SS) stainless steel belt. Includes 4 ft. clear discharge hose, on/off switch and 8 ft. cord. Stock belt lengths measured from mounting base to bottom of tail pulley.

| Base to Bottom | Abanaki Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **6 GPH*** | | | | | |
| 12" | BT2S-0018 | 6Y751 | $1180.44 | $1148.00 | 36.0 |
| 24 | BT2S-0030 | 6Y752 | 1180.44 | 1148.00 | 39.0 |
| 54 | BT2S-0060 | 6Y753 | 1180.44 | 1148.00 | 41.0 |

(*) Rated for SAE 30 oils.

### MIGHTY MINI SKIMMERS



No. 6Y757

Removes 1 GPH of oil from water. Works with oil concentrator for virtually water free oil discharge. Cleans up floating tramp oil from coolants or parts washers. Fits through 55 gal. drum bung hole. Lightweight, portable units require no assembly. 1" wide, SS belt unit can fit under a CNC machine. Includes 8 ft. cord and discharge hose. Available in 6, 12, 18, and 24" sizes (from base to bottom of tail pulley). Order dual-position mounting bracket model OMMST100 through Grainger Parts Operation.

| Base to Bottom (In.) | Abanaki Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **1 GPH*** | | | | | |
| 6 | MM100-06 | 6Y757 | $415.34 | $382.75 | 5.0 |
| 12 | MM100-12 | 6Y758 | 415.34 | 382.75 | 6.0 |
| 18 | MM100-18 | 6Y759 | 415.34 | 382.75 | 7.0 |
| 24 | MM100-24 | 6Y760 | 415.34 | 382.75 | 8.0 |

(*) Rated for SAE 30 oils.

### OIL SKIMMER ACCESSORIES

#### OIL CONCENTRATOR

Makes skimmed oil virtually water free. Keeps water and coolant from going out with the oil, conserving coolant.

**No. 6Y756.** (0DM100) Shpg. wt. 5.0 lbs. List $215.00. Each ..... **$170.00**

#### STANDS

**Drum/Tank Mount** allows quick mounting of 6 GPH portable skimmers on the edge of open drums or tanks with tank lips under 1" wide. Can also be used with oil concentrator.

**No. 6Y755.** (0TISTDM1). Shpg. wt. 7.0 lbs. List $98.76. Each ..... **$88.90**

**Storage Stand** allows easy storage of 6 GPH units. Made of carbon steel with baked on powder coating. Height 5 ft.

**No. 6Y754.** (0TIST500) Shpg. wt. 20.0 lbs. List $158.88. Each ..... **$144.45**

### MICRO-DROP® DISPENSERS

No. 6Y839

Dispenses small amounts of high efficiency lubricant to cutting tools. Air operated dispensers available in single and dual lines. Solenoid equipped models allow for remote shut-off and machine synchronization. For use in sawing, drilling, milling, and tapping operations. Come with 18" Loc-Line® nozzles and 6 ft. long lines. 16 oz. capacity reservoir. Use with Nos. 6Y842 or 6Y843 lubricants.

| Line | Operation Type | Trico Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Dual | Air | 30802 | 6Y839 | $412.00 | $391.50 | 8.3 |
| Single | Air w/ Solenoid - 115V | 30805 | 6Y840 | 412.00 | 391.50 | 7.7 |
| Dual | Air w/ Solenoid - 115V | 30806 | 6Y841 | 481.00 | 456.00 | 8.9 |

### MICRO-DROP® LUBRICANTS

No. 6Y843

Designed for use with Micro-Drop® dispensing systems or other micro-lubrication equipment (Not intended for mist-coolant systems). Non-toxic, hypoallergenic and environmentally friendly lubricants. Container size: 1 gallon. Trico brand.

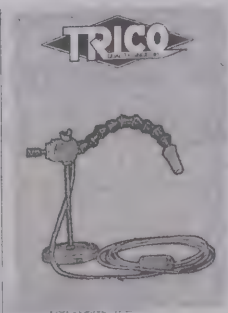
**No. 6Y842.** ❸ Advanced Synthetic Lubricant (30659-1). Shpg. wt. 8.7 lbs. List $54.00. Each ..... **$53.65**

**No. 6Y843.** ❸ Vegetable Based Lubricant (30648). Shpg. wt. 8.7 lbs. List $64.50. Each ..... **$64.20**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

## MIST COOLING SYSTEMS

### 1 QUART CAPACITY



No. 6Y845

For light-duty operations. 4 ft. line available in plastic (No. 6Y844) or brass (No. 6Y845). Features easy-to-read liquid level gauge and separate air and coolant controls. Includes mounting bracket and 3" straight brass nozzles. Trico Brand.

**No. 6Y844.** Plastic line unit Lil-Mister® (30451). Shpg. wt. 2.0 lbs. List $74.80. Each..... **$71.10**

**No. 6Y845.** Brass line unit Lil-Mister® (30453). Shpg. wt. 2.2 lbs. List $83.50. Each..... **$79.35**

### PORTABLE UNIT

Economical, easy to assemble portable unit. Comes with 7" flexible nozzle, 60 lb. magnetic base, 7 ft. siphon line with a 40 micron stainless steel filter. Trico Brand.

**No. 6Y846.** DL Mist Unit (30660) Shpg. wt. 1.0 lbs. List $54.90. Each ..... **$53.30**

### 1 GALLON CAPACITY

No. 6Y848

Heavy-duty corrosion-resistant stainless steel reservoir. Features easy-to-read liquid level gauge and individual air and coolant controls. Brass armored lines. Single line (No. 6Y847) and double line (No. 6Y848) systems available. Trico Brand.

**No. 6Y847.** Spraymaster®-SS with 1 line (30531). Shpg. wt. 5.1 lbs. List $176.00. Each..... **$170.25**

**No. 6Y848.** Spraymaster®-SS with 2 lines (30532). Shpg. wt. 6.1 lbs. List $233.00. Each..... **$221.50**

# RESERVOIRS AND ACCESSORIES

## AIR OVER OIL RESERVOIRS

For use with basic low pressure hydraulic circuits. Converts shop air into low pressure hydraulic power without the high cost of conventional hydraulic power unit. 1:1 pressure ratio. Features acrylic bowl, aluminum end plates and Buna N seals.

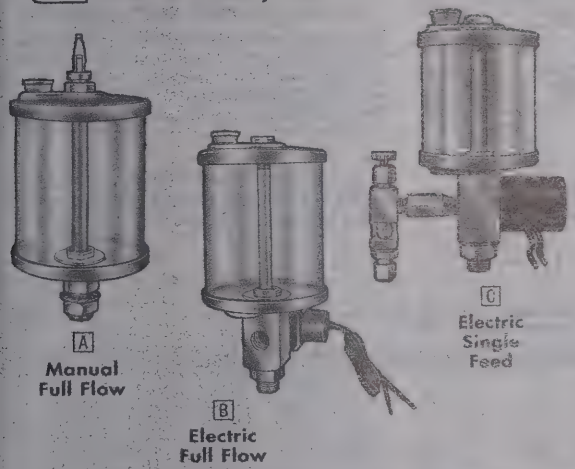
SEE PRODUCT INDEX UNDER "LUBRICANTS" FOR OTHER RELATED ITEMS

# MANUAL AND ELECTRIC RESERVOIRS

Gravity fed full-flow reservoirs. Break-resistant clear acrylic bowl allows full 360° viewing of fluid. For temperatures up to 160°F. Ratings at atmospheric pressure. Aluminum end plates and Buna N seals.

### [A] MANUAL FULL FLOW

Provides full flow of oil which can be shut off manually. Ideal when used as a central dispenser for lubrication system.



### [B] ELECTRIC FULL-FLOW

Can be connected in series to valve or valve brushes. Normally closed solenoid is usually wired across machine starting switch to provide automatic on/off full flow fluid control. 120V, 60 Hz, 1 Phase coil in solenoid.

### [C] ELECTRIC SINGLE FEED

Automatically control the distribution of lubricant through needle valve. Normally closed solenoid is usually wired across machine starting switch to provide automatic on/off fluid control. Needle valve included. 120V, 60 Hz, 1 phase coil in solenoid.

# GRAVITY FEED RESERVOIRS

Make-up or replenishing reservoirs with no-flow control function. Features clear acrylic bowl which allows full 360° viewing of fluid level and condition. Self-closing snap lid filler caps. Aluminum body and Buna N seals. Can be disassembled for cleaning. For temperatures up to 160°F. Ratings at atmospheric pressure.

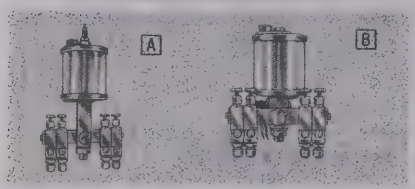
# CONSTANT LEVEL OILERS AND MULTIPLE FEED RESERVOIRS

## CONSTANT LEVEL OILERS

Automatically maintain oil levels in bearing, pump or gear housings, line shafts, moistening pads, etc. Available with acrylic bowl (for temperatures to 160°F) or glass bowl (for temperatures to 250°). Aluminum body and Buna N seals.

### A DUAL SIDE & BOTTOM OUTLET

Allow 1/2" oil level adjustment. Side and bottom outlet (1/4" NPTF). Simply remove pipe plug from outlet to be used and screw it into the unused port.



### B TOP FILL WITH SIGHT WINDOW

Large sight window with "OIL LEVEL" line clearly indicates fluid level in chamber. Side or bottom mounted. Large surge capacity. Bottom outlet can be used as drain. 1/8" PTF air vent, 1/2" NPTF outlets.

## MULTIPLE FEED RESERVOIRS

Manual and electric multiple feed oilers control lubrication of multiple points from one location. Feature break-resistant transparent acrylic bowl which allows 360° viewing. For temperatures to 160°F. Also features 5/8-1/8 central mounting shank, snap closing filler cap, aluminum construction, and Buna N seals.

### A MANUAL

Manually operated toggle lever controls on/off full flow of oil valves. Drip feed rate individually set at each valve and indicated through glass sight in valve body. Compact manifold design allows for easy removal of any of the valves.

### B ELECTRIC

Solenoid valve (120V, 60 Hz, 1 PH coil) automatically controls full flow of oil from reservoir to valves. For automatic operation; wire normally closed solenoid across machine starting switch; feeding stops when machine is turned off. Drip feed rate determined by adjustment of needle valves.

# DROP FEED—MANUAL RESERVOIRS

Dispenses oil by gravity from reservoir bowl through adjustable needle valve. Features vented sight chamber, adjustable metering, toggle shut-off, and self closing filler cap. Aluminum construction and Buna N seals. Break resistant, transparent acrylic bowl for temperatures to 160°F. Glass bowls are borosilicate for fluid compatibility, thermal shock and temperatures to 250°F. Ratings are at atmospheric pressure.

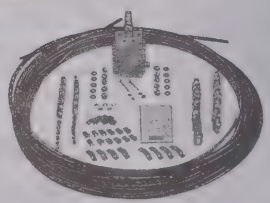
TRICO QUALITY SINCE 1917

No. 6Y849
Constant
Level Oilers



## CONSTANT LEVEL OILERS

One piece glass reservoirs prevent accidental overfilling of the oil level through leaky gaskets. Constructed of zinc cast with zinc plating. Features adjustable level setting with side and bottom ports. Available in 4, 8, and 16 oz. capacities. 1/4" pipe thread connection.

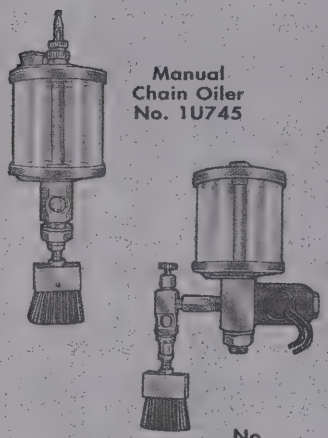
LINCOLN

## QUICKLUB® CENTRALIZED LUBRICATION SYSTEM



Contains all items required to install a lubrication system — including detailed instructions, drilling templates and service literature.

Includes:

- Metering valve – 12 outlets with cycle indicator pin, pressure relief and grease fitting
- Mounting bolts – use as self-tapping screw or as nut and bolt
- Tube fittings/closure plugs - for lubricating 2 to 12 lube points
- Feed line tubing – 100ft ¼" O.D. nylon prefilled with N.L.G.I. #1 grease
- Tube Clamps/Screws – for mounting lines securely to machine
- Snap-on Couplers – Connects feed lines to existing grease fittings

No. 6Y860. Lincoln (83712) Shpg. wt. 17.0 lbs. List ..... $398.50.
Each ..... $322.25

LUBE DEVICES, INC.

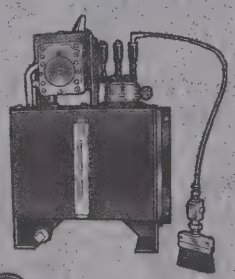
Manual Chain Oiler No. 1U745

No. 1U753 Electric Chain Oiler

## CHAIN OILER RESERVOIRS

Deliver oil at all load carrying points where motion occurs. Flexible brush bristles follow contour of moving chain, sheet stock, or cable distributing oil to critical points, reducing wear. Nylon brush bristles 1½ x 3/8" flat, acrylic bowl for temperatures to 160°F. Ratings at atmospheric pressure. Aluminum construction. Buna N seals, and snap closing vented filler cap.

### MANUAL



Toggles shut-off on reservoir can be turned on and off without affecting previously set feed rate. Drip rate clearly visible through large viewing sight in central mounting shank.

### ELECTRIC

Solenoid valve (120V, 60 Hz, 1 PH coil) automatically controls full flow of oil from reservoir to valve brush. For automatic operation: wire normally closed solenoid across machine starting switch, feeding stops when machine is turned off. Drip feed rate determined by adjustment of needle valve.

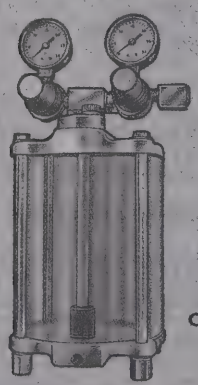
LUBE DEVICES, INC.

Pump Operated

## PUMP OPERATED MULTI-POINT LUBRICATORS

Ideal for applications where height restrictions prevent the use of gravity oilers. Feature 2 to 6 outlets with brush applicators for each outlet. Also includes 14 day timer. May be floor or wall mounted.



**Timer:** 14 day, 120V, 60 Hz, clock driven, up to 6 operations a day 5 minutes to 1 hour in length, 3 SPST switch rated 5A per pole.

**Reservoir:** 2 gallon, welded steel, oiled interior, liquid level gage.

**Brush Kit:** 2¼ x 3/8" flat long wearing nylon with adjustable mounting shank, fittings and 10 ft. of poly tubing; one kit per outlet.

**Pump:** 120V, 60 Hz, 1 PH, 1.3A: 0.5 GPH max. 750 SSU lube oil max. 30 ft. head max.

| Outlets | Lube Devices Model | Stock No. | List | Each | Shpg. Wt. |

Air Operated

## AIR OPERATED, DUAL REGULATORS

- **Inlet unregulated air pressure 125 psig maximum regulated air and fluid pressure**
- **Break resistant, transparent acrylic bowl for temperatures to 160°F**
- **Ratings at atmospheric pressure**
- **Aluminum construction and Buna N seals**

For applying lubricants to chains or rollers, or for spraying large sheets using a spray valve. Spray pattern accurately controlled by varying pressure on fluid and spray valve. Use of solenoid on outlet side will provide positive shut-off of air and liquid.

**See page 2759 for optional spray valves, Nos. 1U766 and 1U767.**

# REGULATED SPRAY VALVES

Air operated multi-point spray valves for spraying lubricant on bearings, rollers, or chains. Sheet stock may be lubricated prior to blanking or drawing. Provides precise adjustment of fluid/nozzle pressure when used in conjunction with regulators on a reservoir. 1/8"-27 NPTF inlet. See page 2758 for Air Operated Reservoir.

# VALVE BRUSHES

Apply lubricant to chain drives traveling in a horizontal or slightly inclined plane. Can be connected in series to lubricate several points and feed from central reservoir. Feed rate adjustable at hand-wheel and easily monitored through glass sight in valve body. Aluminum and brass construction. 1/2-20 UNF thread for mounting. Long wearing nylon bristles for temperatures below 250°F. Stainless steel bristles available for temperatures above 250°F.

# SHANK BRUSHES

Designed for applying lubricant to chain drives traveling in a horizontal or slightly inclined plane. Can be remotely mounted and feed rate controlled from metering valves by central reservoir. Flexible brush bristles follow the contour of chain distributing oil to load carrying points.

Aluminum construction and 1/2-20 UNF thread for mounting. Long wearing nylon bristles for temperatures below 250°F. Stainless steel bristles for temperatures above 250°F. 1/2" adjustment for brush wear provided.

# TOGGLE AND SOLENOID VALVES AND NEEDLE VALVE MANIFOLDS

## TOGGLE VALVES—SIGHT FEED

Straight, cross, and angle pattern flow toggle valves can be turned off and on without affecting previous set drip or flow rate. Removable valve stem and toggle make it ideal for installation in areas with small assembly clearance. Valves feature large viewing window in sight body that provides clear view of feed rate. Feed rate is adjustable from full orifice flow to shut off. .094 orifice diameter. Solid brass construction, Buna N seals and glass sight.

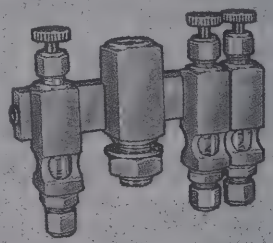
No. 1U844 Angle Pattern Flow

## SOLENOID VALVES

LUBE DEVICES, INC.

No. 1U853 Angle Pattern Flow

No. 1U855 Straight Pattern Flow



Features automatic fluid flow. Coil can be wired to start switch so unit feeds only when machine runs. Knurled adjustment wheel provides positive, smooth feed rate from full flow to shut-off. Large vented glass sight window for easy viewing of drip rate. Normally closed valve, solid brass construction, and Buna N seals.

Power consumption is 11.5 watts. Class "B" molded waterproof coil. .094 minimum orifice. 120V, 60 Hz, 1 Ph coil in solenoid.

## NEEDLE VALVE MANIFOLDS

LUBE DEVICES, INC.

No. 1U829 Three Feed Manifold

Provide controlled multiple oiling from central location. Lubricant (in reservoir or dispenser) metered at individual valves and travels to various points allowing servicing of normally inaccessible areas. Easily disassembled for cleaning. Valves may be removed without disturbing other components. Comes with vented sight chamber.

Features include 5/8-18 UNF central mounting, 1/4 NPTF inlet and 1/4 tube outlet (tube not included). Aluminum construction, Buna N seals and glass sights. Vented at sight, intended for gravity applications.

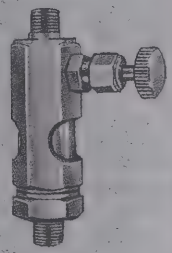
# SIGHT FEED NEEDLE VALVES



Ideal for installations requiring controlled visible fluid metering. Straight, angle and cross patterns allow optimum configuration selection. Knurled handwheel provides smooth, accurate adjustment of flow rates. Drip rate visible through large glass sight window in body valve. Valves furnished with vented sight chamber.

### STRAIGHT PATTERN

Precision machined from brass bar stock for durability.

### ANGLE/CROSS PATTERNS

Vented angle and cross pattern needle valves can be installed singly or in a series. Aluminum bar stock construction. All pipe threads are dryseal .094 orifice diameter.

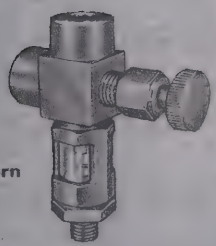
# HEAVY-DUTY VENTED NEEDLE VALVES



For rugged conditions requiring controlled visible fluid metering. Knurled handwheel provides smooth accurate adjustment of flow rates. Flow rate clearly visible through large glass sight window open on two sides. Sight window adjustable independent of valve body for optimum viewing. Comes with vented sight chamber—not intended for pressure applications.

Provided with full .250 diameter orifice for low pressure drops at high flow rates. Solid brass bar stock construction.

# GREASE FEEDERS AND LUBRICATORS

## GREASE FEEDERS

### LubeSite®

- Allow easy visual inspection of grease level
- Mounts in any position
- Spring tension 1-2 PSI
- 1/8" NPT

**A ALL POLYCARBONATE**

- For minimal vibration operating conditions
- Comes assembled with medium spring, additional light and heavy springs included

**B POLYCARBONATE WITH METAL BASE**

- For dynamic and vibrating operating conditions
- Comes assembled with medium spring, additional light and heavy springs included

**C POLYCARBONATE WITH CORROSION RESISTANT METAL BASE**

- For corrosive operating conditions such as chemical and food processing applications
- Polycarbonate with double plated nickel-chrome construction; come assembled with medium spring, additional light spring and heavy spring included

**D HIGH TEMPERATURE GREASE FEEDER**

- For high temperature operating conditions such as steel mills, foundries, lumber drying kilns, glass plants, and metal heat-treating facilities
- Comes assembled with medium spring, additional heavy spring included
- Borosilicate glass, stainless steel cap, and temperature-resistant Viton seal construction

### REMOTE GREASE REFILL KIT

Allows refill of hard to reach sites. Kit comes complete with all of the required fittings and 10 ft. of high pressure nylon tubing.

**No. 6Y742.** Lubeline™ (900). Shpg. wt. 0.3 lbs. List $38.42. Each.....**$32.75**

LUBE DEVICES, INC.

## GREASE LUBRICATORS

**GUN-fil® Grease Lubricators** provide dependable, uniform bearing lubrication. Features a single point, spring loaded grease applicator, colored valve stem indicator to show when refill is needed, grease fitting for filling, and rugged steel construction.

**Available in two valve speeds:** Slow feed for high ambient temperatures, close or tight fitting bearings, and intermittent operations; Fast feed for low ambient temperatures, loose fitting bearings, and continuous operation.

**Mount in any position** horizontally, vertically, or inclined at any angle in new or existing installations—only pipe tapped holes are required.

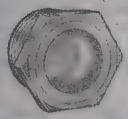
# LIQUID LEVEL SIGHT PLUGS, IN-LINE FILTER, AND BREATHER VENTS



## LIQUID LEVEL SIGHT PLUGS

LUBE DEVICES, INC.

Low PSI Sight Plug W. Reflector

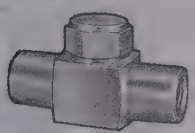
No. 1U917

No. 1U926

High PSI Sight Plug—Open View

**Maximum Operating Temperature: High PSI 500°F**

**Allow visual inspection** of fluid levels in gear boxes or reservoirs. Can be used as an observation window to check burner flames, gears in motion, relay or switch operation in sealed housings.



**Low pressure sight plugs** feature stainless steel reflector to aid viewing of dark fluids. Solid brass body, clear glass sight, and Buna N seals.

**High pressure sight plugs** are constructed with fused heavy glass window. Steel body with electroless nickel plating. Open view (no reflector).

## IN-LINE LIQUID FILTER

LUBE DEVICES, INC.

No. 1U590

For use in liquid lines where dirt or particles could cause clogging. In-line cap unscrews to allow filter cleaning without dismantling unit from line. Brass construction and Buna N seals. 40 micron filter. 150 psi max. working pressure. 175°F maximum temperature.

| Thread (Female) PTF | Body (Square) (In.) | Length (In.) | Height (In.) | Lube Devices Model | Stock No. | List | Each | Shpg. Wt. |

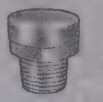
## BREATHER/VENTS



LUBE DEVICES, INC.

A No. 1U585

B No. 1U568

C No. 1U572

D No. 1U584

### A PRESSURE/VACUUM BREATHERS

Allow sealed pressure systems to vent off excess pressure as heat in system builds up. Air pressure is allowed back into system as system cools. 20 micron bronze filter keeps dirt from entering. Steel body with aluminum top cap. Buna N seals.

| Thread PTF | Dia. (In.) Hex Flats | Overall Length (In.) | PSI | Vacuum In. Hg. | Lube Devices Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|

# CLOSED CIRCUIT LIQUID LEVEL GAGES AND VENTED OIL GAGES

## CLOSED CIRCUIT LIQUID LEVEL GAGES

### A FRONT MOUNT—ADAPTERS

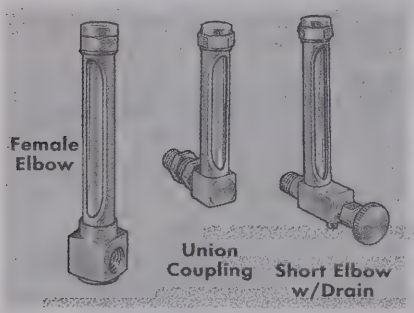
1/4" NPTF brass pipe adapters for mounting in heavy wall tank or weld spuds on reservoir walls. Aluminum construction, front mounting, and Buna N seals. Borosilicate sight glass with red line on white background.

### B FRONT MOUNT—DIAL THERMOMETER

Dial probe thermometer series gage features highly accurate protected sensing element. Stainless steel dial thermometer: 1⅜" dia. Fahrenheit dial (0° to 300°). Aluminum construction, 1/2-20 UNF thread front mounting, Buna N seals. Borosilicate sight glass with red line on white background.

### C FRONT MOUNT—RIGID PLASTIC SIGHT

Provides wide angle viewing through tough, break resistant transparent cylindrical nylon sight. Aluminum end blocks and mounting bolts. 1/2-20 UNF thread front mounting. Buna N seals.



### LUBE DEVICES, INC.

### D FRONT MOUNT—NEEDLE VALVES

Features brass shut-off valves, 1/2 NPTF pipe thread. Gage body may be removed from valves without loss of fluid. Aluminum construction, front mounting, Buna N seals. Borosilicate sight glass with red line on white background.

## VENTED OIL GAGES

Provide quick, visual inspection of fluid levels in gear boxes and bearing housings. Protective gage shield rotates for optimum viewing. Positive sealing achieved by employing two trepanned pressure bosses inside chamber; one in the shank cavity and one in the closure cap. This prevents lateral extrusion of seals and eliminates leaks. Brass construction with glass sight. Buna N seals.

**Short and long elbow gages** may be disassembled on site, elbow alone installed, and gage reassembled.

**Union coupling gages** provide a convenient break point.

# SYNTHETIC AND MINERAL GEAR AND POWER TRANSMISSION OILS

Mobil

## A SYNTHETIC GEAR OILS

- **For industrial enclosed gears, speed and gear reducers (worm, helical, spur), plain and roller bearings**

Multi-viscosity SHC base. Recommended for severe temperature and load conditions. Reduces power consumption. Contains additives that enhance oxidation stability, and corrosion protection. Extends oil drain intervals. Approved by major gear manufacturers Mobil SHC 634 ISO VG 460 AGMA 7 for No. 4ZF30. Mobil SHC 630 ISO VG 220 AGMA 5 for No. 6Y778.

## B INDUSTRIAL GEAR OILS

- **For industrial enclosed gear drives**

Premium quality, heavy-duty industrial gear lubricants formulated to provide anti-wear, rust, and corrosion protection. Recommended in gear drives containing both circulation and splash lubrication systems. Satisfy AGMA specifications as follows: Mobilgear 634-AGMA 7EP.

## C MULTIPURPOSE GEAR LUBRICANT

- **For axles, final drives and some manual transmissions on cars, trucks, tractors, and contractor and mining equipment**

Multipurpose heavy-duty, extreme pressure gear lubricants are qualified API Service GL-5 and meet US Military Specifications MIL-1-2105D and Mack GO-H. Ideal for equipment operated under high speed shock load, high-speed low torque, and low-speed high torque conditions.

## D SYNTHETIC GEAR LUBRICANT

- **For year-round automotive applications in some manual transmissions, differentials, and light to medium-duty gearboxes**

Specially designed extreme pressure limited slip, GL5 sulphur-phosphorus additive package with SHC base. Reduces wear and spalling under high speed, high torque, and high horsepower conditions. Extremely resistant to heat and breakdown.

## E MOBIL 1® SYNTHETIC AUTOMATIC TRANSMISSION FLUID

- **For automatic transmissions requiring GM DEXRON III and Mercon fluid**

Synthetic transmission fluid which outperforms all conventional multipurpose ATF products. Meets or exceeds Allison C-4 requirements and Caterpillar TO-2 for on-and-off-highway heavy-duty transmissions.

## F MOBIL TRACTOR HYDRAULIC/ TRANSMISSION FLUID

- **For top-off and refill of transmissions, differentials, final drives, hydraulics, and power steering systems, as well as wet brakes. PTOs and hydrostatic drives in farm, contractor, and industrial tractors**

Meets or exceeds the following specifications: John Deere J20A, J20C; Ford New Holland M2C134D; Massey Ferguson M1135, M1141; White New Idea Q-1802, Q-1826; Case International JIC 145, MS1210, B6 JIC 185, MS 1204, MS 1205, MS1206, Allison C-4; Deutz Allis XL; Caterpillar TO-2 Powershift, SAE80, API GL-4 Gear Lube.

## G AUTOMATIC POWER TRANSMISSION FLUID

- **For automotive transmissions in most cars and light trucks requiring GM DEXRON III and Mercon fluid**

New generation, premium automatic transmission fluid provides excellent protection against wear and deposits in heavy-duty service. Recommended where Ford MERCON, M2C166-H (Types CJ and H) fluids are specified. Also recommended for off highway transmissions, power steering, and hydraulic systems requiring DEXRON II, Allison C-4, or Caterpillar TO-2 fluid. Meets industrial hydraulic oil demands of Denison HF-O Vickers Vane Pump, and Sundstrand Piston Pump specifications.

Mobil produces high quality products and is a leading name in lubricants. Complete line of oils and greases including: premium graded mineral, food grade and synthetic lubricants. Products are packaged in smaller containers to provide you the following benefits.

- **Smaller initial purchases**
- **Availability, no need to inventory**
- **Reduced chance of contamination**
- **No leaking drums to create hazard**
- **Conveniently used or dispensed, see dispensing equipment on 2752**

Be sure to follow equipment manufacturer's recommendations relative to lubricant's properties. If you require additional assistance call: 1-800-662-4525.

# GASOLINE AND DIESEL ENGINE OILS

Mobil

**Mobil produces high quality products and is a leading name in lubricants. Complete line of oils and greases including: premium graded mineral, food grade and synthetic lubricants. Products are packaged in smaller containers to provide you the following benefits.**

- **Smaller initial purchases**
- **Availability, no need to inventory**
- **Reduced chance of contamination**
- **No leaking drums to create hazard**
- **Conveniently used or dispensed, see dispensing equipment on 2752**

**Be sure to follow equipment manufacturer's recommendations relative to lubricant's properties. If you require additional assistance call: 1-800-662-4525.**

## [A] DELVAC 1300 SUPER DIESEL ENGINE OIL

- **For on and off-highway and farm diesel engines**

SAE 15W-40 high performance multi-grade diesel engine oil meets new emission requirement. Offers superior overall engine wear protection with minimal ring and crown land deposits. Excellent soot control makes them ideal for pick-up and delivery service.

Meets or exceeds specifications: API, CH-4, SJ, CF-4; Mack EO-M, EO-L plus, EO-K2; Cummins NTC 400; Detroit Diesel 7SE270; Navistar TSI-85-6; GM 6094M; Ford ESE-M2C-153E; MIL-L-2104E; MIL-L-46152D; Allison C-4 fluid; Caterpillar TO-2 fluid.

## [B] GASOLINE/DIESEL/NATURAL GAS ENGINE OIL

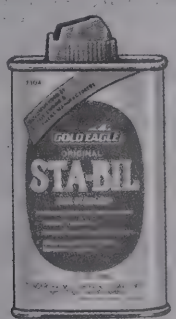
- **For air-cooled and water cooled gasoline and diesel engines and equipment. Also natural gas engines using liquid propane, methane, and butane in lift trucks and irrigation equipment**

SAE 30 highly stable, highly detergent monograde engine oil features: ashless dispersants, metallic detergents; oxidation, corrosion and rust inhibitors, anti-wear agents, and a defoamant.

Meets or exceeds API classifications CF2, CF, CE, CD-II, CD and SH. Approved for use by the Allison Division of GM as a type C-4 fluid. Exceeds performance requirement of US Military Specifications MIL-L-46152E and MIL-L-2104F; meets or exceeds Ford ESE-M2C153D, GM 6094M, Detroit Diesel 7SE270, Cummins NTC 400, and Mack EO-K/2.

Mobil

[C] No. 4F743



## [C] MOBIL 1® AUTOMOTIVE

- **For automotive engines including turbo-charged, light-truck gasoline or diesel engines requiring API service SJ/CF and ILSAC GF.2**

SAE 10W30 which increases fuel efficiency and extends oil drain intervals two to three times (depending on driving and environmental conditions). Synthetic, detergent-dispersant oil contains no impurities, providing engine cleanliness and fewer deposits. Exceeds Energy Conserving II fuel efficiency ratings, and manufacturers' requirements. Extreme heat protection, up to 425°F. Cold start protection, able to pump oil at -45°F. Compatible with and may be mixed with mineral base oils.

## STA-BIL® FUEL STABILIZER

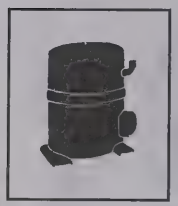
**Used for:**

- **Seasonal storage**
- **Preventive maintenance for infrequently used equipment**
- **Gasoline stabilization in hot and humid climates**
- **Assured starts in stand-by and emergency equipment**

**Used in all 2 and 4-cycle engines, diesel engines, engine-powered equipment.**

**Prevents oxidation, rust, and corrosion** in fuel systems; prevents gum and varnish formation; and keeps gaskets lubricated and leak-free.

**Easy to use.** Just add to fuel tank, agitate, run equipment, and store. Stabilized fuel remains in tank to keep the system conditioned for quick, easy start-up. Eliminates the need to drain or burn off fuel prior to storage. One 4-ounce container treats 5 gallons of gasoline. Golden Eagle brand.



No. 6A114. ❸ Shpg. wt. 0.4 lbs. List $5.82. Each ..... $3.49

# COMPRESSOR OILS AND SPECIAL SERVICE OILS

## COMPRESSOR OILS

Mobil®

### A AIR COMPRESSOR OIL

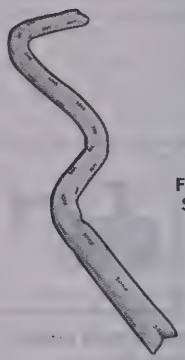
- **For single and multistage reciprocating air compressors**

Developed to handle higher speeds and temperatures of modern single and multistage air compressors. Specially selected additives combined to enhance lubrication, anti-wear and rust protection in cylinders and crankcases. Can minimize valve carbon and crankcase sludge deposits, allowing extended service and drain intervals. Nondetergent, anti-foam additive maintains lubrication and density. 30 wt.

### B SYNTHETIC AIR COMPRESSOR OIL

- **For rotary screw air compressors (No. 4ZF39) and for reciprocating air compressors (No. 6Y783)**

Synthetic diester meets viscosity requirements of many compressors. Extraordinary resistance to oxidation provides long oil, filter, and separator life.



### C REFRIGERATION COMPRESSOR OIL

- **For refrigeration compressors**

Highly refined naphthenic base oil exceeds manufacturer's recommendations. Suitable for lubrication of reciprocating compressors (cylinders and bearings) using many types of refrigerants except sulfur dioxide, HCFCs, and HFCs.

**COMPRESSOR OIL REFRIGERANT COMPATIBILITY**

## SPECIAL SERVICE OILS

### A ROCK DRILL, AIR TOOL OIL

- **For air tools and air line lubricators and pneumatic rock drills**

Formulation provides a balance of adhesiveness, yet is emulsifiable enough to pick up moisture carried in oil stream. High EP characteristics protect tools even in tough mining, contractor and in-plant operations. 10 wt.

### B VACUUM PUMP OIL

- **For vacuum pumps**

High quality, straight mineral oil with low vapor pressure. Recommended for most vacuum pumps where high vacuum is required (0.08 Hg max. microns). Suitable for use with Busch, Leybold, Gast, Pneumotive, and Welch pumps.

### SPECIAL SERVICE OIL SPECIFICATIONS AND ORDERING DATA

# HYDRAULIC AND MACHINE TOOL OILS

## HYDRAULIC OILS

### [A] PREMIUM HYDRAULIC OILS

- **For use with a wide variety of industrial, marine, and mobile service hydraulic equipment. Also for use in hand and power operated jacks, scissor jacks, hand pumps, etc.**

Highest quality, premium antiwear industrial hydraulic oils that meet the requirements of all conventional and high output hydraulic systems, including high pressure systems with servo valves, and all robotics. Allows operation in wide range of temperatures while handling heavy loads. Approved in Dension HF-0, Vickers V-104C and 35VQ25, and Sunstrand pump tests. Available in convenient sizes for various applications.

### [B] PREMIUM CIRCULATING OIL

- **For bearings, gears, hydraulics, selected vacuum pumps, and air compressors**

High quality, double-inhibited oil designed for multiple applications.

Contains: oxidation inhibitors to resist thermal degradation, defoamants to ensure entrained air is released. Demulsibility permits water and other contaminants to separate.

### [C] FOOD GRADE HYDRAULIC OIL

- **H1 USDA Approved hydraulic/circulating oil for use in food processing equipment**

Highly refined mineral oil specially treated to remove color bodies. White oil that will not stain or discolor material it comes in contact with. FDA and USDA Regulation H-1 Approved. Suitable for use where there is a likelihood of incidental contact with food.

### [D] BIODEGRADABLE HYDRAULIC OIL

- **For industrial, marine, and mobile service including high pressure systems, systems with servo valves, and all robotics**

Satisfies stringent criteria for biodegradability and toxicity. Recommended for most hydraulic systems requiring readily biodegradable, nontoxic fluids. Approved in Vickers V-104C, 35VQ25, and other various pump tests.

### [E] PREMIUM HYDRAULIC OIL

- **Excellent keep-clean performance and deposit control** *New*
- **Antiwear performance equal to the best premium zinc containing oils**
- **Compatible with zinc containing hydraulic fluids**
- **Controlled demulsibility to work with small amounts of water and separate out large quantities**
- **Multimetal compatibility**
- **Excellent protection against rust**

High quality premium hydraulic oil formulated for most applications in industrial, marine, and mobile service where zinc free fluids are desired. Designed for high pressure systems, systems with servo valves, NC control mechanisms, and all robotics. Provides maximum equipment productivity with keep-clean performance, minimizing sludge, varnish, and deposit formation. Minimizes equipment maintenance by reducing wear and corrosion.

## MACHINE TOOL OILS

### [A] WAY OILS

- **For machine tool ways, slides and gears**

Recommended when extreme precision or slow speeds make it necessary to eliminate stick-slip or chatter. Approved by major machine tool builders such as Cincinnati Milacron, Okuma, Bijur. Aqueous coolant friendly.

### [B] SPINDLE BEARING OILS

- **For high speed spindle, plain, and antifriction bearings in textile machines, precision grinders, and other machine tools**

Light bodied, light colored oil offers long service life, excellent antifoam, and rust protection. Resists oxidation and deposit formation. Approved against Cincinnati Milacron P specifications.

## LOCTITE® DUPONT® KRYTOX® HIGH PERFORMANCE GREASES

- **Increases service life of critical parts**
- **Using Teflon® technology lubricates in extreme conditions, decreasing downtime and part replacement**

For demanding bearing, valve and seal use. Chemically inert, nonreactive; will not form gummy solids or deposits which cause failures. Will not react with gaseous or liquid oxygen or chlorine. Nonflammable, no flash or fire point. Thermally stable from -60°F to 600°F; withstands continuous temp. of 400°F and intermittent temp. of 600°F.

Outperforms hydrocarbon, synthetic, silicone, fluorinated silicone and chlorofluorocarbon greases. Hybrid compound of perfluoroalklpolyether oil and Teflon® thickener, made only by DuPont®. Insoluble in hydrocarbons, water, solvents, acids and bases.

### GENERAL PURPOSE GREASES

2 oz. Tube

## THERMAPLEX™ HI-TEMP

Specially developed to remain stable and resist carbonization at extremely high temperatures, thus reducing risk of bearing failure. Features: Excellent high temperature performance, very high melting point: 536°F (over 280°C), extends relubrication intervals, reduces grease consumption, reduces risk of bearing failure at high temps, very good vibration resistance, reduces need for multiple greases

***New*** **No. 4UJ38.** LPS brand (70214). Shpg. wt. 1.0 lbs. List $7.42. Each ..... $6.75

## THERMAPLEX™ HI-LOAD

Designed to provide long-lasting lubrication for heavily loaded bearings or those subjected to shock loading and vibration. Features: Excellent load carrying ability, withstands shock loading, reduces wear from vibration, good corrosion resistance, excellent anti-wear properties, wide operating temperature range.

***New*** **No. 4UJ40.** LPS brand (70414). Shpg. wt. 1.0 lbs. List $5.11 Each ..... $4.65

## THERMAPLEX™ MULTI-PURPOSE

Specifically developed to outperform conventional bearing greases and extend relubrication periods, reducing maintenance requirements and grease use. Features: Long life, excellent load carrying properties, prolongs bearing life, good corrosion resistance, reduces grease consumption. Ideal for lubricating all types of bearings.

***New*** **No. 4UJ42.** LPS brand (70614). Shpg. wt. 1.0 lbs. List $4.18 Each ..... $3.80

## THERMAPLEX™ LO-TEMP

Formulated to provide excellent bearing lubrication at extremely low temperatures or in environments where rapid temperature variations occur. Features: Excellent low temperature performance, very good load carrying capacity, reduces wear, excellent corrosion resistance, resists water wash out, increases efficiency, extends lubrication intervals

***New*** **No. 4UJ39.** LPS brand (70314). Shpg. wt. 1.0 lbs. List $4.95. Each ..... $4.50

## THERMAPLEX™ FOODLUBE

Suitable for bearing lubrication in which incidental contact with food stuffs may occur or in an application where clean, routine lubrication is required. Features: USDA H1 category approved, uses only FDA listed ingredients, high degree of water resistance, excellent corrosion protection, very good load capacity, does not contain mineral oil, solvents or silicone. Product is non-toxic, nonstaining, and nonemulsifying.

***New*** **No. 4UJ37.** LPS brand (70114). Shpg. wt. 1.0 lbs. List $6.05. Each ..... $5.50

## THERMAPLEX™ AQUA

Specially created to withstand the effects of running water and to provide excellent long-lasting lubrication even when fully submerged in fresh or salt water. Features: Resists water wash out, good adhesion properties, excellent corrosion resistance, significant load carrying capability, reduces wear, reduces grease consumption. Provides a greater degree of bearing protection and is resistant to both salt and fresh water.

***New*** **No. 4UJ41.** LPS brand (70514). Shpg. wt. 1.0 lbs. List $3.85. Each ..... $3.50

# GREASE

**Mobil produces high quality products and is a leading name in lubricants. Complete line of oils and greases including: premium grade mineral, food grade and synthetic lubricants. Products are packaged in smaller containers to provide you the following benefits:**

- **Smaller initial purchases**
- **Availability, no need to inventory**
- **Reduce chance of contamination**
- **No leaking drums to create hazard**
- **Conveniently used or dispensed, see dispensing equipment on pages 2752 - 2753**

**Be sure to follow equipment manufacturer's recommendations relative to lubricant's properties. If you require additional information or assistance, call: 1-800-662-4525.**

**See page 2765 for comparative viscosity classifications.**

NLGI: National Lubrication and Grease Institute

## [A] MULTIPURPOSE GREASE

- **For bearings, cams, ways, other sliding elements**

NLGI Grade 2 extreme-pressure, antiwear lithium complex, soap-base grease. Excellent service under severe operating conditions of high-pressure, shock loading and water contamination. Recommended for temperatures up to 350°F.

## [B] MOBIL 1 SYNTHETIC AUTOMOTIVE GREASE

- **For automotive grease applications**

NLGI Grade 2, for high and low temperature greasing. Ideal for disc brake wheel bearings, ball and steering joints and universal joints.

## [C] MULTIPURPOSE AUTO GREASE

- **For chassis, universal joints, disc brake wheel bearings in automotive, fleet, farm and off—highway service**

NLGI Grade 2 extreme pressure, unleaded, lithium, soap base grease. Excellent resistance to oxidation and water displacement.

## [D] MULTIPURPOSE AUTO GREASE WITH MOLY

Same as above multipurpose auto grease but with molybdenum disulfide (moly).

## [E] CONTRACTOR/MINING GREASE

- **For heavy-duty, severe service greasing requirements of off-highway contractor and mining equipment**

NLGI Grade 2, unleaded, extreme pressure grease with 3% moly. Provides protection against wear and shock loads, and rust and water wash. Exhibits long-term structural and chemical stability.

## [F] SYNTHETIC BEARING GREASE

- **For grease lubricated rolling element bearings in electric motors**

NLGI Grade 2 grease combines a synthetic base fluid with a lithium complex soap thickener. Satisfies long service life and performance requirements for most electric motor manufacturers. (ISO 100 synthetic)

## [G] SYNTHETIC BEARING GREASE

- **For high-temperature, high-load rolling element bearings and water pump applications**

NLGI Grade 1.5 antiwear, extreme pressure grease combines synthetic base fluid with lithium complex soap thickener. Resists consistency change when contaminated with water. Superior protection against rust and corrosion. (ISO 460 synthetic)

## [H] FOOD GRADE GREASE

- **H1 USDA Approved for journal and antifriction bearings on food/beverage machinery and sanitary equipment**

NLGI Grade 2, aluminum soap-thickened grease for use in plant food machinery and movable equipment handling food products. Withstands elevated temperatures and is resistant to water contamination. Meets FDA regulation 178.3570 and has USDA Type H-1 for lubricants with incidental food contact.

# CUTTING FLUIDS

## LPS® TAPMATIC® CUTTING FLUIDS

**LPS® TAPMATIC #1 GOLD Cutting Fluid** Simultaneously protects and lubricates to reduce friction and eliminate chip welding in tapping, drilling, reaming, and threading. Does not contain 1,1,1 trichloroethane, CFC's, chlorinated paraffins, water, solvents, or inactive fillers. Safe to use on all metals. LPS brand. (40320)

**No. 2F019.** Shpg. wt. 0.3. List $4.36. Each ..... **$3.80**

**No. 2F021.** Shpg. wt. 1.1. List $8.57. Each ..... **$7.45**

## LPS® TAPMATIC® AQUACUT

**LPS® Tapmatic® Aquacut.** A water-based cutting fluid that extends tool life and reduces friction, heat, and tool failure. Provides clean cuts and fine finishes. Designed for use on steel, aluminum, and other metals, except magnesium. Does not contain any sulfur, chlorine, or 1,1,1 trichloroethane. Will not stain metal. Nonflammable and cinnamon-scented. LPS brand (01216).

**No. 2C649.** Shpg. wt. 1.3. List $7.25. Each ..... **$6.03**

## CRC® CUTTING OIL

Thread-cutting lubricant for use on all types of metal. Low-odor formula is safe on soft metals such as brass, copper, and aluminum, and has no strong sulfur odor. Additives create strong film that withstands extreme pressures, increasing tool life and ease of cutting. 16 oz. can/12 oz. net wt. CRC brand (14050).

**No. 2F146.** Shpg. wt. 1.0. List $5.62. Each ..... **$5.35**

## SPRAYON® CUTTING OIL

Provides cooling and lubrication at point of work to eliminate scoring. For use when drilling, cutting, sawing, and threading. Ideal for all matreials including stainless steel, aluminum, brass, and copper surfaces. Foaming action aids penetration for longer tool life. Features jet-type spray, and pinpoint extension tube. USDA H2 rated. Sprayon brand. (S00208)

**No. 2W755.** Shpg. wt. 1.1 lbs. List $8.06. Each ..... **$3.95**

## STARRETT® TOOL AND INSTRUMENT OIL

Highly refined, colorless, oil for use in extreme temperatures on close-fitting parts. Protects high quality precision tools.

## STARRETT® M1 ALL-PURPOSE LUBRICANT

Cleans, polishes, and protects against rust and corrosion damage. Prevents short circuits and halts electrical leakage from wet ignition wires. Contains no fluorocarbons, detergents, or silicone and is not water soluble. FDA approved for use in or near food-related environments. Works in extreme temperatures. Removes grease, tar and grime from metal parts and painted surfaces.

| Description | Container Size | Starrett Model | Stock No. | Each | Shpg. Wt. |

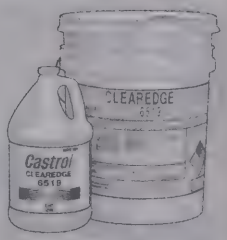
COOLEDGE® 6612C



SUPEREDGE® 6759

ILOCUT® 5468

SYNTILO® 9930

CLEAREDGE® 6519

## COOLEDGE® 6612C General Purpose Soluble Oil

- **Soft fluid residue offers lubrication to fixtures and gauges; resulting in care-free equipment maintenance**
- **Strong operator acceptance—clean, neutral-odor fluid is pleasant to use**

A water-dilutable cutting and grinding fluid for machining and grinding of ferrous and nonferrous metals. Especially for shops that machine an assortment of alloys. This concentrate mixes easily with hard or soft water to form a stable emulsion. Formulated to keep machines and parts clean and free of sticky residues.

**No. 3VJ01.** 1 Gal. Shpg. wt. 8.8 lbs. Each ..... $20.60

**No. 3VJ02.** 5 Gal. Shpg. wt. 38.0 lbs. Each ..... $78.75

## ILOCUT® 5468 High Performance Straight Oil

- **Extreme pressure lubrication prevents tool wear to extend tool life**
- **Boundary and polar lubrication—achieve closer tolerances for improved surface finish**
- **Reduces chip welding so tools remain clean and free-cutting**

Formulated with sulfurized and chlorinated extreme pressure additives to provide a combination of both hydrodynamic and polar lubrication. Ideal for general machining operations on ferrous alloys. Provides outstanding performance in screw and bar machine, chucker and deep-hole drilling applications.

**No. 3VJ03.** 1 Gal. Shpg. wt. 8.6 lbs. Each ..... $16.40

**No. 3VJ04.** 5 Gal. Shpg. wt. 38.0 lbs. Each ..... $60.30

## CLEAREDGE® 6519 Premium Performance Semi-Synthetic Fluid

- **Bioresistant to inhibit microbial growth**
- **Long sump life—reduces overall costs in both individual sumps and central systems**
- **Exceptional foam control to eliminate foam-outs and spills**

A premium performance semi-synthetic fluid for machining aluminum and ferrous alloys. For job shops that want a single fluid. Fluid provides dependable rancidity control when used in machine tools that operate on individual coolant reservoirs.

**No. 3VH96.** 1 Gal. Shpg. wt. 9.4 lbs. Each ..... $29.80

**No. 3VH97.** 5 Gal. Shpg. wt. 41.0 lbs. Each ..... $111.50

## SUPEREDGE® 6759 High Performance Soluble Oil

- **Unique tool/wheel performance is formulated to offer extreme pressure and boundary lubrication far exceeding conventional fluids**
- **Strong operator acceptance—clean, mild-to-the-skin, low odor fluid is pleasant to use**

A water-soluble cutting and grinding fluid that provides trouble-free performance and excellent tool life. Resists microbial attack under rigorous conditions, promoting extended service life in central system applications as well as individual sumps. Its light, transparent, oily film protects both parts and machine tools from corrosion.

**No. 3VJ11.** 1 Gal. Shpg. wt. 9.4 lbs. Each ..... $26.15

**No. 3VJ12.** 5 Gal. Shpg. wt. 42.0 lbs. Each ..... $97.60

## SYNTILO® 9930 Oil-Rejecting Synthetic Fluid

- **Versatile fluid can be used in a wide range of applications on ferrous metals**
- **Excellent cooling properties remove heat from the work-piece to improve tool life and surface finish**
- **Bioresistant to inhibit microbial growth to extend fluid life in central systems and individual sumps**

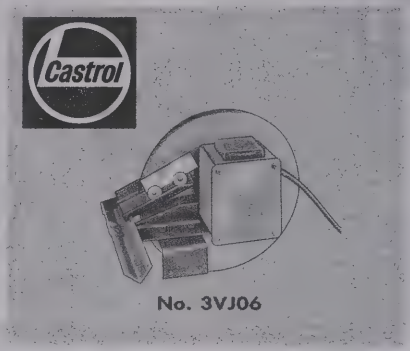
A synthetic fluid for a variety of machining applications on ferrous metals. The superior cooling properties provide long service life in both central systems and individual sumps; resulting in low turnover rates. Offers foam control and low residue characteristics, settles chips and swarf quickly, and contains a corrosion protection package to keep parts and machines free from in-process rust.

**No. 3VJ13.** 1 Gal. Shpg. wt. 10.0 lbs. Each ..... $24.99

**No. 3VJ14.** 5 Gal. Shpg. wt. 45.0 lbs. Each ..... $90.80

# FLUID MANAGEMENT

## N1 REFRACTOMETER



No. 3VJ05

The N1 Refractometer is a precise, hand-held, optical instrument used to quickly measure the concentration of metalworking fluids.

- **Extended fluid life — maintaining the correct concentration promotes optimum fluid performance**
- **Longer tool life and improved surface finish — maintaining proper fluid concentration results in longer tool life and improved surface finish**
- **Easy-to-use, durable aluminum casting is easy to read, calibrate, and clean**
- **Instant results; readings done "on the spot," no need to wait for lab results**
- **Portable, hand-held design can easily be carried from individual sumps to central systems**

**No. 3VJ05.** Shpg. wt. 1.0 lbs. Each .....**$201.00**

## OIL WHEEL SKIMMER 201D

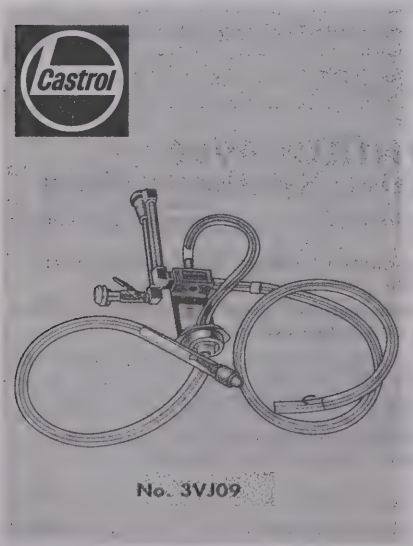
No. 3VJ06

The Oil Wheel Skimmer 201D is designed to remove free, unemulsified floating hydraulic and lubricating oils and greases from the surface of coolant in individual machine tool coolant tanks.

- **Extends fluid life - removes the tramp oil deposits that contaminate coolant tanks**
- **Easy to install and operate - wiper blades wipe off oil that adheres to the disc and run-off is directed to a separate area for proper disposal**
- **Trouble-free operation - one moving part requires minimal maintenance**

**No. 3VJ06.** Shpg. wt. 9.0 lbs. Each .....**$284.00**

## SUMP DEODORIZING TABLETS



No. 3VJ08

Sump Deodorizing Tablets (SDT) provide fast, effective odor control to oil-containing coolant systems. One tablet treats 25 gallons of fluid for up to 7 days. Besides odor control, SDT's assist with controlling pH. 15 tablets per tube.

- **Eliminates odors immediately to increase operator satisfaction and comfort**
- **Easy to use; simply place tablets in individual machine sumps**
- **Stabilizes emulsions for cleaner machines and improved rust protection**
- **Formaldehyde-free to improve operator health and safety**

**No. 3VJ08.** Shpg. wt. 1.3 lbs. Each .....**$22.04**

No. 3VJ09

## DRUM PROPORTIONER SP-174

The Drum Proportioner SP-174 accurately mixes liquid chemical concentrate with water and dispenses proportioned solution into a designated container.

- **Automatic mixing eliminates the guesswork, mess and waste associated with manual mixing**
- **Uniquely designed, color-coded metering tips offer a wide range of accurate water-to-product concentration ratios**
- **Easy to install—attaches to standard garden hose thread and adapts to 3/4" and 2" standard drum bung openings in 5, 30 and 55 gallon containers**
- **Foot valve provides protection against backflow into concentrate**
- **Tamper-resistant location of the tip in the siphon tube is accessible when a change in concentration is desired**
- **Chemical-resistant components are made of quality PVC, stainless steel and plated brass; making the unit usable with caustic solutions and water temperatures up to 180° F (82.2° C)**

**No. 3VJ09.** Shpg. wt. 3.0 lbs. Each .....**$147.95**

# RUSTLICK METALWORKING FLUIDS AND ACCESSORIES

## EDM-30 DIELECTRIC OIL

- **High quality, low viscosity oil for fast setting and simplified purification**
- **Yields higher quality finishes**
- **Eliminates smoke and odor, and is designed for paper cartridge filtration up to 150 Amps**

**No. 1C191.** 5-Gallon Pail (72052). Shpg. wt. 37.0 lbs. Each ..... $54.00

## EDM-250 DIELECTRIC OIL

- **Designed to resist thermal degradation from high amperage applications**
- **Prevents clogging of diatomaceous earth and edge-wafer disposable cartridge filters**
- **Eliminates smoke and odor**
- **Long lasting, low viscosity for excellent flushing and finishing**

**No. 1C193.** 55-Gallon Drum (72550). Shpg. wt. 425.0 lbs. Each ..... $437.00▲

(▲) Net prices, not subject to discounts.

## WS-5050 HEAVY-DUTY SOLUBLE OIL

- **Suited to all types of machining. Compatible with CNC machining**
- **Can be used on all metals except magnesium and titanium**
- **Special additive protects neoprene seals and extends tool life**

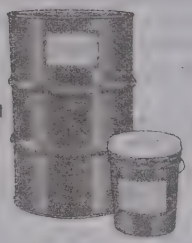
**No. 1C841.** 1-Gallon Can (74016) Shpg. wt. 8.0 lbs. Each ..... $18.00

**No. 1C853.** 5-Gallon Drum (74056). Shpg. wt. 43.0 lbs. Each ..... $76.00

## WS-11 NON-CHLORINATED SOLUBLE OIL

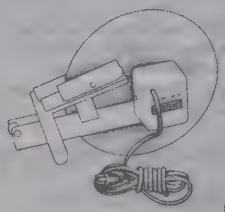
- **For light machining of all metals**
- **Can be used as a light rust preventative**

**No. 1C847.** 5-Gallon Pail (74053). Shpg. wt. 41.0 lbs. Each ..... $62.50



## WS-600A BIOSTABLE HEAVY-DUTY SOLUBLE OIL

- **Provides stable pH performance that resist bacteria and fungal growth, rancidity, and unpleasant odors**
- **Does not contain chlorine, active sulfur, or phenols**
- **Use on all metals, including titanium**
- **Contains additives and highly refined mineral oils which leave a protective film on machine slides, ways, fixtures**



**No. 1C845.** 1-Gallon Can (74018). Shpg. wt. 8.0 lbs. Each ..... $22.25

**No. 1C857.** 5-Gallon Drum (74058). Shpg. wt. 47.0 lbs. Each ..... $90.00

RUSTLICK®

No. 1C756

No. 1C877

## G-1066D SYNTHETIC DIAMOND GRINDING FLUID

- **Designed for diamond wheel grinding and slicing**
- **Transparent, biodegradeable, keeps wheels clean and free cutting**

**No. 1C875.** 5-gallon Pail (75051). Shpg. wt. 47.0 lbs. Each ..... $65.00

## G-25J SYNTHETIC GRINDING FLUID

- **For surface grinding applications**
- **Well suited for Blanchard-type grinding, grinding of cast iron and other ferrous metals**
- **Transparent, non-foaming, biodegradable, allows for rapid settling of residues**

**No. 1C877.** 5-gallon Pail (75052). Shpg. wt. 47.0 lbs Each ..... $64.00

## RUSTLICK 228J SYNTHETIC GRINDING FLUID

- **Designed for carbide grinding**
- **Remains clear and non-staining**
- **Does not contain nitrites, solvents or hazardous materials**
- **Allows fines to settle in minutes and provides excellent lubricity and less wheel dressing**

**No. 1C756.** 5-gallon Pail (73553). Shpg. wt. 47.0 lbs. Each ..... $84.00

## REFRACTOMETER

**No. 1E158.** Refractometer (78095). Shpg. wt. 2.5 lbs. Each ..... $270.00

## TRAMP OIL SKIMMER

- **Effective way to remove up to 1½ gallons of tramp oil per hour**
- **Helps to prevent rancidity and eliminates odors**

**No. 1C909.** 12" Skimmer (78013). Shpg. wt. 6.5 lbs. Each ..... $275.00

**No. 1C911.** 18" Skimmer (78019). Shpg. wt. 8.8 lbs. Each ..... $350.00

## DRUM MIXER

- **Use to dilute and mix coolant concentrates with proper amount of water**
- **Comes with series of color-coded inserts, each delivers specific dilution ratio**
- **Tamper-resistant**
- **Rustlick brand**

**No. 1E162.** Drum Mixer (78096). Shpg. wt. 4.0 lbs. Each ..... $120.00

## ORDERING HAS NEVER BEEN EASIER!

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

# COOLANTS AND LAYOUT FLUIDS

## RUSTLICK SN-100A BIOSTABLE SYNTHETIC COOLANT

- Versatile, heavy-duty fluid formulated to meet critical performance requirements
- Provides level pH performance which resists bacteria and fungal growth, rancidity, and unpleasant odors
- Does not contain chlorine, active sulfur, or phenols
- Excellent for use on all metals including titanium
- Provides rapid chip and swarf setting, leaves a clear, non-sticky film on tool, machine surfaces, and parts
- 5 Gallon pail

**No. 1C199.** Shpg. wt. 47.0 lbs. Each .....$90.00

## RUSTLICK SS-400A BIOSTABLE SEMI-SYNTHETIC COOLANT

- Contains boundary lubricants that improve the performance of all machining operations
- Coolant provides stable pH levels that resist bacteria and fungal growth, rancidity, and unpleasant odors
- Allows swarth to settle quickly to ease filtration and prevent poor finish from contaminated coolant
- Will not leave sticky or tacky residues on machine tools or parts
- 5 Gallon pail

**No. 1C752.** Shpg. wt. 47.0 lbs. Each .....$90.00

## RUSTLICK SS 405L SEMI-SYNTHETIC COOLANT

- Near-universal coolant for machining or grinding many different metals, including aluminum
- Provides exceptional lubricity and leaves a protective oil film on machines for rust prevention
- 5 Gallon pail

**No. 1E168.** Shpg. wt. 45.0 lbs. Each.....$75.00

**RUSTLICK®**

## PRUSSIAN BLUE LAYOUT FLUID

- Use on bearings, valves, gears, and other machined assemblies
- Locates high spots on close-to-tolerance components
- Aids precision fitting of machined surfaces
- Non-drying, easy cleanup
- Color blue
- Conforms to MIL-P3051
- Loctite brand

***New*** **No. 4UK13.** 0.75 Oz. Tube (80038). Shpg. wt. 0.1 lbs. List $3.19. Each .....$2.90

## BLUE LAYOUT FLUID

- The economical choice for most layout projects
- VOC compliant
- Fast-drying, non-flaking, non-etching, won't peel
- Heat-resistant, non-corrosive
- Adheres to metal or glass
- Equipped with DanVern Fanspray valve
- Spray-On brand (500603)

Uses: Pattern making, tool and die making, machining, maintenance mechanicals.

**No. 1D271.** 16-Oz. Can.. Shpg. wt. 1.1 lbs. List $5.20. Each $4.50; Lots 12..... $4.05

## LAYOUT FLUID REMOVER

- Specially formulated to remove layout fluids quickly and efficiently
- May also be used to remove light oils, greases, lacquer materials and other markings on metal or glass
- Leaves no residue
- Does not contain chlorinated solvents
- Equipped with DanVern standard valve
- Spray-On brand (500606)

Uses: Tool and die applications and production departments.

**No. 1D272.** 16-Oz. Can.. Shpg. wt. 1.1 lbs. List $5.20. Each $4.95; Lots 12 .....$4.46

# CUTTING AND METALWORKING FLUIDS

## [A] WATER SOLUBLE CUTTING OIL

- **For cutting and grinding operations**

Moderate-duty fluid containing soaps, sulfonates, coupling agents and stabilizers to control odor. Recommended for ferrous and nonferrous metals. Will not stain. Use in areas of normal water hardness (300 PPM). Do not use in machining magnesium due to potential fire hazards.

## [B] CUTTING FLUIDS, NONSTAINING

- **For automatic screw machines and all grinding operations where a non-staining cutting oil is needed**

Heavy-duty dual- or tri-purpose, antimist cutting oil. Nonstaining. Permits use where complementary oils are required for splash, hydraulic, or spindle lubrication systems of metalworking machines. Excellent for severe machining operations on difficult to machine metals such as copper and its alloys, as well as stainless and high-alloy steels.

Mobil

## [C] CUTTING FLUID, ACTIVE

- **For severe operations including threading, tapping, and broaching**

Antimist, active cutting oil. Transparent, low odor oil controls build up on tool tip for better surface finish. Applications include heavy-duty threading, tapping, and broaching. For use with difficult to machine metals that are tough, draggy, and brittle. Excellent for use with less difficult materials. May stain nonferrous metals except aluminum.

## [D] SYNTHETIC METALWORKING COOLANT

- **For machining operations such as drilling, turning, milling, grinding and tapping requiring friction reducing coolants**

Non-toxic, bioresistant synthetic based soluble oil which, when added to water forms an effective metalworking coolant. Use with a wide range of ferrous and nonferrous alloys. Optimal 5% concentration, with water, emulsifies spontaneously. Has good resistance to foaming and provides effective protection against rust. Does not contain halogens, sulfur, chlorine, biocides, phenols or nitrites. Proprietary formula requires less monitoring due to 250 day batch life and high resistance to bacterial growth. NOTE: Add coolant to water. Do not add water to coolant.

# CUTTING FLUIDS

## TAP MAGIC™

Special blend of extreme pressure lubricants penetrate to the cutting edge to break down surface tension, stress and prevent metal-to-metal adhesion (weldment). Drilling, tapping, threading, and boring operations are free of drag. Provides greater precision, superior finish while greatly extending tool life.

[A] **New Tap Magic.** Formulated with Ep-Xtra™ to replace 1,1,1 trichloroethane. Highly effective fluid yields micro-fine finish while preventing rust and corrosion. Ideal for difficult cutting operations including long duration extreme-pressure cuts. For use with all metals including stainless steel, aluminum and titanium. Longer cling time reduces need for reapplication.

[B] **Protap.** Highly effective on all metals. Completely biodegradable and free of all regulated chemicals.

[C] **Aluminum.** Formulated specifically for use on aluminum. Provides excellent performance for all cutting operations.

No. 4KK73

No. 4KK74

## EDGE LIQUID

LPS Tapmatic Edge Liquid is a biodegradable high film strength, friction-reducing agent for cutting and forming operations on all materials. The naturally-derived formula contains no hazardous chemicals.

- **Low toxicity**
- **Replaces flood coolants and eliminates disposal costs**
- **Increases tool life**
- **High film strength**
- **Reduces friction**
- **Excellent for high alloy metals**
- **Safe on all metals**
- **Compatible with oil and water systems**
- **Compatible with drop applicators**
- **Authorized by the USDA for use in federally inspected meat and poultry plants**

## EDGE CREME

LPS Tapmatic Edge Creme is a biodegradable, creme paste formula cutting lubricant that can be applied to cutting tools before tapping or reaming.

- **Ecological and economical**
- **Biodegradable, does not contain any hazardous chemicals**
- **For use when drilling, tapping blind holes, forming, bending, pre-coating fasteners and lubricating rubber seals**
- **Can be applied to cutting tools before tapping or reaming**
- **Excellent for vertical applications**
- **Safe on all metals**
- **Squeeze tube allows easy usage**
- **Authorized by the USDA for use in federally inspected meat and poultry plants**

## EDGE LUBE

LPS Tapmatic Edge Lube is a biodegradable, solid, white waxy bar cutting lubricant. Edge Lube is packaged in an easy to use cylinder for manual application to rotating or stationary cutting tools, grinding wheels or belts.

- **Low toxicity, does not contain any hazardous chemicals**
- **Biodegradable**
- **Excellent for belt, wheel and disc grinding or sawing applications**
- **Extends grinding wheel life**
- **Eliminates heat build-up and belt loading**
- **Safe on all metals**
- **White, solid waxy bar**
- **Compatible with oil and water systems**
- **Authorized by the USDA for use in federally inspected meat and poultry plants**

## NATURAL CUTTING FLUID

LPS Tapmatic Natural is a high-performance, biodegradable, naturally organic cutting fluid without 1,1,1 trichloroethane that can be used for tapping, drilling and machining.

- **Nontoxic and nonhazardous**
- **Does not irritate the skin, eyes or respiratory tract**
- **Ultra-safe and biodegradable**
- **High performance lubricating ability eliminates galling and seizing**
- **Safe on all metals**
- **Does not contain 1,1,1 trichloroethane, sulfur, chlorine, chlorinated solvents, water, mineral oil or inactive fillers**
- **Authorized by the USDA for use in federally inspected meat and poultry plants**

## SAFETY-DRAW® 722X Drawing and Tapping Lubricant

A heavy-duty extreme pressure lubricant for drawing and tapping. Relieves intense pressures and temperatures, allowing for greater metal flow with less tool wear. Used for rigorous applications such as cold forging, impact extruding, tapping and tube drawing.

- **Versatile for use in a wide range of applications on various metals**
- **Easy to apply with hand-held squeeze bottle; spout directs flow accurately for maximum effectiveness**
- **Castrol brand**

**No. 3VJ07.** SAFETY-DRAW® 722X.(16 oz bottles.) Shpg. wt. 1.3 lbs. Each.....**$8.59**

No. 3VJ07

No. 3VJ10

## STICK WAX® GENERAL PURPOSE SOLID LUBRICANT

STICK WAX® offers the lubricating properties of wax in a convenient cardboard tube. Can be used on an assortment of materials including metal, plastic, fiberglass, wood and hardboard. Periodic applications directly on the cutting surface of tools, saw blades, grinding wheels and sanding belts improves machining performance. Apply to windows, doors, fasteners, hinges, slides and tracks to reduce friction and smooth movement. Castrol brand.

**No. 3VJ10.** Shpg. wt. 1.1 lbs. Each.....**$4.20**

# MOLD RELEASES

### LPS MR-750 Silicone Mold Release/Lubricant

Nonflammable, noncorrosive, colorless thin film, excellent for releasing molded parts in high temperatures or pressures. 12 oz. LPS brand (01616).

**No. 4KK78.** Shpg. wt. 1.1 lbs. Each.....$8.80

### LPS MR-650 Food Grade Mold Release/Lubricant

Quick evaporating, noncorrosive lubricant. Meets FDA regulation for incidental food contact when used in accordance with FDA guidelines. Meets/exceeds the following specs: FDA Regulation 21 CFR 178.3570 for Incidental Food Contact. 12 0z. LPS brand (01716).

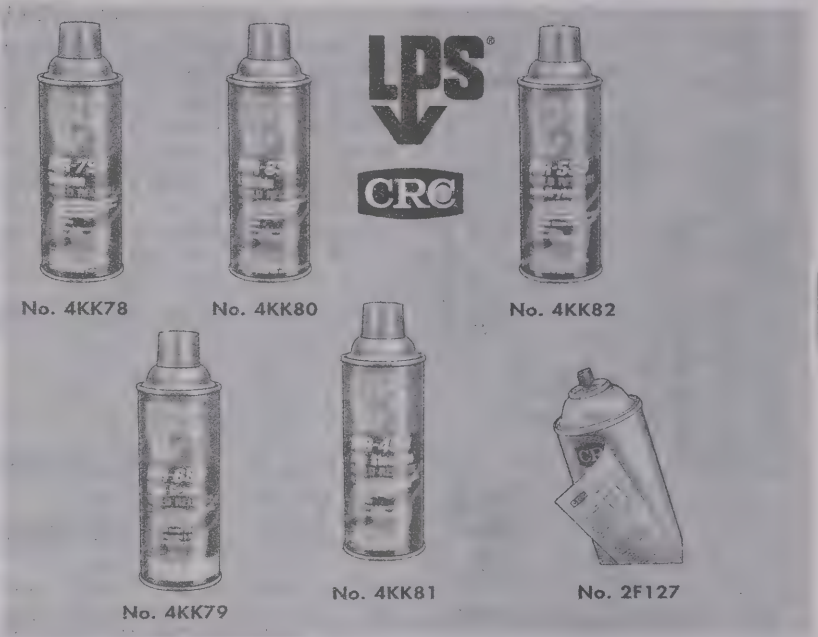
**No. 4KK79.** Shpg. wt. 1.1 lbs. Each.....$8.64

### LPS MR-850 Lecithin Mold Release/Lubricant

Nonflammable, paintable lubricant. MR-850 is excellent for releasing molded parts for post finishing applications and is an ideal welding anti-spatter. 12 oz. LPS brand (01816).

**No. 4KK80.** Shpg. wt. 1.1 lbs. Each.....$8.23

### LPS MR-950 Zinc Stearate Mold Release/Lubricant



Nonflammable lubricant, used for releasing molded parts for post decorating applications. 12 oz. LPS brand (02316).

**No. 4KK81.** Shpg. wt. 1.1 lbs. Each.....$8.33

### LPS MR-550 Mold Release/Lubricant

Nonflammable, dry film lubricant with the latest advancement in release technology. Provides lubrication for releasing molded parts. 12 oz. LPS brand (02616).

**No. 4KK82.** Shpg. wt. 1.1 lbs. Each.....$8.59

No. 4KK78 No. 4KK80 No. 4KK82

No. 4KK79 No. 4KK81 No. 2F127

### CRC MOLD RELEASE—BORON NITRIDE

Super slick, dry film lubricant that withstands extreme temperatures. Can be used as a mold release for metal, ceramics and other materials. Withstands maximum temperature 1500°F in an oxidizing environment and can also be used as a electrical insulator and thermal conductor. 16 oz. can/10 oz. net wt. CRC brand (03046).

**No. 2F127.** Shpg. wt. 1.0 lbs.Each $32.50; Lots 12.....$29.25

### CRC MOLD RELEASE—PAINTABLE LECITHIN

Versatile non-silicone paintable mold release assures multiple clean releasers. Provides quick, clean releases for metal die molding, thermoset plastics, epoxy resins and thermoplastics. Does not interfere with parts to be painted, adhesive bonded, heat sealed or laminated. 16 oz. can/12 oz. net wt. CRC brand (03047).

**No. 2F128.** Shpg. wt. 1.0 lbs. Each $9.81; Lots 12.....$8.83

# CUTTING FLUIDS

## CRC CUTTING OIL

Thread-cutting lubricant for use on all types of metal. Low-odor formula is safe on soft metals such as brass, copper, and aluminum, and has no strong sulfur odor. Additives create strong film that withstands extreme pressures, increasing tool life and ease of cutting. 16 oz. can/12 oz. net wt. CRC brand (14050).

**No. 2F146.** Shpg. wt. 1.0. List $5.62. Each.....$5.35

## LPS® TAPMATIC AQUACUT

**LPS® Tapmatic® Aquacut cutting fluid.** A water-based cutting fluid that extends tool life and reduces friction, heat, and tool failure. Provides clean cuts and fine finishes. Designed for use on steel, aluminum, and other metals, except magnesium. Does not contain any sulfur, chlorine, or 1,1,1 trichloroethane. Will not stain metal. Nonflammable and cinnamon-scented. LPS brand (01216).

**No. 2C649.** Shpg. wt. 1.3. List $7.25. Each.....$6.03

## LPS® TAPMATIC CUTTING FLUIDS

**LPS® TAPMATIC #1 GOLD Cutting Fluid** Simultaneously protects and lubricates to reduce friction and eliminate chip welding in tapping, drilling, reaming, and threading. Does not contain 1,1,1 trichloroethane, CFC's, chlorinated paraffins, water, solvents, or inactive fillers. Safe to use on all metals. LPS brand (40320).

**No. 2F019.** Shpg. wt. 0.3. List $4.36. Each.....$3.80
**No. 2F021.** Shpg. wt. 1.1. List $8.57. Each.....$7.45

No. 2C649 No. 2F019

# LUBRICANTS AND COMPRESSED AIR SPRAYERS

## WD-40® LUBRICANTS

**WD-40®** Displaces moisture and establishes a protective barrier to prevent rust. Loosens rust-to-metal bonds and frees stuck, frozen or rusted metal parts. Contains no CFC's chorinated solvents or 1.1.1. Trichlorethane. Dissolves most adhesives. USDA authorized for use in federally inspected meat and poultry plants (H-2 classification). Silicone free, won't attract dust or dirt.

**T*A*L5™** Aerosol for heavy duty applications. Resists breakdown due to corrosion, friction, temperature, load and motion. Can be applied to rubber, metal or plastic. Contains no CFC's or VOC's and has a flash point of over 200°F. 360° spray valve for added convenience.

**3-IN-One®** for applications that require precise control of lubrication and rust prevention. Unique spout helps to pinpoint each application. Contains no CFC's or VOC's.

## SURE SHOT RECHARGEABLE/REUSABLE COMPRESSED AIR SPRAYERS

**These sprayers are not recommended for use with paints.**

- **Uses compressed air eliminating hazardous propellants**
- **Safe and easy to use. Unscrew fill port, fill with sprayable fluids, and charge using air chuck using standard compressed air (Max. 200 PSI)**
- **Provides economical spraying of bulk liquids**
- **Contents label write-in-space**
- **Eliminates disposal of used and/or half full discharged aerosol cans**
- **Controlled, uniform spraying action with a full range of nozzles from pin stream to fine finish**
- **For use with light fluids (10 weight motor oil and lighter) such as lubricants, penetrants, degreasers, pesticides, solvents and cleaners**

**To choose the right model for your needs,** refer to chart below. If unsure of base, contact fluid supplier for recommendations.

**No. 2Z858** not for use with ammonia based materials.

**Nos. 4Z986 and 4F965** not for use with chlorinated materials.

**8 Ounce** (1 cup) unit No. 4F965 is constructed of aluminum. Similar to dimensions of standard aerosol cans. Comes with double set of spray nozzles. From pin stream (with extension tube) to fine finish.

**16 Ounce** (1 pint) units Nos. 4Z796 and 6Z790 come in aluminum or stainless steel. Both units include a double set of spray nozzles from pin stream (with extrusion tube) to fine mist spray, similar in performance to those used on aerosol spray cans. Easy to clean and maintain.

**32 Ounce** (1 quart) units Nos. 2Z857 and 2Z858 come in steel with red enamel finish and chrome plated brass. Sprayers are equipped with metal, swirl jet nozzles that convert from general purpose round to pin stream. Thumb trigger style.

### CRC 3-36®

Multi-purpose lubricant/corrosion inhibitor that displaces moisture and seals out corrosion with micro-thin film. High affinity for metal allowing penetration and lubrication, while attacking rust and preventing corrosion. Cleans light soils. 360° spray valve for added convenience. 16 oz. can/11 oz. net wt. CRC brand (03005).

**No. 2F141.** Shpg. wt. 1.0 lbs. Each .....$3.95
Lots 12 .....$3.56

### CRC ULTRA-LITE 3-36®

Ultra-thin, non-staining dry film light-duty lubricant and cleaner resists oil, dust and dirt build-up. Penetrates minute openings, sealing out moisture and preventing corrosion. Excellent for use on delicate mechanisms and parts. 16 oz. can/11 oz. net wt. CRC brand (03160).

**No. 2F140.** Shpg. wt. 1.0 lbs. Each .....$4.23
Lots 12 .....$3.81

### CRC TECHNICAL GRADE 3-36

Multi-purpose lubricant/corrosion inhibitor that displaces moisture, cleans surfaces without leaving gummy residue, penetrates rust and corrosion. Safe for use around polyethylene, PPO resins, ABS and polycarbonate plastics including Noryl®. 360° spray valve for added convenience. 16 oz. can/11 oz. net wt. CRC brand (03003).

**No. 4ZF10.** Shpg. wt. 1.0 lbs. Each .....$4.29
Lots 12 .....$3.86

### CRC SCREW LOOSE PENETRATING OIL

Non-compromise penetrant attacks rust and corrosion and penetrates through oxides and soil to free corroded fasteners and mechanical components. Low surface tension formulation quickly dissolves rust, scale, and corrosion, aiding disassembly of close tolerance fasteners and assemblies. 360° spray valve for added convenience. 16 oz. can/11 oz. net wt. CRC brand (03060).

**No. 2F145.** Shpg. wt. 1.0 lbs. Each .....$3.64
Lots 12 .....$3.28

### LPS® LST PENETRANT

A deep penetrating formulation which attacks rust and corrosion to free "frozen" parts. Extremely low surface tension that combines with a powerful foaming action to provide complete surface coverage, better penetration, and improved moisture displacement. USDA authorized for use in federally inspected poultry and meat plants. Meets or exceeds these specifications: Fed. Spec. VV-P216C Type 1 A-A-50493 Type 1. LPS brand (01916). 11 oz. can.

**No. 2C665.** Shpg. wt. 1.0 lbs. Each .....$4.41
Lots 6 .....$3.97

### TKX - ALL-PURPOSE PENETRANT

Lubricant and Protectant. A safe, nonflammable propellant alternative that loosens rusted and frozen parts, displaces moisture, and protects against corrosion. 11 oz. LPS brand (02016).

**No. 4KK77.** Shpg. wt. 1.0 lbs. Each .....$3.33

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

CRC LPS Starrett

No. 2F141 No. 2F140 No. 4ZF10 No. 2F145 No. 2C665

No. 4KK77 No. 6Y743 No. 6Y744 No. 4L958 No. 1D267

### LPS 1 GREASELESS LUBRICANT

Fine lubricant that penetrates, dries "non-oily", and resists dirt and dust build-up. Cleans and displaces moisture. Dissolves and removes grease and oils. Meets or exceeds specifications: O-W-001284a, MIL-C-23411A. 16 oz. can/11 oz. net wt. LPS brand (00116).

**No. 6Y743.** ❸ Shpg. wt. 1.0 lbs. Each .....$5.08

### LPS 2 INDUSTRIAL STRENGTH LUBRICANT

Multipurpose lubricant and penetrant with added corrosion protection. Non-drying, oily film lubricant loosens rusted and frozen parts. Meets or exceeds specifications: MIL-C-813809E Type III Grade 1, 16 oz. can/11 oz. net wt. LPS brand.

**No. 6Y744.** ❸ Shpg. wt. 1.0 lbs. Each .....$5.44

### STARRETT M1 ALL-PURPOSE LUBRICANT

Cleans, polishes and protects against rust and corrosion damage. Prevents short circuits and halts electrical leakage from wet ignition wires. Contains no fluorocarbons, detergents, or silicone and is not water soluble. Protects high quality precision tools. FDA approved for use in or near food-related environments. Works in extreme temperatures. Removes grease, tar and grime from metal parts and painted surfaces. Starrett brand (95173).

**No. 4L958.** Shpg. wt. 1.1 lbs. Each ..... $3.69

### CRC BELT DRESSING

Extends the life of drive belts and pulley bearings by improving traction and allowing runs under reduced belt tension. Its a tacky film resists being washed off. Meets FDA regulation. CFR21-178.3570 for incidental contact.

**No. 1D267.** Shpg. wt. 1.3 lbs. Each $5.40
Lots 12 .....$4.86

(▲) Net prices, not subject to discounts.

# SPECIALTY LUBRICANTS

## TEFLON LUBRICANTS

### CRC POWER LUBE®

Sophisticated additive package with "Teflon" provides long lasting protection against friction and wear—increasing life and operating efficiency of parts and equipment. Works under extremes of pressure and the environment. 16 oz. can/11 oz. net wt. CRC brand (03045).

**No. 2F144.** ❸ Shpg. wt. 1.0 lbs. Each ..... $4.48

### LPS MAGNUM TEFLON™

LPS Magnum Teflon™ is a high-performance lubricant formulated for maximum lubricity. 11 oz. LPS brand (00616).

**No. 4KK75.** Shpg. wt. 1.0 lbs. Each..... $6.82

## SILICONE LUBRICANTS

### LPS HEAVY-DUTY SILICONE

A silicone-rich formula that lubricates and protects rubber, plastic, and metal parts. Meets or exceeds the following specs: FDA Regulation 21. CFR 178.3570 for Incidental Food Contact. 13 oz. LPS brand.

**No. 4KK76.** Shpg. wt. 1.1 lbs. Each ..... $5.18

### CRC EXTREME DUTY SILICONE

Nonstaining, clear, odorless film which is moisture resistant and helps prevent corrosion and oxidation. Reduces friction and galling—effective on metallic and nonmetallic surfaces. High grade release and parting agent. Effective temperature range: -100°F to 500°F. USDA authorized for use in federally inspected meat and poultry plants. 16 oz. can/10 oz. net wt. CRC brand (03030).

**No. 4ZF08.** Shpg. wt. 1.0 lbs. Each..... $6.60

### CRC FOOD GRADE SILICONE

Colorless, tasteless, non-toxic and non-staining moisture resistant film. Performs through wide temperature range. Excellent release agent and lubricant for all surfaces. Meets FDA Regulation CFR 21-178.3570 for incidental food contact. 16 oz. can/10 oz. net wt. CRC brand (03040).

**No. 2F130.** Shpg. wt. 1.0 lbs. Each..... $4.35

### CRC CHAIN AND WIRE LUBRICANT

Colorless, tasteless, non-toxic and non-staining moisture resistant film. Performs through wide temperature range. Excellent release agent and lubricant for all surfaces. Meets FDA Regulation CFR 21-178.3570 for incidental food contact. 16 oz. can/10 oz. net wt. CRC brand (03050).

**No. 2F139.** Shpg. wt. 1.0 lbs. Each..... $5.25

### CHAIN & CABLE LUBRICANT

Oil lubricant with graphite increases the life of chains and cables by providing longer lasting lubrication. When oil evaporates graphite remains to provide lubrication. Lubricant protects against corrosion, penetrates wire rope, and is unaffected by temperature extremes. For use on conveyors, fasteners, bearings, dies and molds, chains, steering cables, hinges, and wire rope. 16 oz. can/12.5 oz. net. Superior Graphite brand (35201G).

**No. 6Y649.** Shpg. wt. 1.2 lbs. Each..... $5.40

No. 4KK75 No. 4KK76

No. 2F130 No. 6Y649

### CRC DRY MOLY LUBRICANT

High solids molybdenum disulfide (moly) coating that withstands high pressure and high temperature. Penetrates substrate pores and forms thin film that provides long-lasting anti-friction and anti-seizure properties. Dries rapidly, excellent for use as dirt resistant lubricant. 16 oz. can/11 oz. net wt. CRC brand (03084).

**No. 2F138.** Shpg. wt. 1.0 lbs. Each..... $4.54

### CRC MACHINE OIL—FOOD GRADE

General purpose machine oil that penetrates rust, dirt, scale, and corrosion. Non-silicone lubricant for use in areas where silicone over spray can interfere with carton sealing and capping operations. Virtually odorless, tasteless, and colorless. USDA H-1 rated. 16 oz. can/12 oz. net wt. CRC brand (03081).

**No. 2F132.** Shpg. wt. 0.9 lbs. Each..... $5.03

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets are available. See page opposite inside back cover.

**Grainger will supply you with the dependable, brand name products you need to keep your operation running smoothly-plus the solutions you need to keep your operation running more profitably.**

# SPRAY LUBRICANTS

### [A] T.F.E DRY LUBE

Dry, non-oily, non-staining lubricant made with DuPont Krytox®. Ideal for use where low speeds and light loads are involved. Dries quickly to a white, chemically inert film. Effective from -40 to 572°F. SprayOn brand (S00708).

### [B] THE PROTECTOR™ PENETRANT

Unlocks frozen or rusted parts. Formulated to ensure maximum moisture displacement. Ultra-thin and greaseless with a rust preventative film. USDA H-2 rated. Dielectric strength 47,000 VPM. Perfect for electrical wiring, transformers, operating controls, and production equipment. Sprays in upright and inverted positions. SprayOn brand (S00711).

### [C] SILICONE LUBRICANT

All-purpose lubricant stops squeaks and sticking, eliminating friction, repelling water. Protects and lubricates wood, most plastics, rubber and metals against corrosion. Effective from -50 to 375°F. Equipped with Spray any Way valve and extension tube. SprayOn brand (S00206).

### [D] GEAR AND WIRE ROPE LUBRICANT

Provides lubrication and rust prevention for gears, cables, and wire rope. Strong adhering properties; penetrates pores of metal and core of wire rope. Black color spray allows visual check for coverage. Will not wash away. Withstands extreme temperatures. Works from 0 to 250°F. SprayOn brand (S00201).

### [E] CUTTING OIL

Provides cooling and lubrication at point of work to eliminate scoring. For use when drilling, cutting, sawing, and threading. Ideal for all metals, including stainless steel, aluminum, brass, and copper surfaces. Foaming action aids penetration for longer tool life. Features jet-type spray, and pinpoint extension tube. Spray On brand (SS00208).

## SPECIALTY LUBRICANTS

### PENETRATING OIL

Fast-acting, deep-action oil with graphite eases disassembly of mechanical components by penetrating deeply to loosen rusted and frozen parts. When oil evaporates, graphite is still present to provide lubrication. For use on extrusions, bearings, latches, nuts and bolts, precision parts, engine parts, pulleys, fasteners, etc. 16 oz. can/12.5 oz. net.

**No. 6Y650.** Shpg. wt. 2.4 lbs. List $6.00.Each **$5.40;** Lots 12 .....**$5.10**

### CHAIN & CABLE LUBRICANT

Oil lubricant with graphite increases the life of chains and cable by providing longer lasting lubrication. When oil evaporates, graphite remains to provide lubrication. Lubricant protects against corrosion, penetrates wire rope, and is unaffected by temperature extremes. For use on conveyors, fasteners, bearings, dies and molds, chains, steering cables, hinges, and wire rope. 16 oz can/12.5 oz. net.

**No. 6Y649.** Shpg. wt. 1.2 lbs. List $6.00. Each **$5.40;** Lots 12 .....**$5.10**

**SUPERIOR GRAPHITE CO.**

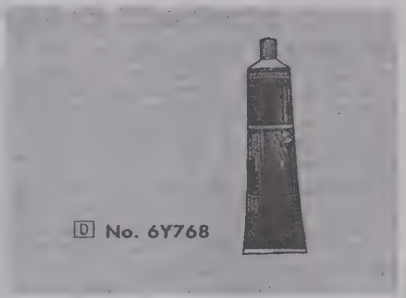
No.6Y650

No. 6Y649

# SPECIALTY LUBRICANTS

**A** **CRC White Lithium Grease** High quality, purity NLGI grade 2 grease with excellent EP characteristics. Resistant to wash off and maintains high viscosity film. White color for easy visual detection. 16 oz. can/10 oz. net wt. CRC brand (03080).

**A** **CRC Di-Electric Grease** Non-curing silicone paste used for sealing, lubricating, protecting and insulating. Waterproof—protects against water infiltration and arcing on all types of electrical connections. Excellent electrical resistance, high dielectric strength, ability to encapsulate airborne contaminants and prevent them from causing problems to insulators. Helps reduce arcing, tracking, crossover, and voltage drop conditions—improving electrical performance. 16 oz. can/10.5 oz. net wt. CRC brand (03082).



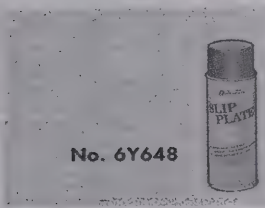
**B** **Extreme Low Temperature Bearing Grease** Silicone grease NLGI 1.5 (Light), 2 (Medium), compatible with metal, plastic, and rubber. For use with: high or low speed lightly loaded ball bearings primarily in lower temperatures. Food grade USDA H2. Dow Corning brand.

**C** **Extreme High Temperature Bearing Grease** Carbon black thickened silicone grease, NLGI #2. For use with lightly loaded, low speed ball and anti-friction bearings encountering high temperatures.

**D** **High Temperature Bearing Grease Silicone** grease NLGI 1.5 (Light), 2 (Medium). For use with: Moderate to high speed loaded bearings and plastic and rubber parts encountering higher temperatures. Available in light and medium. Dow Corning brand.

**E** **O-Ring Lubricant** Lithium soap thickened silicone grease NLGI #2. For use with: rubber O-rings and seals providing barrier between rubber and metal parts. Not recommended for use with silicone/rubber, polycarbonate, and some plastics. Dow Corning brand.

**F** **Valve Lubricant/Sealant** NLGI #3 heavy consistency grease-like silicone paste. For use as a valve lubricant and sealant providing non-curing, non-paintable moisture barrier. NSF51 and FDA21 Approved. Dow Corning brand.



**D** No. 6Y768

**G** **Electrical Insulating Compound** Medium consistency grease like silicone paste. For use with electrical/electronic equipment. Provides moisture barrier. Not for surfaces that will be painted. Dow Corning brand.

No. 6Y648

No. 6Y652

No. 6Y654

### GRAPHITE DRY FILM LUBRICANT

Slip Plate® greaseless, ozone-safe lubricant reduces friction, resists build-up of rust, prevents parts wear, and bonds quickly. For use on saw blades, conveyors, hitches, hay bailers, tools, fork lifts, snowblowers, and lawnmower decks. Dries quickly at room temperature. Operating temperature: -75°F to 400°F. 16 oz. can/12 oz. net. Superior Graphite brand.

**No. 6Y648.** Shpg. wt. 1.2 lbs. List $6.51.
Each **$5.86;** Lots 12.....**$5.53**

### SLIP PLATE No.1 DRY FILM LUBRICANT

Heavy-duty dry film lubricant for maximum lubricity and protection. For applications that slide, roll, turn, twist or spin. Bonds to clean metal, wood, concrete, and most plastic surfaces. Dry film graphite eliminates build up of dirt and provides long lasting lubrication. Tack free dry time: 70-90 minutes. Coverage (approx.): 200 sq.ft. Operating temp. (approx.): -75°F to 400°F. Do not store above 120°F. Superior Graphite brand.

**No. 6Y652.** Shpg. wt. 10.0 lbs. List $32.97.
Each **$29.70;** Lots 4.....**$26.70**

**No. 6Y653.** Shpg. wt. 51.0 lbs. List $155.41.
Each.....**$139.90**

### SLIP PLATE No. 3 DRY FILM LUBRICANT

**Slip Plate No. 3 DRY FILM Lubricant** sprayable, quick-dry lubricant provides protective dry film graphite coat which does not gather dirt, dust, or mud. Will not melt, freeze, or wash off. Formulated for spray gun, paint brush or dipping applications. Tack free dry time: 15-20 minutes. Coverage (approx.): 300 sq.ft. Operating temp.: -75°F to 400°F. Do not store above 120°F. Container size: 1 gallon. Superior Graphite brand.

**No. 6Y654.** Shpg. wt. 9.0 lbs. List $30.62.
Each.....**$27.60**

# CLEANERS AND DEGREASERS

## CONTACT CLEANERS

**CRC INDUSTRIAL CONTACT CLEANER.** This patent pending blend of solvents replaces chlorinated precision cleaners. For precision cleaning applications involving sensitive plastics. Does not contain suspected carcinogens or highly toxic solvents and is not restricted under the EPA Essential Use guidelines. Effectively removes dirt, dust, light oils and fingerprints. Non-corrosive; SNAP approved.

**CRC CONTACT CLEANER 2000.** A HCFC based, high purity cleaner that does not exhibit the same ozone-depleting properties as traditional CFC based cleaners. Evaporates fast, no residue, no flashpoint. For removing flux, light oils, and other contaminants.

**CRC QD CONTACT CLEANER.** An alcohol based precision cleaner that is 100% free of CFC's. Evaporates fast, no residue, and is harmless to most plastics and paper tapes.

**IMPORTANT PRODUCT INFORMATION**

**Contact Cleaner 2000, No. 1D260, is EPA regulated, and may only be purchased by commercial entities. Buyers must verify their commercial status, prior to purchasing the product, by presenting a Federal employer identification number, a state sales tax exemption number, a local business license number or a government contract number.**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are printed on reverse side of label.
(*) Product may only be purchased by commercial users.

## DEGREASING SOLVENTS

### CRC HEAVY-DUTY DEGREASER

TCE-based cleaner/degreaser is chemically stable and effective in heavy-duty applications. Has no ozone depleting substances. Nonflammable, nonstaining, and noncorrosive. Evaporates fast; no residue. Dissolves away grease, oil, dirt, and sludge. CRC Brand.

### CRC HEAVY-DUTY DEGREASER II

Alternative to 1, 1, 1, Trichloroethane and other chlorinated solvents. Removes tough grease, oil, and dirt from mechanical and electrical equipment. Flashpoint of over 140°F and dielectric strength of 21,600 volts. CRC Brand.

### CRC QUICK CLEAN

A nonozone-depleting alternative to 1, 1, 1, Trichloroethane solvents. Nonflammable, nonstaining, noncorrosive, and nonconducting. Evaporates fast, no residue, removes grease, oil, and dirt from equipment. CRC Brand.

| Description | Can Size | Net Wt. | CRC Model | Stock No. | List | Each | Lots 12 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **Heavy-Duty Degreaser** | 20 | 19 | 03095 | **1D265*** | $7.24 | **$6.76** | **$6.08** | 1.5 |
| **Heavy-Duty Degreaser II** | 20 | 15 | 03120 | **1D264*** | 8.61 | **7.83** | **7.05** | 1.3 |
| **Quick Clean Degreaser** | 20 | 19 | 03180 | **1D259❷†** | 5.23 | **4.76** | **4.28** | 1.5 |

(*) Product may only be purchased by commercial users. (†) Product contains Dichloromethane which has been shown to cause cancer in labaratory animals.
❷ These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch.

## TECHNICAL REFERENCE LITERATURE

**Technical reference literature is available on such subjects as welding, basic electricity, electric motors, and hydraulics and pneumatics See Index under Books.**

# CLEANERS AND DEGREASERS

## A LPS ZERO TRI CLEANER/DEGREASER

Fast-acting, solvent alternative to 1,1,1 for cleaning and degreasing parts and equipment. Removes oil, grease, wax, tar, dirt, brake fluid, and other contaminants in seconds. Safe for most surfaces. ZeroTri is flammable. USDA Authorized for use in federally inspected meat and poultry plants. LPS brand (03520). 15 oz. can.

**No. 2C691**. Shpg. wt. 1.2 lbs. Each.....$8.53

## B LPS PRECISION CLEAN MULTI-PURPOSE CLEANER/DEGREASER

Removes stubborn soils such as grease, oil, sludge, soot, ink, coffee, and more. Water-based, biodegradable, wipes off or rinses clean. Contains potentially harmful butyl, chlorinated or petroleum solvents, bleach, ammonia, or abrasives. Used in parts washers, dip tanks, ultrasonic cleaners, and in pressure washers. Meets or exceeds these specifications: McDonnel Douglas CSD #1, Boeing D6-17487 Rev. H, AMS 1526A. USDA authorized for use in federally inspected meat and poultry plants. LPS brand (02728). 28 oz. bottle.

**No. 2C682**. Shpg. wt. 2.2 lbs. Each.....$6.87

## C LPS PRESOLVE CLEANER/DEGREASER

Removes adhesives, oils, grease, wax, tar, dirt. Nonconductive, no CFC's or 1,1,1 trichloroethane, can be used on metal and most plastics. USDA authorized for use in federally inspected meat and poultry plants. Meets or exceeds these specifications: McDonnell Douglas CSD #1. LPS brand (01420). 15 oz. can.

**No. 2C654**. Shpg. wt. 1.3 lbs. Each.....$8.25

## D LPS CFC-FREE ELECTRO CONTACT CLEANER

Fast-penetrating cleaner for removing light grease, oil, dirt, and flux from delicate precision parts. Contains no CFC's, HCFC's, or 1,1,1 trichloroethane. Fast evaporation. NSN#6850-00-N047576. USDA authorized for use in federally inspected meat and poultry plants. LPS brand (03116). 11 oz. can.

**No. 2C687**. Shpg. wt. 1.0 lbs. Each.....$10.09

## E LPS NO FLASH ELECTRO CONTACT CLEANER

A vaporous solvent cleaner alternative to CFC's that's safe to use on most surfaces. Can be used while equipment is in operation. Dislodge soil, grease, dirt, and other materials from precision parts. Meets or exceeds these specifications. McDonnell Douglas CDs #1. LPS brand (04016). 15 oz. can.

**No. 2F017**. Shpg. wt. 1.3 lbs. Each.....$13.38

## F LPS PSC PLASTIC SAFE CLEANER

A nonconductive, noncorrosive cleaner with no flash point. It is safe to use on most plastics and can be used on energized equipment. 20 oz. can. LPS brand.

**No. 4KK69**. Shpg. wt. 1.4 lbs. Each.....$24.39

## G LPS MAGNUM TEFLON™

A high-performance lubricant formulated for maximum lubricity. 11 oz. LPS brand.

**No. 4KK75**. Shpg. wt. 1.0 lbs. Each.....$6.82

## H HEAVY-DUTY SILICONE LUBRICANT

A silicone-rich formula that lubricates and protects rubber, plastic, and metal parts. Meets or exceeds the following specs: FDA Regulation 21. CFR 178.3570 for Incidental Food Contact. 13 oz. LPS brand (01516).

**No. 4KK76**. Shpg. wt. 1.1 lbs. Each.....$5.18

## I TKX ALL-PURPOSE PENETRANT

Lubricant and Protectant. A safe, nonflammable propellant alternative that loosens rusted and frozen parts, displaces moisture, and protects against corrosion. 11 oz. can. LPS brand (02016).

**No. 4KK77**. Shpg. wt. 1.0 lbs. Each.....$3.33

## J HDX HEAVY-DUTY DEGREASER

Fast-acting, heavy-duty solvent removes oil, grease, wax, dirt, moisture, tar, brake fluid, and other contaminants from parts and equipment without rinsing. Nonflammable. LPS brand (01020). 19 oz.

*New* **No. 4KK67**. Shpg. wt. 1.5 lbs. Each.....$5.94

# CLEANERS, VARNISHES, COATINGS AND RUBBER PROTECTANT

## CLEANERS

### ENGINE DEGREASER

Especially formulated to clean all mechanical engines, machinery, and tools. Removes dirt, grease, and varnish deposits. Simply spray on, allow to set for 15 minutes, and flush surface with water; contaminants are carried away, leaving a clean surface. Biodegradable. Penetrates to the metal. Water soluble. Noncorrosive, nonstaining. Will not damage wiring, insulation, distributor caps, or painted surfaces. High velocity valve delivers deep penetration to intricate mechanical parts. For use on: automotive and marine engines; shop equipment; tools.

### PAINT & DECAL REMOVER

A fast-acting remover that cuts through all paint finishes (air-dry or baked). Also removes urethane, varnish, shellac, decals. Catalyst action penetrates through gasket cements, sealants, adhesives, tape residue, and carbon deposits. Leaves surface clean and ready to repaint. Accepted by USDA as a paint remover for use in nonprocessing areas of official establishments operating under the Federal Meat and Poultry Products Inspection Program. For use on: metal; wood; glass; concrete; stone; brick; ceramic tile. NOTE: May damage plastic, fiberglass, or any synthetic material. Before using on questionable surfaces, first test for suitability.

## VARNISHES AND COATINGS

### GREEN EPOXY INSULATING VARNISH

A superior spray insulation for motor windings, electric components, etc. Bake or air dry to an extra-hard, tough surface that is oilproof and waterproof. High arc-resistant and nontracking properties. High dielectric strength. Class F, over 1900 volts/mil, dry; over 1400 volts/mil, wet. (ASTM-D115-55). Danvern® Standard nozzle features clog-resistant spraying, less finger pressure, greater coverage.

### RED & CLEAR INSULATING VARNISHES

Insulating sprays for general coating, impregnating and insulating electrical and electronic work. Excellent adhesion to metals, windings, coils. Dry in 10-15 minutes; tack-free in 60 minutes. Protect surface against oils, moisture, acid, and alkalis. Perfect for small field and magnet coils; penetrate old and new windings; excellent flexibility and water resistance. Dielectric strength up to 2100 volts/mil.

Air dries faster than most insulating materials. High arc-resistance and nontracking properties. Equipped with exclusive easy-operating Danvern® Standard nozzle for less finger fatigue and professional coverage. Use as an insulating varnish in Class F systems as well as a finish coat. Resist abrasion and wear. Contain no methylene chloride. For use on: motor windings; transformers; commutator ends; sealing electrical and electronic components; field and magnet coils; armatures; stator windings; ring and frames.

### CLEAR ACRYLIC COATING

Seals electrical and electronic parts. Weatherproofs and waterproofs in one application. Protects against rust, corrosion, and tarnish. Resists fungus, chemicals, dirt, and grease. Material dries in approximately four minutes to a crystal clear, flexible film. Meets MIL-C-175048 and TT-L-50G Type I and Type III performance requirements. Dries to the touch in less than five minutes. Dielectric strength of 1500 volts/mil. Equipped with Danvern® Standard nozzle. Contains no methylene chloride. For use on: wiring installations; printed circuit boards; batteries; chrome and bright work.

### CRYSTAL CLEAR COATING

A clear, colorless lacquer protective spray coating. Tough, long-lasting protection for electronic components and circuits. Goes on clear; stays clear. Dries to the touch in two minutes. Waterproof and weatherproof. Resists moisture, rust, tarnish, and corrosion. High dielectric strength helps keep electronic equipment functioning under adverse conditions. Dielectric strength is 1346 volts/mil. For use on: televisions, radios, stereos, and other electronic units.

No. 5E229

## COLOR GUARD™ RUBBER PROTECTANT

Rubber coating won't crack or chip like paint. Protect, seals, identifies, and adds gripping power to almost any material like valve handles, handtools, electronic connections, and pipe hangers. Dip, spray, or brush on. Use to 200°F. USDA approved. Permatex brand.

# CORROSION INHIBITORS AND RUST PREVENTATIVES

### LPS 3 HEAVY DUTY RUST INHIBITOR

Transparent waxy film stops rust and corrosion, provides protective coating for up to 2 years. Resists moisture, sand, dirt, dust, and vibration. Stops exfoliation or filiform corrosion of aluminum. Provides anti-seize coating. Penetrates to replace moisture. Meets or exceeds specifications: MIL-C-16173D-Grade 2, MIL-C-0083933A, BMS 3-23F Type II; DMS 2150, Airbus TN A.007.10138 Type 1, Grade 2. 16 oz. can/11 oz. net wt. LPS brand (00316).

**No. 6Y745.** ❸ Shpg. wt. 1.0 lbs. Each ..... $6.62

### RUST BREAKER™

Penetrates through grease, dirt, and corrosion to free rusted or frozen parts quickly effortlessly. Deposits a long-lasting moly film to displace moisture and protect against rust and corrosion. Jet-stream spray assures saturation of working areas only, preventing unnecessary waste and also allowing safe application on moving parts. Low surface tension permits complete penetration. Will not harm painted surfaces. Packaged with a nonflammable propellant that provides a higher flashpoint and safety. Diaelectric strength is 47,400 volts/mil, per ASTM D 877. Authorized by USDA for use in federally inspected meat and poultry plants. For use on: lugs and bolts; tight-fitting parts and fasteners; tools and dies; machined shafting. SprayOn brand (S00103).

**No. 1D277.** Shpg. wt. 1.1 lbs. Each ..... $4.25

### CRC SP-350

Long-term indoor corrosion inhibitor provides extended protection for all metal parts and assemblies for up to 2 years. Thin, non-drying film protects better than many thicker, waxy films and is easily removed with solvent cleaners. 16 oz. can/14 oz. net wt. CRC brand (03262).

**No. 2F142.** ❸ Shpg. wt. 1.0 lbs. Each ..... $5.99

### CRC SP-400

Extreme duty corrosion inhibitor provides long-term outdoor metal protection for up to 1 year. Dry transparent waxy film seals out moisture and can be easily removed or diluted with petroleum solvents. Highly resistant to humidity and salt spray—coating never becomes brittle. 16 oz. can/12 oz. net wt. CRC brand (03282).

**No. 2F143.** Shpg. wt. 0.9 lbs. Each ..... $5.25

### LPS COLD GALVANIZED CORROSION INHIBITOR

The 95% zinc, coating protects ferrous metals indoors and out. Temp range up to 750° continuous dry heat. Meets or exceeds specs: MIL-P-46105 Weld Through Primer, ASTM A-780, Passes Preece Test for Hot-Dip Galvanizing, NSN 8010-00-214-7241. LPS Brand (00516).

**No. 4KK70.** ❸ Shpg. wt. 1.3 lbs. Each ..... $7.41

### CRC BATTERY TERMINAL PROTECTOR

Provides lead-free protective coating formulated for aerosol applications. Protects terminals from corrosion, which is a major cause of hard starting and battery failure. Dries quickly to a soft film assuring easier starting and longer battery life. 12 oz. can/7.5 oz. net wt. CRC brand.

**No. 2F134.** ❸ Shpg. wt. 1.1 lbs. Each ..... $4.25

### RUSTLICK 631 CORROSION PROTECTION

- **Concentrated rust preventative designed for long-term use in harsh environments which may include acid and salt vapors**
- **Non-conductive and can be safely used on electrical parts**

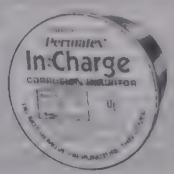
**No. 1C187.** 1-Gallon Pail (71011). Shpg. wt. 8.0 lbs. Each ..... $15.75

**No. 1C185.** 5-Gallon Pail (71051). Shpg. wt. 37.0 lbs. Each ..... $64.00

### RUSTLICK B WATER-SOLUBLE CORROSION INHIBITOR

- **Designed for use with ferrous metals**
- **Non-flammable and does not require removal prior to painting, plating or assembly**
- **For in-process corrosion control**
- **Can be used for hydrostatic testing and corrosion control during vibratory finishing and sand blasting**

**No. 1C197.** 5-Gallon Pail (73051). Shpg. wt. 49.0 lbs. Each ..... $84.00



## IN-CHARGE™ CORROSION INHIBITOR

- **Contains ingredients that absorb moisture and release a vapor that coats and protects surfaces inside enclosed areas**
- **Sold in packages of 2**
- **Applications include junction boxes, control panels, and tool boxes**
- **Ideal for environments subject to salt, moisture, contaminants and corrosive substances**

**No. 4KL38.** Shpg. wt. 0.2 lbs., 7 gm. inhibitor, protects 6 cu. ft.. Each ..... $10.80

**No. 4KL39.** Shpg. wt. 0.2 lbs. 11 gm. inhibitor, protects 11 cu. ft.. Each ..... $18.60

PERMATEX INDUSTRIAL

No. 4KL39

❸ These products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite inside back cover.

# CLEANERS, CAN PUNCTURING KIT, AND CAN HANDLER

## LPS PSC PLASTIC SAFE CLEANER

A nonconductive, noncorrosive cleaner with no flash point. It is safe to use on all plastics and can be used on energized equipment. 20 oz. LPS brand (04620).

**No. 4KK69.** Shpg. wt. 1.4 lbs. Each.....**$24.39**

## LPS TRIFREE BRAKE CLEANER

Removes brake fluid, oil, grease, and other contaminants on contact, evaporating completely, no residue. 15 oz. LPS brand (03620).

**No. 4KK68.** Shpg. wt. 1.3 lbs. Each.....**$6.97**

## CRC BRAKELEEN NON-CHLORINATED

Brake parts cleaner formulated to quickly remove brake fluid, grease, oil and other contaminants from brake linings, and pads. Effectively removes brake fluid, grease, and oil. Contains no 1,1,1 trichloroethane. 20 oz. container. CRC brand (05088). 20 oz. can/15 oz. net wt.

**No. 2F147.** Shpg. wt. 1.3 lbs. Each .....**$4.01**

## ENGINE DEGREASER

Formulated to clean all mechanical engines, machinery and tools. Removes dirt, grease, and varnish deposits. Spray on, allow to set for 15 minutes, and flush surface with water. Biodegradable. Penetrates to the metal. Water soluble. Non corrosive, nonstaining. Will not damage wiring, insulation , distributor caps, or painted surfaces. High velocity valve delivers deep penetration to intricate mechanical parts. For use on: automotive and marine engines; shop equipment; tools. SprayOn brand (S00702).

**No. 1D269.** Shpg. wt. 1.1 lbs. Each.....**$4.49**

## CRC CARB AND CHOKE CLEANER

Dissolves and removes gum and varnish deposits from carburetors, automatic chokes, heat control valves and PCV valves. Easy to use, fast acting-will not harm oxygen sensors or catalytic converters. 16 oz. can/12 oz. net wt. CRC brand (3077).

**No. 2F135.** Shpg. wt. 1.0 lbs. Each.....**$2.59**

## CAN HANDLER

- **Prevents absorption of chemicals through skin**
- **Keeps hands clean**
- **Reduces finger fatigue**
- **Includes trigger lock**
- **Demkote brand**

**No. 4ZF12.** Shpg. wt. 0.1 lbs. Each .....**$1.62**

## COME-CLEAN® 900 HEAVY-DUTY INDUSTRIAL CLEANER

Heavy duty, water-based cleaner removes soil from metal substrates and concrete. Effective in steam cleaning equipment. Works in industrial scrubbers, manual operations and immersion cleaning systems. Recommended for the flushing and cleaning of machine tools before charging with fresh coolant. Castrol brand.

**No. 3VH98.** 1 Gal. Shpg. wt. 11.0 lbs. Each.....**$19.97**

**No. 3VH99.** 5 Gal. Shpg. wt. 50.0 lbs. Each.....**$74.35**

## CRC BATTERY CLEANER

Designed to remove corrosion quickly and economically while neutralizing acid spills. Easily removes corrosion and helps restore battery output. Can be used on battery terminals, casing, cable connectors, and retainer frames. 12 oz. can/11 oz. net. wt. CRC brand (01376).

**No. 2F133.** Shpg. wt. 0.9 lbs. Each .....**$3.05**

## RUSTLICK KILL-CIDE 700 BACTERIA FUNGI CONTROL

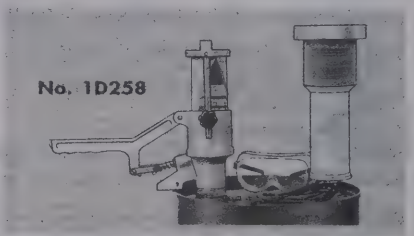
- **Controls rancidity in difficult environments in order to prevent rusting and foul-smelling sump odors.**
- **Extends coolant life and is useful in protecting coolants in seldom-used machines**

**No. 1C905.** 16 oz. Plastic Bottle (77122). Shpg. wt. 1.3 lbs. Each .....**$15.00**

**No. 1C893.** 1 Gallon Can (77012). Shpg. wt. 8.0 lbs. Each.....**$71.50**

## RUSTLICK KLEENZOL DY ALKALINE CLEANER

- **A general maintenance cleaner for machines, sump, and parts**
- **Non-flammable, non-toxic, and biodegradable**



**No. 1C883.** 1 Gallon Pail (76012). Shpg. wt. 8.0 lbs. Each.....**$13.75**

## AEROSOLV CAN PUNCTURING KIT

Lightweight, portable unit threads directly to any standard drum and collects residual aerosol contents directly into the drum. Accommodates all sizes of aerosol cans. Combination filter effectively filters and collects VOC's removes organic compounds, and filters odors. Each kit contains one aerosol can puncturing unit, one combination filter, one anti-static wire, and one pair of safety goggles.

**EXTRA COMBINATION FILTER.** For use with Can Puncturing System No. 1D528. For best results, replace every 45-60 days.

| Description | CRC Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Aerosov Can Puncturing Kit** | 14140 | **1D258** | $643.76 | **$613.50** | 7.0 |
| **Aerosov Extra Combination Filter** | 14141 | **1D257** | 157.52 | **150.00** | 1.0 |

# HYDRAULIC SYSTEM COMPONENTS

**Cushion**—A deceleration device sometimes built into the ends of a cylinder to restrict the flow of fluid at the outlet port.

**Cylinder**—A device which converts fluid power into linear mechanical force and motion. It usually consists of a movable element, such as a piston and piston rod, plunger or ram, operating within a cylindrical bore.

**Double Acting Cylinder**—A cylinder in which fluid force can be applied to the movable element in either direction.

**Ram Cylinder**—A cylinder in which the movable element has the same cross-sectional area as the piston rod.

**Single Acting Cylinder**—A cylinder in which the fluid force can be applied to the movable element in only one direction.

**Hydraulic Filter**—A device whose primary function is the retention of insoluble contaminants from a fluid.

**Return Line Filter**—A hydraulic filter positioned in the system just before the reservoir. This is the filter most often used and is recommended for all hydraulic systems.

**Suction Filter**—A hydraulic filter located in the suction line between reservoir and pump.

**Hydraulic Motor**—A device which converts fluid power into mechanical force and motion. It usually provides rotary motion. Motors are either fixed displacement, in which the quantity of fluid per unit of output motion is constant or variable displacement, in which the quantity of fluid per unit of output motion can be adjusted.

**Gear Motor**—A fixed displacement motor having two or more intermeshed rotating gears enclosed in a housing.

**Piston Motor**—A variable displacement motor having multiple pistons disposed radially and actuated by an eccentric swashplate.

**Vane Motor**—This is the more widely used hydraulic motor. It develops an output torque at its shaft by allowing hydraulic pressure to act on vanes within the motor housing.

**Hydraulic Pump**—A device which converts mechanical force and motion into fluid power. Pumps are either fixed displacement or variable displacement types.

**Gear Pump**—This is the most widely used fixed displacement pump. It has two or more intermeshed rotating gears enclosed in a housing. It is most often used in agricultural and mobile equipment.

**Piston Pump**—A variable displacement pump having multiple pistons disposed radially and actuated by an eccentric swashplate.

**Vane Pump**—A variable displacement pump having multiple radial vanes within a supporting rotor.

**Hydraulic Valve**—A device which controls fluid flow direction, pressure or flow rate.

**Directional Control Valve**—A valve whose function is to direct or prevent flow through selected passages. Most common types are three way and four way valves.

**Four Way Valve**—A directional control valve whose primary function is to pressurize and exhaust two ports. Used in system with double acting cylinder.

**Three Way Valve**—A directional control valve whose primary function is to pressurize and exhaust one port. Used in system with single acting cylinder.

**Flow Control Valve**—An adjustable valve which meters flow rate in one direction and permits full flow in the opposite direction.

**Needle Valve**—An adjustable valve whose function is to meter flow rate.

**Relief Valve**—A pressure control valve whose primary function is to limit system pressure.

**Reservoir**—A container for storing and conditioning fluid in a hydraulic system.

# HYDRAULIC FORMULAS

The following formulas can be helpful in designing and sizing of hydraulic systems for specific applications.

$PSI = \frac{F}{A}$ — Fluid pressure (PSI) = Force (lbs.) ÷ Area (sq. in.)

$A = \pi r2$ — Cylinder area (sq. in.) = 3.1416 x Radius² (in.)

$F = PA$ — Cylinder force (lbs.) = Pressure (PSI) x Area (sq. in.)

$V = \frac{.3208Q}{A}$ — Cylinder speed (ft./sec.) = (231 x GPM) ÷ (12 x 60 x Area)

$HP = \frac{QP}{1714}$ — Hydraulic horsepower = Pressure (PSI) x GPM ÷ 1714

$T = \frac{PD}{2\pi}$ — Fluid motor torque (in. -lbs.) = Pressure (PSI) x displ. (cu. in.) ÷ 62822

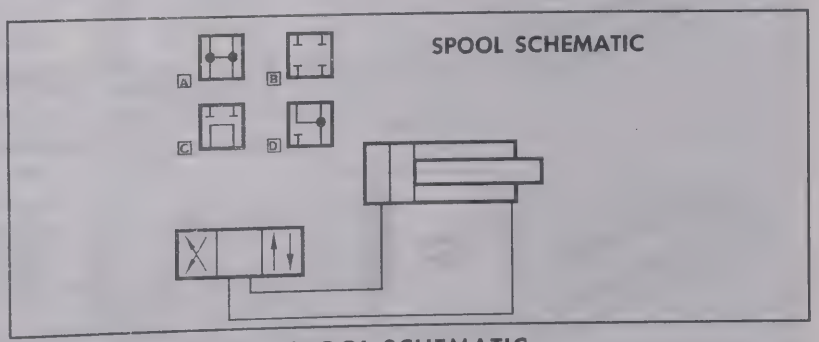
$N = \frac{231\ Q}{d}$ — Fluid motor speed (RPM) = 231 x GPM ÷ displ. (cu. in.)

$HP = \frac{TN}{63025}$ — Fluid motor horsepower = Torque (in.-lbs.) x RPM ÷ 63025

$Q = \frac{ND}{231}$ — Pump output flow (GPM) = Speed (RPM) x displ. (cu. in.) ÷ 231

1 Gallon = 231 Cubic Inches

Input HP = PSI x GPM x .0007



Hydraulic Motor HP = Torque x RPM ÷ 63025

Volume (in.³) = Area (in.²) x Stroke (in.)

Area = (Piston Dia.)² x .7854

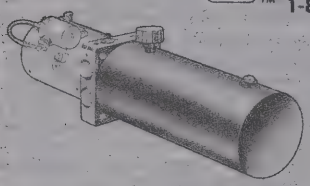
Flow (GPM) = Rod Speed (in./min.) x Area (in²) ÷ 231

Force (lbs.) = Pressure Applied (PSI) x Piston Area (in.²)

## SPOOL SCHEMATIC

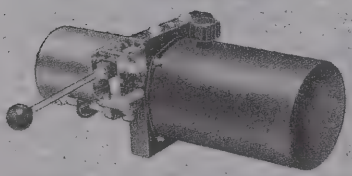
A **OPEN CENTER**—Used when cylinder "drift" is necessary under pressure (i.e. snow plow blade)

B **CLOSED CENTER**—Used when cylinder must lock into place along travel path and fluid flow from supply is blocked completely (i.e. air powered press)



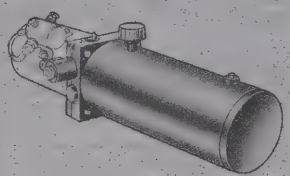
C **TANDEM CENTER**—Same as "B" but allows fluid to flow through valve reducing created fluid heat and facilitating more functions downstream (i.e. multiple valves in series)

D **FLOAT CENTER**—In the center position the cylinder can move freewheeling in or out under no pressure (i.e. free wheeling hydraulic motor)

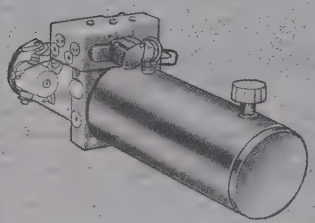


# 12 VDC POWER UNITS

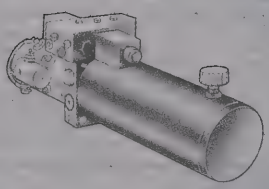
**Fenner Fluid Power**



Replacement Parts Available 1-800-323-0620™



No. 4Z629



No. 4Z185

No. 4Z186

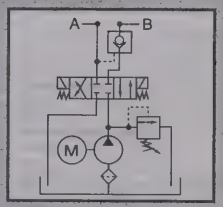
No. 4Z339



**HYDRAULIC SCHEMATICS**

**12 Volt DC, horizontal mount hydraulic power units** offer a range of valving options to suit many mobile applications: truck tail gates, cranes, wheel chair lifts, concrete saws, dump bodies, and aerial lifts.

- **For applications requiring additional oil capacity, 2½ (6W873) and 4 (6W874) gallon reservoirs are also available. See page 2793.**
- **Nos. 4Z629, 4Z185, and 4Z186 can be horizontally mounted only**
- **Nos. 4Z338 and 4Z339 can only be horizontally mounted**

**Maximum Duty Cycle:**
1 Minute in 5 maximum running at 500 PSI
1/2 Minute in 5 maximum running at 2000 PSI

### No. 4Z629 BASIC POWER UNIT

- **For use in custom applications using remote mounted directional control valves**
- **Includes relief valve and check valve**

### No. 4Z185 MANUAL CONTROL POWER UNIT

- **For single acting cylinders only for tail gates, dump bodies, and material handling**
- **Includes relief valve, check valve, and manually actuated release valve**

**Spring-centered handle** controls function; one direction starts motor to raise load, other direction provides fingertip control of lowering speed.

### No. 4Z186 REMOTE CONTROL POWER UNIT

- **For single acting cylinders only, for remotely operated wheel chair/personal lifts, material handling, dump bodies, aerial ladders, and cherry pickers**
- **Includes relief valve, check valve, and solenoid actuated release valve**

**Includes weatherproof control box** with 10 ft. cord. One button starts motor to raise load, other button releases pressure to lower load.

### No. 4Z338 MANUAL 4-WAY POWER UNIT

- **Used for 4-way manual control of double acting cylinders or reversing fluid motors**
- **Includes relief valve and manually actuated directional control valve**

**Spring-centered handle** moves in either direction from center to start the motor and direct flow to one of two work ports. At one port, a pilot operated check valve holds system pressure until handle is moved to opposite position.

### No. 4Z339 REMOTE 4-WAY POWER UNIT

- **Used for 4-way remote control of double acting cylinders or reversing fluid motors**
- **Includes relief valve and 4-way solenoid-actuated directional control valve**

**Has weatherproof control box** and 10 ft. cord. One button starts motor and sends flow to one work port with pilot operated check valve. Other button starts motor and sends flow to unchecked work port.

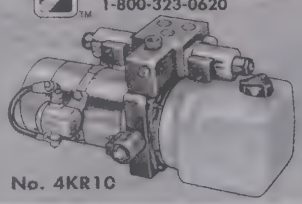
# DC SNOWPLOW POWER UNIT



**Fenner Fluid Power**

- For horizontal mounting only
- See-thru 1.5 quart poly tank
- Toggle switches with 10 ft. cords
- Aeroquip snowplow hose, see page 2830

**12-Volt DC snowplow power unit.** Operate front end truck mounted snowplows with single-acting and double-acting cylinders. For raise/lower and left/right functions.

**Features:** Fitted with 2000 PSI relief valve, 3-position 4-way solenoid valve, 2-way lowering valve, load holding check valve and crossover relief valves. Intermittent duty motor: 60 sec. On/4 min. Off at 500 PSI; 30 sec On/4.5 min. Off at 1600 PSI.

Replacement Parts Available 1-800-323-0620

No. 4KR10

# Fenner Fluid Power

## DC PALLET TRUCK POWER UNITS

- 12 and 24 Volt DC units for powering raise, hold, and lower functions on walk-behind pallet trucks
- Fitted with relief, check, and solenoid actuated release valves and pressure compensated return flow control
- For vertical mounting only
- 7/16 SAE auxiliary return port

**Intermittent Duty Motors:**

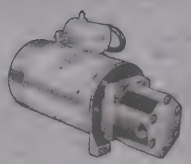
10 Sec. in any minute at 500 PSI

5 Sec. in any minute at 2000 PSI

## DC AUXILIARY POWER UNIT

- 12 Volt DC unit for mobile auxiliary power applications including back-up hydraulic power for truck mounted equipment, emergency power steering for off-road vehicles, elevated work platforms, and material handling auxiliary functions
- Includes check valve and relief valve
- Requires remotely mounted reservoir, and accepts remotely mounted auxiliary valving
- Unit has 9/16 - 18 external drain relief

**Intermittent Duty Motors:**



1 Min. in 5 maximum running at 500 PSI

1/2 Min. in 5 maximum running at 2000 PSI

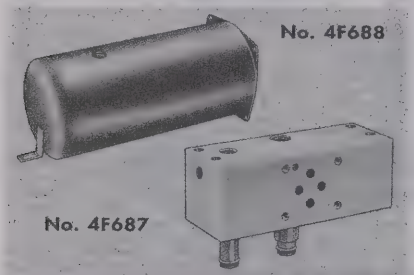
# AC POWER UNITS

## 1/2 TO 2 HP AC POWER UNITS



- For lift tables, hose crimpers, conveyors, dock levelers, car hoists, presses, robotics, packaging machines, machine tools
- Compact, lightweight design
- Comes completely assembled as pump, motor, reservoir with check valve and relief valve preset at maximum operating pressure as noted below
- Pretested
- Standard 1½ gallon oil reservoir; 2½ gallon reservoir available, see below
- Heavy-duty cast iron pump with quiet 11-tooth hardened steel gears. Aluminum center adapter serves as a port manifold and valve housing with load holding check and adjustable relief valve
- 9/16-18 outlet and return ports
- Barnes brand

## RESERVOIR AND MANIFOLD ADAPTER KIT

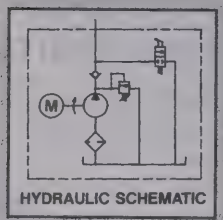
### 2½ GALLON RESERVOIR

2½ gallon oil reservoir expands capabilities of AC power units listed above. For applications requiring longer run times and more useable oil; or when oil temperature exceeds or will continuously run at 160-165°F. Barnes brand (2280916).

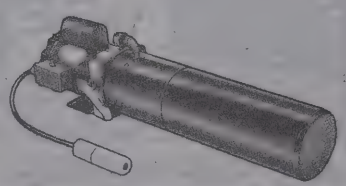
**No. 4F688.** 2½ Gallon Reservoir.
Shpg. wt. 4.5 lbs. List $61.35. Each.....**$48.25**

### MANIFOLD ADAPTER KIT

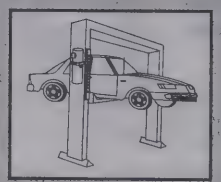
Adapts above power units to NFPA DO3 (DO1) valve. Ports are 9/16-18. NOTE: It is recommended an open or tandem centered valve be used with the above units. Barnes brand (2620290).



**No. 4F687.** Manifold Adapter Kit.
Shpg. wt. 2.3 lbs. List $136.74. Each.....**$107.90**



## AC HYDRAULIC POWER UNIT FOR AUTO HOISTS



Replacement Parts Available 1-800-323-0620

Haldex
Barnes Hydraulics

AC power unit designed for use in 2 and 4 post auto hoists with single acting cylinders

- Supplies power to raise, hold, and lower
- Adjustable poppet type relief valve
- Hardened steel valve parts may be serviced in the field
- 100 mesh pump inlet screen and breather filler reduce contamination risk
- 230 volt, single phase, 11.0 Amps
- 9/16-18 ports
- 3 gallon reservoir
- Includes #12 AWG 3 wire 18" long cord
- Interchangeable with most OEM lifts using standard NEMA mountings
- Barnes brand (1280555)

# 1 TO 5 HP AC POWER UNITS

Haldex
Barnes Hydraulics

Replacement Parts Available
1-800-323-0620

No. 6W644

- Nos. 6W642 and 6W643 two-stage hi-low pumps are ideal for compactors, presses, log splitters, and clamping circuits
- Heavy-duty pumps include hardened and ground alloy-steel gears and shafts, with high strength, fine grain cast-iron housings
- All units come completely assembled with: filler/breather, fluid level gauge with thermometer, pressure gauge, flexible coupling, and relief valve
- D03 manifold units have 1/2" (F) NPT ports, and 3/4" SAE ports
- D05 manifold units have 3/4" (F) NPT ports, and 3/4" SAE ports
- Barnes brand

Power units provide dependable source of hydraulic power for industrial machinery in actuating, pressing, stamping, molding, punching, clamping, and lifting applications. Manifold block included for mounting single D03 or D05 valve. Can also accommodate optional 2- or 3-station manifold, see page 2815. Manifold is removable for direct pressure and tank (P&T) plumbing. Block includes both NPT and SAE ports.

Nos. 6W642 and 6W643 two-stage pumps, first stage pump unloads fully at 450 PSI, second stage operates up to high pressure relief setting. All units include high torque motors so that relief valves can be adjusted up to 50% above factory setting for intermittent applications. 3000 PSI maximum.

# POWER UNITS

Zero leak design Global System Pak power units are quality engineered, complete hydraulic systems with optional single or multi-station valve manifolds for mounting Vickers DO3 directional controls and Systemstak valves.

- **Zero leak design reservoir with filler/breather, pressure gauge, oil level indicator, and removable top**
- **Vickers V10 fixed vane pump or Vickers PVQ remote pressure compensated piston pump with adjustable max. displacement stop**
- **Top serviceable, high performance return line filter with visual indicator to clean system oil to ISO 16/14/12**
- **Vickers adjustable cartridge style relief valve**
- **Power units are 100% tested and backed by Vickers**
- **3/4 SAE pressure and tank ports**

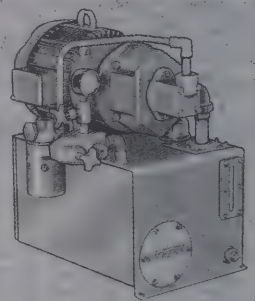
(*) M-N-GS30-RF4-10 (†) M-N-GS50-RF4-10 (#) Manifolds and Vickers valves are supplied separately for customer mounting. See DO3 valves on page 2818.

## 1 TO 10 HP AC POWER UNITS

For powering hydraulic equipment in applications such as pressing, clamping, chucking, transferring, actuating, lifting, and indexing.

**Comes assembled and includes:**

- **Vickers models V10 or V20 vane pump (depending on HP)**
- **Heavy-gauge steel tank**
- **3-phase, 230/460V, 60 Hz, 1800 RPM TEFC motor with C-face mounting**
- **Motor/pump adapter**
- **Adjustable relief valve**
- **Filler/Breather**
- **Pressure gauge • Oil level gauge**
- **Return-line spin-on filter**
- **Clean-out port in tank**

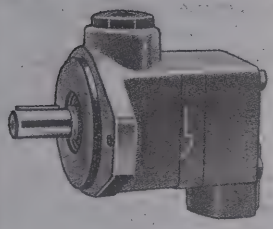


No. 6Z610 1.0 HP unit with 8.0 gallon tank

VICKERS®

**Nos. 6Z610 thru 6Z616 have vertically mounted motor. Nos. 6Z617 thru 6Z619 have horizontally mounted motors.**

Replacement Parts Available 1-800-323-0620



No. 6Z619 10 HP unit with 30 gallon tank

## VANE PUMPS

VICKERS®

Replacement Parts Available 1-800-323-0620

- Heavy-duty pumps for high-flow, high performance, continuous duty applications
- Low vane tip/ring loading allows high pressure operation
- Excellent hydraulic balance
- Used in industrial power units and mobile equipment such as trenchers, tractors, and backhoes
- Reversible rotation (shipped clockwise facing shaft)

**Internal inlet and outlet ports** are diametrically opposed, for balanced pressure-induced radial loads.

**Maximum pressure** is 2500 PSI. All units have SAE two-bolt "A" flange mounting.

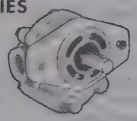
## INTRAVANE PUMPS

VICKERS®



Replacement Parts Available 1-800-323-0620

- Intravane pumps provide longer life, increased productivity, and application versatility. Compact size and ease of service allow maximum equipment design flexibility.
- Low noise characteristics inherent in intravane design enhance operator comfort
- Hydraulic balancing, designed to prevent internally-induced radial shaft and bearing loads, provides long life
- High operating pressure capabilities in compact packages provide high power-to-weight ratios and lower installed costs
- Max. RPM 1800
- Ports: 10 SAE 4-bolt flange, see page 2798
- SAE 2-bolt mounting (3MC19-3MC22;B-Flange, 3MC23-3MC29 C-Flange)

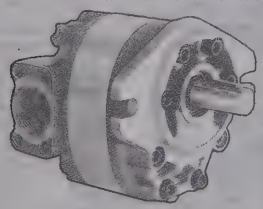
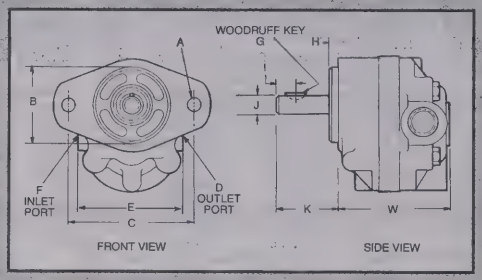
# GEAR PUMPS

SAE "AA" 2-Bolt D SERIES



SAE "A" 2-Bolt H SERIES



Parker

Replacement Parts Available 1-800-323-0620

SAE "B" 2-Bolt M SERIES

## GEAR PUMPS

- High tolerance to system contamination
- Reliable under cold weather conditions
- Few moving parts makes a simple, efficient design
- Compact and lightweight for capacity
- Pressures to 2500 PSI
- 185°F max. temperature
- Direct drive only
- Pressure balanced design

Parker hydraulic gear pumps feature die cast aluminum case with extruded center section to enhance overall durability. Lightweight. Case hardened shaft with dual lip Buna seals and bronze bushings for reliability and long pump life. Clockwise rotation facing shaft end. 80-1000 SSU operating viscosity range. 4000 SSU maximum startup viscosity.

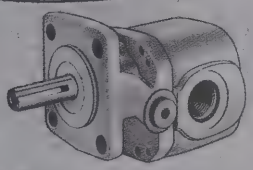
(*) Operation in the intermittent pressure range must not exceed 5 seconds per duty cycle and must make up less than 20% of the overall cycle time.

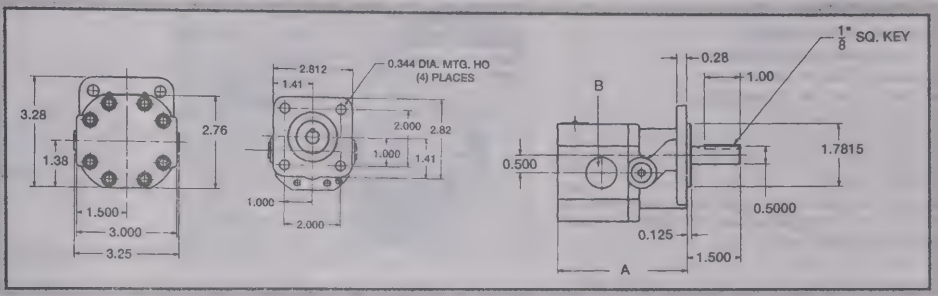
VICKERS

## 4-BOLT FLANGES



- For use with Vickers intravane pumps listed on page 2797

Threaded-connection flanges are for use on standard SAE 4-bolt flange mounting pads and are furnished with seals and screws for mounting. Straight threaded models are preferred over pipe threaded models because they reduce the possibility of leakage. Maximum pressure 3000 PSI.



| SAE Straight Thread (In.) | (F) NPT Pipe Thread (In.) | Vickers Model | Stock No. | List | Each | Shpg. Wt. |

# BI-ROTATIONAL GEAR PUMPS

Haldex
Barnes Hydraulics

Replacement Parts Available
1-800-323-0620

## APPLICATIONS

- Machine tools—lubrication, clamping, clutch shifting
- Robotics
- Drilling and boring heads
- Metal bending, forming, stamping, and punching
- Material handling
- Platform and elevator lifts
- Agricultural and construction equipment
- Lawn care
- Efficient 11-tooth hydraulic gear pump pumps a variety of fluids with lubricating qualities
- Durable cast iron body with hardened steel gears suitable for continuous duty to 3000 PSI and intermittent pressures up to 3500 PSI
- Four-bolt 4F17 mounting with 1½" long shaft extension, key drive, side outlet ports
- Barnes brand

Bi-rotational pumps suit gas engines or electric motors. Proper coupling and C-face adapter are required. Calculate horsepower based on 1/3 HP/1 GPM/500 PSI. Nos. 4F652-4F659 pumps also function as motors, see page 2803.

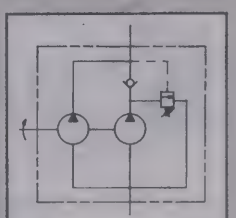
# TWO-STAGE "HI-LO" GEAR PUMPS

## APPLICATIONS



- Presses, log splitters, compactors
- Automatic two-speed transmission
- Heavy-duty cast-iron pumps with optimum output per unit size
- Hardened steel 11-tooth gears with large bearings and shaft size
- Clockwise rotation for electric motor or gas engine
- 1/2 in. drive shaft with #404 Woodruff drive key
- Direct drive only
- Motor, coupling, and adapter not included
- Barnes brand

Two stages—first stage pump unloads fully at 450 PSI, second stage operates up to 2500 PSI. Generally 5 HP input is required for No. 4F663 and 8 HP for No. 4F664. Note: Circuit requires the addition of a pressure-limiting relief valve. Standard 4F17 four-bolt mounting.

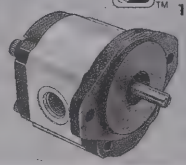
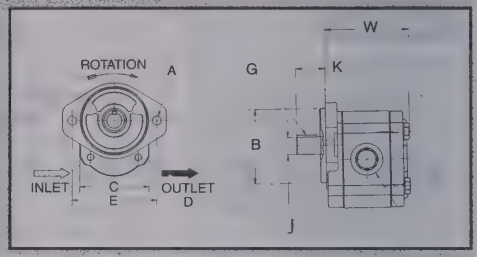
# HIGH PRESSURE GEAR PUMPS

## 3-9 GPM SAE "A" 2-BOLT MOUNTING PUMPS

### APPLICATIONS



- Material handling
- Construction and paving
- Aerial lifts • Winches
- Turf care • Agricultural
- Direct drive only



Continuous pressures to 4000 PSI. Speeds 500 to 4000 RPM. 90% overall efficiency and low noise.

Rough bore bushing type design constructed of high strength aluminum housings and cast-iron end covers.

Haldex
Barnes Hydraulics

## 11/14 GPM SAE "A" 2-BOLT MOUNTING PUMPS
## 20/26 GPM SAE "B" 2-BOLT MOUNTING PUMPS

Haldex
Barnes Hydraulics

Replacement Parts Available 1-800-323-0620

### APPLICATIONS

- Backhoes • End loaders • Booms • Trenchers
- Skid steer vehicles • Dump trucks • Mining equipment
- High tolerance to system contamination
- Reliable under cold weather conditions
- Simple, efficient design with few moving parts
- Compact • Pressures to 4000 PSI
- 205°F max. temperature
- Pressure balanced design

Cast-iron front and rear covers for reliability, strength, and noise reduction. Center section is cast-iron, allowing gear tips to generate their own run-in paths, creating minimum radial gear-tip clearance for high volumetric efficiency.

Gears are AISI 8620 alloy steel for greater shaft strength and stronger gear assembly. Ten-tooth gears minimize pressure ripple. Gear sides and shaft journals are carburized, hardened, and ground to fine finish.

Seals utilize two seal packs and two bronze faced wear plates to minimize leakage across the end faces of the gears and to reduce wear.

Bearings and support structures move in unison with and adjust to shafts that are deflected by high hydraulic loads. Optimum bearing alignment under load minimizes wear, maximizing life of bearings and pump.

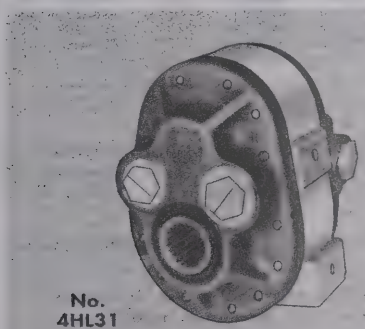
# PISTON PUMPS

- Inline variable displacement units provide efficient performance and high operating reliability
- Operate on variety of hydraulic fluids including oil, invert emulsions, water glycols, and high water based fluids
- CW rotation only as viewed from shaft end
- 5W565 and 5W566 have SAE A 2-bolt mounting
- 3MD24 and 3MD25 have SAE B 2-bolt mounting
- 3MD26 and 3MD27 have SAE C 2-bolt mounting
- 3MD28 has SAE D 4-bolt mounting

**Pumps demonstrate** approximately 97% volumetric efficiency and 85% overall efficiency at rated speeds and pressures.

**Pressure compensator control** automatically adjusts pump delivery to maintain volume requirements of the system at a preselected pressure. Minimizes need for cooling equipment and reduces size of reservoir required. Pressure compensator adjustable range: 250-3000 PSI (Nos. 5W565, 3MD24, 3MD26, and 3MD28); 250-2000 PSI (Nos. 5W566, 3MD25, and 3MD27).



**SAE straight thread ports** are standard on all units, SAE four bolt flange on 4MD28. All units have 7/8 x 2.31" keyed shaft.

(*) Unit service life is individual to each application. Applications which require continuous operation at maximum pressure will likely result in shortened service life.
(†) Sound levels recorded per NAFP standards at 3 ft. full flow, 1800 RPM, and maximum pressure.

# PTO PUMPS

No. 4HL31

Prince HYDRAULICS

**LIMITED 3-YEAR WARRANTY**

Prince hydraulic pumps carry a 3-year limited warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Nos. 4Z171 and 4Z172

- Used as original equipment or additional hydraulic power supply on farm tractors of all sizes
- No additional gearing needed
- Provides working pressures up to 2500 PSI

**Power take-off (PTO) hydraulic gear pumps** have two self-adjusting wear plates to seal off leakage around the two unequal size gears. These plates, activated by internal fluid pressure, offset any wear or expansion that may occur during life of the pump. Each pump is assembled with zero clearance between housing and tips of gear teeth and is test run until teeth establish a proper wear path in the housing.

**Pumps have high tensile, cast-iron end-plates,** aluminum housing, and an internal splined 6-tooth shaft supported on both sides by roller bearings. Tapped holes are provided for torque arm mounting. No. 4Z171 includes #16 SAE to 1.25" hose barb adapter for inlet port, #12 SAE to 0.75" (F) NPTF adapter for outlet port, #12 SAE plug for unused pressure port. No. 4Z172 includes #16 SAE to 1" hose barb adapter for inlet port, #12 SAE to 0.75" (F) NPTF adapter for outlet port, #12 SAE plug for unused pressure port. CW rotation only. No. 4HL31 includes #20 SAE to 2" hose barb adapter for inlet, #16 SAE to 1" (F) NPTF adapter for outlet, #12 SAE plug for unused pressure port.

## FOOT BRACKET MOUNTING KITS

VICKERS®

- Foot brackets can be used to mount pumps or hydraulic motors having standard SAE 2-bolt A, B, or C mounting flanges. These designations correspond to -A, -B, and -C- letters in the kit model number.
- Each kit includes a bracket and screws for mounting to the pump or motor
- Kits are not included with pumps and hydraulic motors, and must be ordered separately by model number

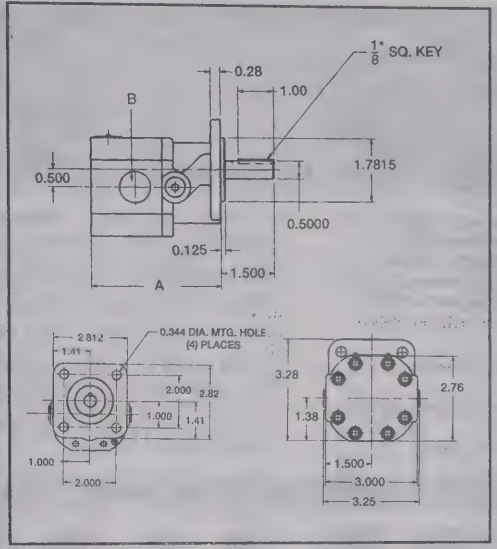
**DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**



Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

# BI-ROTATIONAL FLUID MOTORS

Haldex
Barnes Hydraulics

**Applications:**
- Conveyors
- Reel drives
- Index tables
- Variable speed drives
- Two-directional, forward-reverse drives
- Vacuum blowers
- Fan drives
- Robotics

**Features:**

**Heavy-duty cast-iron contruction.** Quiet 11-tooth hardened gears. Suitable for intermittent pressures up to 3500 PSI with output torque up to 180 in.-lbs.; see performance data below. Four-bolt 4F17 mount, 0.500 dia. x 1½" shaft extension and square key drive.

**400 PSI Viton lip seal** and reversing check valves included to avoid a case drain port. This feature also allows motors to be used as bi-directional pumps, see page 2799

**Side ports with SAE straight threads** are standard in sizes shown below.

**Maximum shaft speed** is 5000 RPM; minimum speed for most applications is 750 RPM.

**Maximum input** is 12 GPM.

Made in USA.

**Note:** Motors may be used to replace electric motors or gas engines in hazardous locations.

**Replacement Parts Available**
**1-800-323-0620**

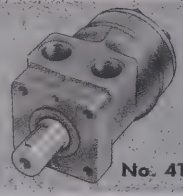
# MEDIUM-DUTY, AND HEAVY-DUTY, HIGH TORQUE, LOW SPEED MOTORS



Fluid Power

Danfoss

New

No. 4TK40/C Type Flange

No. 4TK30/A2 Type Flange

- **Medium-duty motors are used in demanding applications including car wash brush drives, salt spreader drives, machine tool turntables, and farm implement drives.**
- **Heavy-duty motors are used in tough applications including wheel, winch, digger, auger, and conveyor drives**
- **Both feature cast iron construction and are direct-drive**
- **Maximum oil temperature: 140° F**
- **Minimum oil viscosity: 100 SUS (Saybolt Universal Seconds)**
- **Maximum continuous operation pressure see charts, intermittent operation 2500 PSI**
- **Straight keyed shaft is 1" diameter x 1.75" long**

Mounting and shaft dimensions are interchangeable with hydraulic motors of similar performance ratings, making these motors highly suitable replacements for other major brands. Check with your local Grainger Branch for cross reference information. Medium-duty models have plain teeth gear rims. These models are ideal for applications with long operating periods at moderate pressures or short operating periods at high pressures. Heavy-duty models have roller gear rims for low friction and better efficiency at high pressures. Useful in applications requiring long operating periods with high pressures. Medium-Duty models are available with 2-bolt oval SAE "C" type flange or 4-bolt SAE "A2" type flange. Heavy-duty models have 4-bolt SAE "A2" type flange. Straight keyed shaft is 1" diameter x 1.75" long.

# FLOW DIVIDERS

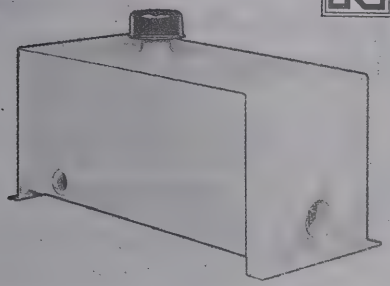
Haldex
Barnes Hydraulics

- **Up to 3000 PSI inlet pressure**
- **Up to 4500 PSI outer pressure**
- **Maximum speed up to 4500 RPM**
- **11-tooth hardened steel gears**
- **Permanent mold cast-iron bodies machined to close tolerances**
- **Differential pressure relief valves**

**Gear Type Rotary Flow Dividers** synchronize two parallel motions hydraulically rather than mechanically. Hydraulic flow dividers split the flow from a single pump source to a pair of matched cylinders or fluid motors.

**Applications** include agricultural equipment—planters, cotton strippers and cultivators, equalizing jacks on cargo containers and semi-trailers, self-propelled manlifts, booms, trim mowers, and car wash machines.

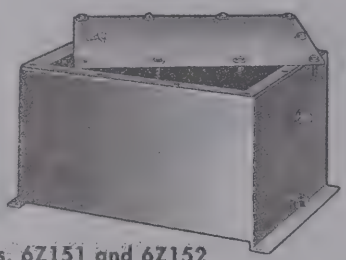
**Both drive gears** in 2-section dividers are driven by common shaft, allowing flow equalization to occur in a wide speed range. Speeds in the range of 2000 to 4500 RPM will improve overall efficiency.



**Integral differential relief valves** for each circuit limit pressure intensification and permit cylinders to re-phase at the end of each stroke.

**Accuracy** is 3.4 cu. in./min. per 100 PSI differential in operating pressure.

## FLOW DIVIDER SPECIFICATIONS AND ORDERING DATA



| Flow Rate (GPM) | Cu. In. / Rev. | Operating Pressure (PSI) | SAE Port Sizes Inlet (In.) | Outlet (In.) | Dimensions (In.) Length | Width | Height | Barnes Model | Stock No. | List | Each | Shpg. Wt. |

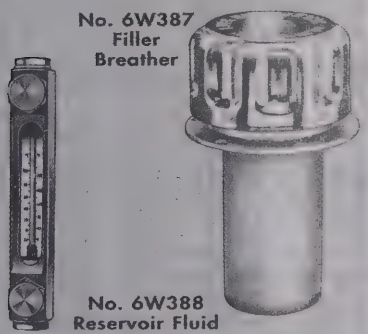
## NEWCO FABRICATION

**No. 4Z980**

- 3/4" NPT return port
- 1½" NPT suction port
- Fill port with breather cap
- Black powder coat finish

**Nos. 6Z151 and 6Z152**

- For custom designed hydraulic power units
- Removable steel cover
- Horizontal or vertical mount
- Cork neoprene cover gasket
- Oil sight gauge
- 3/4" NPT deep reach magnetic drain plug
- Black powder coat finish



**Applications** include log splitters, mobile and industrial hydraulic systems.

**Five and ten gallon capacity,** 14-gauge steel, general purpose and power unit reservoirs. Used as primary or auxiliary storage tanks for hydraulic oil. Allow contaminants to settle out of oil and entrained air to be vented before being picked up by the pump

### RESERVOIR SPECIFICATIONS AND ORDERING DATA

| Capacity | Dimensions (In.) H | W | L | Removable Cover | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 5 | 8⅝ | 8⅝ | 20 | No | **4Z980** | $58.40 | **$57.15** | 23.0 |

## FILLER BREATHER

**No. 6W387 Filler Breather**

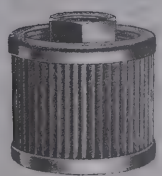
**No. 6W388 Reservoir Fluid Level Gauge**

3 in. diameter, 40 micron plated steel breather cap handles up to 30 cfm airflow at less than 1" Hg differential pressure. Twist-to-lock cap includes safety chain. 30 mesh, stainless steel strainer basket allows rapid filling and is compatible with most hydraulic fluids. Includes mounting screws and gasket. Lube Devices (FB103).

**No. 6W387.** Shpg. Wt. 0.5 lbs. List $14.99.
Each ..... **$10.99**

## RESERVOIR FLUID LEVEL/TEMPERATURE GAUGES

Fluid level gauges have low profile bodies with wide sight opening for maximum visibility. Machined from extruded aluminum bar stock. Crystal clear borosilicate sights compatible with all hydraulic fluids. Will not discolor with age or temperature. Buna-N seals. 20 PSI maximum working pressure. 250°F maximum temperature. 1/2-20 UNF threads on mounting bolts. Lube Devices brand. For additional fluid level gauges, see pages 2763 and 2764.



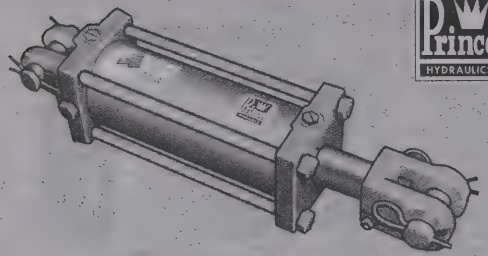
**No. 6W389.** 3 in. Mounting Center Level Gauge* (G1615-03-A-1). Shpg. wt. 0.4 lbs. List $24.89.
Each ..... **$13.97**

**No. 6W388.** 5 in. Mounting Center Level Gauge* (G1615-05-A-1). Shpg. wt. 0.5 lbs. List $26.31.
Each ..... **$14.54**

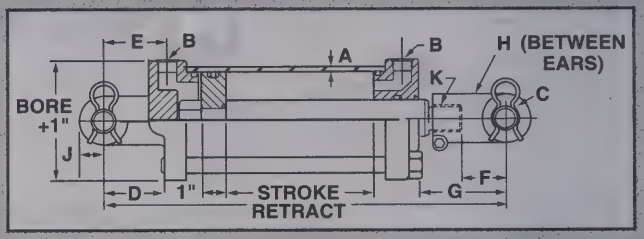
**No. 6W390.** 10 in. Mounting Center Level Gauge* (G1615-10-A-1). Shpg. wt. 0.7 lbs. List $52.04.
Each ..... **$28.15**

(*) ½-20 UNF mounting threads on bolts.

## LUBE DEVICES, INC.



**No. 6W382**



## HYDRAULIC SUCTION STRAINERS

Used to filter oil at end of pick-up tube in oil reservoir. Zinc-plated steel end plates. Rigid, one piece inner frame. Stainless steel. 100 mesh screen can be easily cleaned. Lube Devices brand.

# AG/MOBILE TIE-ROD CYLINDERS

**LIMITED 3-YEAR WARRANTY**

Prince AG/Mobile cylinders carry a 3-year limited warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Replacement Parts Available 1-800-323-0620

- **Double acting tie-rod design allows cylinders to be used in heavy-duty agricultural, transportation, construction, and industrial equipment applications**
- **2500 PSI features: O-ring seal and leather back-up washers on piston**
- **3000 PSI features: Urethane U-cup rod seal, metal encased rod wiper (2½" bore and larger), crown seal on piston, nylon bearing on piston (4, 4½, and 5" bores), and hardened pins (4, 4½, and 5" bores)**
- **O-ring seal between tube and ductile iron butt and gland casting**

**Precision honed tubes** and ground and polished chromed piston rods. Cast iron piston with O-ring seal between piston rod and piston. (NPT adapter fittings included with cylinder. NPT ports are 1/2" except No. 4Z193 is 3/4").

# AG/MOBILE WELDED CYLINDERS

**LIMITED 3-YEAR WARRANTY**

Prince AG/Mobile cylinders carry a 3-year limited warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- **Universal end mountings allow double acting cylinder to fit a variety of construction, industrial, and agricultural applications**
- **Maximum working pressure: 2500 PSI†**
- **Available in 2½" to 4" bores and in 16, 20, 24, 30, and 36" strokes**

Cylinders feature all steel welded construction with welded cross tube. Heavy wall honed steel tubing. Ground and polished chrome piston rod with welded crosstube. Cast-iron ring, O-ring, and back-up washer packing on piston. Urethane U-cup rod seal. Truarc gland retainer. Red finish. Prince brand.

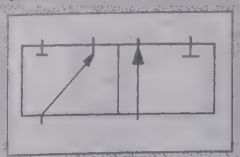
(*) Ports, NPTF (†) Cylinders will operate at full pressure thru 16" stroke except: 5Z369 with limit of 13,000 lbs. (1839 PSI) in extension; 5Z370 with limit of 13,540 lbs. (1407 PSI) in extension; and 5Z371 with limit of 9700 lbs. (1008 PSI) in extension.

# TWO POSITION SELECTOR VALVES



- **Available in single and double models**
- **Heat treated and hard chrome-plated spools for maximum load handling capacity**
- **Cast-iron body**
- **2500 PSI maximum pressure rating**
- **No. 6W567 is a 2-position, 3-way valve that enables the operator to direct flow to either of two separate hydraulic circuits**
- **No. 6W568 is a double selector valve**

**Note:** a single selector valve is typically used to operate either of two single acting cylinders or two motors that only run in one direction. A double selector valve is typically used to control two separate double acting cylinders or motors or to control four single acting cylinders or motors.

# INDUSTRIAL CYLINDERS

Miller FLUID POWER

Replacement Parts Available
1-800-323-0620

- **Industrial grade hydraulic cylinders**
- **Meet NFPA and JIC standards**
- **Pressures up to 2500 PSI**
- **Temperature range:-20 to 160F**
- **All steel construction with black finish**
- **Modular mounting design**

Available in 1½" to 4" bores with 1" to 12" strokes. 6, 8, 10, and 12" stroke cylinders have adjustable cushions on both ends with ball checks for faster out-of-cushion starts.

Pilot bushing assures concentricity.

Piston rods case hardened and hard chrome plated to resist mechanical damage.

High strength tie rods protect against shock and fatigue.

Patented Teflon SHEF tube and seals provide positive sealing action even under shock conditions.

Pre-loaded rod seal provides positive seal at high or low pressures.

Single, bidirectional dynamic piston seal protects against high-pressure spikes.

One-piece piloted piston design provides maximum strength and protection against shock loads.

Durable, non-metallic wear band on piston prevents metal-to-metal contact and reduces possibility of scoring of tube.

Urethane piston and rod seals compatible with standard hydraulic fluids.

## AREA AND THEORETICAL-FORCE CHARTS FOR HYDRAULIC CYLINDERS

| Bore (In.) | PUSH FORCES IN LBS. @ PSI 500 | 1000 | 2000 | 2500 | Piston Area Sq. In. | PULL FORCES* IN LBS. @ PSI 500 | 1000 | 2000 | 2500 | Piston Area Sq. In. |
|---|---|---|---|---|---|---|---|---|---|---|

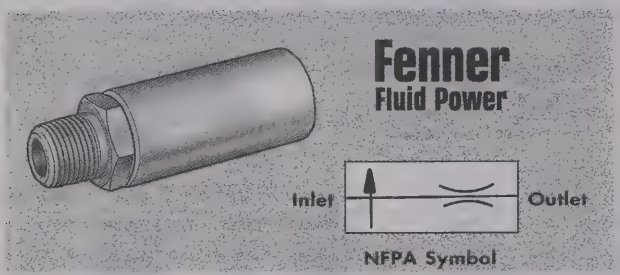
# RELIEF AND CONTROL VALVES

## 3/4" ADJUSTABLE FLOW CONTROL VALVE

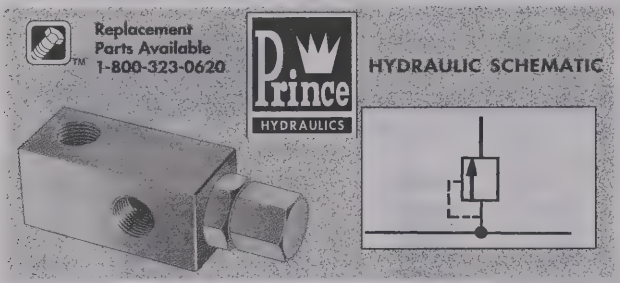


- **Starts and stops hydraulic cylinders or motors**
- **Varies speed smoothly over the full range**
- **Flow range capacity: 0 to 30 GPM**
- **Pressure range: 500 to 3000 PSI**
- **Pressure compensated adjustable flow control**
- **Prince brand (RDRS-175-30)**

**Dimensions: 4.6L x 4.1H x 2.9"D**

Once speed is set with the lever, it remains constant regardless of load variations. Comes with built-in ball and spring relief valve with cast iron seat.

**No. 6X842.** Shpg. wt. 8.0 lbs. List $101.00. Each.....**$78.00**



**Limited 3-year warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## FLOW CONTROL VALVES

Current OSHA standards require that the lowering speed of hydraulically supported loads be controlled in event of pump circuit failure. In-line valve regulates lowering of speed by controlling flow rate of hydraulic fluid between cylinder and reservoir in return cycle. Maintains flow rate within 1% for every 100 PSI change in pressure. Only 70 PSI pressure drop across orifice. Can be installed directly into cylinder outlet port. 3/8" (M)NPT inlet and 3/8" (F)NPT outlet. 3⅛"L x 1" dia. Max flow: 16 GPM.

| Flow Rate (GPM) | Fenner Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 | A8-2142-00 | **5X487** | $25.89 | **$24.94** | 0.4 |
| 2 | A8-2142-00 | **5X488** | 25.89 | **24.94** | 0.4 |

## 1/2" ADJUSTABLE RELIEF VALVE

- **Compact 1/2" NPT, high pressure relief valve designed for full flow with low pressure drop**
- **Pressure adjustable from 1000 to 2500 PSI**
- **For heavy-duty hydraulic applications**
- **High strength steel bar stock body with replaceable heat treated seat • 16 GPM maximum**
- **Prince brand (RD1850H)**

**Dimensions: 4⅝L x 1½W x 1½"D**

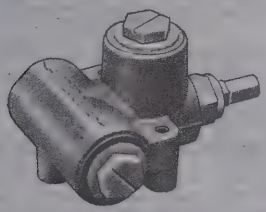
**No. 6X843.** Shpg. wt. 2.2 lbs. List $41.34. Each.....**$28.50**

**Limited 3-year warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## ADJUSTABLE RELIEF VALVES

- **Adjustable relief valve controls maximum pressure within a hydraulic circuit**
- **Two stage, balanced piston design provides fast response and minimizes pressure override**
- **Vent connection allows low pressure venting of system to tank**
- **Remote pressure control capability is achieved by directing flow from vent connection to a separate pressure relief valve**
- **Standard "F3" seals provide multi-fluid capability**

**Inlet and outlet pressure connections** may be used interchangeably when the valve is mounted in the pressure line, or the valve may be teed off the pressure line with one of the inlet pressure connections plugged. 7/8"-14 UNF-2B thread inlet and outlet connections CS-03. 1.0625-12 UN-2B thread inlet and outlet connections-CS-06.



**Pressure setting selected** should be approximately 150 to 200 PSI above the actual system working pressure.

**Pressure is adjusted** by loosening the jam nut and turning the control knob. Maximum pressure 3000 PSI. Dimensions: 5.6L x 6.6W x 2.1"H. Vickers brand.

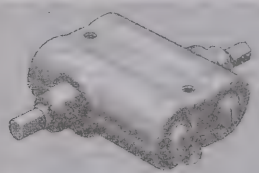
## DIFFERENTIAL POPPET INLINE RELIEF VALVE

No. 4HL34

Replacement Parts Available 1-800-323-0620



**Differential poppet type inline relief valve** is made up of a relief cartridge and a cast iron valve body. Provides smooth quiet performance with a minimum variation between cracking and full flow pressures, and is also less sensitive to system contamination. No. 4HL34 is well suited as a system relief up to 30 GPM and 3000 PSI. Unit comes factory set at 2000 PSI @ 10 GPM. Externally adjustable. 3/4" NPT ports.

### INLINE RELIEF VALVE SPECIFICATIONS AND ORDERING DATA

| Max. Inlet Flow GPM | Min. PSI | Max. PSI | Dimensions (In.) L | W | H | Prince Model | Stock No. | List | Each | Shpg. Wt. |

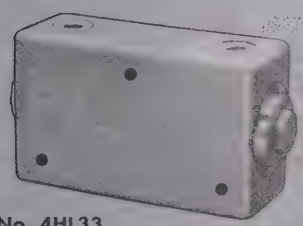
## DIFFERENTIAL POPPET DOUBLE RELIEF VALVE

**Differential poppet type double relief valve** uses the same relief cartridge as No. 4HL34. The double relief is used in systems that require cross-over relief protection such as a reversible hydraulic motor, or systems that require a cushion valve such as double acting cylinders. Unit comes factory set at 2000 PSI @ 10 GPM.

No. 4HL35



Replacement Parts Available 1-800-323-0620

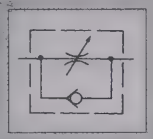
## DOUBLE PILOT-OPERATED CHECK VALVE

No. 4HL33



**Double pilot-operated lock valve** will lock a cylinder in place when a directional control valve is in the neutral position. In operation, oil is directed to one of the valve ports and oil can free flow to the corresponding cylinder port. The pressure on this valve port will shift the pilot spool opening to the opposite check valve. This will allow oil to return through the opposite check valve. Valve has hardened steel seat and steel ball and should not be used in applications requiring absolutely zero leakage. Valve features 1/2" NPT ports.

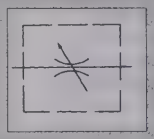
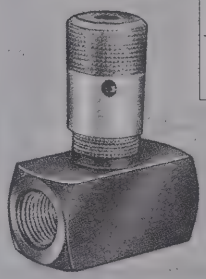
# CONTROL VALVES

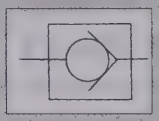


NFPA Symbol

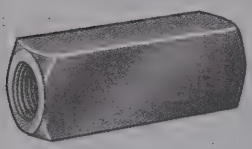


No. 1A853

NFPA Symbol



No. 1A861



Parker

Replacement Parts Available 1-800-323-0620

NFPA Symbol

No. 1A857

- Withstand shock, vibration, and wear to provide accurate settings and precise control
- Poppets in precision fitted cylinders eliminate wobble and erratic travel common to check balls
- Maximum working pressure for brass valves: 2000 PSI
- Maximum working pressure for steel valves: 5000 PSI

Poppets feature hydraulic cushioning to soften impact against valve spring and seat; whereas check balls impact heavily against spring and seat, eventually causing leaks.

Brass valves are suited for pneumatic and medium pressure hydraulic applications.

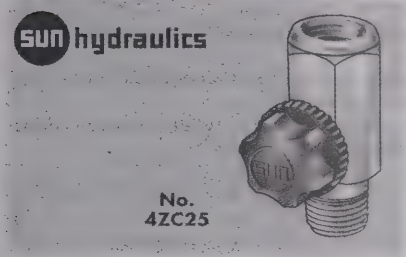
Steel valves are for high pressure hydraulic applications.

### COLORFLOW® FLOW CONTROL VALVES

Series F valves provide precision flow control in one direction, and automatically allow unrestricted free flow in opposite direction. Two-step needle allows fine adjustment at low flow with first three turns of adjusting knob. Next three turns give full-open needle position and conventional throttling control. Exclusive Colorflow color reference scale on valve stem permits fast, accurate setting and quick return to previous setting.

### COLORFLOW® NEEDLE VALVES

Series N valves are used as speed controls where a reverse flow check valve is not needed. Have the same operating features as Series F Colorflow valves with the exception of reverse flow. They provide excellent control and reliable shut-off in a small envelope. May be used to control flow in both directions.



### COLORFLOW® CHECK VALVES

Series C check valves provide free flow in one direction and dependable shutoff in the opposite direction. Valve body has inlet and outlet ports and movable poppet controlled by spring pressure. Unique triangular retainers guide poppet and hold spring firmly in place even under high velocity and shock loads. 5 PSI cracking pressure.

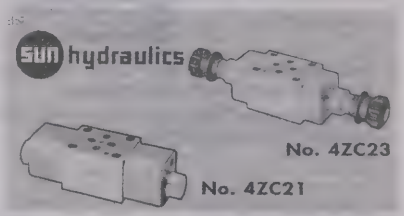
(*) Height of Series F and N valves are measured from center of port with adjustment knob fully open.

## GAUGE SNUBBER

**Stainless steel gauge snubber** is a throttling and shut-off device that isolates, protects, and extends the life and accuracy of hydraulic gauges. When partially opened, unit reduces or eliminates gauge pointer pulsations. When closed, unit positively shuts off gauge from line pressure. Leak-proof needle stem is positively retained. Viton seals. Fingertip adjustment and lock-nut. 1/4" NPT, 5000 PSI maximum pressure rating. Sun Hydraulics (#NSAB-KXV-BA).

**No. 4ZC25.** Gauge Snubber. Shpg. wt. 0.2 lbs. List $19.79. Each.....$17.25

## SANDWICH VALVES



**Sandwich design valves are compact,** which allows mounting between solenoid-operated directional valves and subplate or manifold. Units allow construction of compact hydraulic circuits with a minimum of piping or potential leakeage points. Effective means of adding additional control functions to existing circuit since piping does not require changing.

### DUAL PILOT-TO-OPEN CHECK VALVE

**Dual pilot-to-open check valve assemblies** positively lock a pressurized load at actuator work ports when solenoid operated valve is centered (de-energized). Internal pilots release load as soon as directional valve solenoids are energized. Valves have hardened steel seats for long wear and maximum dirt tolerance. 30 PSI cracking pressure. Buna N seals. 3000 PSI maximum pressure rating.

| For NFPA* | Sun Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|

(*) D03 is former D01, D05 is former D02

### DUAL PRESSURE COMPENSATED FLOW CONTROLS

**Dual pressure compensated flow regulators** with internal reverse free-flow checks for precise speed (flow) control at either or both work ports. Handknobs provide easy adjustment. May be installed to provide either meter-in or meter-out control of load. Buna N seals. 3000 PSI maximum pressure rating.

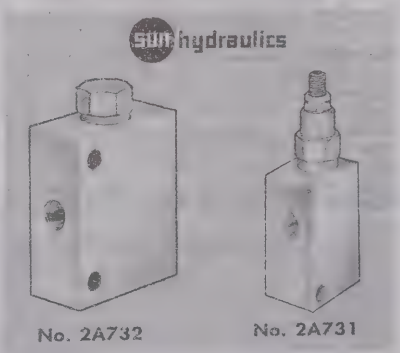
## CARTRIDGE VALVES



### PILOT-TO-OPEN CHECK VALVE

Non-vented internal pilot valve positively locks a pressurized load, but will release the load upon application of pressure to the pilot port. Releases when a pilot pressure equaling one-third of the system's pressure is applied.

**Applications** include personnel lifts, stabilizer jacks, clamps, up- or down-acting cylinders and presses.

**Valve has a steel seat** for long wear and maximum dirt tolerance. 30 PSI cracking pressure. Buna N seals. 1/2" NPTF main ports, 1/4" NPTF pilot port. Sun Hydraulics brand (CKEB-XCN-BCC).

**No. 2A732.** Shpg. wt. 2.5 lbs. List $60.09. Each.....$54.35

### RELIEF VALVE

**Pilot-operated, balanced spool relief valve** is used to regulate maximum system pressure, limit pressure in all systems and subsystems, and cushion deceleration of hydraulic cylinders and motors.

**Valve has Buna N seals** and 1/2" NPTF ports. Leakproof screw adjusts relief setting between 100 and 3000 PSI. Designed for flows of up to 25 GPM. Sun Hydraulics brand (RPEC-LAN-FAC).

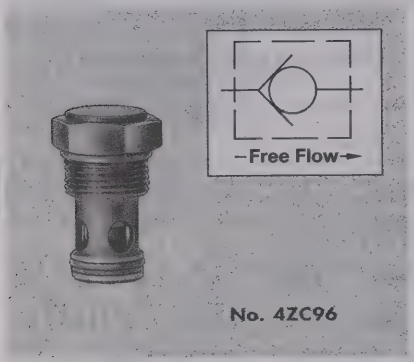
**No. 2A731.** Shpg. wt. 0.7 lbs. List $53.48. Each.....$47.65

## HYDRAULIC VALVE MANIFOLDS

**Daman parallel circuit aluminum manifolds** are designed to accommodate two or three valves in applications where a power unit is required to actuate more than one device. They incorporate dry seal pipe threads and steel mounting brackets with hex-head. Maximum pressure rating is 3000 PSI. Additional pressure and tank ports on top of manifolds are for pressure-beyond and return-line filter applications, if needed. Nos. 1A763 and 1A765 are 2-station manifolds, while Nos. 1A764 and 1A766 are 3-station types.

**NFPA D03 Design Nos. 1A763 and 1A764** conform to NFPA standard D03 specifications for mounting as well as ISO-03 mounting configurations. A and B cylinder ports are 3/8-18 NPTF. Pressure and tank ports are 1/2-14 NPTF.

**NFPA D05 Design Nos. 1A765 and 1A766** conform to NFPA standard D05 and ISO-05. A and B cylinder ports are 1/2-14 NPTF. Pressure and tank ports are 3/4-14 NPTF.



**Bolt kits available** through Grainger Parts Operations, Part #BK590716.

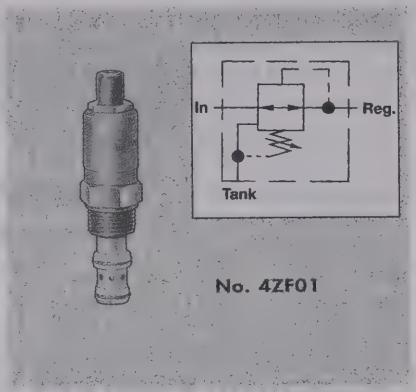
# THREADED CARTRIDGE VALVES

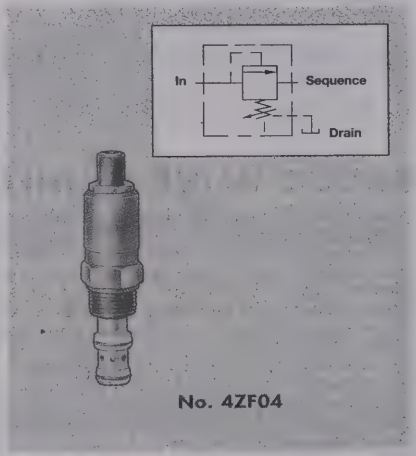
- Self-contained, portless valves designed for straight thread installation to eliminate leakage
- Reduce weight and space required compared to a conventionally plumbed system
- Reduce cost of fittings and hose, simplifies troubleshooting and reduces downtime
- Quick and easy removal. Simply unscrew, no fittings to disconnect
- Allow hydraulic system controls to be integrated into a single block or individual valve bases
- Cartridge style valves include: check, relief, pressure reducing, sequence, needle, and solenoid valves

## A CHECK VALVES



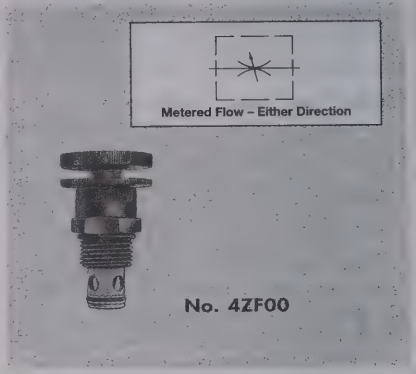
**Nos. 4ZC96 and 4ZC97** check valves allow free flow in one direction while preventing flow in the reverse direction. They can be used to isolate portions of a hydraulic cir-

## B RELIEF VALVES



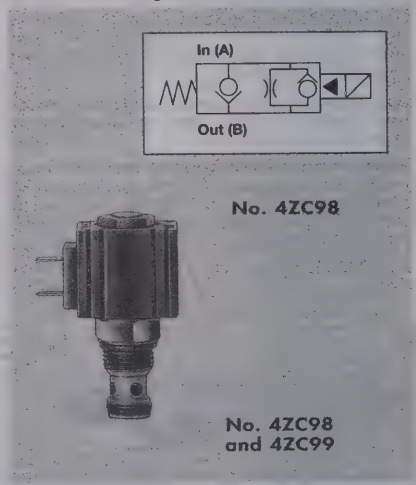
**No. 4ZF02 relief valve** is suited for continuous duty applications and is primarily used to limit main system pressure.

**No. 4ZF03 relief valve** is best suited for intermittent duty applications as overload protection and shock protection relief.



## C PRESSURE REDUCING/ RELIEF VALVE

**No. 4ZF01 pressure reducing/relieving valve** can be used in any application where a regulated pressure lower than system pressure is required. The valve also acts as a relief valve, relieving any shocks or surges that occur between its regulated pressure port and the actuator. When the valve is in the relieving mode, the inlet port is blocked. 200-3500 PSI range.



## D SEQUENCE VALVE

**No. 4ZF04 sequence valve** is used to control the sequence of operation of two or more hydraulic actuators by assuring priority hydraulic pressure to one actuator before another.

## E NEEDLE VALVE

**No. 4ZF00 needle valve** provides speed control and shutoff where a reverse flow check is not required.

## F SOLENOID VALVES

**Nos. 4ZC98 and 4ZC99 solenoid valves** are used in circuits requiring On/Off valves and low leakage. Single acting cylinder applications typically utilize valves of this type. Valves can be used for bleed down flow and/or raising and lowering a vertical cylinder. No 4ZC98 (DC) is normally closed and No. 4ZC99 (DC) is normally open.

# CETOP-3 SIZE SOLENOID OPERATED DIRECTIONAL VALVES

**DG4V3S SERIES FEATURES:**

- Compatible with the ISO 4401 size 03, and NFPA D03 port and mounting patterns
- Valve body NFPA fatigue proof rated at 5075 PSI for safety and performance
- High solenoid and spring forces provide increased reliability in extreme conditions
- Optimized valve body/spool design minimizes pressure drop and energy consumption
- Higher machine productivity and uptime, valve endurance tested over 20 million cycles
- Viton O-rings provide multi-fluid capability without changing seals
- Max. working port pressure (P, A, B) is 5075 PSI
- Max. tank pressure is 1450 PSI
- DC valves require both wire connectors Nos. 3MC17 and 3MC18

## INDUSTRIAL HYDRAULIC TECHNOLOGY

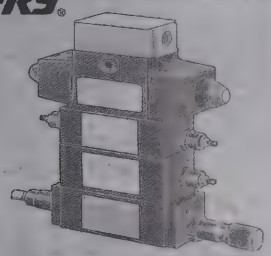
Updated 2nd edition text contains 15 chapters for both designers and users of hydraulic systems. Individual hydraulic components are explained in function and use in most common circuit designs. Two new chapters on hydrualic fluids and the basics of proportional and servo hydraulic valves. Exercises at end of each chapter serve as summary of important points with answers provided in separate manual (included). Color illustrations. 331 pages. Parker Bulletin 0232-B1.

**No. 6W620.** Shpg. wt. 2.1 lbs. List $41.92.
Each ..... **$38.35**

No. 6W620

## HYDRAULIC MAINTENANCE TECHNOLOGY

Training textbook provides user of industrial hydraulic equipment with detailed reference in areas of maintenance and troubleshooting. Common hydraulic problems, causes and possible remedies are discussed in detail and listed in Troubleshooting Charts. Exercises at end of each chapter serve as summary of important points with answers in separate manual (included). 214 pages. Parker Bulletin 0240-B1.



**No. 6ZF44.** Shpg. wt. 1.8 lbs. List $25.59.
Each ..... **$24.74**

No. 6ZF44

# SYSTEMSTAK CONTROL VALVES

VICKERS®

Replacement Parts Available
1-800-323-0620™

## CETOP-3 SIZE SYSTEMSTAK® CONTROL VALVES

- Compatible with ISO 4401-03 and NFPA DO3 port and mounting patterns
- A wide variety of valve functions and options for simplified design and installation of hydraulics systems
- Valve bodies fatigue proof rated to 4500 PSI with flow capability to 15.7 GPM
- Compact "sandwich" mounted design improves system response and reduces potential for system leakage
- Fewer mounting points, fittings and piping result in quicker assembly and lower installed cost
- Larger flow passages and improved designs allow these Vickers valves to operate at flow rates up to 50% higher than similar valves
- Viton O-rings allow multi-fluid capability without changing seals
- Rugged screw and locknut arrangements allows quick and secure adjustment of pressure or flow setting

## SYSTEMSTAK® VALVE MOUNTING BOLT KITS

**FOR CETOP-3 ISO 4401-03 SIZE SYSTEMSTAK VALVES:**

The length of mounting bolt used to install a SYSTEMSTAK assembly is dependent on the number of valves being used, plus the length needed for mounting other valves in the assembly, such as: solenoid operated directional valves, tapping or blanking plates. A large selection of bolt kits (kit=4 bolts) are offered. To determine your needs, use the following guide for bolt length calculation. Rated to 4500 PSI when using cast iron or steel subplates or manifolds. 3000 PSI with aluminum subplates or manifolds. Thread size: 10-24 UNC-3A.

**Note:** If not using Vickers bolt kits, bolts must be to Grade 12.9 (ISO 898) or better.

**A-Bolt clamp length in directional valve, blanking plate, crossover plate, etc.**

**B-Height of intermediate valve stack, comprising SystemStak valve(s) plus tapping plates, etc.**

**C- Depth of thread engagement in subplate/manifold block.**

**L-Required bolt length; select from the table.**

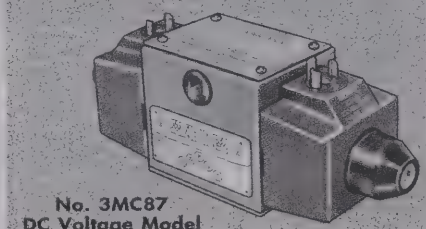
# CETOP-5 SIZE SOLENOID OPERATED DIRECTIONAL VALVES



VICKERS

**DG4S4 SERIES FEATURES:**

- Compatible with the ISO 4401 size 05 and NFPA DO5 port and mounting patterns
- DC valve require both solenoid wire connector Nos. 3MC17 and 3MC18
- Manual overrides allow safe manual shifting during troubleshooting or power failure
- Optimized valve body/spool design minimizes pressure drop and energy consumption
- Higher machine productivity and uptime, valve endurance tested over 20 million cycles
- Solenoid/core tube design allows coils to be changed without removing valve from installation and without risk of oil spillage or system contamination
- Max. pressure P, A, B ports to 3600 PSI
- Max. pressure T port to 1000 PSI

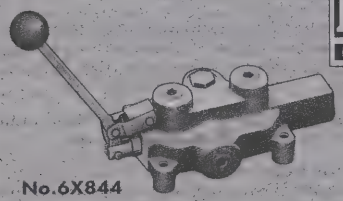
## SYSTEMSTAK VALVE BOLT EXTENDER KIT INFORMATION

VICKERS

**FOR CETOP-5, ISO 4401-05 SIZE SYSTEMSTAK VALVES**

- **Uses 5/32 Hex socket for tightening**
- **1/4"—20 threads**

These valves may be mounted with bolt extender kits. The use of these kits simplifies installation by permitting each valve body to be separately installed with the correct torque value. This also provides the ability to remove the directional valve for service or replacement without disturbing the stack assembly. There are 4 bolt extenders per kit.



| SystemStak Height (In.) | Thread | Kit Model No. | Stock No. | List | Each | Shpg. Wt. |

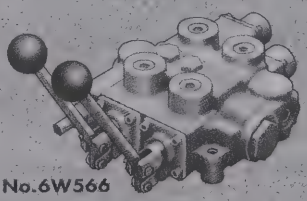
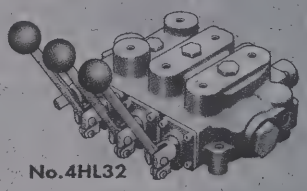
# DIRECTIONAL CONTROL VALVES

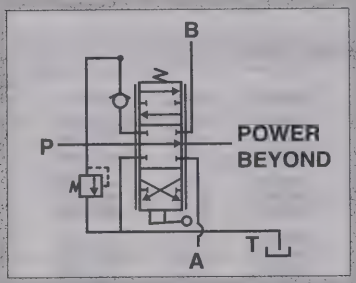


## ONE, TWO, AND THREE SPOOL MONOBLOCK VALVES

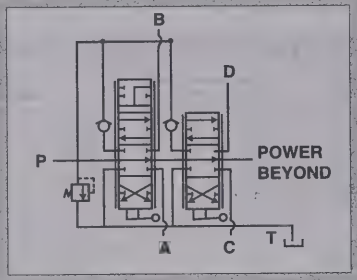
Prince HYDRAULICS

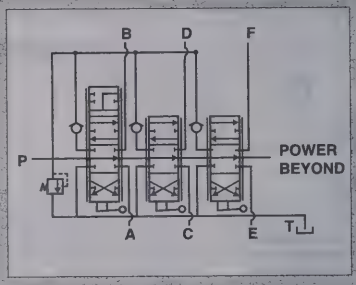


Replacement Parts Available 1-800-323-0620



No.6X844





No.6W566

No.4HL32

- Valves commonly used to control cylinders or motors in mobile, agricultural and light industrial applications
- Single spool valves are 3 or 4-way, 3 position and tandem center. Three-way spool valves are used for single-acting cylinders; 4-way spool valves are used for double-acting cylinders
- Two and three spool valves have a 3 position, tandem center first spool with a 4th position float. Commonly used on equipment that needs to be allowed to "drift" during part of the usage cycle: for example, a loader bucket following the ground contour. The remaining spool(s) are 4-way, 3 position and tandem center
- Load checks provided on all spools (except No. 1A967)
- Can be converted to closed center*‡ or power beyond† operation
- No. 6W565 can be converted to closed center operation‡
- All valves have differential poppet relief valves
- No. 1A967 features a pressure detent release preset at 1200 PSI with an adjustment range of 600 to 2000 PSI for applications including logsplitters and presses

### ONE, TWO, AND THREE SPOOL MONOBLOCK VALVE SPECIFICATIONS

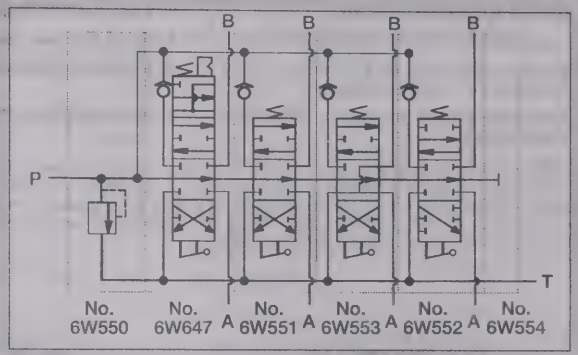
# 12 GPM STACK VALVES

Replacement Parts Available 1-800-323-0620



Unassembled

Assembled

HYDRAULIC SCHEMATIC

**Stack valves are hydraulic control valves** built in a modular fashion. Used in a wide range of applications from mobile to agricultural to light industrial.

**Stack Valves Consist of:**

1. Inlet section
2. Work section(s)
3. Outlet section
4. Bolt kit (to hold assembly together)

**Each work section provides** everything needed to control one function or circuit. As extra circuits are needed, they can be added into the stack. Stack valve handles can be mounted in various ways to enable usage in overhead position or to change the flow direction with regard to handle movement without re-plumbing the circuit.

- **Add additional functions by inserting sections**
- **Control up to 8 functions from one station**
- **Assemble special valves for specific applications**
- **Assembly easily performed by sliding inlet, work sections, and outlet together onto 3 bolts, and torquing the bolts to 12.5 ft.-lbs.**
- **Load checks on each section • 12 GPM nominal rating**
- **Inlets offer top and end porting and are machined for cartridge type relief valve**
- **Inlet relief valves are smooth, efficient differential poppet design**
- **Inlets feature #100RB (7/8-14) straight thread porting with the option of using either top or side ports**
- **Work sections all feature #8 ORB (3/4-16) straight thread porting**
- **Outlets feature #8 ORB (7/8-14) straight thread porting with top or side porting**

### INLET SECTION: 500 TO 1500 PSI

- **Standard #10 SAE inlet with relief**
- **Relief preset at 1000 PSI with an adjustment range of 500 to 1500 PSI**
- **Prince model (SV124)**

**No. 6W549.** Shpg. wt. 4.0 lbs. List $44.52.
Each ..... $39.75

### INLET SECTION: 1500 TO 3000 PSI

- **Standard inlet with relief**
- **Relief preset at 2000 PSI with an adjustment range of 1500 to 3000 PSI**
- **Prince model (SV125)**

**No. 6W550.** Shpg. wt. 4.2 lbs.. List $44.52.
Each ..... $39.75

### WORK SECTION: 4-WAY, 3 POSITION, TANDEM CENTER

- **Standard 4-way, 3 position spring centered section with work ports blocked in neutral**
- **Prince model (SVW1BA1)**

**No. 6W551.** Shpg. wt. 6.2 lbs. List $69.96.
Each ..... $64.55

### WORK SECTION: 4-WAY, 4 POSITION, FLOAT CENTER

- **4-way, 4 position fourth position float with spring center and float detent**
- **Prince model (SVW1DD1)**

**No. 6W647.** Shpg. wt. 7.0 lbs. List $88.51.
Each ..... $84.80

### WORK SECTION: 4-WAY, 3 POSITION, OPEN CENTER

- **4-way, motor spool 3 position spring center section with work ports open to tank in neutral**
- **Prince model (SVW1CA1)**

**No. 6W553.** Shpg. wt. 6.2 lbs. List $71.02.
Each ..... $67.35

### WORK SECTION: 3-WAY, 3 POSITION

- **3-way, 3 position section for single acting cylinders**
- **Prince model (SVW1AA1)**

**No. 6W552.** Shpg. wt. 4.1 lbs.. List $71.02.
Each ..... $67.35

### OUTLET SECTION: OPEN CENTER

- **Standard open center outlet**
- **Prince model (SVE21)**

**No. 6W554.** Shpg. wt. 4.1 lbs. List $29.15.
Each ..... $26.50

### OUTLET SECTION: POWER-BEYOND OUTLET

- **Power-beyond outlet with 3/4-16 straight thread power-beyond port**
- **Prince model (SVE22)**

**No. 6W555.** Shpg. wt. 4.1 lbs. List $37.10.
Each ..... $33.40

### OUTLET SECTION: CLOSED CENTER

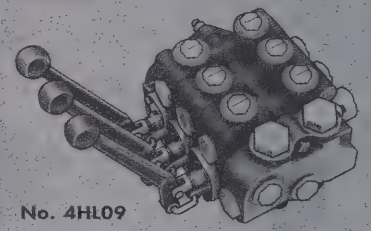
- **Closed center outlet**
- **Prince model (SVE23)**

**No. 6W556.** Shpg. wt. 4.0 lbs. List $36.04.
Each ..... $32.35

### BOLT KITS

| No. of Work Sections | Prince Model (660401) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 | 001 | 6W557 | $5.83 | **$5.57** | 0.4 |
| 2 | 002 | 6W558 | 5.93 | **5.67** | 0.5 |
| 3 | 003 | 6W559 | 6.09 | **5.78** | 0.6 |
| 4 | 004 | 6W560 | 6.36 | **5.94** | 0.7 |
| 5 | 005 | 6W561 | 6.36 | **6.04** | 0.9 |
| 6 | 006 | 6W562 | 6.57 | **6.15** | 0.9 |
| 7 | 007 | 6W563 | 6.67 | **6.25** | 1.0 |
| 8 | 008 | 6W564 | 6.89 | **6.63** | 1.0 |

# DIRECTIONAL CONTROL VALVES



## 20 GPM STACK VALVES

- Up to 8 work sections
- Power beyond capability
- Load checks on each work port
- Float section can be installed in any location in valve assembly
- Interchangeable mounting with other stack valves
- Fine spool metering
- Reversible handle
- Hard chrome plated spools
- Maximum operating pressure: 3500 PSI
- Nominal flow rating: 20 GPM

**Parallel circuit construction.** When any one of the spools in a valve bank is shifted, it blocks off the open center passage. Oil then flows into the parallel circuit core, making oil available to all spools. If more than one spool is fully shifted, then oil will go to the section with the lowest pressure requirements. Possible to meter flow to the spool with the least load, and power two unequal loads.

Prince HYDRAULICS

Replacement Parts Available 1-800-323-0620

No. 4HL09

### INLET SECTION: 1350 TO 1750 PSI

- Standard #12 SAE inlet with relief set

**No. 4HL09.** Shpg. wt. 7.5 lbs. List $83.10.
Each ..... $73.70

### INLET SECTION: 1750 TO 2200 PSI

- Standard #12 SAE inlet with relief set

**No. 4HL10.** Shpg. wt. 7.5 lbs. List $83.10.
Each ..... $73.70

### INLET SECTION: 2200 TO 3000 PSI

- Standard #12 SAE inlet with relief set

**No. 4HL11.** Shpg. wt. 7.5 lbs. List $83.10.
Each ..... $73.70

### WORK SECTION: 4-WAY, 3 POSITION

- 4-way, 3 position work ports blocked in neutral, spring return to center
- Prince model 20P1BA1AA

**No. 4HL12.** Shpg. wt. 10.0 lbs. List $115.22.
Each ..... $102.10

### WORK SECTION: 4-WAY, 3 POSITION

- 4-way, 3 position work ports blocked in neutral, 3 position detent
- Prince model 20P1BB1AA

**No. 4HL13.** Shpg. wt. 10.0 lbs. List $120.09.
Each ..... $106.40

### WORK SECTION: 4-WAY, 4 POSITION

- 4-way, 4 position work ports blocked in center position, 3 position spring return to center, 4th position is float position with detent, port reliefs set at 2200 PSI
- Shim adjustable from 1700 to 2200 PSI
- Prince model 20P1DD1DD

**No. 4HL14.** Shpg. wt. 11.0 lbs. List $228.11.
Each ..... $200.50

### WORK SECTION: 4-WAY, 3 POSITION

- 4-way, 3 position work ports open to tank in center (motor spool), spring to center
- Prince model 20P1CA1AA

**No. 4HL15.** Shpg. wt. 10.0 lbs. List $121.42.
Each ..... $107.50

### WORK SECTION: 4-WAY, 3 POSITION

- 4-way, 3 position work ports open to tank in center (motor spool), 3 position detent
- Prince model 20P1CB1AA

**No. 4HL16.** Shpg. wt. 10.0 lbs. List $126.24.
Each ..... $111.70

### OUTLET SECTION: OPEN CENTER

- Open center, #12 SAE port, option port plugged
- Prince model 20E21

**No. 4HL17.** Shpg. wt. 4.5 lbs. List $36.09.
Each ..... $32.30

### OUTLET SECTION: OPEN CENTER

- Open center, #12 SAE port, power beyond sleeve with #10 SAE port
- Prince model 20E22

**No. 4HL18.** Shpg. wt. 4.5 lbs. List $39.90.
Each ..... $35.55

### OUTLET SECTION: CLOSED CENTER

- Closed center, #12 SAE port
- Prince model 20E23

**No. 4HL19.** Shpg. wt. 4.5 lbs. List $41.02.
Each ..... $36.55

### PORT RELIEF CARTRIDGE: 1350 TO 1750 PSI

- Set at 1750 PSI
- Shim adjustable from 1351 to 1750 PSI
- Prince model 660290323

**No. 4HL20.** Shpg. wt. 1.0 lbs. List $45.89.
Each ..... $40.15

### PORT RELIEF CARTRIDGE: 1750 TO 2200 PSI

- Set at 2200 PSI
- Shim adjustable from 1750 to 2200 PSI
- Prince model 660290325

**No. 4HL21.** Shpg. wt. 1.0 lbs. List $45.89.
Each ..... $40.15

### PORT RELIEF CARTRIDGE: 2200 TO 3000 PSI

- Set at 2500 PSI
- Shim adjustable from 2200 to 3000 PSI
- Prince model 660290327

**No. 4HL22.** Shpg. wt. 1.0 lbs. List $45.89.
Each ..... $40.15

GUARDIAN® Parker Filtration

No. 6F582

No. 6F583

No. 6F590

## GUARDIAN® PORTABLE FILTRATION SYSTEM

- For conditioning and transferring petroleum-based and water emulsion fluids
- Use when adding new oil to reservoir or to clean and "polish" oil already in system
- Compact, hand-held design is lightweight and ideal for hard to reach places
- Prevents contaminants from damaging critical hydraulic components
- Flow rate to 4 GPM
- Built-in relief valve with no downstream bypass ensures 100% filtration
- Wide variety of replacement filter elements available (see below)
- UL Recognized, CSA Listed motor

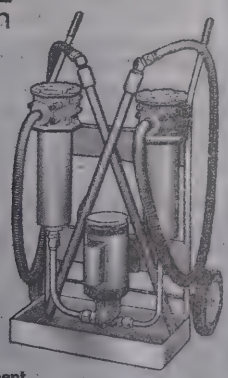
Gerotor pump with visible serviceable inlet strainer. 1/4 HP, 115 VAC, 3.0 F/L Amp, motor with thermal overload protection. Inlet and outlet hoses can be connected for leak proof transport. Auxiliary ports can be used to sample oil. Viton seals provide long life.

Includes one 10-micron cellulose filter element and two clear, wire reinforced, 5 ft. hose assemblies with wand attachments.

Maximum 16,000 SUS fluid viscosity. 50 PSI maximum operating pressure. Visual 25 PSID differential pressure indicator. Operating temperature range: -15 to 180°F (120°F maximum operating temperature of wand and hoses).

**No. 6F582.** Parker brand (GT410C1).
Shpg. wt. 27.0 lbs. List $759.44. Each...**$722.50**

### MOLDED PLASTIC CARRYING CASE



Optional carrying case for ease of transporting and storage.

**No. 6F583.** Parker brand (GT410C1).
Shpg. wt. 8.6 lbs. List $173.80. Each.....**$164.50**

Parker Filtration

Replacement Parts Available 1-800-323-0620™

No. 4Z987

## PORTABLE OIL FILTRATION CART

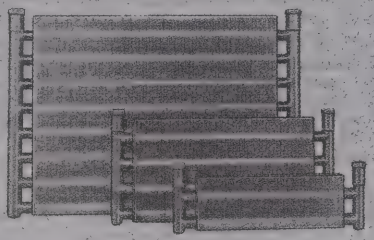
- Eliminate contaminants found even in fresh oil
- Prefilter hydraulic oil while transferring to the reservoir
- Filter oil already in reservoir as a part of routine maintenance schedule to prolong life of hydraulic components
- 3/4 HP, 115V 10 amp motor with thermal overload protection
- Incorporates two high capacity filters to remove ultrafine contaminants
- Flow rate to 10 GPM
- Built-in bypass valve allows no partial bypass until differential pressure is reached
- Assembled on two-wheel hand cart with oil drip pan

System filters fluids through a primary 40-micron synthetic polyester inlet filter, then through a final discharge 10-micron cellulose filter. Visual indicator tells condition of element and warns when element should be changed (direct replacement and optional replacement elements listed below).

Unit includes two 1" diameter x 7 foot hoses and two 3-foot wands on inlet and discharge filters. Two-wheel cart is easy to maneuver and includes a cart-mounted On/Off switch.

Measures 25½L x 19W x 40½"H. Maximum operating temperature is 225°F.

**No. 4Z987.** Parker brand (10M40SA 10C).
Shpg. wt. 104.0 lbs. List $1369.93.
Each .....**$1345.00**



Optional Discharge Filter Medium. Replacement elements available in microglass, cellulose, and 20-micron/water removal. Microglass has a higher dirt-holding capacity for longer usable filter life. Three-micron cellulose element provides finer filtration than the standard element provided with filter cart. Twenty-micron/water removal element will eliminate moisture and the damaging effects of rust and corrosion to prolong component life.

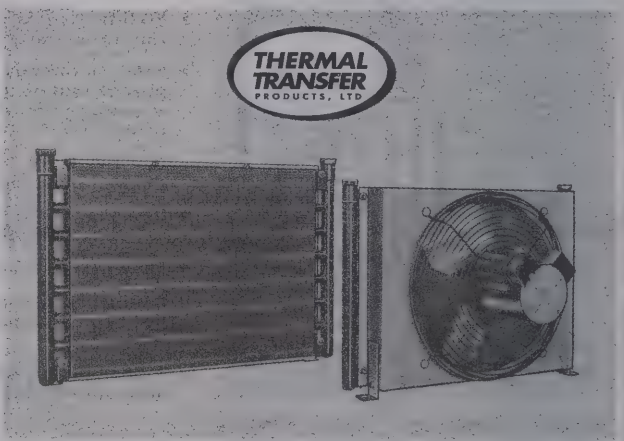
## FORCED AIR OIL COOLERS

- **Compact, highly efficient design with contoured air side fins and internal oil turbulators**
- **Rugged construction resists vibration and torsional stress**
- **Eliminates water and sewer costs**
- **Copper and aluminum construction**
- **Fully assembled**
- **Mounting bracket included for easy installation**
- **Max. PSI 300 • Max. temperature 350°F**

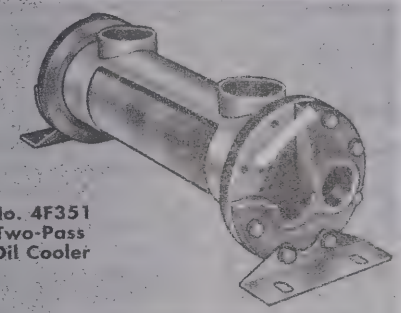


### Sizing Forced Air Units:

1.Find the system oil flow (GPM)

2.Size heat exchanger to remove approximately 30% of input horsepower

NOTE: To find an approximation of the BTU removed, multiply the HP heat removed by 2545.



- **Pressure drop is less than 25 PSI at maximum flow**
- **Performance based on oil entering cooler 50°F higher than ambient air temperature**

# WATER COOLED HYDRAULIC OIL COOLERS

No. 4F351
Two-Pass
Oil Cooler

Many hydraulic systems recommend the operating temperature of oil not exceed 160°F. Excessive temperatures can cause oil to oxidize, forming gum, varnish resins, sludge, and acids. These by-products shorten life of oil, cause valves to stick and cause erratic operation of system. Additionally, excessive heat reduces efficiency of system while consuming more energy.

- **Aluminum fins mechanically bonded to copper tubes extend cooling surface**
- **Highly efficient design lowers operating costs**
- **Internal oil flow bypass relief valve (surge cushion) protects cooler from pressure spikes**
- **Rotating mounting brackets allow for easy installation**
- **Removable end caps allow easy access to tubes for cleaning**
- **Nos. 4F351 and 4F352 are two-pass units**
- **Maximum water PSI 150**
- **Maximum oil PSI 500**

**Sizing Hydraulic Cooler:**

1. Find the system oil flow (GPM)
2. Size heat exchanger to remove approximately 30% of input horsepower

**NOTE:** To find an approximation of the BTU removed, multiply the HP heat removed by 2545.

- **Pressure drop is less than 20 PSI at maximum flow**
- **One GPM of water is required for every two GPM of oil**
- **Performance based on oil leaving cooler 40°F higher than incoming water temperature**

# SPIN-ON FILTER & REPLACEMENT ELEMENTS

## HYDRAULIC RETURN LINE SPIN-ON FILTERS

- **Used in return line, just before the reservoir, in any hydraulic system using petroleum-based fluids**
- **Maximum pressure is 150 PSI; temperature 225°F**
- **Cast aluminum head mounts securely to in-line piping**
- **Like size filter heads are interchangeable**

**Head has 1/8" NPTF port** for use with optional gauge No. 1A318 listed below.

**Dual Buna N seals;** outer seal resists leaks up to 150 PSI; inner seal keeps incoming fluid from mixing with clean filtered fluid. Have 15 PSID bypass spring. Flow rates are determined by fluid viscosity. Amount of dirt entering system affects frequency of element replacement.

**Two threaded holes in filter head** permit extra rigid mounting. In sizing filters, consider maximum flow rate of oil discharge to reservoir as return flow rate can be more than pump rated flow rate.

**Filter medium** is phenolic impregnated cellulose or microglass. Microglass has a higher dirt-holding capacity for longer usable filter life. Elements are interchangeable with major brands having same size element stem: 1"-12 thread for 20 GPM models and 1½"-16 thread for 50 GPM models. Parker brand.

## FILTER REPLACEMENT GAUGE/INDICATOR

1/8" NPT back connection compound gauge/indicator. Enables operator to tell when filter canister needs replacing. Indicator is red-lined at 15 to 60 PSI. ±3% full scale accuracy. ABS case. Polycarbonate window. 2" diameter open face dial. Ashcroft brand (20W1005PH).

**No. 2C492.** Filter Replacement Indicator. Shpg. wt. 0.2lbs. List $22.25. Each ..... **$8.74**

## HYDRAULIC PRESSURE FILTERS

- **For intermediate and higher pressure systems in mobile and industrial applications**
- **Rated max. allowable operating pressure of 3000 PSI**
- **Lightweight, compact design made of corrosion resistant anodized aluminum**

Protect proportional controls, servo valves, and other critical hydraulic components against dirt and foreign matter when installed downstream from pump.

**Two housing lengths.** Single for normal filtration requirements. Double for extended element life. Ten-micron paper element is standard.

**Built-in 50 PSID bypass valve** allows system to continue operating in an unfiltered condition. Pop-up indicator signals the bypass condition and need for element replacement. 3/4"-SAE12 (5Z279, 5Z280), and 1"-SAE16 (5Z281, 5Z282). Parker brand.

## PARKER HYDRAULIC FILTER ELEMENTS ALSO INTERCHANGE WITH THE FOLLOWING BRANDS†:

FIAT- ALLIS FRAM · GRESEN HYDRECO · MOOG RYCO · STEIGER SULLAIR · TORO VICKERS

(†) Cross-reference information available listing brands and models where Parker elements can be used. See Cross-Reference Information on page opposite inside back cover.

# DEFINITE PURPOSE HOSE ASSEMBLIES

## SNOW PLOW HOSE ASSEMBLIES

Aeroquip thermoplastic FC372 1/4" I.D. hose coupled with 1/4" (1/4-18) (M)NPT at each end.

- **Works with Nos. 2F773 and 2F775 couplers**
- **Hose working PSI: 2750**
- **All hoses have a 4:1 safety factor**
- **Temperature range: -65° to 200°F**
- **Minimum bend radius: 1.25"**

| Type | Hose Size (In.) | Aeroquip Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Western Snow Plows** | 1/4 x 36 | 4-36WH | **2F499** | $41.50 | **$15.92** | 0.5 |
| **Meyer Snow Plows** | 1/4 x 45 | 4-45MH | **2F501** | 45.00 | **17.25** | 0.8 |

## LIQUID PROPANE GAS HOSE ASSEMBLIES

Aeroquip FC321-5/16" I.D. hose coupled with 4401-6S (5/8-18) SAE 45° swivel at each end. LPG UL listing MH6044. For use in butane-propane applications on mobile and stationary equipment. Operating temperature range: -40° to 250°F (-40° to 121°C). Maximum operating PSI: 350; 4:1 safety factor. Bend radius: 2".

| Length (In.) | Aeroquip Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **12** | LP-12 | **2F655** | $50.50 | **$19.44** | 0.4 |

## HOSE ASSEMBLY

Aeroquip FC310-1" I.D. hose SAE 100R2 Hi-Pac performance coupled with 1" (1-11 1/2) male NPT at each end. Hose assembly is protected by steel coil spring for use between tractor and trailers. Operating temperature range: -40°F to 212°F (-40° to 100°C). Maximum operating PSI: 2000; 4:1 safety factor. Minimum bend radius: 6".

| Length (Ft.) | Aeroquip Model | Stock No. | List | Each | Shpg. Wt |
|---|---|---|---|---|---|
| **8** | WL-8 | **2F787** | $233.00 | **$89.70** | 10.0 |
| **10** | WL-10 | **2F783** | 276.50 | **106.40** | 12.0 |

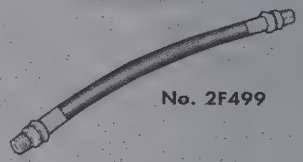
## LOW SPILL-CONNECT UNDER PRESSURE QUICK COUPLER

5100 Series low spill-connect under pressure. Brass coupling with steel tubular valve offers minimum air inclusion and fluid loss. Thread together latch provides connect under pressure capability and vibration resistance. Not rated for continuous hydraulic impulse applications.

- **Tubular valve construction for virtually no fluid loss during disconnection, reducing environmental and worker safety hazards**
- **Low air inclusion during connection maintains system performance**
- **Connect against pressure capability allows connection of halves even when pressurized**
- **Brass construction with steel valving components and Buna N seal material**
- **Working PSI: 3000; Flow GPM: 40**
- **Vacuum (IN/HG): 28**



| Type | Pipe Size (In.) | Aeroquip Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|

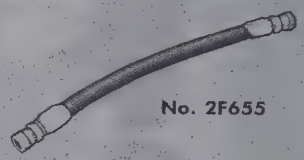
| **Nipple (Tip)** | 1 (F)NPT | 5100-S2-16B | **2F533** | 80.50 | **38.75** | 1.7 |

## HIGH PRESSURE HOSE ASSEMBLIES



- **For high pressure hydraulic jacking systems maximum 10,000 PSI operating pressure**
- **Buna N tube, double wire braid reinforcement, PVC-nitrile blend cover**
- **Temperature range: -40° to 212°F**
- **All hoses have a 2:1 safety factor**
- **Hose is 1/4" I.D. (0.60" O.D.)**
- **Minimum bend radius: 2"**
- **3/8" (M)NPT fittings with spring guards**
- **Meets Material Handling Institute (MHI) specification IJ100**

# HIGH PRESSURE HOSE ASSEMBLIES

Aeroquip

- **Aeroquip HI-PAC® hose meets or exceeds performance aspects of SAE J517C 100R2 ratings**
- **For hydraulic system and general industrial applications**
- **Compatible with petroleum and water based fluids**
- **Temperature range: -40 to 212°F**

**Tube:** Seamless, heat and oil resistant synthetic rubber

**Reinforcement:** Braided, carbon steel wire

**Cover:** Black, oil and abrasion resistant synthetic rubber

- **All hoses have a 4:1 safety factor**

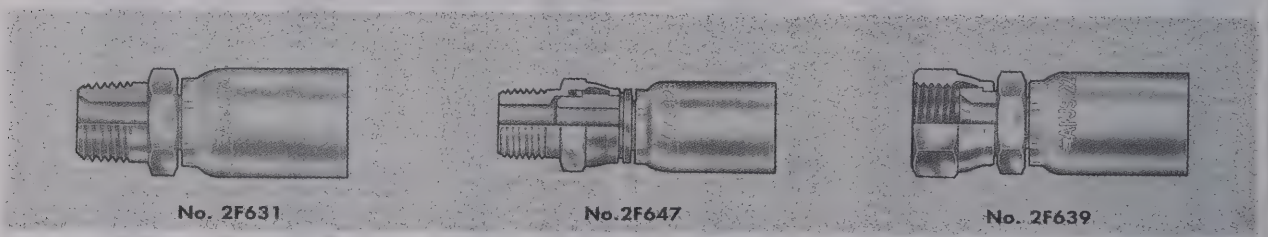
# BULK HYDRAULIC HOSE AND FITTINGS

## BULK HYDRAULIC HOSE

- **Available in SAE 100R1 medium pressure and SAE 100R2 high pressure Type AT designs**
- **Used on industrial, agricultural, and construction hydraulic equipment**
- **Temperature range: -40 to 212°F**
- **Meets Mine Safety and Health Administration (MSHA) standards**
- **All hoses have a 4:1 safety factor**

**Neoprene rubber inner tube** is reinforced with steel braid (two braids on high pressure hose) and covered with neoprene.

**Available in 50 ft. boxes** containing no more than two lengths of hose and in 250 ft. reels with no more than three lengths of hose.



No. 2F581 No. 2F597

## FJ STYLE FITTINGS

No. 2F631 No. 2F647 No. 2F639

Aeroquip

- **Fit 1/4, 3/8, 1/2, and 3/4" medium and high pressure hydraulic rubber hose**
- **Available in chamfer rigid and swivel male pipe and JIC female swivel fittings**
- **Aeroquip brand**

**(*) Interchange information is for reference purposes only. Aeroquip fittings and hose can be assembled using Weatherhead crimp tools. Do not mix hose and fittings of different manufacturers.**

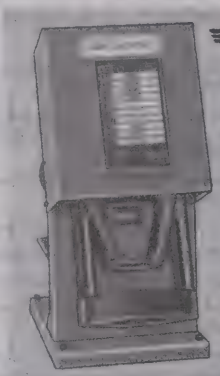
# HYDRAULIC HOSE CRIMPER AND REUSABLE BULK HOSE AND FITTINGS



## PRO CRIMP™ 1380 HOSE CRIMPER

- Setup in garage, shop, or work area
- Preset crimp settings for FJ stlye fittings
- Hydraulic pump included
- Crimp 1/4 through 3/4" I.D., 1 and 2 wire braided hose
- For use with SAE 100R1/100R2 hose and FJ style fittings

**Electronically controlled hose crimper** for fast, accurate crimps. Electronic keypad is easily adjustable with up to 10 programmable settings. Preset settings minimize training and errors and reduce the number of steps and time involved in set-up and crimping of assembly. Upright design features highly visible work area and work light that illuminates top of fitting being crimped. Simple die cage insertion. Includes instruction video.

**Features Enerpac** 10,000 PSI hydraulic pump and cylinder for quiet, efficient operation. When power is On, electronic display and light are lit to indicate set-up. Pump will not begin operation until crimp toggle switch is activated, saving energy and motor wear. Aeroquip brand (FT1380-1-9).

**No. 3F813.** Shpg. wt. 270.0 lbs.

## REUSABLE HOSE AND FITTINGS

### FC300 MULTIPURPOSE HYDRAULIC HOSE

- Single wire braid SAE 100R5 type hose
- Aeroquip elastomer tube, polyester inner braid, single wire braid reinforcement with blue polyester braid cover
- All hoses have a 4:1 safety factor
- Transfers hydraulic oil, air, gasoline, fuel oils, lubricating oils and fire resistant hydraulic fluids
- DOT/FMVSS 106 type all approved for brake line inspection
- Temperature range: -55 to 300°F (-49 to 150°C), except for Air, which is 250°F (121°C)
- High temperature range for longer life
- Fittings: Screw together reuseable type

# TEFLON* HOSE ASSEMBLIES WITH STAINLESS STEEL BRAIDED COVER

- **Applications: Chemical lines, food handling, pharmaceutical, hydraulic fluid, air and water**
- **FDA approved for handling food products. Teflon will not transmit odor, taste, or introduce contamination at any operational temperature**
- **Temperature range: Teflon hose will stand up to alternate steam to cold chill shock cycles**
- **-100 to +500°F (-73 to +260°C) intermittent service**
- **-65 to +450°F (-54 to +232°C) continuous service**
- **Meets or exceeds SAE 100R14 specifications**
- **Non-stick: Smooth bore Teflon hose can be easily steamed cleaned or solvent flushed**
- **Non-aging: Weather, exposure and time do not affect the properties of Teflon. Teflon hose has limitless shelf life, it does not age**
- **Flexible and strong: Combined with stainless steel braid, Teflon hose can perform under high pressure and continuous flexing and vibration conditions**
- **Low friction: Deposits will not accumulate to obstruct flow and reduce pressure**

**The only known classes of chemicals** that attack Teflon are the molten alkali metals such as sodium and potassium, and halogenated chemicals like fluorine gas or chlorine trifluoride. The chemical compatibility of Teflon combined with its other physical characteristics, make it the ideal engineered plastic for use in hose applications. The superior qualities of Teflon and stainless steel are a natural for virtually any hose application.

(*) A DuPont registered trademark.

- **Stainless steel adapters for use with Teflon hose assemblies, see page 2839**

**No. 4HM65**

# HYDRAULIC HOSE ADAPTERS

- JIC 37° male flare adapters conform to Society of Automotive Engineers (SAE) and Joint Industry Conference (JIC) standards
- One-piece, forged steel construction offers greater strength and resistance to vibration and shock loading than conventional, 2-piece brazed adapters
- Zinc-plated finish resists corrosion
- Aeroquip brand
- Meets or exceeds SAE 100R2 maximum operating pressure

# NPT PIPE X (F)NPT SWIVEL ADAPTERS

- Prevent hose stress due to twisting during assembly
- Internal pipe swivel mechanism (NPSM) with 30°seat
- Zinc-plated for corrosion resistance
- Fit all 1/4, 3/8, 1/2, 3/4, 1" male NPT threads with 30° chamfer

Repair, replace or install — Your hydraulic powerhouse has it all.

# HYDRAULIC QUICK COUPLERS

## SAFEWAY/PIONEER INTERCHANGE COUPLERS

- Allows quick connection/disconnection of hydraulic lines on agricultural, mobile, and industrial hydraulic equipment
- All parts machined in USA from solid steel bar stock
- Double shut-off type using rugged ball style checks (standard to agricultural industry)
- Temperature range: -40° to 250°F
- Pioneer 4000 Series interchange

Steel parts are zinc and gold dichromate plated for corrosion protection. Critical parts are induction hardened for long life. Dependable ball locking mechanism holds mating halves together and provides swivel feature. Buna N body seal. Rated pressure (PSI); 1/4" couplers: 4000; 3/8" and 1/2" couplers: 3000. 1/2" size meets ISO #5675 standards.

No. 2F771

No. 2F781

## FD45 SERIES INDUSTRIAL INTERCHANGE COUPLERS

- Interchanges with Parker 60 Series and Hansen HK Series
- Operating temperature range: -40° to 250°F
- Maximum working pressure for 1/4" couplers: 5000 PSI
- Maximum working pressure for 3/8", 1/2", 3/4" and 1" couplers: 4000 PSI

**Valve in both body and nipple halves** prevents fluid loss when disconnected. Captive valve seal ensures "bubble tight" poppet sealing. 360° metal to metal valve stop maintains valve alignment and guarantees poppet opens fully.

**Couplers machined from solid steel bar stock** for maximum resistance to hydraulic and mechanical shock. Zinc plated for corrosion resistance. Durable ball locking mechanism for reliable connections. Ball bearings distribute load and permit excellent swiveling action to reduce torque and prolong hose life.

**Buna N seals.** Flow rate is 3 GPM for 1/4" couplings, 6 GPM for 3/8", 12 GPM for 1/2", 28 GPM for 3/4" and 50 GPM for 1" units. Industry interchangeable with most major brand couplings.

## 5600 SERIES/INDUSTRIAL INTERCHANGE (SERIES A) COUPLERS

- Body and nipples are interchangeable with Parker 6600 series
- Double shutoff design for hydraulic applications where frequent connections and disconnections are required
- For use with dump trucks, snow plows, refuse hauling, mining, asphalt paving, and truck trailer connections
- 5000 PSI max. Working pressure on 1/8, 1/4: 4000 PSI max. working pressure on 3/8, 1/2, 3/4, 1

**Positive valve stop.** Solid metal perch maintains valve alignment and prevents flow checking. Valves stay fully open during high pressure fluid surges.

**Captive valve seal** assures bubble tight poppet sealing.

**Case hardened sleeves, induction hardened nipples** and zinc plated bar stock steel construction throughout add extra durability to withstand harsh environments.

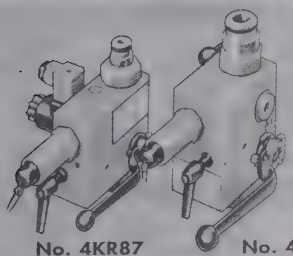
### IF YOU'RE IN A BIND, CALL GRAINGER

If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.



# NPT X JIC TYPE 316 STAINLESS STEEL HOSE ADAPTERS

- Designed in accordance with SAE J514 and military specification
- Use in conjunction with Teflon hose assemblies or where a stainless steel adapter is required
- Forged design for superior strength and vibration resistance
- Excellent chemical resistance
- Corrosion resistant

## NPT X JIC 316 STAINLESS STEEL SPECIFICATIONS AND ORDERING DATA

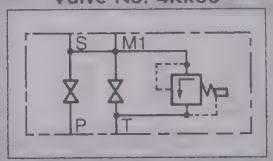
# ACCUMULATOR SAFETY AND SHUT-OFF BLOCKS



No. 4KR87 No. 4KR86

HYDAC

Solenoid-Operated Bleed Valve No. 4KR87

Manually Operated Bleed Valve No. 4KR86

S-Accumulator Connection, P-System Connection, T-Tank Connection, M1-Gauge Connection

**Safety and Shut-off Block** is designed to protect, shut-off and discharge hydraulic accumulators or user units.

**Features:**

- Max. working pressure: 4565 PSI
- Pressure relief valve
- Pressure gauge connection
- Shut-off valve
- Manual bleed valve
- 2-Way solenoid operated bleed valve (electric units only)

In accordance with OSHA requirements for stored hazardous energy, HYDAC recommends the use of its safety and shut-off block (SAB) with solenoid operated bleed valve. Use of the SAB block in your system satisfies OSHA regulation 29 CFR part 1910 for the accumulator

Solenoid-operated bleed valve (open when de-energized) allows automatic release of the accumulator or equipment during emergency or shut-down.

**Fluids:** Mineral oil, hydraulic oil, water-glycol (min. 95/5), non-flammable fluids.
**Temperature:** 14°F to 176°F (-10° to 80°C).

Nos. 4KR86, 4KR89, and 4KR92 with manually operated bleed valve for manual pressure release of the accumulator. Nos. 4KR87, 4KR88, 4KR90, 4KR91, 4KR93, and 4KR94 with solenoid operated bleed valve (open when de-energized), for automatic pressure release of the accumulator.

# BLADDER ACCUMULATORS

**HYDAC bladder accumulators** are used in hydraulic systems to (1) reduce pump size and energy consumption, (2) provide auxiliary hydraulic pressure in case of emergency, (3) provide pressure compensation for system leakage, (4) minimize pump pulsations, and (5) absorb hydraulic shock.

**Construction:** Accumulators include forged shell designed according to ASME Buna N bladder, and valves for gas and fluid. Accumulators are not precharged and must be precharged to desired pressure using dry nitrogen only. See below for charging and gauging kit.

**WARNING: DO NOT PRECHARGE WITH OXYGEN OR AIR. EXPLOSION COULD RESULT.**

**Mounting Position:** Can be installed vertically or at a slant. When installing vertically or at a slant, the fluid port must be at the bottom. The following mounting is preferred for the listed applications:

**Energy storage**—vertical

**Pulsation dampening**—vertical or slant

**Maintaining constant pressure**—any position from horizontal to vertical

**Volume compensation:** vertical to horizontal

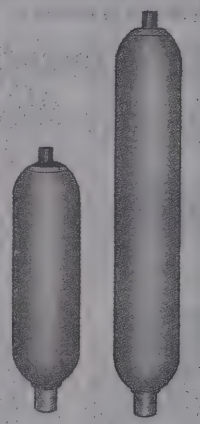
**Maximum Pressure:** 3000 PSI

**Temperature Range:** Mineral oil 5°F to 180°F; water and water-glycol 32°F to 180°F.

**Accessories:** Mounting components and charging and gauging kit available, see listings below.

## REPAIR KITS

Include Buna N bladder, valve seal cap, seal kit, and gas valve core with 7/8-14 UNF valve stem.



## CHARGING AND GAUGING KIT

Includes valve body, check valve, manual bleed valve, relief valve, 0-3600 PSI pressure gauge, 8 ft. charging hose, adapter for nitrogen cylinders, and carrying case. For use with HYDAC bladders only. HYDAC brand (02054186).

**No. 6W653.** Shpg. wt. 8.0 lbs. List.....$240.00.
Each.....**$228.00**

HYDAC

- Reduce wear and increase system performance
- Lower operating and maintenance costs
- Provide fail safe conditions
- Prevent pump, pipe, and system failure

No. 6W624 No. 6W625

No. 6W653

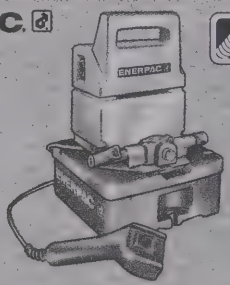
## HAND PUMPS



- Available in single- and two-stage designs
- Feature integral oil reservoir, manually operated pumping unit and external load release valve
- Internal adjustable pressure relief valve factory preset at 10,000 PSI
- For operating single acting cylinders, crimping equipment, and hydraulic presses
- Can be used in horizontal or vertical position with pump head downward
- Nos. 6W461, 6W462, and 3KD31 are constructed of durable glass filled nylon. Encapsulated aluminum pump base
- Two-stage pumps offer higher flow at low pressure and automatically shift to low flow at high pressure
- Units shipped with oil

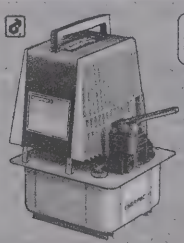
## 1/2 HP ELECTRIC PUMP



For use in fabricating, maintenance, and construction jobs requiring high pressure hydraulic power. Not intended for continuous duty or production.

- 1/2 HP motor operates on standard 115V, 15 amp circuit. Allows accessibility to remote applications or even with long extension cords
- Two-stage, 10,000 PSI pump produces flow of 200 cu. in./min.
- Lightweight—only 22 lbs.
- 3-way, two-position valve for Advance-Hold-Retract of cylinder
- 10 ft. remote pendant operates on 24V for user's safety
- Jog feature allows operator to "inch" cylinders into position
- Durable shroud and 1/2 gallon reservoir constructed of high-impact polyethylene

## 1-HP ELECTRIC PUMP

Ideal for continuous use/production and high flow application. Also used for fabrication, maintenance, and construction jobs requiring high pressure hydraulics power.

- 2-Stage electric pump
- 3-way, 2-position solenoid valve for Advance-Hold-Retract of cylinder
- 10-foot power cord
- Jog feature allows cylinder to be "inched" into position
- 2-gallon hydraulic reservoir

### 1 HP ELECTRIC PUMP SPECIFICATIONS AND ORDERING DATA

| Reservoir Capacity | Oil Displacement 0-500 PSI | Oil Displacement 500-10,000 | HP | Volts | Amps | Fluid Port | dBa | Enerpac Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|

# HIGH FORCE HYDRAULIC TOOLS

## 3/8" HIGH PRESSURE COUPLER

- For use with Enerpac pumps and cylinders at 10,000 PSI
- Includes 3/8" NPT male and female coupler
- Designed for quick-connect/disconnect
- New design improves back flow from cylinder to pump
- Shorter profile length than comparable couplers
- Zinc-coated to resist corrosion
- Interchangeable with similar couplings of same size regardless of valve style, including Pioneer 3000 Series, Enerpac C604 Series, and Safeway S30-3

**No. 3KD30.** High Pressure Coupler. Shpg. wt. 0.9 lbs. List $38.00. Each.....$30.65

SAFEWAY

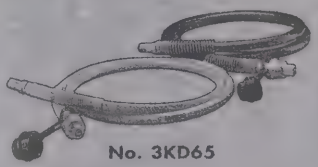
No. 3KD30

## 1/4" HIGH PRESSURE COUPLER

- For use with 6W461 hand pump and 6Z782 cylinder
- Includes 1/4" NPT male and female coupler
- Dust cap for female half only
- Works with Dayton and Lincoln hydraulic repair kits

**No. 3KD28.** High Pressure Coupler. Shpg. wt. 0.3 lbs. List $36.00. Each.....$35.35

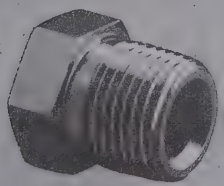
No. 3KD28



## HIGH PRESSURE HOSE ASSEMBLIES

- Designed for use with all Enerpac 10,000 PSI pumps and cylinders
- Hose assemblies include: 3/8" NPT thread on one end, and 3/8" male coupler half on other (except 3KD66 and 3KD64)
- 3KD66 hose can only be used with3KD77 and 3KD78 WalkPac battery-powered pump has 3/8 male couplersat both ends
- 3KD64 has 1/4" (M) NPT fitting; to be used with 3KD28 (coupler), 6Z782 (cylinder) and 6W461 (hand pump)

**HOSE ORDERING DATA**



| Length (Ft.) | Fitting (NPT) (In.) | Stock No. | List | Each | Shpg. Wt. |

YOUR PRODUCT SOLUTION RESOURCE...CALL GRAINGER TODAY!

Grainger will supply you with the dependable, brand name products you need to keep your operation running smoothly-plus the solutions you need to keep your operation running more profitably.

# HIGH FORCE HYDRAULIC TOOLS

All cylinders have chrome plated plungers to resist corrosion and wear. Internal bronze plunger bearings help absorb side loading stresses. Polyurethane rod wiper and seals provide long, leak free operation. Snap-in removable hardened alloy steel saddle handle directs loads without added stress to plunger. Cylinders come with 3/8" female coupler with dust cap (except Nos. 6Z782 and 6Z269, which come with 1/4" coupler).

## [A] SINGLE ACTING RAM CYLINDERS

- **Used for a wide range of general and special applications including hydraulic pressing, clamping, holding, pulling and lifting**
- **Base mounting holes and collar threads for easy fixturing**
- **Mount in any position, spring return plunger**
- **Compact design provides flexible, easy installation**
- **Comes with grooved saddle**

# HIGH FORCE HYDRAULIC TOOLS

## [A] FLAT-JAC® COMPACT MOVING CYLINDERS

- Low retract heights for tight spaces
- Ideal for maintenance and construction applications
- Use to create larger work areas
- Includes internal return spring
- No. 6Z782 comes with 1/4" female coupler and reducer bushing. Remove bushing to use with 3/8" NPTF couplers and hose

## [B] SINGLE ACTING HOLLOW PLUNGER CYLINDERS

- For tooling and tensioning applications
- Can be used as push cylinders from the top or pull cylinders from the bottom
- Hollow piston design allows for rod stock, threaded rod or steel cable to be passed through
- Center hole diameter: No. 6Z269, 3KD54 0.77", No. 6Z270 1.06", No. 6Z271 1.31"
- Comes with smooth saddle

## [C] SINGLE ACTING SPREAD CYLINDERS

- Ideal where a tremendous amount of force is needed to spread open a very narrow space
- Provides smooth, controlled hydraulic spreading force
- Ideal for concrete form removal
- No. 3KD93: Long-stroke spreading application
- No. 3KD94: Small-stroke spreading application

| Capacity in Tons | Stroke | Oil Cap., (Cu. In.) | Spread Width (In.) | Enerpac Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **.75** | 11.50 | 3.91 | 11.5 | WR-15 | **3KD93** | $426.00 | **$409.00** | 25.0 |

## [D] SINGLE ACTING PULL CYLINDER

- Enables heavy steel plates, subassemblies and prefabricated metal modules to be pulled together
- Internal maximum pressure capacity is 8,604 PSI
- Includes 3/8" female coupler

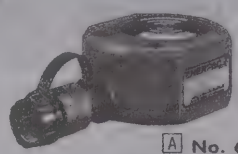
| Capacity in Tons | Stroke | Oil Cap., (Cu. In.) | Internal Pressure at Cap. (PSI) | Enerpac Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **10** | 6.00 | 13.8 | 8,604 | BRP-106C | **3KD41** | $1265.00 | **$1215.00** | 35.0 |

## [E] NEEDLE VALVE

Controls cylinder speed when lowering load for all cylinders. Can also be used for temporary load holding. 3/8" (F)NPT. Enerpac brand (V-82).

No. 6W468. Shpg. wt. 2.1 lbs. List.....$74.00.
Each.....$68.65

## [F] MANUALLY OPERATED CHECK VALVE



For holding applications with all cylinders. Valve is manually opened to allow oil to flow back to reservoir when cylinder retracts. 3/8" (F)NPT inlet. 3/8" (M)NPT outlet. Enerpac brand (V-66).

No. 6W469. Shpg. wt. 2.3 lbs. List.....$163.00
Each.....$149.95

# HIGH FORCE HYDRAULIC TOOLS

## WALKPAC® CORDLESS PUMPS

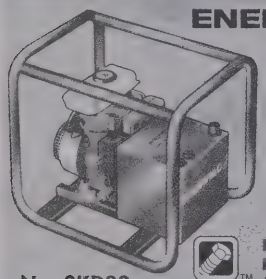
ENERPAC

No. 3KD77

Replacement Parts Available 1-800-323-0620

Combined portability of a hand pump (freedom of movement, cordless operation, lightweight) with power and convenience of an electric pump (one hand operation, reduced operator fatigue) to produce 10,000 PSI. For most intermittent and construction applications. Used with electrical lug crimpers, knock-out punches, nut splitter, spread cylinders, and single acting cylinders up to 25 tons.

- **Ideal for confined or elevated areas such as catwalks or on ladders**
- **Both units come with: 24 Volt Ni-Cad battery, battery charger, shoulder strap, and dust cap**
- **3KD77 has manual release valve**
- **3KD78 has electric valve with 3 ft. remote control**
- **Battery charger operates on 115 Volt and can recharge battery in one hour**
- **Uses 3KD66 hose**
- **Weighs only 19 lbs.**



### CORDLESS PUMP SPECIFICATIONS AND ORDERING DATA

## GAS ENGINE HYDRAULIC PUMP

ENERPAC

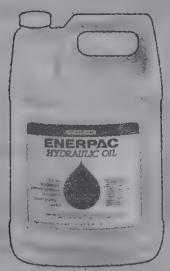
Replacement Parts Available 1-800-323-0620

No. 3KD33

**ENERPAC LIMITED LIFETIME WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Gas engine powered portable pump requires no auxiliary power sources. Works in any weather. For use in remote applications such as construction, rescue and rail yards.



- **2.5 HP Honda engine, recoil start**
- **Three-way, two position valve**
- **Runs up to 2 hours on one tank of fuel**
- **10,000 PSI; by-pass pressure of 2000 PSI**
- **2 gallon oil reservoir**
- **.37 gallon fuel tank (1.4 liters)**
- **For use with single acting hydraulic cylinders**

## PREMIUM HYDRAULIC OIL

ENERPAC

No. 3KD76

**Features:**

- **Recommended for all Enerpac products**
- **Maximum pump volumetric efficiency**
- **Maximum internal heat transfer**
- **Prevents pump cavitation**
- **Anti-rust, foaming and sludge additives improve low temp. flow and stability at high temperatures**
- **High viscosity index**
- **Distinct blue color**
- **Maximum film protective lubricity**
- **Stops oil oxidation**
- **Cleanest hydraulic oil available**

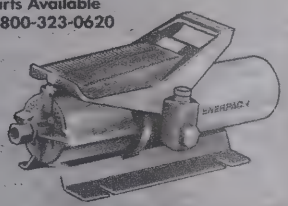
## TURBO® AIR POWERED PUMP



For use in production, maintenance, and construction applications. Turbo® air pump features a unique design in which the exhausting air is used to power the pump. Capable of developing 10,000 PSI with only 80 PSI air. Reservoir capacity is 150 cu.in. with a usable capacity of 127 cu.in. Pump is 13.66L x 6.2W x 8.21"H.

- **Air exhaust muffler reduces noise to 79 dBa, resulting in reduced operator fatigue**
- **Return to tank port for use with remote valve applications**
- **Air and hydraulic inlet filters reduce potential for damage from contamination**
- **Horizontal or vertical operation**
- **Produces operating oil pressure up to 10,000 PSI**
- **Rugged construction and 150 PSI inlet air capability**
- **Large reservoir capacity for system flexibility**
- **Three position treadle enables hand or foot operation and Advance/Hold/Retract of cylinder**

| Operating Air Pressure (PSI) | Air Consumption (CFM) | Air Inlet (NPT) (In.) | Fluid Port (NPT) (In.) | Oil Displacement 0 PSI | Oil Displacement 10,000 PSI | dBa | Enerpac Model | Stock No. | List | Each | Shpg. Wt. |

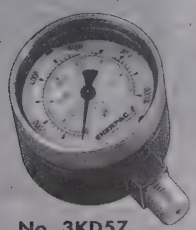
## AIR POWERED PUMP

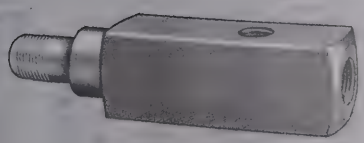
For use in maintenance and light construction applications.

**Swivel coupling** on hydraulic port allows hookup in any position except with oil port pointing downward. Swivel coupling on air intake port permits hose rotation to prevent twisted air line.



**Easy-to-fill reservoir** holds 36.0 cu. in. useable oil to operate single acting cylinders under 25 tons. Hydraulic assist release valve provides quick retraction.

**Internal 3-way valving** holds load if air pressure is turned off. Replaceable air filter protects internal parts from impurities. Pump is 14.69L x 5.62W x 5.71"H.



- **Lightweight and portable pump**
- **Three position treadle enables hand or foot operation and Advance/Hold/Retract of cylinder**
- **10,000 PSI**
- **Carrying handle is built into treadle**
- **Internal air exhaust muffler for quiet operation**

## GAUGES AND GAUGE ADAPTERS

**Enerpac gauges** permit visual reading of the pressures generated by a load to minimize overloading of equipment and ensure proper service, or used to determine the required force for an application. Gauges are precisely calibrated and highly accurate within +/- 2% of full scale. Gauges are calibrated to read in PSI. Glycerin or liquid filled gauges are used in high vibration or tough applications, and feature safety blow-out disk and pressure equalizing membrane. All gauges have bottom connection. Gauge adapters permit fast easy installation of gauges in the line.

### GAUGES

| Scale | Used with Cylinder/Press | Required Gauge Adapter | Gauge Type | Gauge Face Dia. (In.) | Fitting NPT | Enerpac Model | Stock No. | List | Each | Shpg. Wt. |

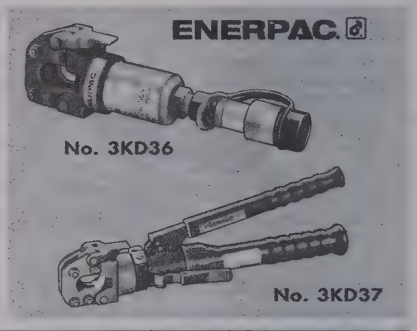
# HIGH FORCE HYDRAULIC TOOLS

## 4-TON HYDRAULIC CUTTING HEADS



**Designed to cut a wide range** of steel wire rope, bar, strand, bolts, cable and chain. No. 3KD36 is designed to work with any Enerpac air, hand, electric, or battery powered pump. Recommended for applications where numerous cuts must be made and productivity is important. No. 3KD36 includes a 3/8" female coupler and carrying bag.

**No. 3KD37 self-contained cutter** is used primarily when the use of power pumps is not feasible. No pump or hoses necessary; makes cutting job easier when in tight or confined work spaces.

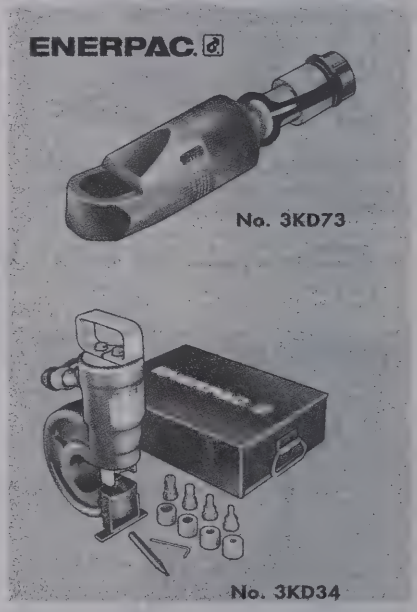
**No. 3KD36.** 4-Ton Self- Contained Hydraulic Cutter Head. Enerpac Model (WHC750). Shpg. wt. 7.0 lbs. List $817.00. Each.....**$799.00**

**No. 3KD37.** 4-Ton Self- Contained Hydraulic Cutter. Enerpac Model (WMC750). Shpg. wt. 8.0 lbs. List $1070.00. Each.....**$1027.00**

**No. 3KD35.** Replacement Blade for 3KD36 and 3KD37. Enerpac Model (WCB750). Shpg. wt. 0.2 lbs. List $85.00. Each.....**$83.50**

### SELECTION CHART (MAXIMUM CUTTING CAPACITIES - INCHES)

| | | | | | Round Bar | | | Wire Strand | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Stock No. | Cap. (Tons) | Cutterhead Operation | Oil Cap. (Cu. In.) | Length (In.) | Steel Wire Rope 6X7 6X12, 6X19 Hempcore or IWRC | Copper Wire or Bar | Aluminum Wire or Bar | Soft Steel Bolts | Bare Copper Wire Strands | Bare Aluminum Wire Strands | ACSR | Guy Steel Wire Strands 1X7, 1X19 |
| 3KD36 | 4 | Single Acting | 1.2 | 5.00 | .69 | .69 | .69 | .69 | .75 | .75 | .75 | .63 |
| 3KD37 | 4 | — | — | 15.00 | .75 | .69 | .69 | .69 | .75 | .75 | .75 | .56 |



CAUTION: Unit is not designed to cut telephone cable, lead sheated cable, or underground cable. Any attempt to do so my result in personal injury or damage to the unit and will void warranty.

## HYDRAULIC NUT SPLITTER

- **Used to split all grades of hex nuts up to HRc-44 hardness**
- **No grinding, sawing or flame cutting**
- **Single acting, spring return cylinder**
- **Used with hand, air, electric, or battery powered pumps**
- **Includes one spare blade, spare set of screws and wrenches to secure blade, and 3/8" female quick coupler**
- **5 ton capacity**
- **Bolt range (In.): .31 to .50**
- **Hex nut range (In.): .50 to .75**

**No. 3KD73.** 5-Ton Nut Splitter. Enerpac Model (NC1319). Shpg. wt. 3.0 lbs. List $435.00. Each.....**$419.00**

**No. 3KD74.** Replacement Blade. Enerpac Model (NCB1319). Shpg. wt. 1.0 lbs. List $64.00. Each.....**$63.00**

## 35-TON HYDRAULIC PUNCH

Designed to punch burr free holes in mild steel up to 1/2" thick. Faster than drilling and cleaner than torches. Punch includes bench mount bracket, metal storage case, die changeover tools, and 3/8" coupler. Works with hand, air, electric, and battery powered pumps.

- **Spring return cylinder**
- **Punch and Die sets sold separately**
- **Punch and Die sets range from 1/4" up to 3/4" bolt size**

**No. 3KD34.** Enerpac Model (SP35). Shpg. wt. 47.0 lbs. List $1708.00. Each.....**$1640.00**

Note: Maximum allowable material thickness to be punched varies with die set wear. Chart above is for reference only. (**) Material thickness should not exceed hole diameter.

# GUIDE TO AIR COMPRESSOR SELECTION

**Satisfaction with an air compressor** comes with the unit producing the right amount of air at the needed force. CHOOSING BY HORSEPOWER ALONE does not give all the information needed. You must consider your demand in the amount of air (volume--CFM, cubic feet per minute) and force of air (pressure--PSI, pounds per square inch). Duty Cycles let you know how often the compressor can run, and Pump Life will let you know how long it will last.

To help in selecting the best compressor to fit your requirements, several key terms are explained below. You will find these terms used in most of the air compressor listings.

**PEAK/DEVELOPED MOTOR HORSEPOWER. This rating is commonly the industry's advertised HP of smaller single stage air compressors.** This rating is determined by the motor's output power when a maximum load is applied prior to an abrupt drop in speed and torque. Sometimes also referred to as breakdown torque.

**Note:** Compressor with a peak/developed HP rating may not operate at or near its peak/developed HP, but rather its running HP.

**RUNNING HP.** The motor's output power needed to run the compressor pump to deliver air at a rated pressure and flow.

**FREE AIR.** The **actual** volume/CFM of air produced by the compressor pump at rated pressure(s).

**DUTY CYCLE.** The percentage of time in an hour that the pump should be allowed to actually run. If the compressor has a 50/50 duty cycle, and is going to run in a 10 minute cycle, it should be run for **a combined maximum** of 5 minutes ON and 5 minutes OFF. The higher the duty cycle, the greater amount of time the pump can operate within one hour.

**PUMP LIFE.** Generally, other components within the pump outlast the pump bearings. The B-10 rating is a calculated pump bearing life. Meaning that, on average, 90% of the bearings in a test group would continue to operate beyond the rated life. **Note:** Individual compressor pump life will vary depending on duty cycle, ambient temperature, maintenance performed, and air intake quality.

In sizing a compressor, the following factors need to be considered:

- **Power Source**
- **Air Flow (CFM)**
- **Tank Size**
- **Duty Cycle**
- **Pressure (PSI)**

**Power Source (Electrical/Gas):**

What electrical power is available to run the compressor? The most common electrical outlet is rated 115 Volt, 15 Amp. If portability is a concern, then select a compressor rated to operate at 115 Volts, 15 amps or less.

If available, 230 Volts will allow the selection of higher HP, which supplies greater CFM output, but 230 Volt outlets are not as common as 115 Volt. Three phase compressors and larger single phase compressors, such as 5 HP two stage units, require magnetic motor starters and are usually permanently wired.

If electrical power is not always available, gas engine driven units are the alternative.

**Cubic Feet Per Minute (CFM):**

The next critical factor is CFM output of the pump. Users commonly size compressors based on their HP rating. **A compressor needs to be sized by CFM, not HP. Your tools or equipment run off the CFM and Pressure (PSI).** A larger HP motor/engine allows the pump to run at faster speeds or larger displacement to produce more CFM at a rated pressure.

It is always better to **oversize a reciprocating compressor** than to undersize. As a rule of thumb, to size a compressor, determine the total CFM being consumed, with additional future expansion in mind, and multiply by 1.5. This will provide approximately a 50% duty cycle.

Undersizing an air compressor will cause the pump to exceed its rated duty cycle and will shorten the life of the pump. Continuous run compressors, such as gasoline engine powered compressors, should also be sized as above. Even though they run continuously, they are not always under a load.

**Example:**

Total air required is 5 CFM. 5 x 1.5 = 7.5

This means that a compressor must produce a **minimum** of 7.5 CFM at maximum rated pressure to operate properly.

**Tank Size:**

The proper tank size has already been engineered on each compressor in the catalog. If a system is being put together, units in the catalog would be a good reference in selecting the proper tank to motor/pump combination.

**Duty Cycle:**

Another consideration is the duty cycle of tools or equipment being used. Impacts or nail guns are generally used intermittently, and only consume small amounts of air over a long period of time. Sanders and grinders run continuously and consume a large amount of air over a long period of time. For continuous use tools, it may be better to step up to a larger CFM producing compressor.

**PSI:**

The PSI is determined by the tools or equipment that the compressor is running. It is important that the compressor maintains pressures that are higher than what is required. If your tool/equipment requires 90 PSI, then a single stage compressor that operates between 95-125/135 will work, assuming that the compressor also produces enough CFM to operate the tool/equipment. If the tool/equipment runs at 120 PSI, then a single stage unit that is turning on at 95 will not be able to produce the proper pressure needed to run the tool. This would require a two stage unit that runs between 145-175 PSI.

## VACUUM SYSTEM ACCESSORIES/VACUUM PUMP SYSTEM TERMINOLOGY

**Exhaust Muffler.** Installed at the discharge side of the vacuum pump to reduce exhaust noise and trap any particles that may be discharged by the pump.

**Intake Filter.** Installed at the intake to the vacuum pump to prevent potentially damaging foreign particles from entering the pump, such as dust, dirt or liquids.

**Vacuum Gauge.** Used to measure vacuum levels. Normally designed to read 0 to 30 in. Hg.

**Vacuum Relief Valve.** Used to vent a vacuum system at a predetermined level. Normally used in continuous operations to keep pump working at desired vacuum levels. Helps to extend life of the pump by preventing pump from operating at higher than necessary vacuum levels.

**Absolute Pressure**—In vacuum systems, the pressure above a perfect vacuum.

**Gauge Pressure**—In vacuum systems, the difference between pressure in an evacuated system and atmospheric pressure.

**Vacuum**—A space containing air at pressure below atmosphere (O PSI Gauge), usually expressed in the following measurements:

**In. Hg-Inches of Mercury**—0 in. Hg represents atmospheric pressure; 29.92126 in. Hg gauge represents perfect vacuum. The higher the number of inches Hg the higher the vacuum.

**mm Hg—Millimeter of Mercury**—760 mm Hg absolute represents atmospheric pressure; 0 mm Hg absolute represents perfect vacuum. The lower the number of mm Hg, the higher the vacuum.

**Microns**—Equal to 0.001 mm Hg. Used to express very high vacuum levels. Examples: 25 microns=0.025 mm Hg=29.9209 in. Hg; 1.0 micron=0.001 mm Hg=29.9212 in. Hg. (in mercury).

**Vacuum Pump Types**—There are three basic pump types:

**Diaphragm**—Consists of a diaphragm that is flexed back and forth by a shaft, creating a pistonlike motion inside a housing.

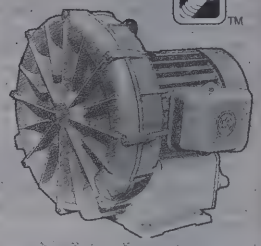
**Piston**—Consists of one or more pistons reciprocating inside one or more cylinders. Similar in operation to a piston compressor, except that air is discharged to atmosphere.

**Rotary Vane**—Consists of a rotor with sliding vanes rotating inside a housing. The rotating vanes trap the air and "sweep" it from intake to exhaust, generating a vacuum.

**Torr**—Unit of pressure (vacuum) equal to 1mm of mercury

# FUJI REGENERATIVE BLOWERS

**Fuji regenerative blowers (ring compressors) are designed to generate pressure** or vacuum through the rotation of a unique, single-stage impeller. Air enters through an inlet port and is picked up between the vanes of an impeller. As the impeller is rotated, air is bounced in and out between the base of the impeller and the outer casing. The cycle of air bouncing in and out of the casing to the rotating impeller vanes, accelerates and compresses, or regenerates the air until the air reaches the outlet port.



**Impeller, mounting base and housing are constructed of aluminum alloy** (No. 5Z189, 5F243, and 5F651 have cast iron housing) for maximum strength, reduced weight and increased corrosion resistance. No. 5F241 is constructed of polyethylene plastics. Dustproof shaft seal protects bearings from contaminated air and foreign particles. Dynamically balanced to virtually eliminate vibration while increasing overall reliability. Class B NEMA insulation.

**Blower and TEFC motor are built as single unit** with no gears, belts, motor bushings or sliding vanes. Single-phase motors have automatic reset thermal protection; three-phase motors have pilot duty thermal protection. For use with air and noncombustible, noncorrosive, nonexplosive gases. Maximum ambient temperature: 104°F.

- Continuous duty
- Pressure or vacuum operated
- Air flow without pulsation
- Oil-free air
- Low noise levels
- For use as original equipment or for upgraded performance

FUJI

LR48762 E54355

**Performance ratings shown below are rated with motor run at 60 Hz. If 50 Hz is used deduct 1/5 from rating. Minimum CFM ratings are at continuous flow. Conversions: to PSI = (inches of water x 0.036). To inches Hg = (Inches of water x 0.074).**

## [A] VACUUM AND PRESSURE RELIEF VALVES

- **Protect regenerative blowers (ring compressors) from overheating**
- **Relief valves for either vacuum or pressure (deadhead) conditions**
- **Field adjustable for use with other manufacturer's regenerative blowers (ring compressors)**

**Vacuum and pressure relief valves** are preset at minimum air flow or maximum pressure/vacuum level for Fuji regenerative blowers. Field adjustable for Gast, Rotron, Siemens, and Spencer regenerative blowers (see Fuji Regenerative Blower Cross-Reference listed on facing page).

| Valve Type | Preset Limit In. / Water (In.) | For Regen. Blower Stock No. | Connection (In.) | Fuji Model | Stock No. | List | Each | Shpg. Wt. |

(*) 2 required for 5F243.

## [B] INLET FILTERS WITH REPLACEABLE COVERS

- **Filter particles from inlet air to protect regenerative blowers**
- **Can be used with other manufacturer's regenerative blowers**

**Inlet filters** are specifically designed to protect regenerative blowers (ring compressors) by filtering damaging particles from inlet air. Filters have perforated outer cylinders. Inner cylinder is wrapped with fine (0.009") mesh screen.

**Replaceable filter covers** are made of 7/8" thick, 100% polyester filter media. Provide 80% efficiency to 5 microns. Can also be used with Gast, Rotron, Siemens, and Spencer regenerative blowers (see Fuji Regenerative Blower Cross-Reference listed on facing page).

### INLET FILTERS WITH COVERS

| 5F244 | C-89 | **5F245** | 21.76 | **20.62** | 0.3 |

## [C] MUFFLERS

- **Specifically designed for quieting regenerative blowers operating for pressure or vacuum**
- **One muffler will lower sound level (at 1 meter) by 5 dBa**

**Mufflers** for use in environments where noise level reduction is desired or required to comply with specified or regulated noise levels. Mufflers will reduce noise levels by 5 dBa; a 3 dBa reduction lowers noise levels by 50%. Can be used on inlet and/or outlet side and/or in the pressure relief valve circuit.

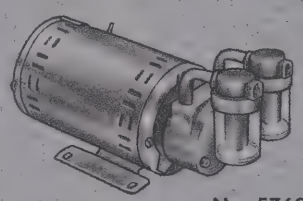
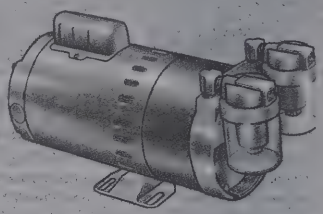
# ROTARY VANE VACUUM PUMPS AND VACUUM/PRESSURE RELIEF VALVES

- **Oil-less design prevents downstream oil contamination problems, allows mounting in non-regular maintenance areas, and provides long life**
- **Self-adjusting, self-lubricating vanes for maximum efficiency and sustained pump capacity throughout service life**
- **Cast iron pump housing provides strength and durability as well as an optimum running surface for vanes**
- **Permanently lubricated and sealed bearings provide long, service-free life**
- **All models include intake and exhaust filters. For use as a compressor; units are easily converted by removing discharge filter**



**Rotary vane compressors and vacuum pumps** for continuous duty in general vacuum and low pressure applications such as aeration, vacuum frames, packaging equipment, printing presses, air sampling, and graphic arts. **Time proven rotary pump design** with integral motor combine to provide a high efficiency pneumatic or vacuum supply in a compact unit. Precision machined surfaces provide close tolerance alignment of moving parts for high quality products with maximum performance and long life.

**Open dripproof, ball bearing motors** with automatic reset thermal protection. Ambient temperature range: 35° to 95°F. Gray finish.



**NOTE:** Units may not fit your applications as is. Additional plumbing or mounting alterations may be required.

# VACUUM/PRESSURE RELIEF VALVES

control devices inc.

- **Relieve vacuum from 0-30" Hg., pressure to 20 PSI**
- **Easily convert from vacuum to pressure relief by reversing poppet and spring**

Compatible with rotary vane, diaphragm, and piston pumps to 3 HP. To size, match maximum air flow of vacuum pump/compressor to maximum flow capacity of relief valve. Brass body with zinc plated wire spring. Poppet on Stock No. 5Z763 is chrome steel ball; Nos. 5Z764 and 5Z765 have nylon poppet with nitrile seal.

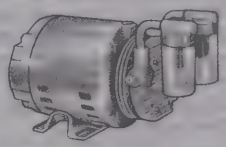
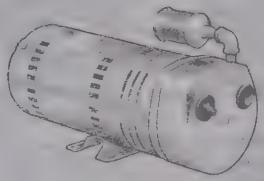
# ROTARY VANE VACUUM PUMPS

- For general vacuum requirements up to 27" Hg (mercury) continuous
- Handle low pressure requirements up to 10 PSI
- Vacuum units can be easily converted to compressor operation by removing the discharge muffler assembly
- Oil-less design produces oil-free air, eliminates oil vapor carryover, allows use in remote applications where maintenance is difficult
- Self-sealing, compound carbon vanes self-adjust as they wear to maintain pump efficiency
- Used in packaging equipment, graphic arts equipment, laboratories, photo and food processing

**Nos. 4F740, 4F741, 4F742, 4TF21, and 4TF42** have internal filters and mufflers to reduce operating noise. Have international multivoltage, dual frequency motors.



**Nos. 5Z667, 4Z334, 4F740, 4F741, 4F742, 4TF21, and 4TF22** are compact and lightweight. Single phase motors have thermal overload protection. Motor mounted design minimizes installation requirements. No. 5Z667 has 10 ft. cord with plug and toggle switch. No. 4Z334 has rubber foot supports. CSA Certified (LR39793)



**Nos. 4Z469 and 4Z470** include coupling and integral coupling guard. Mount to NEMA 56C frame motors. Available with or without electric motor. Models with motors (Nos. 7Z778-7Z783) listed below are not CSA Certified. Gray finish. Gast brand.

# MEDIUM VACUUM PUMPS, AND REFRIGERATION VACUUM PUMPS

## R5 SERIES MEDIUM VACUUM PUMPS

**Features:**

- Compact, simple design for easy installation and low maintenance
- Air cooled, requiring no water
- Direct drive, eliminating belts and gears that loosen or wear
- Oil mist eliminator for 99.9% oil-free exhaust
- Quiet operation for placement near the operator

**Includes:**

- TEFC motor for continuous duty
- Motor starter with 208-230V insert included (460V inserts available—call 1-800-323-0620)
- Oil sight glass
- 5 micron inlet filter
- Non-metallic, non-asbestos vanes
- Built-in exhaust filter
- Vibration isolators
- Vacuum oil

**Modular design Busch R5 series rotary vane vacuum pumps** are single stage, oil-flooded, air cooled, and direct driven. Motor, pump, and exhaust separation system is an integral unit.

**These pumps are designed for vacuum applications** between 20" and 29.3" Hg (15 Torr), and are available in 4 sizes ranging from 15 to 63 CFM displacement. Rugged pumps are used extensively in vacuum packaging, vacuum chucking, die casting, vacuum thermoforming, and material handling. UL Recognized Component (E136528), except No. 5Z354. Silver/gray metallic finish.

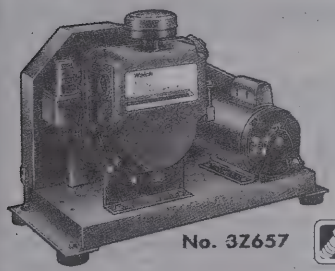
## REFRIGERATION SERVICE VACUUM PUMP

Lightweight, direct-drive, two-stage, portable vacuum pump designed for use in the refrigeration service industry for evacuating refrigeration systems. 3 CFM free air displacement. 25 microns ultimate vacuum. Operating temperature 150°F, ±18°F. Powered by a 1/3 HP, 1725 RPM, 115V, 60 Hz, thermal overload protected, capacitor-start motor. Durable aluminum housing with iron and steel internal parts. Easy-to-fill oil port, oil drain, oil level sight glass and field replaceable vacuum cartridge. Includes rubber feet, 10' cord and On/Off switch. 1/4 and 3/8" SAE male flare inlet connections. 13 1/8L x 5 3/4W x 9 1/2"H.



**No. 5Z354.** Shpg. wt. 67.0 lbs. List $2034.14. Each ..... **$1949.00**

# HIGH VACUUM PUMPS

## STANDARD HIGH VACUUM PUMPS

No. 3Z654

No. 3Z657

Welch Vacuum THOMAS

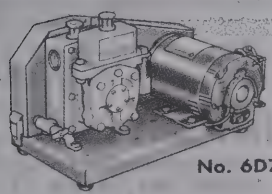
**Applications:**

- Potting
- Neon sign manufacturing
- Degassing
- Vacuum drying
- Rice Porosity Test
- Light bulb and picture tube evacuation
- Freeze drying
- Chamber evacuation

**DUOSEAL®**

Replacement Parts Available 1-800-323-0620

- **Low pump RPM facilitates long service life; pump speed ranges between 400 and 580 RPM**
- **Large oil reservoir dilutes contaminants and minimizes oil changes**
- **High vacuum achieved; ultimate pressure to 1 x $10^{-4}$ Torr (.1 Microns)**
- **Cool running lengthens oil life and minimizes maintenance**
- **Stable pumping efficiency even in low micron range reduces pump down time**
- **Continuous duty with thermally protected motors**



**DUOSEAL® two-stage high vacuum pumps** are rated for low micron Hg vacuum, continuous duty operation. Low pump RPM (400 to 580 RPM) reduces internal wear. Pumps operate 20°F cooler than many high RPM direct-drive pumps. Lower operating temperature reduces maintenance requirements. Built to be rugged with fewer moving parts. All metal internal construction.

Contoured molded belt-guard and base on 3Z655 and 3Z656 uniquely designed for quieter operation and preventing visible oil weeping at seal.Gas ballast inhibits condensation inside pump. Factory wired for 115V operation, Intake filter screens reduce possibility of foreign material entering pump. Belt guard, base, motor with On-Off switch, and 3-wire cord. Blue/gray finish. Oil included.

## HIGH VACUUM PUMPS FOR PUMPING CORROSIVE GASES

No. 6D734

Replacement Parts Available 1-800-323-0620

No. 6D735

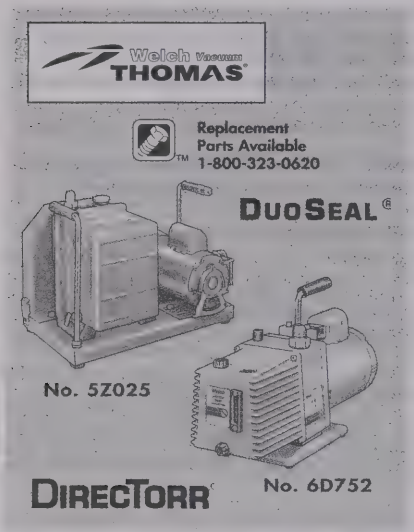
Welch Vacuum THOMAS

**For Pumping Corrosive Gases:**

- HCl • HBr
- Br2 • Cl2
- SOx • Cl2
- HOAC
- CH2O

**CHEMSTAR®**

- **High contamination tolerance; vital parts corrosion resistant**
- **High vacuum achieved; ultimate pressure to 1 x $10^{-4}$ Torr (.1 Microns)**
- **Reduced friction wear due to low pump RPM (400 to 580 RPM)**



**CHEMSTAR® two-stage high vacuum pumps** are used for pumping corrosive gases to pressures below 1 Torr (1 mm of Hg). Vital parts are made of corrosion resistant material. Stainless steel vane springs, valves, pressure tubes, and oil baffle. Oil case is Teflon® lined. Nitrogen purge comes standard and allows degassing and cooling of the pump reducing oil corrosion rate. Gas ballast valve inhibits condensation of vapor.

Contoured molded belt-guard and base on 6D735 and 6D732 uniquely designed for quieter operation and preventing visible oil weeping at seal. Pumps rotate at speeds less than 580 RPM compared with over 1700 RPM of direct-drive vacuum pumps. Factory wired for 115V operation. Intake filter screens to reduce possibility of foreign material entering pump. Each pump includes hose adapter, belt guard, base, motor with On-Off switch, and 3-wire cord, except No. 6D730, where conduit wiring installation is required. Silver finish on pumping module. Oil included.

# COMMERCIAL AND INDUSTRIAL REFRIGERATION SERVICE PUMPS

**Welch® refrigeration service pumps** are designed for removing air and moisture from industrial and commercial chillers. The vacuum pumps are rated for low micron Hg vacuum, continuous duty (except 4Z197 which is for intermittent duty). Belt-drive vacuum pumps are known worldwide for ruggedness and dependability due to their all metal internal construction, low pump RPM, which facilitates long service life, and large oil reservoirs which dilutes contaminants. Direct-drive DirecTorr® vacuum pumps are lightweight for rooftop jobs, with high capacity to get you on and off the job fast. All models feature a gas ballast valve (except 4Z197), that inhibits condensation of water which can lead to corrosion. All models are factory wired for 115V operation with On-Off switch and 3-wire cord. Belt-drive pumps, with blue/gray finish, come complete with base, belt, belt guard and motor; carrying handles supplied with Stock No. 5Z025. Direct-drive pumps have light gray finish, except 4Z197 which is black. Pumps come with oil.

# HIGH VACUUM PUMPS

- **Direct drive; no belts to wear out and replace**
- **Quiet operation**
- **Large sight ports for easy oil level check**
- **Built-in anti-suckback mechanism and gas ballast valve**
- **Modular design and construction makes maintenance easy**
- **Heavy-duty cast aluminum frames and bodies**
- **CE Approved**

Totally enclosed fan-cooled motors are single phase with thermal protection. Include 6 ft. power cord wired to a junction box with switch. Built-in oil filter. Filter cartridge can be changed without dismantling pump. Pressure relief valve keeps oil flowing if filter is clogged. An anti-suckback mechanism keeps the pump isolated from the rest of the system whenever the motor stops. Gas ballast valve prevents vapors from condensing in the pump chamber. Nos. 5Z621 and 5Z622 have a 1/2" hose adapter, and Nos. 5Z623 and 5Z624 have a 1.0" hose adapter.

**Two-stage, high vacuum applications**

- **Degassing**
- **Autoclaving, sterilization**
- **Chamber evacuation**
- **Distillation**
- **Electron beam; melting, welding**
- **Electronic tube and light bulb evacuation**
- **Freezer drying**
- **Leak detectors**
- **Refrigeration and air conditioning evacuation**
- **Thin film applications**
- **Hose adapters available through Grainger Parts Operations**

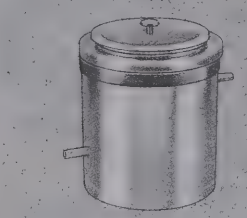
# HIGH VACUUM PUMP ACCESSORIES

Welch Vacuum THOMAS



No. 6D746

## VACUUM HOSE

- Very thick walled hose for high vacuum applications
- Five feet per pkg

### VACUUM HOSE ORDERING DATA

| Use with Vacuum Pump Stock No. | Use Clamp Stock No. | Hose I.D. (In.) | Hose Wall Thickness (In.) | Hose O.D. (In.) | Welch Model | Stock No. | List | Each | Shpg. Wt. |

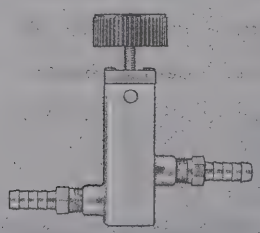
No. 6D743

## DRY ICE COLD TRAP

**Dry ice cold traps** are used between the connecting line and the pump to collect corrosive vapors or large quantities of condensable vapors evolved from vacuum processing. The cold trap condenses out most of the vapors to help prevent damage to the pump mechanism and oil contamination. Dimensions 8¾"H x 10" diameter. Welch brand (1420H-14)

- Removable 3 quart center well for dry ice/alcohol slurry (do not use acetone)
- Visible trapping surface through acrylic cap
- Cold temperature up to 12 hours depending on vapor load
- Accepts 7/16 I.D. vacuum hose

**No. 6D743.** Shpg. wt. 11.0 lbs.
List $559.00. Each..... **$509.50▲**



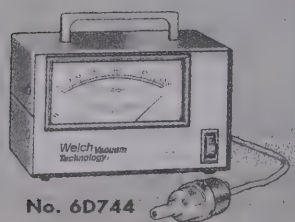
No. 6D750

## ISOLATION VALVE

The Welch Isolation Valve is a safety valve which will protect the vacuum system in the event of a power failure by isolating the vacuum system and venting the vacuum pump. This helps to prevent oil backup into the vacuum system, minimizes the pressure rise in the vacuum system, and makes it easier for the vacuum pump motor to restart. A normally open solenoid is used as the activator. Installation consists of mounting the valve vertically at the pump intake using 13/16" I.D. hose. Dimensions 7 L X 3" diameter. Welch brand (567060).

- Protects vacuum system upon power failure from oil or air in-rush
- Mounts vertically on pump inlet
- Reopens only after intake line is evacuated after power returns
- Operates on 115 V, 60 Hz, 1 Ph

**No. 6D750.** Shpg. wt. 4.0 lbs.
List $266.00. Each..... **$245.25▲**



No. 6D749

## BRASS VACUUM SHUT-OFF VALVE

- Usable to 1 x $10^{-4}$ Torr
- Seals against atmosphere in either direction
- Viton® seal, bronze body and bellows
- Use for forelines in laboratory or industrial service
- Accepts 13/16" I.D. vacuum hose

**No. 6D749.** Shpg. wt. 2.0 lbs.
List $186.00. Each..... **$170.50▲**

No. 6D744

## THERMOCOUPLE VACUUM GAUGE

The Welch single station thermocouple vacuum gauge is self-contained with solid state electronics for rapid response time, long life, and low maintenance. The gauge sensor tube is designed to assure maximum sensitivity over the entire vacuum range. Supplied with permanently attached 6 ft. probe cable, sensor tube, and carrying handle. Sensor tube screws into a 1/8" female NPT hole tapped into metal vacuum line. (Caution: Should not be used to measure the pressure of flammable or explosive gases or vapors.) 7W x 5D x 5.6"H. Wired for 115V, 60Hz, with 5 ft. line cord and plug.

- Portable and lightweight
- Range of 0-5000 millitorr (0-5000 microns Hg)
- 0-10 VDC recorder output

### THERMOCOUPLE VACUUM GAUGE ORDERING DATA

| Description | Welch Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Thermocouple vacuum gauge | 1515 | 6D744 | $554.00 | $509.00▲ | 6.0 |
| Replacement sensor tube | 1515A | 6D745 | 93.00 | 85.50▲ | 0.2 |

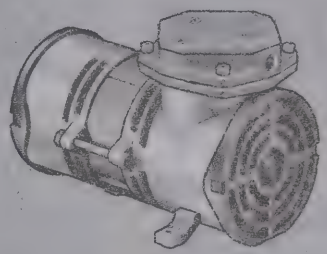
# OIL-LESS DIAPHRAGM AIR COMPRESSOR/VACUUM PUMPS

## DIAPHRAGM COMPRESSOR/VACUUM PUMPS



- **Pressure or vacuum without modification**
- **Extra-quiet operation**
- **12V DC model offers extra mobility**
- **Cast aluminum head, housing and connecting rod**
- **Swedish stainless steel reed-type valves**
- **Inlet and exhaust valve seats cast in head**
- **Compact size**
- **Extra quiet: 55-65 maximum dbA**
- **UL Recognized and CSA Certified (except No. 5Z670)**
- **No. 2Z866 has 1/8 HP shaded pole automatic thermal overload protected motor**
- **No. 4Z024 has 1/3 HP permanent split capacitor motor with automatic thermal overload protection and 6 ft., 3-wire cord with molded 3-prong plug**
- **No. 4Z026 has 12" wire leads and grounding screw**
- **No. 5Z670 has 10" leads and shaded pole motor with automatic thermal overload protection**
- **Nos. 4Z026 and 5Z670 interchangeable with Thomas Industries Series 107**

**Reversible 1/4" (F)NPT inlet and outlet ports.** Permanently lubricated bearings and large diameter motor shaft. Connecting rod is permanently bonded to rod bearing to prevent loosening. Air flow enters and exits at head; no danger of vaporized grease from bearings being picked up and carried into system.

**Oil-less diaphragm compressor and vacuum pumps** are used for continuous duty applications in labs, printing, water aeration, computers, and chemical and photo processing. 1/16 HP models are used for coffee, food, and vending machines, auto analyzers, and office copiers. UL Recognized component (E62533). CSA Certified (LR37697) except No. 5Z670.

Replacement Parts Available 1-800-323-0620

**Construction features:** Single-phase induction motor protected by an auto-reset thermal protector. Lightweight die-cast aluminum parts reduce unnecessary weight. Swedish stainless steel flapper valves provide lasting performance. Balanced eccentrics for low noise and vibration. Bearings are permanently lubricated for maintenance-free life. All units are designed for easy field serviceability. Gray finish.

**Diaphragm units** have long-life diaphragm. For commercial and industrial applications such as agitators, instrumentation, graphic arts, pond/aquarium aeration, business machines, laboratory use, and foam makers, as well as OEM's requiring intermittent and continuous duty operation. 6 ft. grounded power cord on Nos. 4Z791, 4Z792, and 5Z348. 1750 RPM.

**Piston units** have rugged flexible piston cup for high efficiency and constant performance. For aeration, photographic equipment, business machines, packaging equipment, laboratories, paint spraying, air tools, computers, and beverage dispensing, as well as OEM's requiring intermittent and continuous operation. Nos. 5Z350 through 5Z353 and 5Z646 through 5Z648 have 6 ft. grounded power cord. 1750 RPM. No. 5Z349 is 3400 RPM.

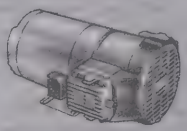
# OIL-LESS PISTON AIR COMPRESSORS/ VACUUM PUMPS

## TASKAIR™ HIGH PRESSURE AIR COMPRESSORS/VACUUM PUMPS

No. 6Z834



No. 5Z677

THOMAS COMPRESSORS & VACUUM PUMPS

Replacement Parts Available 1-800-323-0620

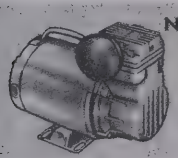
No. 6Z838

No. 6Z841

**Taskair™ reciprocating oil-less air compressors/vacuum pumps** are designed for equipment operating at pressures greater than 15 PSIG or at vacuum levels up to 27.5" Hg.

**Oil-less design** offers oil-less air delivery, versatility in mounting location, and minimal maintenance. High strength, low lift stainless steel valves and permanently lubricated, sealed bearings. Teflon piston rings and skirts reduce piston friction and effectively seal for optimum volumetric efficiency. Cast-iron cylinders provide optimum running surface for piston rings and skirts. 1/4" (F)NPT outlet; No. 6Z841 has 3/8" (F)NPT outlet.

**Nos. 5Z677 and 5Z678** feature a 12V DC high torque, totally enclosed nonventilated motor design which incorporates fused commutators, Class H insulation.



**Come with fifty-micron inlet air filters.** 35° to 95°F ambient temperature range. Safety relief valve set at 15 PSI above maximum pressure ratings and comes standard on 1/2 to 1½ HP models. Powered by 1725 RPM, open, dripproof, thermally protected, ball bearing motor. Gray enamel finish. UL Listed (MP2825) and CSA Certified (LR22977). Thomas brand.

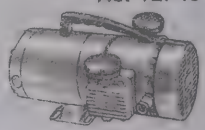
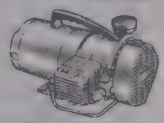
## GH SERIES HIGH FLOW AIR COMPRESSORS/VACUUM PUMPS



No. 4Z436



Replacement Parts Available 1-800-323-0620

THOMAS COMPRESSORS & VACUUM PUMPS

No. 1Z748

No. 5Z680

**GH series reciprocating oil-less air compressors/vacuum pumps** are used with precision air tools by machinists in aeration; vacuum—clamps, presses, and frames. Also used in laboratory and packaging equipment.

All, except Nos. 4Z436 and 5Z679 incorporate a patented, pressure-tight finned chamber in body that discharges cooled air in a steady, even flow. Chamber acts as an aftercooler, smoothing out air pulsations to aid quiet operation. Also allows for direct coupling of pressure switch to eliminate need for air tank.

**Heavy-duty two-stage piston compressors** are cast iron and aluminum for long life and reliable performance in a lightweight compact configuration. Compressors incorporate a patented, pressure-tight finned chamber in the body that discharges cooled air in a steady even flow.

**Powered by 1725 RPM, capacitor-start, high torque motor** with ball bearings and automatic reset thermal protection. Heavy duty pistons, ultra-smooth cast-iron cylinder sleeves and low-lift reed valves. Bearings are grease packed, sealed for life. Gray finish. 1/4" (F)NPT outlet. UL Listed (MP2825) and CSA Certified (LR22977). Thomas brand.

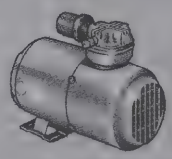
AIR COMPRESSORS

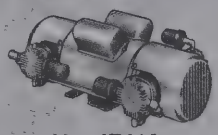
# OIL-LESS PISTON AIR COMPRESSORS AND AIR COMPRESSOR/VACUUM PUMP

## PISTON AIR COMPRESSORS

- **Exclusive lap-joint Teflon piston ring design ensures rated flow throughout service life of pump**
- **Thermally protected motors with high torque start windings maximize pump life**
- **Oil-free system delivers uncontaminated air, helps air compressor stay clean and service-free**
- **Aluminum cylinders, cylinder heads, and pistons resist corrosion for longer life**
- **Corrosion resistant valve design helps maintain pump efficiency and ensures uninterrupted performance**
- **Changeable eccentrics allow stroke length to be changed: make a pump to best suit your application**



**Gast oil-less air compressors** are used in painting, laboratory, water aeration, computer, photographic, and chemical processing applications.



**Stainless steel seals** prevent joint leakage from behind and below the piston rings. Large piston skirt ring of filled Teflon for low friction coefficient between piston and cylinder. Corrosion resistant sandwich valve stops foreign particles from lodging on valve seats. CSA Certified (LR37697). UL Listed except Nos. 4Z706, 4Z707, 4Z460, and 5Z668. Gray finish.

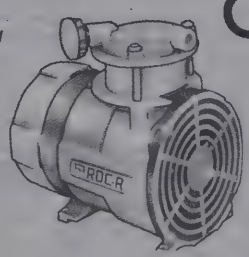
## PISTON COMPRESSOR/VACUUM PUMP



- **Pressure to 100 PSI**
- **Vacuum to 27" Hg**
- **Durable Teflon cups**
- **Bonded piston rod and bearing assembly**
- **Hard coated aluminum cylinder**

**Oil-less compressor/vacuum pump** combines diaphragm pump quietness and durability with piston pump performance. Used for continuous duty applications in laboratories, and food industry where oil-mist contamination is undesirable.

**Sound level** is 63 dbA at 60 PSI. Has shaded pole motor with automatic thermal protection and 6-ft., 3-wire cord and plug assembly. UL Recognized (E62533). CSA Certified (LR37697). Gray finish.

**High Volumes.** If the application requires an instantaneous blast of high pressure, then the reservoir provided by a tank system is essential. Even the largest pumps have to start at atmospheric pressure and therefore will not be able to provide an instantaneous blast pressure.

**Longer Pump Life.** A tank system makes it possible to install two pumps on one tank. Adding a pressure switch and alternator control to run the pump(s) only when needed lets pumps cool down and rest between cycles, prolonging operating life.

**Cost Savings.** A tank system can reduce initial, maintenance, and replacement costs, depending on application.

**Quiet Operation.** In a tank system the pump runs on demand, so it is not operating part of the time. When it is not operating, there is no operating noise.

**Pulse-Free.** Pulse-free air is required by many pneumatic systems for proper operation of components. A tank dampens pulsation from the reciprocating compressor.

**Central System.** Small industrial shops where different tools are required at different times find tank systems particularly useful, since one tank system can supply air to multiple locations.

## 1/8 & 1/6 HP COMPRESSORS

- **Used for beverage dispensing, laboratories, portable displays, commercial door actuation, and for portable off-site use**
- **Include pressure switch, manual drain, pressure safety valve (ASME), pressure gauge, and globe valve**

## 1/3 TO 1½ HP COMPRESSORS

- **Applications include cylinder actuation, pneumatic temperature control, photo processing, spray painting, pneumatic logic, small to medium shops, and auto service stations**
- **Include: ASME coded tank, pressure switch, manual drain, pressure safety valve (ASME), pressure gauge, and globe valve**
- **No. 5Z676 has magnetic starter**

**Tank systems are best suited** for situations that require pulse free air on demand. While the tank stores air for later use, it dampens the pulsations generated by a reciprocating compressor.

**All models** incorporate either a Gast diaphragm or piston compressor pump (listed on page 2859 & 2860). Pressure switch unloading: 70 PSI-On/90 PSI-Off. No. 5Z671 has 30 PSI-On/50 PSI-Off. Gray finish.

# OIL-LESS AIR COMPRESSORS

## LIGHT-DUTY OIL-LESS AIR COMPRESSORS

**Oil-free Air Compressors** are simple and reliable. Ideal for home shop use. Oil-less air compressors are light weight, start easily in cold temperatures, can operate at any angle, and are virtually maintenance free. All models on this page are UL/CUL Listed.

**No. 3JR69**

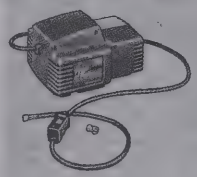
- Tankless design with built in regulator.
- Maximum pressure: 125 PSI
- Unit weighs only 12 lbs.
- 115 volt universal motor starts easily under low voltage conditions
- Includes 25' air hose and tire chuck

**No. 3JR70**

- 2.5 gallon hotdog style tank
- Unit weighs only 25 lbs.
- 115 volt universal motor for improved start under low voltage conditions

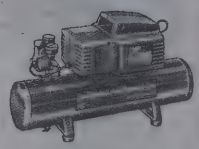
**No. 3JR71**

- 20 gallon horizontal portable tank for optimum mobility
- 5 HP NEMA rated motor operates on 120/230V standard household electric current
- Includes regulator, gauges, 1/4" (M)NPT outlets, and ASME safety valve



**No. 4UP72**

- Vertical/Portable tank design saves floor space and maintains portability
- 5 HP NEMA rated motor operates on 120V standard household electric current
- Includes regulator, gauges, 1/4" (M)NPT outlets, and ASME safety valve



**No. 3JR72**

- 30 gallon ASME code tank
- Twin cylinder, V-block, oil free design for high air flow and smooth operation
- 6HP NEMA motor operates on 240V current
- Includes regulator, gauges, 1/4" (M)NPT outlet, and ASME safety valve

## HEAVY-DUTY OIL-LESS SPEEDAIRE AIR COMPRESSORS

Speedaire heavy-duty oil-less air compressors offer long life, quiet operation, high air flow, and low maintenance.

- 1725 pump RPM for cooler temperatures and longer life
- 2-cylinder, V-block, oil-free design for higher output and smooth operation
- 135 psi maximum/110 psi restart provides greater air supply for extended operation of air tools
- Rated for 65/35 higher-than-standard duty cycle
- 20-gallon ASME code tank
- 3.5 HP NEMA rated motor is equipped with automatic thermal overload protection which prevents motor damage
- Stainless steel valves, anodized cylinder coatings, Teflon piston ring, and large ball bearings ensure reliability
- Includes regulator, gauges, 1/4" (M)NPT outlets and ASME safety valve

**No. 4UP73**

- 10 X 3" pneumatic wheels for improved manueverability on uneven surfaces

**No. 4UP74**

- Vertical/Portable tank design saves floor space and maintains portability

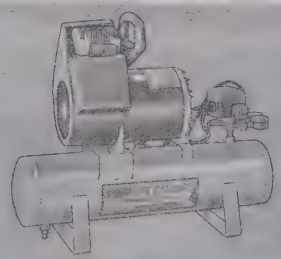
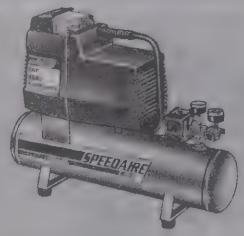
# CONTRACTOR AIR COMPRESSORS



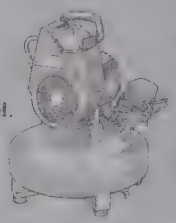
**SPEEDAIRE®**

**Speedaire direct-drive, oil-less air** compressors are designed to provide power, durability, and portability for job site needs.



- **Permanently lubricated/oil-less design allows units to operate at virtually any angle; no oil to spill or starve pick-up**
- **Lightweight and compact for easy carrying, pulling, or maneuvering**
- **Direct drive design eliminates belts and pulleys as well as messy oil refills or spills**
- **Durable, metal housed 4-port regulator and gauge with auto pressure setting**
- **50/50 duty cycle**
- **6 Foot power cord**
- **1/4" (F)NPT outlet**

**Speedaire Model 4B222** belt-driven, oil lubricated air compressor is ideal for commercial and residential construction; operates nailers and pneumatic tools.



- **Cast-iron, two cylinder air compressor pump offers greater durability and longer life**
- **Belt drive design provides smooth, quieter operation**
- **Low center of gravity wheelbarrow design for easy job site maneuvering**
- **Metal wire beltguard for safe operation**
- **50/50 Duty cycle**
- **6 Foot power cord**
- **1/4" (F)NPT outlet**

- Air-Pac® compressors are designed for contractors, are lightweight, come with a sturdy handle, and have a low center of gravity for exceptional stability
- PERMA-LUBE DESIGN provides low maintenance and long life
- N-CLINE DESIGN allows any angle operation
- CIRCUIT SAVER—units draw less than 15 amps, helping to prevent breaker trips
- COLD WEATHER STARTS—units start and run in all types of weather
- EXTENSION CORD-OK—units can be operated on extension cords (Maximum recommended lengths: 14 ga., 50 ft.; 12 ga., 100 ft.; 10 ga., 150 ft.)
- Heavy-Duty aluminum compressor components provide long life and eliminate unnecessary weight
- All units include regulator, tank, and outlet pressure gauge (except No. 5Z683)
- All compressors incorporate a high efficiency, thermally protected induction motor
- Balanced eccentrics provide smooth, low vibration operation and reduce noise level
- UL Listed pressure switch turns unit On at 100 PSI and Off at 125 PSI
- 140 PSI ASME safety valve
- Solid brass fittings
- User-friendly tank drain
- Black/red finish

## PORTABLE TANK DOLLY

- Provides 6 gallons of additional high-pressure air storage
- Compact design consumes a small amount of space
- Sturdy two wheel dolly with wide rubber wheels increases maneuverability
- Accepts all Thomas brand pancake, wide-tank and stack-tank models
- Versatile design permits mounting of a variety of compressors
- Includes storage for hoses and cords
- Easy and fast assembly

THOMAS COMPRESSORS & VACUUM PUMPS

ULTRA AIR-PAC

**No. 5Z685.** Shpg. wt. 70.0 lbs. List $210.00. Each..... **$208.00▲**

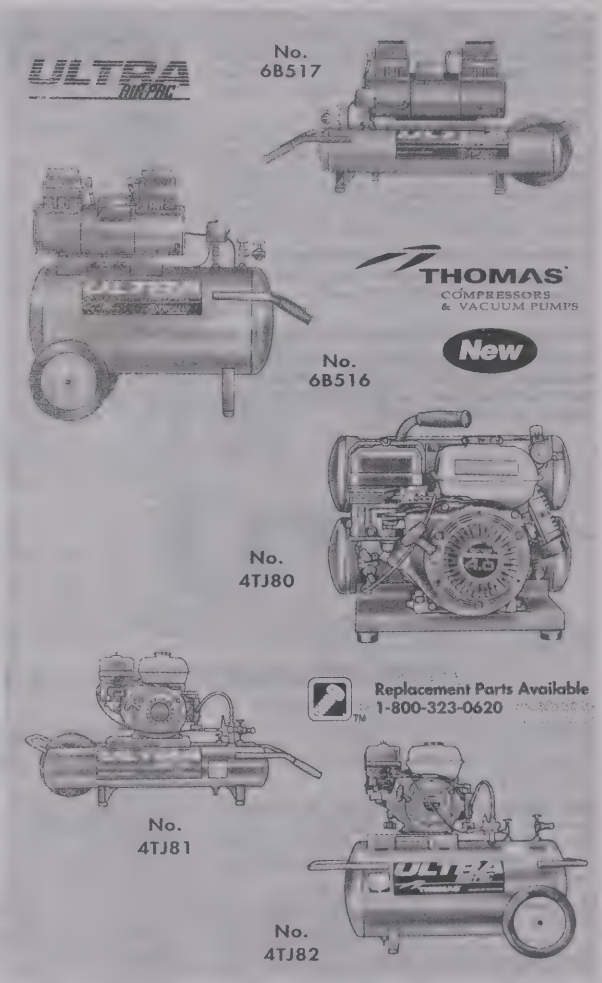
*Dedicated operations or on the job site — these compressors pack the power.*

# CONTRACTOR AIR COMPRESSORS

## THOMAS ULTRA AIR-PAC CONTRACTOR COMPRESSORS

**Air-Pac electric compressors are designed for contractors, are lightweight, come with a sturdy handle, and have a low center of gravity for exceptional stability**

### ELECTRIC POWERED AIR COMPRESSORS



- PERMA-LUBE DESIGN provides low maintenance and long life
- N-CLINE DESIGN allows any angle operation
- COLD WEATHER STARTS-units start and run in all types of weather
- EXTENSION CORDS-OK-units can be operated on extension cords (Maximum recommended lengths: 14 ga., 50 ft.; 12 ga., 100 ft.; 10 ga., 150 ft.)
- Heavy-duty aluminum compressor components provide long life and eliminate unnecessary weight
- Balanced eccentrics provide smooth operation and reduce noise level
- High efficiency, thermally protected induction motor
- UL Listed pressure switch turns unit On at 100 PSI, Off at 125 PSI
- 140 PSI safety valve
- Wheelbarrow and barrel tank configurations provide easy maneuverability and large capacity high-pressure air storage
- All units include regulator, tank and outlet pressure gauge
- Solid brass fittings
- User friendly tank drain
- Black/red finish

### GAS-POWERED AIR COMPRESSORS

- PERMA-LUBE DESIGN provides low maintenance, long life
- Integral compressor / engine design—no belts, pulleys, or guards to get damaged or replace
- Balanced eccentrics and integral mounting provide optimum balance for smooth operation
- High output compressors allow multiple tool operation
- Lightweight compact design allows easier movement on site and is less vulnerable to damage
- All units include regulator, tank, and outlet pressure gauge
- Automatic continuous run unloader valve—Unloads at 135 psi —Loads at 115 psi
- 4.0 HP has single cylinder compressor
- 5.5 HP units have twin cylinder compressor
- Solid brass fittings
- User friendly tank drain
- Black/red finish

### HONDA ENGINE COMPRESSOR

- High performance overhead valve design for added power and high efficiency
- Cast iron cylinder sleeve extends engine life
- Low oil shut down
- Large gas tank for increased fuel capacity and longer run time
- Electronic ignition
- Heavy-duty bearings
- Large muffler for quiet operation
- Easy start operation
- Two-Stage air cleaner
- Fuel shut-off valve
- Two-year engine warranty

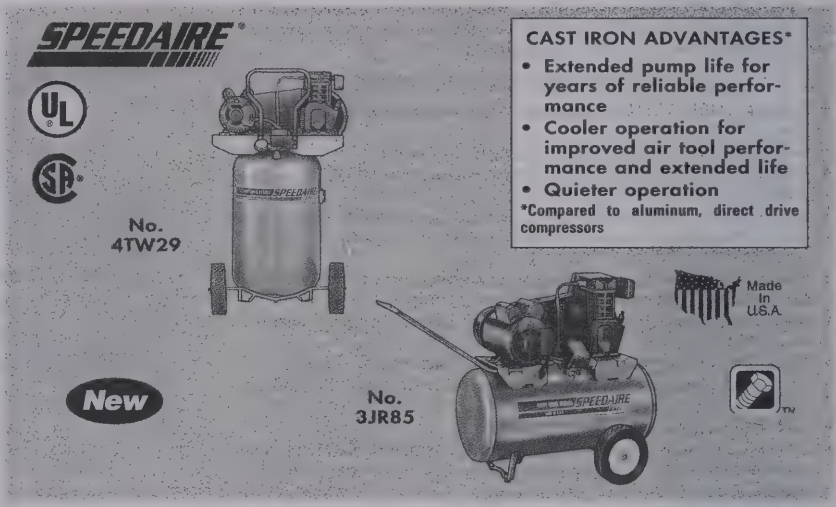
# PORTABLE AIR COMPRESSORS



## VALUE PRICED CAST IRON AIR COMPRESSORS

**Portable Air Compressors** are designed to deliver solid, reliable performance for medium duty applications. Featuring a belt driven, cast iron pump, it is quieter and delivers more air than comparable oilless, direct drive compressors.

Cast iron, oil lubricated, single cylinder compressor pump. No. 3JR85 has 13 gallon horizontal ASME Code tank. No. 4TW29 has a 20 gallon vertical ASME Code tank. Rated for 50/50 duty cycle. Pressure switch set for 95 PSI On and 125 PSI Off

- **Includes pressure regulator and gauges, 6 foot power cord, tank drain, and 1/4 (F)NPT outlet**

**USE AIR HOSE WHEREVER POSSIBLE. Caution: Extension cords can cause excessive amp draw, leading to non-starts and premature motor failure. Use longer air hose instead.**

| Peak/ Developed HP* | Running Motor HP* | Free Air CFM @ PSI 90 | 125 | Tank Size (Gal.) | Volts 60 Hz. | Amp Draw 115/230 | Max PSI | RPM | Rated Pump Life† (Hrs.) | Pump Stock No.** | Dimensions (In.) L | W | H | Stock No. | List | Each | Shpg. Wt. |

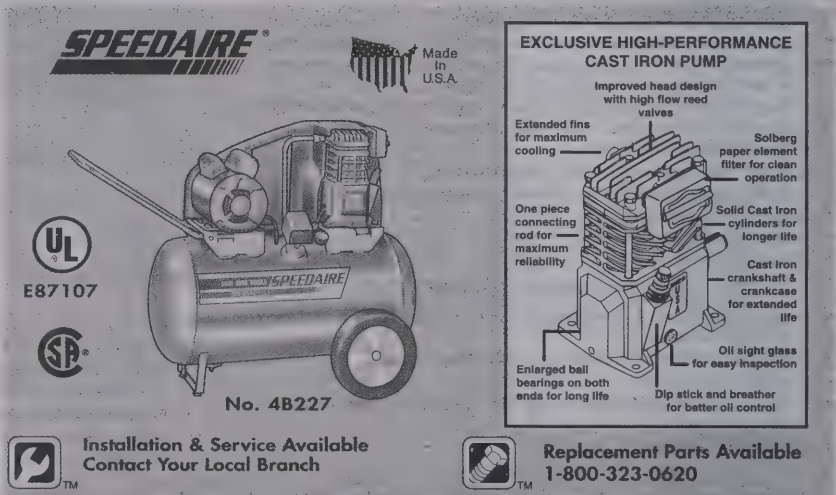
(**) See page 2884 for complete pump specifications. Note: Compressors are shipped without oil, 6 oz. required. Compressor oil 4ZF21 is recommended. (▲) Net prices, not subject to discounts.



## HIGH PERFORMANCE CAST IRON AIR COMPRESSORS

**Speedaire High Performance Portable Air Compressors** deliver outstanding performance for heavy duty applications. They feature the exclusive High Performance Cast Iron Pump.

**High Performance Advantages.** Superior air flow. Longer pump life. Higher pressure—135 PSI maximum. Higher Duty Cycle—rated for 65/35 duty cycle vs. industry standard of 50/50.

**All Models Include:** High Performance, Cast Iron, oil lubricated, two cylinder compressor pump. 20 Gallon ASME Code tank Commercial grade pressure switch, regulator and gauge, and 1/4 (F)NPT outlet. Pressure switch set for 95 PSI On and 135 PSI Off. Belt drive design for quiet operation.6 foot power cord.

**USE AIR HOSE WHEREVER POSSIBLE. Caution: Extension cords can cause excessive amp draw, leading to non-starts and premature motor failure. Use longer air hose instead.**

(*) For specific HP rating explanation, see page 2849. (†) As rated by the standard B-10 bearing life of the pump; see page 2849 for B-10 rating explanation.
(**) See page 2884 pump specifications. Note: Compressors are shipped without oil. All models require 16 oz. Compressor oil No. 4ZF21 is recommended.
(▲) Net prices, not subject to discounts.

# GASOLINE ENGINE DRIVEN CONTRACTOR AIR COMPRESSORS

SPEEDAIRE®

**Speedaire gasoline engine powered contractor** air compressors provide compressed air for contractor job sites or any location where electric power is not available.

### ALL MODELS INCLUDE

- **Low center of gravity design for stability and maneuverability**
- **Automatic throttle control that idles engine when pump is unloading**
- **Manual unloader valve for loadless starts and reduced stress on engine**

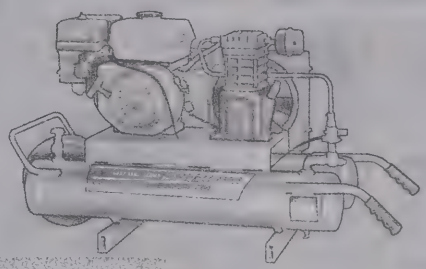
### No. 4B224 FEATURES

- **Cast iron, oil lubricated, two cylinder, single stage air compressor pump**
- **Briggs & Stratton 5 HP four cycle, aluminum block engine with easy recoil start and 3 qt. gas tank**

### No. 4B225 FEATURES

- **Cast iron, oil lubricated, two cylinder, single stage air compressor pump**
- **Honda 5.5 HP four cycle engine with aluminum block, overhead valves, low oil shutdown protection, easy recoil start and 3.8 qt. gas tank**

### No. 3JR79 FEATURES



- **Cast iron, oil lubricated, four cylinder, single stage air compressor pump**
- **8HP Briggs & Stratton Industrial Plus engine with 6 qt. fuel tank and Oil Gard® low oil shutdown**

### No. 5F219 FEATURES

- **Two stage, V-style cast iron air compressor pump**
- **Honda 8 HP four cycle engine with aluminum block, overhead valves, low oil shutdown protection, easy recoil start and 6.4 qt. gas tank**

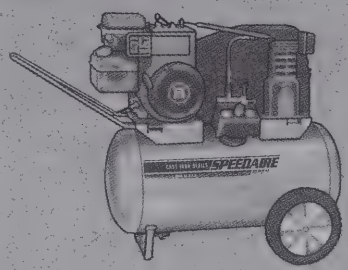
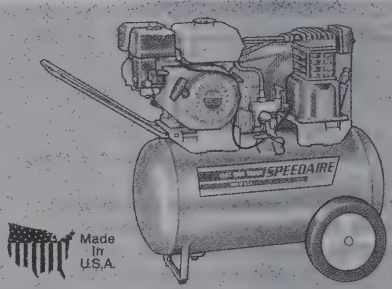
Including blowers, fans, furnaces, heaters, lighting, motors, controls, thermostats, water heaters, and other items. See Index under Energy Saving Products.

# GASOLINE ENGINE-DRIVEN SINGLE-STAGE AIR COMPRESSORS



## PORTABLE AIR COMPRESSORS

**Gas powered, portable compressors** provide compressed air for remote areas or locations where electric power is not available such as job sites, farms, and rural environments.



### FEATURES

- Cast iron, two cylinder air compressor pump
- 20 Gallon ASME Code tank
- 50/50 maximum duty cycle at full throttle
- Automatic throttle control idles engine when pump is unloading, set to load at 95 PSI and unload at 110 PSI
- Model 4B220 has Briggs & Stratton 5 HP four cycle aluminum block engine with easy recoil start and 3 qt. gas tank
- Model 4B241 has Honda 5.5 HP four cycle engine with aluminum block, overhead valves, low oil shutdown protection, easy recoil start and 3.8 qt. gas tank

# STATIONARY GASOLINE ENGINE DRIVEN AIR COMPRESSORS

## [A] TWO-STAGE 12½ and 13 HP AIR COMPRESSORS

**Two-stage gas engine air compressors** are ideal for fleet or field service applications with truckbed mounting design. Provide compressed air power for emergency production line needs. Feature reserve air capacity for remote site pneumatic needs. Automotive style air filter for superior filtration and quiet operation. Long life, stainless steel self-cleaning valves and durable ductile iron counterbalanced crankshaft. 30 gallon ASME code tank includes safety valve, tank drain, and pressure gauge.

- **Two-stage, cast iron compressor pump, 2 year pump warranty**
- **Heavy duty, double ball bearing construction**
- **Pilot valve control automatically idles engine at 175 PSI, resumes full throttle at 145 PSI**
- **Requires 12 VDC, 32 amp/hour battery**
- **No. 5F564: 12½ HP Kohler Command engine with 12V electric starter, fuel pump, 15 amp alternator, and full pressure lubrication**
- **No. 4LW38: 13 HP Honda engine with 12V electric starter, overhead valves, 15 amp alternator, and low oil alert**

### BATTERY TRAY KIT

Allows a battery to be conveniently mounted to Nos. 4LW38 and 5F564 air compressors. Kit includes: steel tray and hardware for attachment to compressor base, battery cables, all weather battery cover, and hold down clamps. Battery not included. (Note: addition of No. 4KP97 battery tray kit increases length of air compressors by 10 inches.) Speedaire brand.

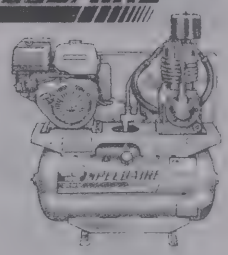
- **For use with Nos. 4LW38 and 5F564 only**

**No. 4KP97.** Battery Tray Kit. Shpg. wt. 10.0 lbs. List $106.50. Each.....**$99.00**

No. 4KP97

## [B] TWO-STAGE TYPE-30, 11 HP AIR COMPRESSORS

These air compressors feature finned copper intercooler, removable cylinders for simple maintenance, splash lubrication design, corrosive resistant powder coat paint finish and 30 gallon ASME tank with manual drain. Also features 11 HP engine with fuel efficient idle engine control and electronic ignition. Meets California Emission Codes. Ingersoll-Rand brand.



- **175 PSI operation, continuous duty rating with 100% cast iron design**
- **For fleet or field service applications with truckbed mounting design**
- **Provide compressed air power for emergency production line needs**
- **Pilot valve control automatically idles engine at 175 PSI, resumes full throttle at 145 PSI**
- **Requires 12 VDC, 32 amp/hour battery**

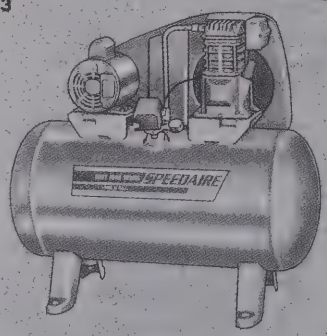
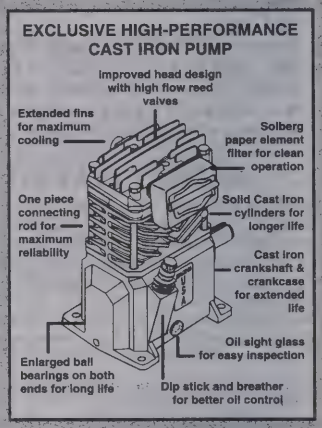
# STATIONARY TANK MOUNTED AND BASE PLATE AIR COMPRESSORS

SPEEDAIRE®



Made in U.S.A.

Except Nos. 4B242 & 4B243



No. 4B243 Base Plate

No. 4B233 2 HP, Vertical Tank

No. 4B234 2 HP, Horizontal Tank

Installation & Service Available Contact Your Local Branch™

Repair Service Available Contact Your Local Branch™

**Speedaire tank mount and base plate air compressors** are designed for commercial/light industrial use. They are ideally suited for applications where a dedicated air supply is needed such as a machining center, small tool operation, or fire sprinkler system. The tank mount models feature a compact, space saving 30 gallon code tank. All models feature the exclusive High Performance Cast Iron Pump.

### HIGH PERFORMANCE ADVANTAGES

- Longer pump life
- Superior air flow
- Higher pressure—135 PSI maximum
- Higher duty cycle—rated for 65/35 duty cycle vs. industry standard of 50/50

### TANK MOUNT MODELS INCLUDE

- High performance, cast iron, two cylinder pump
- 30 Gallon ASME code tank
- Open dripproof single phase motors with thermal protection or 3-phase motors
- NEMA 1 enclosure pressure switch with gauge
- Pressure switch setting 95 PSI On and 135 PSI Off (except No. 4B232)

### FIRE SPRINKLER AIR COMPRESSOR NOS. 4B242 and 4B243

- Suitable for fire sprinkler applications (verify local codes and regulations for compliance)
- Prewired (240V) with pneumatic control package
- Pressure switch setting 30 PSI On and 40 PSI Off

(#) If running unit on 208V, use No. 1H275 Buckboost Transformer. (†) As rated by the standard B-10 bearing of the pump. See page 2849 for B-10 rating information.
(‡) Magnetic starters not mounted or wired, sold separately. (*) See page 2884 for complete pump specifications. (▲) Net prices, not subject to discounts.
Note: Compressors are shipped without oil. Compressor oil No. 4ZF21 is recommended.

# HIGH PERFORMANCE CAST-IRON AIR COMPRESSORS

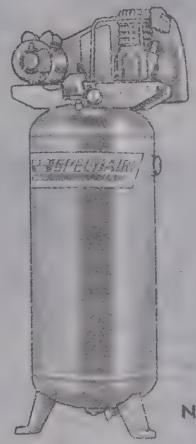
SPEEDAIRE

**Speedaire High Performance Air Compressors deliver** outstanding performance in those demanding applications where a dependable air supply is essential. Ideal for paint sprayers, sanding, impact wrenches and other pneumatic operations.

## HIGH PERFORMANCE ADVANTAGES

- **Cast-Iron construction - NOT aluminum - for greater durability**
- **Superior Air Flow - up to 17 CFM**
- **Higher Pressure - Maximum 135 PSI for a broader range of applications**
- **Higher Duty Cycle - Suitable for 65/35 duty cycle vs. industry standard of 50/50**

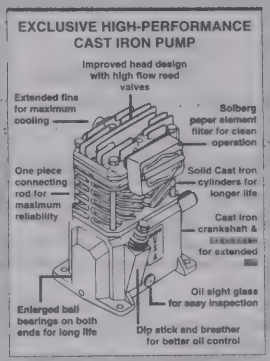
### Model 4B236 Features



- **High Performance, two cylinder cast-iron compressor pump**
- **60-gallon vertical ASME Code tank**
- **Single-phase motor with thermal overload protection, no need for a magnetic starter**

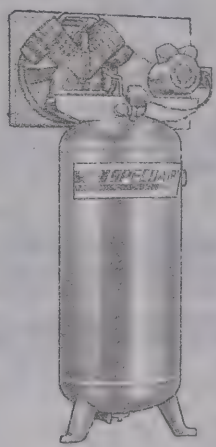
### Model 3JR76 Features

- **High Performance, four cylinder "Quad" cast-iron compressor pump**
- **60-gallon vertical ASME Code tank**
- **Single-phase motor with thermal overload protection, no need for a magnetic starter**

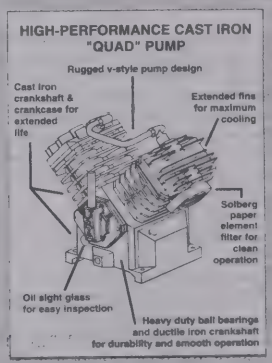


### Model 3JR77 Features

- **High Performance, four cylinder "Quad" cast-iron compressor pump**
- **80-gallon vertical ASME Code tank**
- **Three-phase motor with thermal overload protection, no need for a magnetic starter**



No. 4B236 Only



No. 4B236

Made in U.S.A.

No. 3JR76

**Installation & Service Available**

(*) Rated by standard B-10 bearing life of pump, see page 2849 for B-10 rating. (†) If running unit on 208V, use No. 1H279 Buckboost Transformer
(‡) See pages 2884 and 2886 for complete pump specifications. (▲) Net prices, not subject to discounts

# CLIMATE CONTROL AIR COMPRESSORS FOR HVAC SYSTEMS

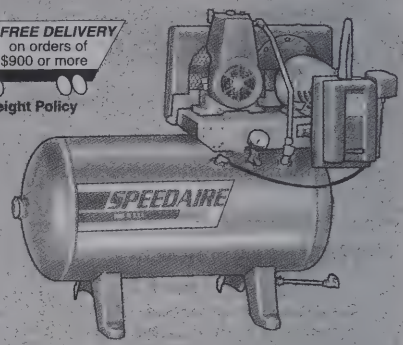
**Engineered specifically for** demanding pneumatic control systems requiring reliability, durability, and the absolute minimum oil carryover. For new, replacement, or upgrade HVAC installations and instrument air applications. Premounted starter and alternator saves time, labor, and expense of installation.

## PUMP FEATURES

- All pumps are individually run-in and certified for low oil carryover; average oil carryover is less than 2 PPM
- Integral fan greatly reduces discharge and operating temperatures
- 390R alloy cylinders quickly dissipate heat and provide long life
- Swedish stainless steel valves resist carbon build-up and are extremely reliable
- Step cut side sealer rings and diamond bored cylinders greatly reduce oil carryover

## TANK MOUNT FEATURES

- Each unit is certified to deliver published CFM at stated RPM and pressure and to be below 2 PPM in oil carryover. All units are run through a seven point quality assurance checklist
- All units are total packages ready for wiring and piping: Simplex packages include mounted and wired magnetic starter (except single phase); Duplex packages include mounted and wired alternator and two magnetic starters
- ASME certified tank and safety valve, also includes tank pressure gauge and manual drain
- Open dripproof NEMA motor, 3-phase, meets 1997 Federal Efficiency Levels
- All three phase duplex units require 115V for control panel power
- All controls are UL Listed
- Simplex: 70 PSI On/90 PSI Off
- Duplex: 70 PSI On/90 PSI Off (lead), 60 PSI On/80 PSI Off (lag)



## SPEEDAIRE LIMITED WARRANTY

Speedaire warrants compressor pumps two years, all other parts and labor one year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

# TWO-STAGE AIR COMPRESSORS

## TYPE-30, VALUE PACKAGE TWO-STAGE ELECTRIC AIR COMPRESSORS

Ingersoll-Rand value packages are 100% cast iron, continuous duty cycle. Totally enclosed, beltguard. Stainless steel finger valve prolongs service intervals. Single point electrical connection, auto Start/Stop control factory set at 145-175 PSI. ASME tank with manual drain, discharge isolation ball valve, 300 PSI pressure gauge, check valve and relief valve.

V-cylinder design for ease of maintenance and maximum compressor cooling. Open dripproof, NEMA 1, 1 or 3 phase electric motor. Unloaded start feature prolongs motor life, splash lubrication. Interstage relief valve and discharge valve. Comply with State of California Code 462 (L)(2). Compressors are shipped without oil. Recommend the use of T30 Select® lubricant No. 4M578 or Air Compressor Start Up Kit No. 4M579 (5 HP) or 4M580 (10 HP). Ingersoll-Rand warrants the compressor pump for 2 years when using T-30 Select® lubricant and/or start-up kit.

No. 4L977 single phase 5 HP compressor features a capacitor start thermally protected motor requiring no magnetic starter. Nos. 4L974 and 4L976 3-phase 5 HP and 10 HP compressors include factory mounted and wired magnetic motor starter. 10 HP compressors feature an oil sight guage.

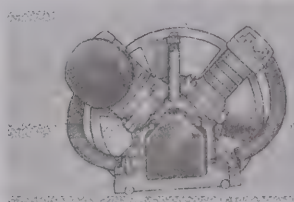
## VALUE PRICED 5 HP TWO-STAGE AIR COMPRESSOR AND PUMP

- **Two-stage, V-style pump with cast iron crankcase**
- **60 Gallon ASME Code tank with safety valve, tank drain, pressure switch and pressure gauge**
- **Open dripproof motor has thermal overload protection eliminating need for magnetic starter**
- **Pressure switch unloading, set at 145 PSI On and 175 PSI Off**



**Value priced Speedaire two-stage air compressor** designed for light commercial applications requiring a dependable air supply. Application should not exceed 60% On/40% Off duty cycle. For heavy duty commercial applications requiring more CFM and longer duty cycle, refer to the Speedaire two stage compressors listed on page 2878.

# TWO-STAGE DUPLEX AIR COMPRESSORS

## SPEEDAIRE DUPLEX DESIGN

**Speedaire Duplex Air Compressors** have two complete compressor pumps and motors providing built-in backup capability. This saves expensive downtime if one of the pumps or motors should require servicing. During times of heavy air usage, both pump/motors will operate to maximum CFM output.

- **All models include factory mounted and wired control panel consisting of definite purpose magnetic starters and alternator**
- **Built-in alternator provides equal pump usage**
- **Premounted control panel saves time, labor, and expense of installation**
- **Built for auto dealers, body shops, industrial machinery, and assembly line environments, printing plants, oil/mining, tire retreading**
- **All models comply with State of California Code 462 (L) (2)**
- **75/25 Duty cycle**

## OIL LUBRICATED PUMPS

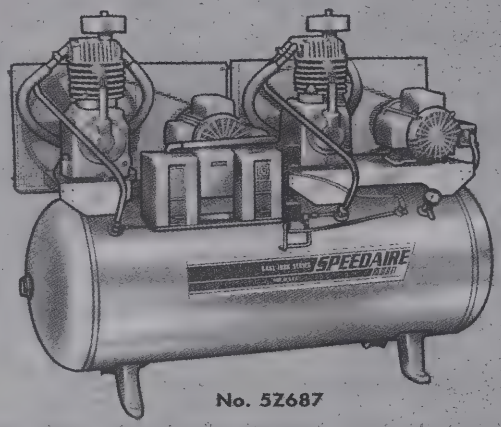
- **Cast iron cylinders, crankcase, and pistons for extended life**
- **Deep finned intercooler and aluminum head for cooler running temperatures**
- **Long life stainless steel self-cleaning valves and durable ductile iron counterbalanced crankshaft**
- **Easy-to-read metal oil sight gauge**
- **Quiet operation with heavy-duty air filter/silencer**
- **Designed for start/stop operation**
- **Splash-type lubrication**

## MOTOR FEATURES

- **Open dripproof NEMA motor, 3-phase, meets 1997 Federal Efficiency Levels**

## TANK MOUNT FEATURES

- **Safe operation with ASME tank and safety valve. Includes tank drain and pressure gauge**
- **Alternator requires 120V power supply**
- **145 PSI On/175 PSI Off (lead); 125 PSI On/155 PSI Off (lag)**



## SPEEDAIRE LIMITED WARRANTY

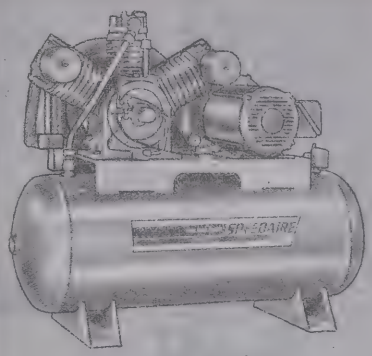
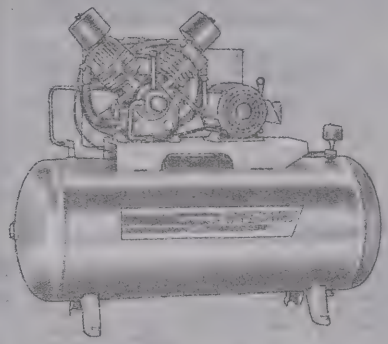
# TWO-STAGE PRESSURE LUBE AIR COMPRESSORS

## PRESSURE LUBRICATED



**Speedaire Pressure Lubricated Air Compressors** are built for long-lasting, heavy duty commercial service. Pressure lubrication provides direct, positive lubrication to the critical internal components of the pump such as connecting rod bearings and piston assembly. These compressors are ideally suited for machine shops, large automotive repair and body shops, printing plants, production air operations, and any other facility where a dependable air supply is essential.

### ALL MODELS FEATURE



- Cast Iron, Pressure Lubricated compressor pump with gear driven oil pump and spin-on oil filter
- Stainless steel valves and ductile iron crankshaft for greater durability and longer life
- 80/20 Duty Cycle
- ASME Code tank with safety valve, pressure gauge, and manual tank drain
- Low RPM for longer life
- Pressure switch unloading, set for 145 PSI On, 175 PSI Off
- Open dripproof NEMA motor, 3-phase, meets 1997 Federal Efficiency Levels
- Compliance with California Code 462(L)(2)
- 25 HP Model No. 5Z634 includes dual control for stop/start or continuous run operation and low oil protection

### SPEEDAIRE LIMITED WARRANTY

Speedaire warrants compressor pumps two years, all other parts and labor one year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

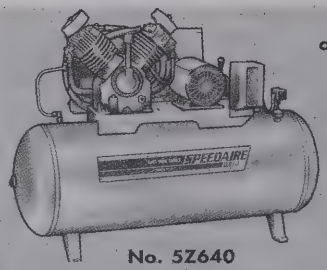
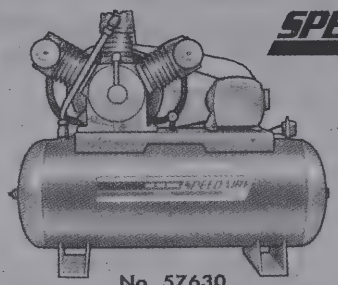
# TWO-STAGE STATIONARY AIR COMPRESSORS



**Speedaire Two-Stage Air Compressors** are designed for heavy duty commercial applications. Featuring cast iron construction, compressors have a two year pump warranty and are backed by a complete parts program for maintenance and servicing.

### ALL MODELS INCLUDE



- **Cast-iron, splash lubricated compressor pump with finned copper intercooler, ductile iron crankshaft, and stainless steel valves**
- **75/25 Duty Cycle**
- **ASME Code tank with safety valve, pressure gauge, and manual tank drain**
- **Open dripproof NEMA motor, 3-phase, meets 1997 Federal Efficiency Levels**
- **Pressure switch unloading, set for 145 PSI On, 175 PSI Off**
- **Compliance with California Code 462(L)(2)**
- **25 HP model features dual control for stop/start or continuous run operation**

### MODELS WITH MOUNTED & WIRED MAGNETIC STARTER

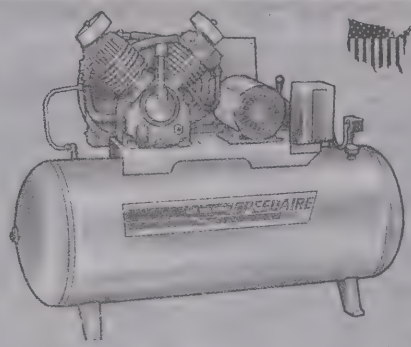
# 5 TO 25 HP TWO-STAGE DRY AIR SYSTEMS

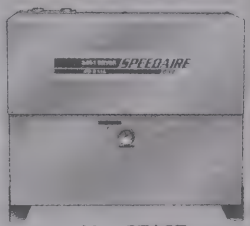
## DRY AIR SYSTEM FEATURES



- Dry air systems include Speedaire two-stage air compressor and Speedaire three-in-one refrigerated dryer
- Provides high pressure, very dry air source with very low moisture
- Protects your air tools and equipment from damaging water and oil
- Dry, clean air minimizes downtime, reduces expensive repair, and extends life of tools and spray equipment
- Prevents water, oil, and dirt contaminants from causing paint problems such as 'fisheye' and 'orange peel'; also prevents air lines from clogging; keeps water from delicate air tools
- Only two components for ease of installation and maintenance
- Green metallic finish

## COMPRESSOR FEATURES

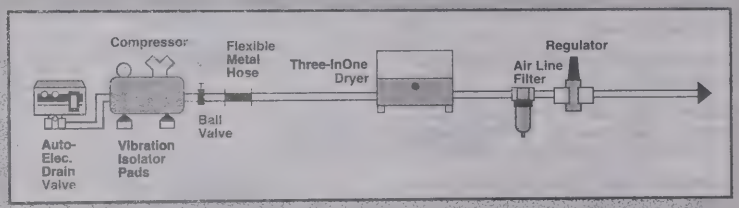
- Cast iron two-stage pumps
- Low RPM for longer pump life
- 2 year pump warranty
- 25 HP models feature dual control for stop/start or continuous run operation
- 75/25 duty cycle



## THREE-IN-ONE DRYER FEATURES

- Refrigerated air dryer combines dryer, aftercooler, and reheater in a single unit
- Handles inlet temperatures up to 180°F; eliminates need for separate aftercooler
- Includes water separator and drain trap
- Heat exchanger is warranted for 5 years
- Reheats chilled air for temperature critical applications such as paint spraying

Made In U.S.A.



SPEEDAIRE®

No. 5Z640

No. 5Z657

**Air Compressor and Dryer Shipped as Separate Components**

System consists of:

- Durable cast iron air compressor
- Three-in-one dryer eliminates complexity by combining an aftercooler, refrigerated dryer, and air reheater

### DRY AIR SYSTEM SPECIFICATIONS

| HP | Water Removal | Gallons Removed | Oil Removal (No Filter) Dryer Only |
|---|---|---|---|
| 5 | 97.6% | 1.23 | 55% |
| 7.5 | 97.6 | 1.80 | 55 |
| 10 | 96.7 | 2.50 | 55 |
| 15 | 97.6 | 3.69 | 55 |
| 25 | 97.6 | 6.35 | 55 |

Ratings based on 90°F ambient temperature with 65% relative humidity, 8 hours of operation at a 75% duty cycle. Changes in temperature and relative humidity yield different results.

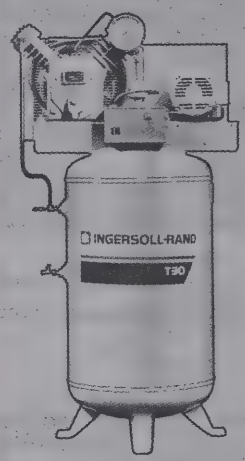
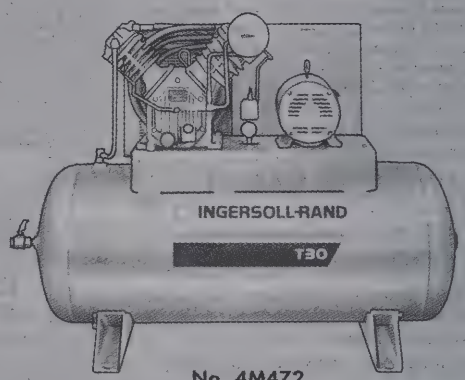
# TWO-STAGE INDUSTRIAL AIR COMPRESSORS



## TYPE 30 AIR COMPRESSORS

Type-30 compressors meet demanding 175 PSIG industrial requirements. V-design cylinders, deep cast cooling fins, interstage coolers and directional airflow patterns maximize compressor cooling, allowing 80/20 duty cycles. Separate cylinders for easy removal for maintenance.



- Single piece connecting rods provide reliability
- All compressors allow for unloaded start feature, prolonging motor life
- 100% cast iron construction, splash lubrication
- Auto start/stop control (5-7.5 HP) dual controls for auto start/stop or constant speed operation (10-30 HP)
- Includes low oil level protection (10 HP and above)
- Interstage relief valve, discharge relief valve
- Open dripproof NEMA motor, 3-phase, conforms to 1997 Federal Efficiency Requirements (EPACT)
- Complies with State of California Code 462(L)(2)
- ASME rated receiver, horizontal (H) or vertical (V), with 300 PSIG pressure gauge, relief valve, insolation valve, and manual drain valve
- Gray color, baked powder coat enamel finish
- Maximum PSI: 175

(*) Magnetic motor starter is an optional accessory. Starter protects motor from electrical overload condition. (†) See page 2889 for start-up kits.
**NOTE: STARTER IS REQUIRED.** Dependent upon installation, starter can be wall mounted or compressor mounted.
When ordering compressor with magnetic magnetic motor starter, assembly comes mounted and wired. (▲) Net prices, not subject to discounts.

# TWO-STAGE INDUSTRIAL AIR COMPRESSORS

## TYPE-30, FULLY PACKAGED AIR COMPRESSORS

For single point electrical and air piping connection. Ensures high quality air supply with minimal maintenance. Compressor packages include:

- **Factory tested, assembled, pre-piped and wired package for quick field connection and start-up**
- **Splash lubrication design provides simple, inexpensive, effective lubrication to critical pump components. In contrast to pressure lubrication units, there are no oil pumps to malfunction, or oil piping and filters to clog or be replaced**
- **Open dripproof NEMA motor, 3-phase, conforms to 1997 Federal Efficiency requirements (EPACT)**
- **5 and 7.5 HP have start/stop pressure switch control operation**
- **10-30 HP units have dual control for auto start/stop or continuous run operation which allows you to select operating control best suited for your shop. Results in power savings and less wear and tear on compressor**
- **Belt guard meets OSHA regulation**
- **Unit comes with heavy-duty 10 micron inlet filter protects the pump cylinder walls from harsh and potentially damaging air-borne particles adherent to body shop and dealership installations. The element itself is automotive style and fully replaceable**
- **Includes interstage relief valve, discharge relief valve and system isolation valve**
- **T-30 Start-up kits available. Kits include the proper amount of oil and intake air filter elements, see page 2889**
- **Maximum PSI: 175**

- Maintenance kit for Type 30 air compressors listed on page 2883

### IR 2-YEAR PUMP WARRANTY

**Ingersoll Rand warrants compressor pump for 2 years when used with No. 4M578 T30 Select® lubricant. Text of warranty available on request, see page opposite inside back cover.**

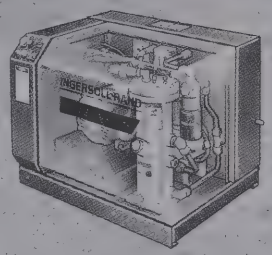
AIR COMPRESSORS

# ROTARY SCREW INDUSTRIAL AIR COMPRESSORS

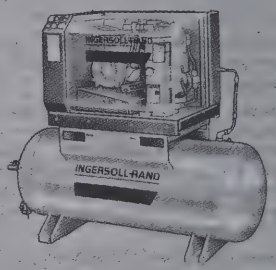
**What is a Rotary Screw Air Compressor?** Rotary compressors use two intermeshing rotors to compress air. As the rotor turns, their configuration compresses the trapped air. This simple process lowers the operating temperatures approximately 50% (as compared to reciprocating designs), increases efficiency and delivers a clean air supply. A rotary compressor uses a coolant to cool its internal components. This allows the compressor to operate at a fully loaded, continuous duty cycle.

**What are the benefits of Rotary Screw Air Compressors?**



- Reliability
- Low noise level, 85 dBA and below, allowing flexibility in compressor location
- Minimum maintenance
- Low discharge air temperature
- Improved air quality

**SSR Rotary Screw Air compressors feature:**



- Fully packaged design —online, offline and auto start/stop control, aircooled aftercooler and full voltage starter
- 8,000 hour/two-year cooling lubricant
- Easy installation/operation
- Two year air end warranty with the use of G-cool lubricant (see page 2883 for details)

**EXCLUSIVE HIGH-PERFORMANCE CAST IRON PUMP**

## SPEEDAIRE CAST IRON SINGLE-STAGE AIR COMPRESSOR PUMPS

**Speedaire compressor pumps** feature cast iron construction, high strength ductile iron crankshaft, ball bearings on both ends of crankshaft (except 2Z498, which has needle bearings), and splash lubrication. Can be used for new or replacement applications.

- **4B245 and 4B247 replace all 2Z499 and 2Z630 pumps**
- **High flow reed valves**
- **Oil dipstick, except 2Z498**
- **CCW rotation facing flywheel**
- **Refer to your tank mounted unit's original specification for replacement pump Nos.**
- **Flywheels sold separately, with 3 different belt styles***

(*) 2Z498 and 3JR84 comes with 8¾ flywheel, with 1A-belt groove.

### SPEEDAIRE HIGH PERFORMANCE COMPRESSOR PUMPS

Nos. 4B246 and 4B247 deliver outstanding performance for demanding applications and offer the following advantages over comparable standard models.

- **Higher duty cycle, 65/35 vs. industry standard 50/50, and longer life**
- **Oil level sight glass**
- **Solberg filter element, not foam element**
- **Higher presssure, 135 PSI vs. 125 PSI**

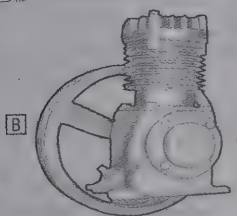
# 1/4 TO 10 HP COMPRESSOR PUMPS

Made In U.S.A.

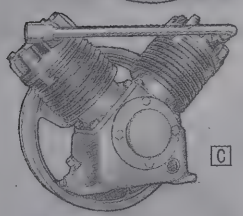
A

Replacement Parts Available 1-800-323-0620



- **Die-cast aluminum cylinders with cast-iron sleeves for greater efficiency, cooling, and service life on models A through D**
- **Aluminum alloy pistons and connecting rods**
- **Swedish steel reed-type valves on models A through D**
- **Cast-iron crankcase and fan-type flywheel**
- **Tapered roller main bearings on pumps C thru F**
- **Designed for 100 PSI maximum heavy-duty and 125 PSI intermittent-duty applications**

**Same Dayton pumps used on many stock compressors,** giving outstanding service. Balanced ductile iron crankshaft. Splash oil lubrication.



**Visual oil level gauge** on 2, 3, and 4-cylinder models. Cast-iron flywheels on all models except No. 2Z157, which is stamped steel. CCW rotation facing flywheel. For applications which require a constant speed unloader control, use No. 5X709 Load Genie unloader control. See Index under "Unloader control."(Formerly Dayton brand.)

**Nos. 3Z172 and 3Z241** have Swedish steel disc valves, centrifugal unloaders and cast iron cylinders. Max. intermittent pressure is 120 PSIG.

**To determine motor pulley size:** Compressor pulley x compressor RPM ÷ motor RPM = motor pulley size.

# AIR COMPRESSOR PUMP ACCESSORIES AND PUMP OVERHAUL KITS

## SINGLE-STAGE AIR COMPRESSOR PUMP

- Cast-iron construction
- 16 CFM air delivery — comparable to two stage compressor air delivery
- 135 maximum pressure
- Splash lubrication
- Ball bearing construction for smooth, quiet operation
- Oil level sight glass

No. 4KP89

Made In U.S.A.

## AIR COMPRESSOR FLYWHEELS

**Available in three styles:**

- A-Groove: For gas and electric models using compressor pumps Nos. 4B244, 4B245, 4B246, and 4B247
- Poly V-Groove: For electric applications using compressor pumps Nos. 2Z499 and 2Z630
- B-Groove: For all gas powered applications using No. 2Z499 or 2Z630 compressor pumps

- Cast iron 10" dia. flywheel with 3/4" dia. bore using 3/16" key designed for maximum durability and balance
- Specifically designed for Dayton and Speedaire pumps

No. 4B254

### ORDERING DATA

## SPEEDAIRE AND DAYTON PUMP OVERHAUL KITS

Replacement and rebuild kits for keeping Speedaire and Dayton compressor pumps in peak operating condition.

### GASKET PARTS KITS

- Consist of one each: cylinder head gasket, valve plate gasket, cylinder gasket, bearing cap gasket, and oil seal
- No. 1R396 Kit fits all No. 2Z499 and 2Z630 pumps
- No. 1R400 Kit fits all No. 2Z498 pumps
- No. 4B252 Kit fits all Nos. 4B244, 4B245, 4B246, and 4B247 pumps

### VALVE PARTS KITS

- No. 1R397 Kit includes 6 reed valves, 2 restrictors, and 12 screws; fits all No. 2Z499 and No. 2Z630 pumps
- No. 1R401 Kit inlcudes 2 reed valves, 6 bolts, and 2 gaskets; fits all No. 2Z498 pumps

### HEAD ASSEMBLY KIT

- Includes entire valve plate, valving, head, and gaskets
- Kit 4B251 fits pump Nos. 4B244, 4B245, 4B246, 4B247, 2Z630, 2Z499, and 4KP89*

### PISTON RING PARTS KITS

- Consist of 4 oil and 4 compression rings, and 2 expanders
- No. 1R398 Kit fits all No. 2Z498, 2Z499, 4B244, 4B245, 4KP89*, 4B246, and 4B247 pumps (Note: includes 2 sets of ring parts for pump No. 2Z498)
- No. 1R399 Kit fits all No. 2Z630 pumps

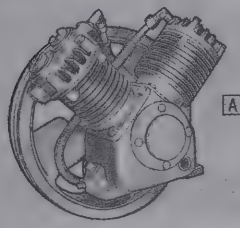
### ORDERING DATA

| Parts Kit | Fits Pump Stock No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Gasket | 2Z499, 2Z630 | 1R396 | $21.13 | $18.25 | 0.3 |
| Gasket | 2Z498 | 1R400 | 13.44 | 11.25 | 0.1 |
| Gasket | 4B244, 4B245, 4B246, 4B247 4KP89* | 4B252 | 12.38 | 10.25 | 0.2 |
| Valve | 2Z499, 2Z630 | 1R397 | 19.06 | 15.75 | 0.1 |
| Valve | 2Z498 | 1R401 | 11.24 | 9.25 | 0.1 |
| Head Assembly | 4B244, 4B245, 4B246, 4B247, 4KP89* | 4B251 | 43.63 | 36.00 | 3.1 |
| Piston Ring | 2Z498, 2Z499, 4B244, 4B245, 4B246, 4B247 | 1R398 | 24.93 | 20.95 | 0.1 |
| Piston Ring | 2Z630 | 1R399 | 24.69 | 20.75 | 0.2 |

(*) Requires two kits.

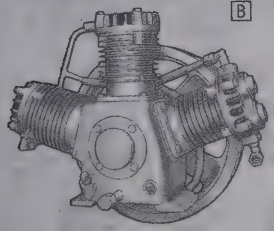
# 3/4 to 25 HP COMPRESSOR PUMPS

CHAMPION Made in U.S.A.

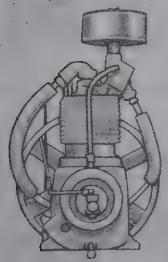


- Splash oil lubrication
- 2, 3, and 4-Cylinder models
- Die-cast aluminum cylinders with cast-iron sleeves for greater efficiency, cooling, and service life
- Cast-iron cylinders with integral heads on Nos. 3Z410 and 3Z411
- Counter-balanced, ductile iron crankshaft
- Tapered roller bearings on crankshaft
- Reed type valves in Nos. 3Z174 and 3Z176 pumps on low pressure side
- Swedish steel disc-in-plate design valves on all other pumps
- Visual oil level gauge

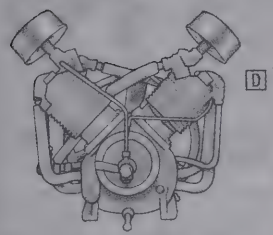
**Built to provide maximum efficiency and long life** in heavy-duty industrial applications. Large diameter finned intercoolers on models C through F dissipate heat for cooler operation. Splash lubrication of cylinder wall and internal moving parts.



**Balanced fan-type flywheels** provide air flow for cooling pump. Rotation CCW facing flywheel. Nos. 3Z181, 3Z183, 3Z410, and 3Z411 include unloader and pilot valve for constant speed operation. (Formerly Dayton brand.)



**Centrifugal unloader** provides efficient pressure release for loadless starting. Not available on 3Z174 and 3Z176. Gray metallic finish.



**To determine motor pulley size:** Compressor pulley x compressor RPM ÷ motor RPM = motor pulley size.

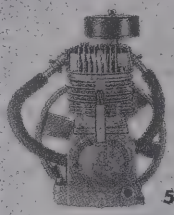
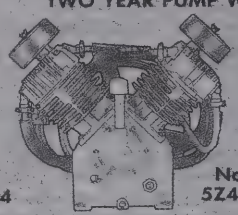
# TWO-STAGE AIR COMPRESSOR PUMPS

## SPEEDAIRE® SPLASH LUBRICATED AIR COMPRESSOR PUMPS



**Speedaire Two Stage Air Compressor Pumps** are rated for heavy duty commercial use in new or replacement applications. These pumps are splash lubricated with cast iron crankcase and cylinders for durability and aluminum head for cooler operating temperature. Rated for 75/25 duty cycle.



- **Cast-iron construction with ductile iron crankshaft for greater durability**
- **Stainless steel valves and finned copper intercooler for extended life**
- **175 Maximum PSI**
- **CCW rotation facing flywheel**
- **25 HP model has dual control for start/stop or continuous run operation**

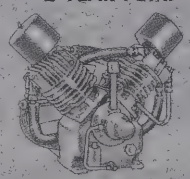
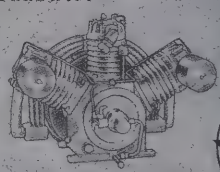
## SPEEDAIRE® PRESSURE LUBRICATED AIR COMPRESSOR PUMPS



**Speedaire Pressure Lubricated Air Compressor Pumps** are designed for long-lasting, heavy-duty commercial/industrial service. Pressure lubrication provides direct, positive lubrication to the critical internal components of the pump such as connecting rod bearings and piston assembly. Rated for 80/20 duty cycle.



- **Cast-iron crankcase and cylinders for extended life and aluminum head for cooler operating temperature**
- **Heavy-duty, gear driven oil pump and spin-on filter to keep oil clean**
- **Stainless steel valves and finned copper intercooler for extended life**
- **175 maximum PSI**
- **CCW rotation facing flywheel**
- **25 HP model features low oil protection and dual control for start/stop or continuous run operation**

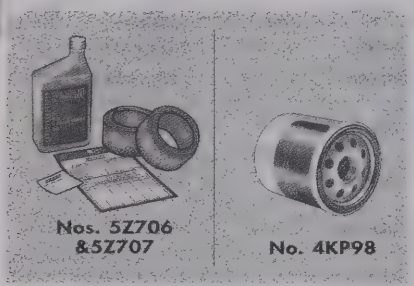
# TWO-STAGE AIR COMPRESSOR ACCESSORY AND MAINTENANCE KITS



## LOW OIL GUARD FOR 5 TO 25 HP COMPRESSORS

- **Protects air compressor pump against damage if oil level drops too low**
- **For Speedaire and Dayton two-stage compressors listed in table below**
- **Easy to assemble and install**
- **1" NPT thread size**

Protect compressor from damage due to insufficient oil in compressor. The low oil guard monitors the oil level in the compressor and shuts it down when the oil level drops below the minimum level. The low oil guard is available for all 230V, electrically wired Speedaire and Dayton compressors listed in table below.

| For Air Compressor Stock Nos. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 5 HP: 5F229A thru 5F232A, 5F235A, 3Z492, 3Z494, 3Z495, 3Z745 5Z397 thru 5Z400, 5Z397A thru 5Z400A, 5Z397B thru 5Z400B 5Z404, 5Z404A, 5Z404B, 5Z404C, 5Z637, 5Z637A, 5Z638, 5Z638A, 5Z687A, 5Z688, 5Z688A | **5Z705** | $150.00 | **$139.00** | 2.3 |
| 7½ HP: 5F563, 5F565, 5F566, 5Z639, 5Z639A, 9Z720, 9Z720A, 3JR80 | | | | |
| 10 HP: 5F233, 5F233A, 5F236, 5F236A, 3Z493, 3Z496, 3Z497, 5Z401, 5Z401A, 5Z401B, 5Z402, 5Z402A, 5Z402B, 5Z405, 5Z405A, 5Z405B, 5Z460, 5Z460A, 5Z689, 5Z689A | | | | |
| 15 HP: 5F567, 3Z892, 3Z894, 5Z629, 5Z631, 5Z633, 5Z635, 4B248, 4B249, 4B250 | | | | |
| 25 HP: 3Z893, 3Z895, 5Z630, 5Z632, 5Z634, 5Z636 | | | | |

- **Preventive maintenance extends life of air compressors**
- **Kits include everything needed for routine compressor maintenance**
- **For Speedaire two-stage compressors listed at right**

## REPLACEMENT OIL FILTER

For Speedaire and Dayton pressure lubricated air compressor pumps, Nos. 4B249, 5F235, 5F236, and 5Z636. Air compressor Nos. 5F229, 5F230, 5F231, 5F232, 5F233, 4B250, and 5Z634.

**No. 4KP98.** Replacement Oil Filter.
Shpg. wt. 0.5 lbs. List ..... $10.25.
Each ..... **$9.50**

## COMPRESSOR MAINTENANCE KITS

**Kit for 5 HP compressors includes:** 2 qts. of compressor oil, 1 air filter element, 1 maintenance schedule and log, and a maintenance service decal.

**Kit for 10 HP compressors includes:** 4 qts. of compressor oil, 2 air filter elements, 1 maintenance schedule and log, and a maintenance service decal.

| For Speedaire Air Compressor Stock Nos. | Stock No. ❸ | List | Each | Shpg. Wt. |

# AIR COMPRESSOR COMPONENT TERMINOLOGY

**Magnetic Starter.** An electrically operated switch used to control the compressor motor and provide thermal protection. Activated by the pressure switch.

**Automatic Tank Drain Valve (No. 5Z617).** Installed at bottom of tank; opens briefly during each pumping cycle to release moisture condensed from the air.

**Belt Guard.** Metal or plastic shield around pump flywheel, belt and motor sheave. Necessary to comply with OSHA requirements.

**Low Oil Level Shutdown Switch.** Installed in compressor crankcase and wired to magnetic motor starter.

**Air Pump (Compressor Head)**—The part of the compressor that compresses the air.

**Single-Stage type,** for applications requiring air at 95 PSI or less. Has one or more cylinders, all discharging directly into the tank.

**Two-Stage type,** for applications requiring air at 100-175 PSI. Has two or more cylinders in series. The first cylinder compresses air into the second cylinder, which compresses it further and then pumps it into the tank.

**Intake Filter**—A foam pad or paper element mounted on the pump air intake. Must be serviced regularly for best pump efficiency.

**Air Tank (Receiver)**—Stores air compressed by pump for peak loads or intermittent use. 3 types are available:

**ASME Standard (UM Type) Tanks**— Made and tested in accordance with American Society of Mechanical Engineers standards. ASME certificate of compliance is available for each tank.

**ASME National Board (U Type) Tanks**— Made, tested, inspected and registered to meet standards of ASME. A certificate is available for each tank to show compliance and registry number. The ASME certificate is required by law in many cities and states to pass safety codes. It assures that: (1) Code approved materials are used, (2) Steel plate is without defects and is the specified thickness, (3) Proper welding techniques are employed by experienced operators, (4) Openings and supports are the correct size, and (5) Tank has passed rigid tests. ASME tanks must be used where OSHA compliance is required.

**Non-Code tanks** do not meet ASME standards. They are widely used on small compressors, in locations where compliance with OSHA and similar standards is not required.

**Tank Pressure Controls**—three types used:

**Pressure Switch Control** starts and stops the compressor as pressure falls and rises in the tank. Generally used on compressors for intermittent duty and where maximum air usage is less than 50% of the compressor's capacity.

**Constant Speed Control** releases (unloads) excess pressure, while compressor operates continuously. Used where air usage is continuous, or maximum air usage exceeds 50% of the compressor's capacity. See Unloaders.

**Dual Control** allows the selection of either constant speed or start-stop operation to fit varying air demands. Allows compressors to be used efficiently in all applications.

**Check Valve**—Allows air to flow one way only, from pump to tank. When compressor stops, this valve closes, preventing loss of air from tank or damage to pump valves.

**Safety or Relief Valve** vents the tank if excess pressure builds up. For safety, a relief valve must be used on all compressors. ASME stamped and sealed safety valves must be used on all ASME tanks.

**Unloaders**—There are two basic types:

**Pump Unloaders** open the air discharge line between pump and tank, whenever the pump stops, relieving pressure, to make re-starting easier. A check valve prevents loss of air from the tank. There are 3 types of head unloaders:

*Centrifugal:* a speed-activated valve that closes as compressor comes up to speed and opens when compressor stops.

*Pressure Switch Unloader* works together with pressure switch. Opens a valve to vent air whenever switch stops compressor. Closes valve when switch re-starts unit.

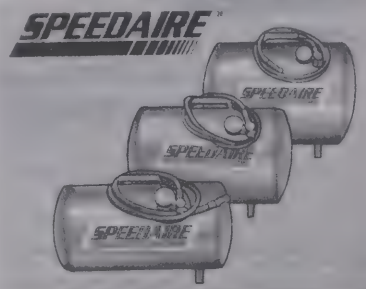
*Combination Unloader and Check Valve* (e.g. Load Genie, Nos. 4X996 to 4X999). As pump stops, valve senses lack of air flow and relieves pressure in discharge line. As pump starts, vent closes and check valve reopens.

**Constant Speed Unloaders** allow pump to operate unloaded (running, but not compressing air) when tank pressure reaches pre-set level. Used on continuous run compressors. 2 types:

*Pilot Valve Unloader* directs air to head unloader on pump which holds pump intake valve open when pre-set pressure is reached.

*Load Genie Continuous Run Unloader* (No. 5X709) vents pump discharge line to the open air whenever tank pressure reaches preset level. Also acts as check valve.

## AIR-CARRY TANKS



**Compact, lightweight air tanks** provide portable air supply wherever you need it. Use for inflating, or in combination with blow gun for cleaning equipment or work areas. Max. working pressure, 125 PSI.

- **6 ft. hose with tire chuck**
- **0-160 PSI pressure gauge**
- **Brass manifold with shutoff and safety valves**
- **14-gauge steel construction**
- **Black powder coat**

**NOTE:** These tanks do not have ASME certification. Before ordering, check local and state code requirements.

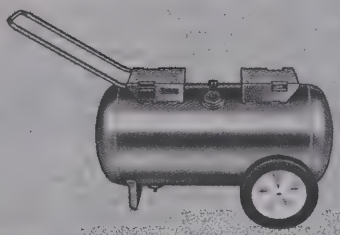
# PORTABLE AIR TANKS



SPEEDAIRE®

No. 1Z782 Hotdog Tank

No. 5Z374 Pancake Tank

No. 3Z409 Portable Tank

- **Large baseplates to accommodate a wide variety of pumps**
- **Tall baseplates for faster, easier assembly**
- **Large 1/4" NPT drain port with drain cock reduces clogging**
- **Rubber grommets provided**
- **Portable tanks assemble in minutes**
- **Green metallic finish**
- **Not for use with gas engines**

**No. 1Z782 3-gallon hotdog tank** is small and compact for benchtop use or can be easily transported from job to job. Formed, one-piece steel strap feet for maximum stability. 1/4 and 1/2" NPT ports.

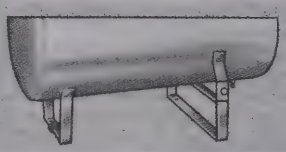
**No. 5Z374 4-gallon pancake tank** has 12-gauge steel construction and rounded knuckle radius shape to provide more strength than standard versions of this design. Two 1/2" ports and one 3/8" drain port. Split base design accommodates a variety of pumps. Some drilling may be required.

NOTE: Non-code tanks do not have ASME certification. Before ordering, check local and state code requirements.

**No. 2Z623 and 2Z624 portable ASME code tanks** include semi-pneumatic tires, axle assembly and pull handle. Tires on 7½ gallon tanks are 7.75 x 1.75"; on 11 gallon tanks, 9.75 x 1.75". 3/8" and 1/2" NPT ports. Sturdy, two-piece pump/motor platforms. No. 2Z623 is equipped with one-piece platform design. All models except No. 2Z623 are convertible to stationary tanks when used with Tank Conversion Kit listed below.

**No. 3Z409 portable ASME code air tank** includes semi-pneumatic 9.75 x 1.75" tires, axle assembly and pull handle. 1/4, 3/8, and 1/2" NPT openings. Sturdy, two-piece pump motor platforms. Convertible to stationary tanks when used with Tank Conversion Kit listed below.

**NOTE:** Code tanks will meet city and state requirements for all commercial and industrial installations. Certificate of Compliance is available for each tank.



| Cap. (Gal.) | Tank Type | Working Pressure (PSI) | Max. Pump HP 1-Stage | Overall Dimensions (In.) L | W | H | Tank Dia. (In.) | Tank Gauge | Stock No. | List | Each | Shpg. Wt. |

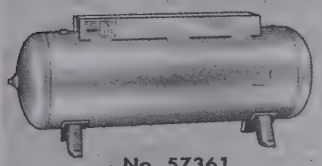
### ASME TANKS

Speedaire ASME Code tanks can be used in stationary applications or can be converted to a portable, carry tank unit with conversion kit 4TK12. Includes two 1/2" NPT ports, two inspection ports, drain valve, and ASME safety valve.

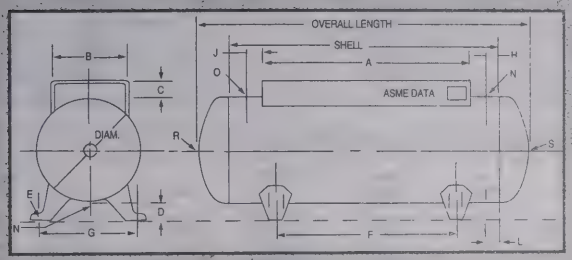


### PORTABLE CARRY TANK CONVERSION KIT

Converts Speedaire 13 and 20 gallon ASME Code Tanks 4TK09 and 4TK10 to portable, carry tank units. Kit Includes: 0-160 PSI pressure gauge, 25 foot recoil air hose, brass manifold with shutoff valve, and tire chuck.

***New* No. 4TK12.** Tank Conversion Kit. Shpg. wt. 1.0 lbs. List $24.00. Each .....**$20.57**

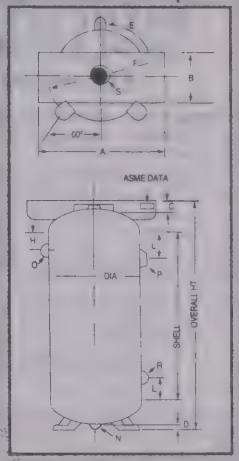
# STATIONARY ASME CODE AIR TANKS



No. 5Z361

Made In U.S.A.

The ASME Certificate is required by law in many cities and states to pass safety codes, and assures that: (1) code approved materials are used, (2) steel plate is without defects and is specified thickness, (3) proper welding techniques are employed by experienced operators, (4) opening and supports are correct size, and (5) tank has passed rigid tests.



ASME Code and National Board Registered Tanks. ASME code (all models). National Board Registered (60, 80, & 120 gal.)

These American Society of Mechanical Engineers (ASME) U and UM Code air tanks meet city and state requirements for most commercial and industrial installations. Each unit is built, inspected and tested to meet rigid standards adopted by ASME.

NOTE: No. 4KP88 does not have baseplate.

No. 5Z365

SPEEDAIRE®

- Removable ASME inspection ports for increased piping flexibility
- Large baseplates to accommodate a wide variety of pumps. Note: No. 4KP88 does not have a baseplate
- Tall baseplates for faster, easier assembly
- Bases are pre-drilled to accommodate the most popular motor frame sizes
- Drilling will be required for pump mounting
- Large 3/8" drain port with drain cock reduces clogging

Designed to accept new or replacement compressor and motor assemblies; No. 5Z359 can be operated with gas engine to 5 HP max. All other models are designed for use with electric motors only. Base plate slots provided for motor assembly. Foot pads on 60, 80, and 120-gallon horizontal units. An ASME Certificate of Inspection is available, listing registered serial number, and verifying that tank has been inspected by an independent agency in accordance with ASME standards.

NOTE: California OSHA Code 462(L)(2) requires the pump, tank, and motor be tested as a complete unit. These tanks comply with this code when used with certain Speedaire and Dayton pumps.

# INTAKE FILTERS/ SILENCERS AND REPLACEMENT ELEMENTS

**Solberg intake filters/silencers and replacement elements** are used by many original equipment manufacturers.

**Filters/silencers are used at the intake manifold of air compressors** to provide 99%+ efficient filtration at 10 microns, per SAE fine dust test.

**Tube silencers in housing decrease noise level** from 5 to 15 dB. Moisture-resistant polyester cloth element handles hot air and oil mist from unload cycle of reciprocating air compressors. (No. 5Z665 uses paper element). Low pressure drop of approximately 3 to 5" water at rated load. Rugged, all-steel weather hood.

**Replacement filter cartridges for use with Solberg brand and many OEM filter/silencers.** Specifically designed to withstand the strong pulsations of air compressor pumps. Easy to replace. Nos. 1R417 and 5A718 include polyurethane prefilter to increase dust loading capacity 40 to 50%. Solberg brand.

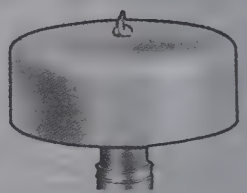
## INTAKE FILTER ADAPTER FOR CHAMPION AND DAYTON COMPRESSORS

**1" NPT adapter** allows replacement of existing intake filter with Solberg intake filter/silencer, No. 4Z680. Adapter slides into air intake of compressor pump and is tightened with set screw. Silicone O-ring provides positive seal. Solberg brand (AD-CP100)



For use with these Champion air compressors and Dayton compressor pumps:

Fits Champion compressors: 5Z064, 5Z065, 5Z066, 5Z067, 5Z068, 5Z069

Fits Dayton Compressor pumps: 3Z172, 3Z180, 3Z181, 3Z182 3Z183

**No. 5Z664.** Shpg. wt. 0.1 lbs. List $6.85. Each ..... **$6.45**

SOLBERG

## INTAKE MANIFOLD KIT WITH FILTER/SILENCER

Replaces head plate on Speedaire compressors (listed below) for addition of No. 4Z679 Solberg intake filter/silencer. This combination permits quieter operation and increased filtration.

For use with these Champion air compressors and Dayton compressor pumps:

Fits Champion compressors: 5Z064, 5Z065, 5Z066, 5Z067, 5Z068, 5Z069

Fits Dayton Compressor pumps: 3Z172, 3Z180, 3Z181, 3Z182 3Z183

**No. 1R421.** Intake manifold kit. Shpg. wt. 2.0 lbs. List..... $82.99. Each ..... **$52.00**

**No. 4Z679.** Filter/Silencer. Shpg. wt. 2.0 lbs. List ..... $21.20. Each ..... **$18.50**

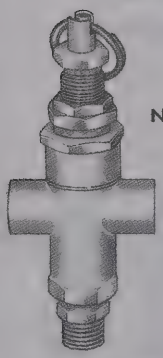
# UNLOADERS AND RELIEF VALVES

control devices inc.

No. 4TK14



A

## A LOAD GENIE CONTINUOUS RUN UNLOADER CONTROL

**Self-contained, continuous run, manifold vent unloader** use three components required in conventional continuous run control systems: pilot valve, check valve, and suction or vent unloader valve. Converts any pressure switch control compressor to constant speed unloader type.

**Can be applied to any gas engine driven compressor** and to compressor applications where air consumption is steady and exceeds 50% of free air delivery. Preset to cut in at 95 PSI and out at 115 PSI. Range and differential can be adjusted to fit needs. 60–250 PSI Range. Stainless steel springs and Teflon seats. 1/8" tap for engine throttle control.

| Max. CFM | (F)NPT Inlet (In.) | (F)NPT Outlet (In.) | (F)NPT Vent Outlet (In.) | Brass Body | Dimensions (L x H) (In.) | Control Devices Model | *New!* Stock No. | List | Each | Shpg. Wt. |

B

New

## B UNLOADER PILOT VALVE

**Single all-in-one control** is adjustable for pressure range and differential. Used on compressors with suction valve head unloaders. Includes an easy opening manual unloader sleeve for start-up under no load conditions. Body is forged brass, springs and ball are stainless steel. 1/4" (F)NPT inlet, 1/8" outlet. Includes 1/4 x 1/4" (M)NPT adapter. Preset at 95 to 115 PSI range. 250 PSI maximum working pressure. 350°F maximum operating temperature. Control Devices brand (P25G).

**No. 3X818.** Unloader valve. Shpg. wt. 0.5 lbs. List $15.14. Each.....**$12.80**

No. 4TK26

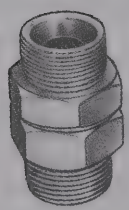
C

## C VARIABLE PRESSURE RELIEF VALVE

- **Installed directly in head of small compressor**
- **Micrometer-style scale, 0-100 PSI**
- **250°F max. temperature**
- **Brass body/nylon knob**
- **Stainless steel poppet/fluoro-carbon O-ring**

A variable pressure relief valve designed specifically for installation directly into the head of small (less than 2HP) tankless air compressors. May also be used wherever a low-flow variable pressure relief valve is used. Control Devices model TR25.

***New!* No. 4TK26.** Shpg. wt. 2.5 lbs. List $11.15. Each.....**$8.36**



D

No. 6D927

## D ENGINE DRIVEN COMPRESSOR THROTTLE CONTROLS

Kit contains components required to install engine "slow down" device on engine driven air compressors. Can be used with all makes of unloader controls and pilot valves (e.g. 5X709, 3X818) to throttle engine back to idle whenever compressor is unloaded. Saves gas and wear and tear on both engine and compressor. Fits all major engine types. Brass cylinder with nitrile O-ring and stainless steel spring with 1/8" NPT (M). Vinyl coated steel jacketed stainless steel cable can be cut to length. Minimum pressure 60 PSI.

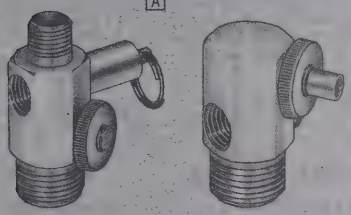
## E LOAD GENIE UNLOADER & CHECK VALVES

Eliminates the need for pressure switch unloader and receiver check valve. Unloads manifolds when air flow stops. Brass body, Teflon seals and stainless steel spring withstand temperatures to 450°F. Max. working pressure 250 PSI. External threads coated with Loctite® Vibra-Seal® 516 dry type thread sealant.



**Nos. 5A703 through 5A706** have (F)NPT inlet and (M)NPT outlet to tank. Nos. 4X996 through 4X999 are threaded to accept compression fitting at inlet, and have (M)NPT outlet to tank.

## A TANK MANIFOLDS

**All-in-one outlet fitting** for air compressor tanks combines safety valve, outlet valve, tank mount fitting, and fittings for mounting user's air gauge and pressure switch. Model for air carry tanks is similar but has tire-type filler valve in place of pressure switch fitting.

**Safety valve is** factory set for 150 PSI -40 to 180°F temperature range. Not suitable for accepting discharge directly from compressor. Airflow through valve must be from the air receiver into the tank-mount fitting. Fitting sizes: tank mount, 1/2" (M)NPT; pressure switch mount (not on No. 6X272) 1/4" (M)NPT; gauge mount and outlet 1/4" (F)NPT, 4H x 3½W x 3½"D brass body. External threads coated with Loctite® Vibra-Seal® 516 dry type thread sealant. Seals most fluids at temperatures from -65° to 250°F (300° intermittent).

| Max. CFM | Type | Tank Mount (In.) | Pressure Switch Mount (In.) | Control Devices Model | Stock No. | List | Each | Shpg. Wt. |

## B COMPACT BALL-TYPE CHECK VALVES

Compact check valves, stainless steel spring and poppet seating on viton O-ring. Low cracking pressure with bubble-tight seal in backflow direction. Widely used in pneumatic circuits, but also suitable for small air compressors (less than 1 HP). Brass body, stainless steel spring, acetyl polymer retainer. Max. pressure 250 PSI. Max. temperature 250°F.

## C & D COMPRESSOR IN-TANK CHECK VALVES

Economical, reliable brass in-tank check valves for compressors, water or oil tanks. For industrial and commercial applications. Fluoropolymer poppet, stainless steel springs. Check valves have been tested to 400° F for water or oil; rated 450 PSI max. pressure. External threads coated with Loctite® Vibra-Seal® 516 dry type thread sealant. Seals most fluids at temperatures from -65° to 250°F (300° intermittent).

**Nos. 6X207, 6X208, 6X209, 6X210, 6D918, 6D919, 6D916 and 6X211** have female National Pipe Thread (NPT) inlets and male NPT into tank. **Nos. 6X213, 6X214, 6X215, and 6X216** have inlets threaded for compression fitting, no adapter for pipe thread-to-compression fitting thread needed. All check valves have 1/8" (F)NPT tapped unloader port; with removable plug for pressure switch unloader connection.

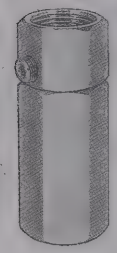
## E BRONZE AIR CHECK VALVES



Noiseless, dome-shaped, positive seating Fluoropolymer discs for maximum air flow. Valves open at less than 3 PSI; withstand up to 250 PSI back pressure, temperatures up to 450°F. Valves may also be used on water or oil lines. Globe valve body with threaded cap; both ends tapped. All models have 1/8" tap for pressure switch unloader connection. Vertical or horizontal mounting.

## A INLINE CHECK VALVES

**Specifically designed for air compressor discharge piping.** Valves feature all-brass bodies with filled Teflon poppets and stainless steel springs. Valves have 1/8" (F)NPT tapped port for pressure switch unloader connection. Valves open at less than 3 PSI with maximum hold back pressure of 450 PSI. Withstands temperatures to 400°F.

## B ASME AIR SAFETY VALVES

**Compact valves** are built to ASME standards, and are National Board Certified. One-piece brass body with resilient silicone elastomer poppet ensures positive, leakproof seal. Valves withstand maximum temperature of 250°F. Bubble-tight to within 10% of set pop-off pressure. Preset pressure limit is tested and sealed at the factory. External threads coated with Loctite® Vibra-Seal® 516 dry type thread sealant.

## C SCREWED OUTLET ASME SAFETY VALVES

- **Brass/stainless steel construction**
- **Silicone rubber seal**
- **Operating temperatures: -20°F to 250°F**
- **Lead seal**

Screwed outlet safety valves are built to ASME standards and are National Board Certified. Captured silicone o-ring ensures bubble-tight seal to within 10% of set pressure.

## D ASME HARD-SEAT AIR SAFETY VALVES

**Premium hard-seat valves** are built to ASME standards, and are National Board Certified. Brass body, chrome steel ball on brass seat, and stainless steel spring. Valves withstand maximum temperature of 350°F. Preset pressure limit is tested and sealed at the factory. Lead seal allows visual detection of tampering. External threads coated with Loctite® Vibra-Seal® 516 dry type thread sealant.

## A HIGH CAPACITY ASME AIR SAFETY VALVES

High capacity safety valves are used on large reciprocating and screw-type compressors, air dryers, and any other components requiring air overpressure protection with high flow rates. Built in accordance with the ASME Code, and flow capacity certified by the National Board. Brass bodies with stainless steel springs and silicone o-ring seals. Bubble tight to within 10% of set pressure. Preset pressure limit is tested and sealed at the factory. Temperature range -40°F to 300°F.

| Preset PSI | (M) NPT Size (In.) | Rated CFM @ Set Pressure | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |

## B ADJUSTABLE RELIEF VALVE

Versatile relief valve offers high flow rates and is easily adjusted to suit individual application. Valve comes with four color coded springs to cover set pressure range of 25 to 200 PSI. Flow rate through valve is 80 SCFM at 100 PSI. Brass body with silicone rubber seal and zinc-plated music wire springs. 9/16" hex body by 1.56" long, 1/4" (M) NPT. Max pressure 200 PSI. Max temperature 250°F. **Not an ASME approved valve.** Mfr's. model NC25K-1A100.

**No. 6D915.** Shpg. Wt. 0.2 lbs. List $4.26. Each.....$3.76

## C VACUUM/PRESSURE RELIEF VALVES

- **Relieve vacuum from 0-30" Hg, pressure to 20 PSI**
- **Max. temperature 250°F**
- **Easily convert from vacuum to pressure relief by reversing poppet and spring**

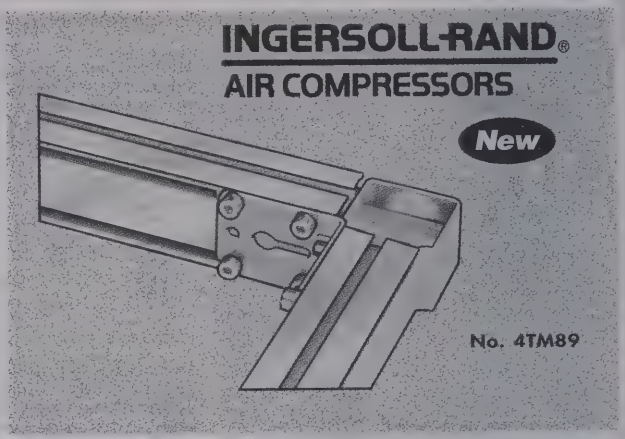
# SIMPLAIR COMPRESSED AIR PIPING SYSTEM



Simplair is a lightweight aluminum, extruded, compressed air piping system that provides considerable structural strength. Manufactured from high-grade anodized aluminum alloy, Simplair resists corrosion and contamination ensuring high-quality compressed air throughout the system. To plan your Simplair system, simply install a main header or loop system around the area where compressed air is required. Then add outlet points for drops and branch lines (sub-headers) at the same time or a later date if you are not sure where compressed air is needed. This flexible system ensures that modifications and expansions can be carried out quickly and easily at any time.

- **Energy savings - leak free system can save as much as 15% in power consumption**
- **Total flexibility - can be modified in minutes with little cost or down-time**
- **Non-corrosive system - maintains air quality from air compressor to point of use over full life of product**
- **Performance - achieves high flow rates and low pressure drops due to the low frictional losses through smooth boring of tubing**
- **Lightweight/clean - only 1/3 the weight of conventional steel or cast iron**
- **Hi-tech appearance - more aesthetically pleasing than conventional piping**
- **Maximum temperature: 226° F**
- **Maximum working pressure: 203 PSI**
- **ANSI B31.1 approved**
- **Can be used for compressed air, vacuum, and nitrogen applications**

**No. 4TN55 Toolkit** for assembling Simplair piping system. Includes: deburring tool, small drilling jig, stepper drill bit, tubes, pipe cutter, Allen wrench, torque wrench, and pilot drill. Ingersoll-Rand brand (88162326).

***New*** **No. 4TN55.** Shpg. wt. 5.4 lbs. List $250.00. Each.....**$199.00▲**

# INDUSTRIAL BRONZE GATE VALVES AND GUIDE TO COMPRESSED AIR TREATMENT PRODUCTS

## INDUSTRIAL BRONZE GATE VALVES

**Nibco bronze gate valves** are designed to be used as the main fluid shutoff in industrial piping systems. Rising stem design with solid wedge bronze disc and screw-in bonnet for positive sealing. Valves are rated for 150 PSI steam and 300 PSI cold water working pressure. Operating temperature to 365°F. Comply with industrial* specifications for basic valve design, wall thickness and material selection. For use with steam, water, compressed air, fuel gas, low pressure industrial gas and other petroleum based liquids and solvents compatible with bronze. (*) Specification MSS SP-80 Type 2.

## GUIDE TO COMPRESSED AIR TREATMENT PRODUCTS

**Caution:** Compressed air contains concentrated water vapor, oil, dirt particles, and other contaminants. If not removed, these contaminants can damage air lines, air tools, air motors, pneumatic equipment and controls, and cause spray painting problems like "fisheye" and "orange peel."

The compressed air treatment products listed below will produce clean, dry air which prolongs equipment life, keeps equipment performing at optimal levels for improved product quality, and reduces maintenance costs.

### MAIN LINE AIR TREATMENT PRODUCTS

**Air-Cooled Aftercooler**—Uses fan-driven ambient air to cool hot compressed air to safe, usable temperatures (100 to 120°F). Cooling of compressed air causes water vapor to condense to liquid. Separator and drain required to remove condensate. Removes up to 75% of water and 70% of oil.

**Water-Cooled Aftercooler**—Same as above, except uses counterflowing water in heat exchanger to cool compressed air.

**Refrigerated Dryer**—Uses refrigeration to chill compressed air to 35 to 50°F pressure dewpoint. Causes more water vapor to condense into liquid. Removes up to 96% of water vapor and 40% of oil from compressed air. Requires use of aftercooler upstream to pre-cool incoming air.

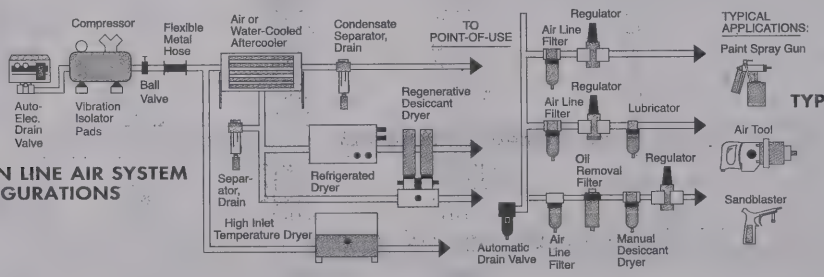
**Regenerative Desiccant Dryer**—Compressed air flows through beds of desiccant material which adsorbs water vapor. Produces -40°F pressure dewpoint for ultra-dry air (removes up to 99.9% of water). Use of oil removal filter upstream is recommended to prevent contamination of desiccant material. Requires upstream aftercooler to pre-cool incoming air.

**Three-In-One Dryer**—Refrigerated dryer which incorporates aftercooler and reheater. Handles high inlet temperatures without need for separate aftercooler, condensate separator, and drain.

**Automatic, Auto-Electric Drain Valves**—Drain liquid water from air compressor receiver tank, aftercooler, and other air system components.

### POINT-OF-USE AIR TREATMENT PRODUCTS

**Air Line Filter**—Removes dirt particle contaminants and liquids from compressed air.



**Oil Removal Filter**—Causes oil aerosols in compressed air to coalesce into liquid. Reduces remaining oil content of air to extremely low levels for critical applications.

**Manual Desiccant Dryer**—Installed at point-of-use. Desiccant material absorbs any remaining water vapor in compressed air.

**Lubricator**—Provides proper type and amount of lubricant to air tools and other pneumatic equipment requiring lubrication.

**WARNING: Air treated with the above products is not suitable for breathing without further purification.**

**NOTE**: Ratings based on 75°F, 75% relative humidity. Different conditions will yield different results. Consult equipment operating instruction to determine air treatment requirements.

TYPICAL MAIN LINE AIR SYSTEM CONFIGURATIONS

TYPICAL POINT-OF-USE SYSTEM CONFIGURATIONS

### PIPING REQUIREMENTS FOR AIR DISTRIBUTION SYSTEMS

Pipe size used should be large enough to keep the pressure drop between the tank and the point of use to a minimum. All piping should slope to an accessible moisture drain point.

The main air line should not be smaller than the compressor outlet size. For long lines, sizes shown at right are recommended.

Outlets should be taken from the top of the main line (tees facing up) to keep moisture out.

Check all piping and fittings regularly to avoid leaks in the system. Filters, regulators and other accessories described above should also be properly maintained.

### PIPE SIZES FOR COMPRESSED AIR LINES

| Air CFM | Length of Pipe Lines in Feet | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | 25 | 50 | 75 | 100 | 150 | 200 | 250 | 300 |

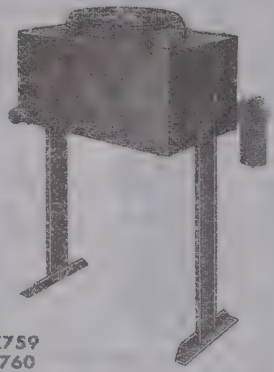
# AIR-COOLED AND WATER-COOLED AFTERCOOLERS



## AIR-COOLED AFTERCOOLERS

Nos. 5Z757 and 5Z758

THERMAL TRANSFER PRODUCTS, LTD

Nos. 5Z757–5Z760 may be mounted for either vertical or horizontal discharge

Nos. 5Z759 and 5Z760

Nos. 5Z761 and 5Z762

Replacement Parts Available
1-800-323-0620™

- Remove harmful water, oil, and contaminants from compressed air systems
- Precool hot air from compressor to temperatures required for use with compressed air dryers
- High efficiency copper tube/aluminum fin heat exchangers provide close approach temperatures with minimal power consumption
- Heavy-duty construction for long, trouble-free life
- Single point electrical junction box for ease of installation
- Includes legs
- Nos. 5Z759-5Z762 include ambient air filter to protect core from airborne contaminants
- Guards conform to OSHA requirements
- Fan motors are UL Recognized, CSA Certified
- Min. 80 PSI, max. 250 PSI, 350°F max.

NOTE: Use of flexible metal hose between air compressor and aftercooler is recommended to prolong equipment life. Separator and drain required to remove condensed water and oil. See Index for hose, separators, and drains.

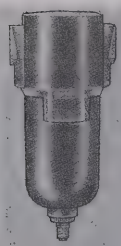
## WATER-COOLED AFTERCOOLERS

THERMAL TRANSFER PRODUCTS LTD

- Remove damaging water, oil, and contaminants from compressed air systems
- Highly efficient cooler is built with corrosion resistant copper tubes, brass shell, and internal baffles
- 3 GPM of cooling water needed per 100 CFM of air
- Cast-iron end bonnets are removable for servicing



For best performance, install aftercoolers so water flows in opposite direction to compressed air. 250 PSI maximum air pressure, 250 PSI maximum water pressure. 350°F maximum operating temperature. Mounting feet at both ends.

(*) Cooling compressed air to 15°F above inlet water temperature. Note: 3 GPM water flow required for each 100 SCFM.

# CONDENSATE SEPARATORS AND DRAIN VALVES

## CONDENSATE SEPARATORS AND AUTOMATIC DRAINS

Nos. 5Z771, 5Z614 and 5Z615 Separators with Internal Drains

Certificate No. FM21121

Nos. 5Z616 and 5Z618 Condensate Separators

No. 5Z620 Automatic Drain

No. 5Z617 Automatic Drain

• Registered to ISO 9001

WILKERSON CORPORATION • ENGLEWOOD, CO 80150

Replacement Parts Available 1-800-323-0620

**Patented, high efficiency separators** utilize centrifugal and impingement separation to remove liquid moisture and contaminants from compressed air systems.

**Typical separator installations** include aftercoolers, dryers and receiver tanks downstream from compressor, after long pipe runs, in drip legs, and point-of-use applications. Suitable for use in systems to 200 PSI at 150°F, over 10-100% of maximum flow rating. Pressure differential of 1 PSI or less results in significant energy savings.

**Nos. 5Z614, 5Z615, and 5Z771** feature cast zinc housings with quick-disconnect bowls for easy servicing, and internal float type drains to automatically discharge entrained condensate and dirt.

**Nos. 5Z616, 5Z618, and 5Z619** have cast aluminum housings with ribbed bowls for easy removal with C-spanner. These units are also equipped with a sight glass (except No. 5Z619) for monitoring proper operation, and can be equipped with an external automatic drain for a maintenance-free system (see table below for recommended drains).

**Automatic drains Nos. 5Z617 and 5Z620** are equipped with metal bowls compatible with all compressor lubricants, including synthetics. Rated at 200 PSI working pressure at 175°F. Drains discharge only when entrained moisture is present to prevent loss of compressed air. Override feature on No. 5Z617 allows manual operation of drain, if desired.

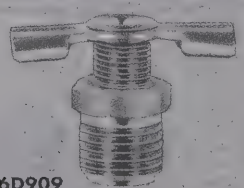
## AUTOMATIC DRAIN VALVE



WILKERSON CORPORATION • ENGLEWOOD, CO 80150

No. 4KT04

**Automatically drains equipment** each time compressor cycles. This eliminates manual draining, delivers dryer air and recaptures full storage capacity. 10 PSI differential opens valve on each compressor cycle. Contains no floats, magnets, or buckets to cause maintenance problems. For up to 100 HP compressors. 30 to 200 PSI pressure range. No field adjustments needed. Installed in 3/8" (F)NPT inlet drain tap in compressor tank and piped to drain. Valve also is used on filters, aftercoolers, and separators.

**No. 4KT04.** Wilkerson compact automatic drain valve. Shpg. wt. 0.8 lbs. List .....$58.60. Each .....$50.50

## DRAIN COCKS

No. 6D909

External seat drain cocks are used on air compressor receivers, condensate separators, radiators, and many other similar applications. Brass stem and body with zinc-plated steel handle. Max. pressure 200 PSI. Max. temperature 200°F. Control Devices brand.

# HIGH INLET TEMPERATURE DRYERS

## THREE-IN-ONE REFRIGERATED DRYERS

- 3-in-1 design combines aftercooler, refrigerated dryer, and reheater in a single unit. Eliminates need for a separate aftercooler to precool the incoming air from compressor
- Handles inlet air temperatures up to 180°F
- Produces 35°F pressure dew point. Removes 96% of harmful moisture from compressed air. Helps protect air system components, spray guns, air tools, sandblasters and other pneumatic equipment
- Operates in hot environments (up to 100°F max. ambient temperature)
- All copper spiral fin tube-in-tube heat exchanger provides maximum efficiency for heat transfer and water separation/filter
- Heat exchanger warranted for 5 years
- Includes monitoring instrumentation, separator, and drain trap
- Refrigeration systems utilize environmentally safe R-134A refrigerant (No. 5Z656) or R-22 refrigerant (all other models)

## COMBINATION AFTERCOOLER/SEPARATOR/DRYER/FILTER

Hankison HIT Series dryers offer a complete air treatment system—replaces aftercooler, separator, refrigerated dryer and filter.

- Ideal for commercial and industrial facilities with 5 to 20 horsepower compressors
- Makes air tools last longer; improves paint jobs; keeps pneumatic equipment operating
- Eliminates the need to frequently replace desiccants, paper rolls, etc.
- Cools—handles inlet air temperatures to 180°
- Dries—eliminates troublesome water
- Cleans—an integral 3 micron filter removes solids and oil aerosols (5ppm by weight remaining oil content)
- Reheats—saves energy and prevents pipe sweating
- Highly efficient heat exchangers and fan switch minimize energy usage
- CFC free refrigeration system requires no adjustments
- Includes power cord, On/Off switch, fault light, automatic condensate drain, ambient air filter and inlet strainer
- 5 year heat exchanger and 2 year refrigeration system warranty
- 175 psig max.; operates in ambient temperatures from 35°F to 110°F

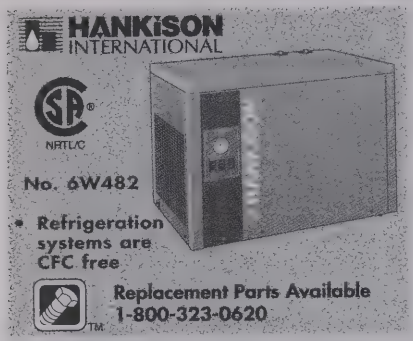
## AIR/LIQUID BY-PASS VALVE

HANKISON INTERNATIONAL



Replacement Parts Available
1-800-323-0620

- For use with most brands of refrigerated dryers, 5-15 CFM
- Allows servicing of system components without shutting down system
- Eliminates installation cost and space limitations of conventional three valve by-pass systems
- Push one button to change modes; no multiple valves to turn on and off
- Push button can be locked in place to make valve tamperproof
- Inlet and outlet fittings are compression type with rubber ferrule for installation on 3/8" O.D. tubing
- Can be used with liquids and gasses compatible with nylon, Buna N, and brass

# REFRIGERATED COMPRESSED AIR DRYERS

## HANKISON REFRIGERATED COMPRESSED AIR DRYERS

Hankison refrigerated dryers eliminate harmful moisture and provide high quality, clean, dry air.

- **Consistent outlet dew points assure dry air downstream**
- **Smooth surface heat exchangers permit low pressure drop through dryer**
- **Heat exchangers are fully encapsulated in non-degrading insulation to preserve cooling effect**
- **Non-fouling, smooth surface, copper heat exchangers maintain high heat transfer efficiency for life of dryer, no prefilter required**
- **Positive condensate discharge with compressed air powered automatic drain**
- **Refrigeration system service life maximized by continuous, non-cycling operation**
- **Utilize 134a refrigerant—CFC free**
- **Two-stage separator maintains high efficiency separation across wide range of flows. Includes 3 micron coalescer**

**Nos. 6W474, 6W475, and 6W476 feature** integral oil/dirt filter, power-on and high temperature warning lights, and six-foot power cord with plug. Full cabinet includes removable end screens and wall mounting bracket.

**Nos. 6W477 thru 6W483 have all features of No. 6W474. Also include** On/Off switch, refrigerant suction pressure gauge, and legs instead of brackets.

**No. 6W484 features** integral oil/dirt filter, and power-On, compressor-On, high temperature warning and refrigerant cut-out lights. Full cabinet includes removable end screens and legs. Also includes refrigerant suction pressure gauge.

## SPEEDAIRE REFRIGERATED COMPRESSED AIR DRYERS

Speedaire refrigerated dryers prevent water from damaging air operated tools, motors and cylinders, ruining paint jobs, and clogging sand blasters. Speedaire Compressed Air Dryers feature:

- **Oversized air-water separator handles heavy liquid loads . . . all models include a combination separator and 3-micron solid particle filter**
- **Automatic condensate drain**
- **Fully automatic refrigeration temperature control. Never needs adjustment. Maintains constant dew point and prevents freeze-ups**
- **Utilize CFC free refrigerants**
- **Smooth surface heat exchangers never need cleaning. No prefilter required ahead of dryer**
- **Refrigeration system includes suction accumulators, filters, dryers, and overloads to protect compressor**
- **Non-cycling operation allows long compressor service life**
- **115V units include power cord**
- **Heavy-duty cabinets supplied with wall mounting brackets or legs**
- **High temperature warning light gives ready indication of system malfunction or overloading. Other instrumentation includes: all units—power-on light; sizes 25 SCFM and larger—suction pressure gauge; 150 SCFM model also includes compressor-On and refrigerant cut-out lights**

(*) Dryer capacities at 38° and 50°F pressure dew point temperatures have been established with compressed air entering dryer at 100 PSIG and 100°F saturated with dryer operating in 100°F ambient temperature. Operating range: 35° to 110°F ambient. Maximum working pressure: 175 PSIG. Maximum inlet compressed air temperature: 120°F.

**If inlet temperatures exceed 120°F, precool air with air or water cooled aftercooler.**

# REFRIGERATED COMPRESSED AIR DRYERS

## SDR SERIES REFRIGERATED COMPRESSED AIR DRYERS

**Air dryers** combine the latest advances in refrigeration technology into an efficient and reliable package. Patent pending system eliminates refrigerant condenser fans, motors, and fan cycling switches. Ingersoll-Rand brand.

- **Simple design with max. reliability**
- **Environmentally friendly R-134A refrigerant**
- **Compact size**
- **Easy installation**
- **Max. inlet air temp: 120°F (49°C)**
- **250 PSIG maximum pressure**

NOTES: Dryer capacities at indicated pressure dew points are based on compressed air entering the dryer at 100 PSIG, 100°F, 100% RH, and 100°F ambient air temperature. Capacity ratings in accordance with CAGI Standard No. DF100 for Class H (33°F-39°F) pressure dew point. (▲) Net prices, Not subject to discounts.

## DXR SERIES REFRIGERATED COMPRESSED AIR DRYERS

**Air dryers** cool compressed air by mechanical refrigeration. Water vapor condenses and is removed from air stream by a moisture separator. Minimum maintenance, no purge air loss and low operating cost for an economical way to remove harmful moisture from compressed air systems. 120°F maximum ambient temperature and 130°F maximum inlet air temperature. If inlet air temperature exceeds 130°F, utilize an air or water cooled aftercooler to precool the air. Nos. 4M649, 4M870, and 4N456 include: Digital display of temperature data and fault warnings for inlet air, ambient air, refrigerant suction and refrigerant discharge. Microprocessor control, and automatic electric drain valve with adjustable operating set points. Ingersoll-Rand brand.

- **250 PSIG maximum pressure**
- **R134A or R22 refrigerant meets EPA regulations**
- **Smooth, non-fouling heat exchanger tubes eliminate need for prefilter**
- **Precooler maximizes refrigeration efficiency, reheater eliminates downstream pipe sweating**
- **99.99% efficient separator**
- **Auto condensate drain**

NOTES: Dryer capacities at indicated pressure dew points are based on compressed air entering the dryer at 100 PSIG, 100°F, 100% RH and 100°F ambient air temperature. Capacity ratings in accordance with CAGI Standard No. ADF100 (33°F-39°F) pressure dew point. Dryer input kw includes the refrigeration compressor, refrigrant fan and controls.

# DESICCANT DRYERS

## WILKERSON DESICCANT DRYERS

- Registered to ISO 9001

Certificate No. FM21121

- **Remove harmful moisture from compressed air systems through direct adsorption**
- **Useful for small systems and moisture sensitive point-of-use applications**
- **Used with air tools, instruments, and paint spraying equipment, or where air lines must be protected from freeze-up**

**Desiccant dryers** provide -45°F atmospheric dewpoint (<0.5% relative humidity at 78°F). Units rated to 150 PSI at 125°F.

**Nos. 5Z610 and 5Z611** have quick-release polycarbonate bowls for easy detection and replacement of saturated desiccant. No. 5Z769 has quick-disconnect aluminum bowl with desiccant saturation indicator.

**Silica gel desiccant material** contains 25% cobalt blue coloring which turns pink to indicate saturation. When desiccant becomes saturated, replace with new desiccant, or regenerate at 350°F. Replacement desiccant material also available. See table below. Wilkerson brand.

## REGENERATIVE DESICCANT COMPRESSED AIR DRYERS

HANKISON INTERNATIONAL

- For ultra-dry compressed air
- Prefilter and afterfilter included

NRTL/C

No. 6F569

Replacement Parts Available 1-800-323-0620

Prevent liquid water from forming in air systems exposed to temperatures below freezing. Adjustable for -40°F or -100°F pressure dew points. CSA certified.

Applications: Added protection where air is used for air tools, motors, cylinders and valves, logic circuits and instrumentation, cable and antenna pressurization, dust collectors, sand blasting, and painting. Ultra-dry compressed air for critical applications such as air agitation, air bearings, air blanketing, air conveying and fluidization, fine grit blasting, nitrogen replacement for electronic chip manufacturing, feedstock for ozone generators.

- **Large desiccant beds provide consistent outlet pressure dew points**
- **Tower repressurization promotes long desiccant life**
- **Bed design minimizes purge air usage**
- **Solid-state timer accurately controls tower cycling**
- **Heavy-duty purge exhaust muffler for quiet operation**
- **Uses easily replaced bulk desiccant—no special cartridges required**
- **Removable, cleanable stainless steel flow diffusers**
- **Non-lubricated, soft seated control valves**
- **Enclosed in durable metal cabinet for easy wall mounting**
- **Front-mounted control panel with Power-On light, tower pressure gauges, and On/Off switch**

**Note:** Electrical; 115VAC/1Ø/60 Hz, NEMA 1, includes 6 ft. power cord and plug. Minimum/Maximum Operating Pressure; 50/150 PSIG. Maximum Operating Temperature: 120°F. (If inlet temperature exceeds 120°F, use aftercooler to precool incoming air—see index under Aftercoolers.)

# DH SERIES PRESSURE-SWING REGENERATIVE DESICCANT COMPRESSED AIR DRYERS

HANKISON INTERNATIONAL

NRTL/C

- For ultra-dry compressed air (pressure dew points of -40°F, -100°F)
- Tower pressure gauges
- Moisture indicator
- Purge flow indicator
- Eliminate water from systems exposed to sub-freezing temperatures
- Reduce moisture content in critical applications

Replacement Parts Available 1-800-323-0620

No. 4HK98

## FEATURES

**Consistent Dew Points**—Large desiccant beds ensure sufficient contact time. Include extra desiccant to compensate for initial desiccant aging.

**Minimum Purge Air Use**—Towers are sized to retain the heat of adsorption, maximizing purge air efficiency.

**Maximum Desiccant Bed Life**—Desiccant won't fluidize. 3 to 5 year bed life.

**Safe**—Pressure relief valves, heavy duty mufflers for quiet operation. ASME code constructed. NEMA 4,4X.

**Easy To Maintain**—Fill and drain ports. Cleanable flow diffusers.

**Dual tower arrangement** allows one tower to dry the air supply while the other tower is regenerated. Towers are automatically switched on and off stream allowing continuous operation. Regeneration occurs by reducing pressure in a portion of the dried air (referred to as purge air) and passing it over the off-stream bed. No heaters are used.

**Rugged activated alumina desiccant** won't disintegrate in water. Offers high crush strength and resistance to abrasion. Environmentally safe. Standard pre-filter/after-filter packages include a high efficiency oil removal filter piped to the inlet of the dryer and a one micron particulate filter piped to the outlet. Dryer and pre-and-after filters are assembled on steel frame complete with floor stand, piped, wired, and shipped with full charge of desiccant. Includes lifting lugs for ease of transporting.

**NOS. 4HK98 THRU 4HL03, 4HL05, AND 4HL07 STANDARD CONTROL PANELS INCLUDE:**

- Tower status lights
- Cycle/mode selector—choice of 4 or 10 minute cycle (-40°F or -100°F outlet dew point) or test mode
- Switching failure alarm—monitors valve operation
- Purge Economizer Switch—allows manual purge air reduction when dryer operating at reduced loads

**NOS. 4HL04, 4HL06, AND 4HL08 SENSATHERM® MODELS INCLUDE:**

- Sensatherm® Automatic purge saving system—matches purge air use to the demand on the dryer
- Tower status lights
- Cycle/mode selector. Choice of 4 or 10 minute fixed cycles, demand mode settings for -40°F, 0°F, or +40°F outlet dew points, or diagnostic mode
- Alarms for switching failure or temperature probe malfunction

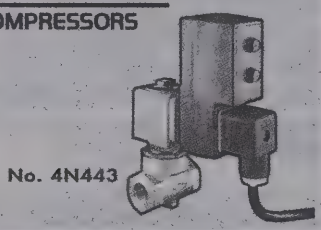
Inlet flows are established in accordance with CAGI standard ADF 200, Dual Tower Regenerative Desiccant Compressed Air Dryers - Methods for Rating and Testing.
Conditions for rating dryers are: inlet pressure - 100 PSIG; inlet temperature - saturated at 100°F. Electrics: 120 VAC 1 ph 60 Hz, 110 VAC 1 ph 50 Hz; NEMA 4, 4X.
Operating conditions: Maximum working pressure: 150 PSIG; Minimum working pressure: 10 minute cycle - 60 PSIG, 4 minute cycle - 80PSIG. Maximum inlet air or ambient air temperature: 120°F; Pressure drop at rated flow: 3 PSI.

# CONDENSATE DRAIN VALVES

INGERSOLL-RAND®
AIR COMPRESSORS

## PNEUMATIC OPERATED DRAIN VALVES

- **No electronics needed**
- **Reduced installation and operating cost**
- **Routine maintenance eliminated**



**No. 4KR56 moisture minder automatic condensate drain valve,** designed to automatically drain condensed water and oil from a compressed air system. Energy efficient design maintains system pressure and air flow, increasing productivity. Installation fittings and instruction materials included. Ingersoll-Rand brand.

**No. 4N445 system saver high capacity sump** allows adaptation to all condensate collection points within a compressed air system. High capacity drain valve provides protection to the compressed air system. Dry control system; moisture does not contaminate or corrode valve actuator. Unique liquid seal float design eliminates air leakage. Ingersoll-Rand brand.

### SYSTEM SAVER DRAIN VALVE SPECIFICATIONS AND ORDERING DATA

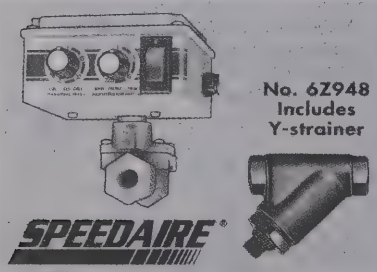
INGERSOLL-RAND®
AIR COMPRESSORS



## ELECTRIC CONDENSATE DRAIN VALVES

- **NEMA-4 Electric components**
- **Fully automatic, assures unattended condensate removal**
- **7/16" Drain orifice, eliminates clogging**
- **Integral surge protection safeguard electronic timer**
- **Protective in-line strainer**
- **Adjustable cycle, 1/2 min. to 45 min., and purge time, 1/2 sec. to 10 sec., matching moisture load**
- **Drain cycle 1/2 min. to 45 min; purge time 1/2 sec. to 10 sec.**

Electronic drain valves provide a reliable low cost alternative to manual style drains. Minimum maintenance required. Ingersoll-Rand brand.

## AUTO-ELECTRIC DRAIN VALVE

**Helps eliminate leaking, clogging, noise,** and other problems found in float-type drains. Solenoid controlled by a solid-state timer opens and closes drain valve at user-selected intervals.

**Features include:** Solid-state controls; corrosion-resistant waterproof molded solenoid coil; skinner brass and stainless valve; corrosion-proof molded plastic enclosure; manual override switch with "On" light; Buna N seals; and 6 ft. heavy-duty grounded power cord and plug.

- **1-60 Minute Adjustable Cycle Time**
- **1-30 Second Adjustable Drain Time**
- **1/4" (F)NPT Connection**
- **200 PSIG Maximum Working Pressure**
- **115Volts, 60 Hz, 0.25 Amps**
- **4 1/16H x 3 5/16W x 4 3/16"D**
- **Includes Y strainer**

**No. 6Z948.** Shpg. wt. 2.0 lbs. List $150.00.
Each ..... **$137.75**

control devices inc.

## CABLE-OPERATED DRAIN VALVE

Designed to be installed wherever a drain valve is needed, but access to valve is difficult. Examples include truck air brake reservoirs and air compressor receiver tanks. Brass body and stem, nitrile O-ring. Vinyl covered steel cable. Maximum pressure 200 PSI. Maximum temperature 200°F. Control Devices brand.

| NPT Size (In.) | Hex (In.) | Cable Length (Ft.) | Height (In.) | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |

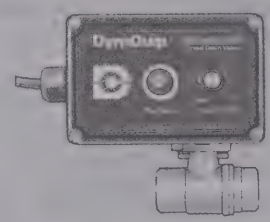
# POWER ACTUATED BALL VALVES

## ELECTRIC ACTUATED BALL VALVE DRAIN

- **Adjustable timer provides 5 minute to 10 hour cycles**
- **3½ Second drain/fill cycle;**
- **Flow Rate 186 PM at 186 PSI 1.05 gallon/cycle**
- **(F)NPT connections**
- **Rated 200 PSI**
- **Heavy-duty motor**
- **115V, 60 Hz, 2.5 amp**
- **NEMA 4 enclosure**

**Quickly and effectively drains water and sediment** from compressed air equipment without clogging and with minimum air loss. Full port valve design helps eliminate the need for a Y-strainer. Wide range electronic timer provides complete flexibility for varying condensate volumes.



Weatherproof unit can be used with a wide variety of liquids for sampling or purging tanks, vessels, and pipes at programmed intervals.

**Installs simply** with integral mounting bracket. Mounts in any position. Useful for draining air receivers, air dryers, filters.

**Features include:** Corrosion-resistant stainless steel ball valve with RTFE seats; strong, impact-resistant ABS timer housing; test button and 6 ft. heavy-duty grounded power cord and plug. Includes 1/4" bushings.

**1/2" Valve**

**No. 6W175.** Shpg. wt. 5.5 lbs. List..... $215.00.
Each ..... **$199.00**

No. 6W175

Replacement Parts Available
1-800-323-0620

## AIR AND ELECTRIC ACTUATED BRASS BALL VALVES

DynaQuip actuated brass ball valves offer a choice of pneumatic or electric actuators. All units feature direct mount brass ball valves that eliminate actuator misalignment and provide a compact assembly profile. O-ring stem seals provide long life and low maintenance. All valves are full port, and have chrome plated brass balls, PTFE seats and fluorocarbon stem seals. Valve temperature range -10°F to 300°F; not suitable for steam. 600 PSI cold working pressure for 1/2 to 3/4" sizes, 300 PSI cold working pressure for 1-2" size.

Pneumatic actuators are either double acting models (air to open, air to close) or spring return models (air to open, close upon loss of air or power.) Units feature rack and pinion design with stroke adjustment, hard anodized aluminum housing, 300 series stainless steel bolts, lapped cylinder walls and piston guide bearings for long service life. These units include an integral NEMA4, 120 VAC, 60 Hz, NAMUR mount solenoid with two 1/4" NPT ports allowing easy connection and control of air sources. Actuator to valve mounting conforms to ISO 5211/DIN3337 actuator mounting standards. Actuator temperature range -5°F to 175°F. Actuator air pressure required 80 to 140 PSI.

Electric actuators feature reversible motors, NEMA 4 enclosure, terminal strip, manual override, anti-corrosive coating and a hardened precision gear train. Limit switches 15A, 1/2 HP, 125 - 250 VAC, provide two remote signaling positions, Cycle time - 2½ seconds for 1/2 to 1" sizes, 5 seconds for 1¼ and 1½" sizes, 15 seconds for 2" size. Actuator temperature range -4°F to 150°F.

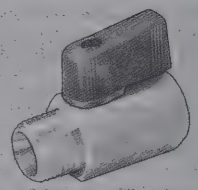
# BRASS BALL VALVES



## BRASS MINI BALL VALVES

**DynaQuip industrial quality**, one-piece brass bar stock design mini ball valves provide the space savings necessary for small line fluid and gas control applications. Designed for handling compressed air, water, fuels, gases, and other non-corrosive liquids in industrial applications that require compact ball valves. Top-of-the-line features include 450 PSI CWP rating, PTFE ball seats for a positive seal in both directions, Viton stem seal, chrome plated brass ball and body for long life and extra corrosion resistance, bottom loaded stem for safety. Corrosion resistant nylon wing handle is compact, easy to use, and clearly shows ball position. Each valve is leak tested to ensure quality. Valve body functions as wrench flats for easy installation. Operating temperature range is -4 to 200° F. Valves have full NPT threads made to ANSI B1.20.1 standards. Full porting on 1/8" and 1/4" models, standard porting on 3/8" and 1/2" models. Offered with female pipe threads on both ends of valve, or with female pipe threads on one end and male pipe threads on the other.

## BRASS BALL VALVES

**DynaQuip industrial two-piece forged brass ball valves** are precision machined for maximum strength, durability and maintenance free operation. Top-of-the-line features include 600 PSI WOG and 150 PSI WSP ratings, reinforced PTFE seats, chrome plated ball for long life, separate pack nut to permit handle removal under pressure and bottom loaded stem for safety. Corrosion-resistant steel handle comes with vinyl grip and 1/4" twin stop for positive control. Valves operate in either direction. Vacuum rating to 25 in. Hg. Temperature range is -20 to 370°F. NPT threads. Full port to 2". Offered with female pipe threads on both ends of valve. Offered with female pipe threads on one end and male pipe threads on the other. Listings/Approvals: UL, AGA, CGA, Factory Mutual.

## SAFETY EXHAUST/ENERGY LOCKOUT BRASS BALL VALVES

Comply with requirements of paragraph 1910.147 of Occupational Safety and Health Standards. Exhaust port automatically and continuously bleeds down compressed air trapped between valve and machine when valve is closed, relieving potentially hazardous stored energy. This venting action ensures that air-powered equipment is safe to service. Strong lockable handle with vinyl grip accommodates 1/4" or 9/32" lock shackles, when valve is in closed position only. Two-piece body construction with reinforced PTFE seats and chrome plated ball. Full port design to minimize pressure drop. For use with compressed air and inert gases. Rated for 200 PSI operating pressure, 40° to 140°F temperature range. Female NPT.

DynaQuip

- **Energy Isolating and Lockout Valve meets OSHA Standard 1910.147**

# BALL VALVES

## CARBON STEEL BALL VALVES

**DynaQuip one-piece carbon steel ball valves** feature self-adjusting, spring loaded stem packing that ensures long, leak-free operation. Bottom loaded stem resists blow-out. Valve body functions as wrench flats. Reinforced PTFE seats are designed to wipe ball clean upon closing. Valve is threaded on both ends and has vinyl grip handle. **Pressure rating is 2000 PSI for 1/4 to 1" valves, 1500 PSI for 1¼ to 2" valves.** Can also be used in vacuum service up to 25 in. Hg. Operating temperature is -20° to +425°F. Full porting on 1/4 and 3/8" models, reduced porting on others.

## STAINLESS STEEL BALL VALVES

**DynaQuip two-piece stainless steel ball valves** handle most acids, caustics, solvents, brines and other fluids compatible with Type 316 stainless steel. Bodies are investment cast ASTM A351 GR CF8M alloy, and the ball, stem and packing nut are machined from ASTM A276 Type 316 material. The ball seats and stem seal are reinforced PTFE; body seal is virgin PTFE; handle is Type 304 stainless steel; handle nut is 18-8 stainless steel; and handle has a vinyl grip.

Bottom loaded stem resists blow-out. Separate packing nut allows handle removal in service and mounting pad permits actuator or panel mounting. 1/4" to 2" (F) NPT sizes. Maximum pressure rating is 2000 PSI, sizes 1/4"-1" and 1500 PSI. sizes 1¼"-2" for air, gas, water, oil and other liquids; 150 PSI for steam. Vacuum rating is 25" Hg; temperature rating is -20°F to +425°F. Standard Porting.

## MEDIUM PRESSURE CARBON STEEL BALL VALVES

DynaQuip medium pressure carbon steel ball valves feature two-piece screwed body design. Body is C12L14 steel with a corrosion-resistant zinc phosphate coating. Chrome-plated ball assures smooth operation and extended seat life. Carbon and graphite filled PTFE seats for long wearing and low torque operation. Bottom-loaded stem for safety, adjustable stem packing. Zinc-plated steel handle resists corrosion. Operating temperature is -20° to 425°F. All sizes full port to minimize pressure drop. Pressure rating is 3000 WOG and 150 WSP. 100% leak tested. NPT female threads, ¼" to 1" sizes. (SAE O-ring boss ends available special order.)

## HIGH PRESSURE CARBON STEEL BALL VALVES

**DynaQuip high pressure carbon steel ball valves** feature heavy duty bar stock or forged body 3-piece designs. Bottom loaded stems have nitrile rubber seals that require no maintenance. Ball seats are lubricated polyacetal resin designed to allow operation of the valve at full rated pressure without seat distortion. Valves have large porting to minimize pressure drop. Valve housing has a uniform black oxide finish, chrome plated balls assure smooth operation and extended seat life. Valve threads are female NPT conforming to ANSI B1.20.1. Handles are cast zinc alloy for 1/4 - 1/2" sizes and cast steel for the 3/4 - 2" sizes. All sizes have a 3 to 1 minimum safety factor. Operating temperature is -20° to 175° F. 1/4- 1 1/2" sizes have full port openings, 2" size has large standard port. Suitable for use with petroleum based, water/glycol and water/oil emulsion hydraulic fluids. Pressure rating: 1/4 - 3/8" 7000 PSI, 1/2" 5800 PSI, 3/4 - 2" 4600 PSI.

# COMPRESSED AIR FILTERS AND O-RINGS

## COMPRESSED AIR FILTERS

Coalescing filters effectively remove solid particulates, liquid water, oil and aerosols from compressed air. Contaminants are removed by mechanical separation, which occurs when compressed air is accelerated or channeled, which causes dense particles or liquids to drop from the air stream. Coalescence occurs when liquids, aerosols or particulates randomly collide with small diameter fibers. The process merges invisible contamination into larger droplets which gravitate to base of filter housing. Ingersoll-Rand brand.

- **Coalescing filters provided with two filtration efficiencies dependent upon application**
- **1.0 PPM element meets General Industry requirements for coarse filtration (mineral or synthetic lubricants)**
- **0.001 PPM element designed to meet difficult compressed air filtration requirements (paint spraying, coating operations and/or pneumatic instrumentation)**
- **Extended element life; minimum maintenance**
- **Integral element service indicator accurately monitors need for maintenance**
- **Automatic condensate drain (100 CFM and below)**

(*) Filter capacity based on 100 PSIG operating pressure and 100F inlet air temperature. Maximum filter operating pressure is 250 PSIG. (†) Filtration efficiency (99.9997%) attained by Dioctylphthalate (DOP) penetration test.

## STANDARD AND PROFESSIONAL O-RING KITS

### STANDARD O-RING KITS

High quality, industrial grade O-rings. 12 size, 1050-piece Buna N or 550-piece Viton kits available. Series 2, 70 durometer. Includes resilient 12-compartment plastic case. Shadow graph and chart on inside cover for easy O-ring identification.

### PROFESSIONAL O-RING KITS

High quality, industrial grade O-rings. 37 size, 513-piece Buna N or 33 size, 489-piece Viton kits available. Series 2, 70 durometer. Includes 2-compartment ABS plastic carrying case with molded handle. O-rings stored on removable locking pegs which prevent O-rings from falling off when case is tipped. Built-in gauges for O-ring sizing.

## AIR LINE COALESCING/OIL REMOVING FILTERS

**Dual filtration system** incorporates inner impregnated paper support with thick borosilicate fibers filter to remove up to 99.9% of submicron particles and liquid aerosols including oil. Insures clean, filtered, oil free air. For applications where oil in air line must be removed to avoid damage to finished product.

**Grade 6 elements** are 99.97% efficient at removing .3 to .6 micron particles, and leave a maximum oil carryover of .008 parts per million in your system. Grade 6 elements offer very high efficiency for your most demanding coalescing applications.

**Grade 10 elements** are 95% efficient at removing .3 to .6 micron particles, and leave a maximum oil carryover of .85 parts per million in your system. Grade 10 elements offer higher flows with excellent system protection.

**Compact inline coalescing filter** in disposable coalescing style elements for cost effective filtration on low flow applications. Available in two filtration levels.

# AIR LINE FILTERS

SPEEDAIRE®

Replacement Parts Available
1-800-323-0620

## AIR LINE FILTERS

### A MINI AIR LINE FILTER

Compact, high flow miniature air filters offer efficient water removal while removing dirt and scale down to 5 microns in size. Miniature filters are standard with a clear, shatterproof polycarbonate bowl and easy to operate twist drain.

### B AIR LINE FILTERS

Using a unique deflector system, Speedaire air filters remove water and heavy contaminates by creating a swirling air system inside of the bowl. Depth style elements remove impurities down to 40 microns in size while allowing high flows. Liquids are removed from the clear, shatterproof polycarbonate bowl through the use of standard twist drain assembly. Metal bowl guard standard.

### C HEAVY-DUTY AIR LINE FILTERS

Similar to B, but with a rugged die cast bowl with sight glass for heavy-duty use at higher pressures and temperatures.

# AIR LINE REGULATORS

SPEEDAIRE®

Replacement Parts Available
1-800-323-0620

A

B

C

D

E

## A MINI AIR LINE REGULATORS

Self-relieving and reverse flow capability. Nonrising "locking" adjustment knob. Solid control piston with resilient seat for service-free operation. 2-125 PSI adjustable output. Includes two 1/8" NPT gauge ports. Uses No. 1X802 pressure gauge.

## B HIGH FLOW MINI AIR LINE REGULATOR

Compact regulator offers high flows. Self-relieving piston construction gives long trouble-free operation and ease of pressure adjustment. Balanced poppet for quick, accurate pressure regulation. 2-125 PSI adjustable output. Includes two 1/4" NPT gauge ports. Uses No. 1X762 pressure gauge.

## C HEAVY-DUTY AIR LINE REGULATORS

Rolling diaphragm regulator combines features of solid piston styles with the pressure regulation characteristics of typical flat diaphragm types for long service life with accurate pressure control. Self-relieving style and balanced poppet construction aid in setting and holding pressures. 2-125 PSI adjustable output. Includes two 1/4" NPT gauge ports. Uses No. 1X762 pressure gauge.

## D HEAVY-DUTY AIR LINE REGULATORS

Balanced poppet and efficient aspirator provide quick response and accurate pressure regulation. Self-relieving piston design gives long service life. 2-125 PSI adjustable output. Includes two 1/4" gauge ports. Uses No. 1X762 pressure gauges.

## E KEY LOCK

Speedaire Key Lock offers a field convertible, tamper-resistant option for systems that need protection from misadjustment. Fits all speedaire regulators except: 1Z838, 2Z324, 2Z767, 3JV14, 3JV27, 4Z030, 4Z546, 5Z415, 5Z419, 6ZC27, 6ZC33.

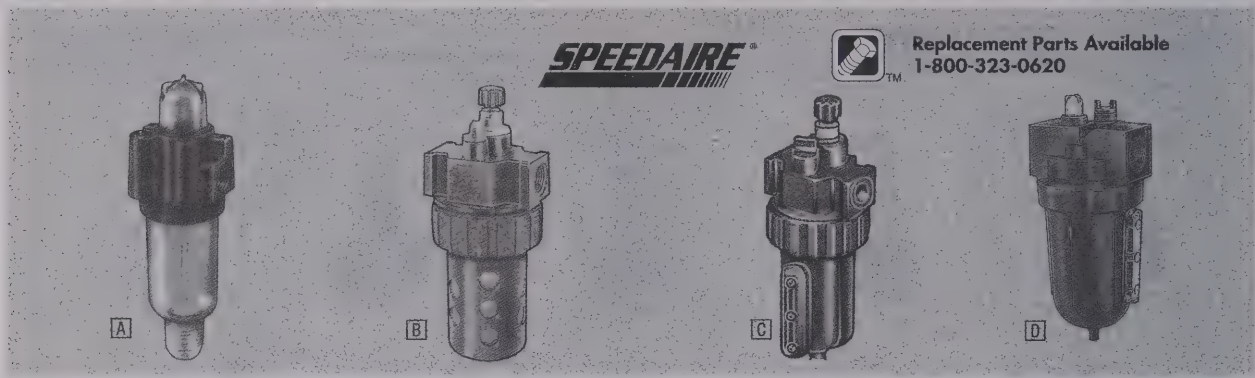
(†) CFM flow measured with 100 PSIG inlet adjusted to a set pressure of 90 PSIG and a 15 PSIG pressure drop.

# DISPOSABLE IN-LINE DESICCANT FILTER/DRYER

Ideal for paint spraying applications. Filter/dryer provides final protection against painting failures by removing oil aerosols and moisture that may have bypassed main air filtration system. Unit mounts directly to spray gun inlet for most efficient type of filtration. Removes oil, water and dirt by using a sintered bronze element for dirt, an oil removing filter media for oil vapor, and a desiccant drying agent for water vapor. Silica gel in clear plastic filter changes color when replacement is needed. 15 CFM. Max PSI 125, max temp. 130°F. 40 micron. Package of two. Speedaire brand



**No. 6ZC63.** Disposable Air Filter/Dryer. Shpg. wt. 0.4 lbs. ..... **$11.95**
List $12.50. Each

SPEEDAIRE®

- 3¾ x 1 11/16" diameter
- 1/4" NPT female inlet and male outlet
- Compact and lightweight
- Removes water, oil, and dirt
- Changes color when replacement is needed
- Mounts directly to spray gun inlet

# AIR LINE MICROMIST AND MIST LUBRICATORS

## MICROMIST AIR LINE LUBRICATORS

Proportional oil delivery over wide range of air flow. Generates oil particles 5 microns and smaller downstream (up to 100 ft.) to lubricate systems with complex piping arrangements. Bypass gives wide operating range without excessive pressure drop. B Clear, shatterproof polycarbonate bowl with metal bowl guard. C and Dhave metal bowls with sight glass.

## MIST AIR LINE LUBRICATORS

Wide operating flow range with minimal pressure drop. Precision needle valve oil feed adjustment. Can be filled under pressure. Clear, shatterproof polycarbonate bowl with metal bowl guard, except C, D, which have metal bowls with sight glass. Generates oil particles of 50-80 microns in size (should be used within 15-20 feet.)

(*) Polycarbonate bowls are not recommended for use in atmospheres containing chemicals such as acetone, benzene, carbon tetrachloride, ethylene dichloride, gasoline, and toluene, and/or air compressor systems using synthetic fire-resistant lubricants. (†) CFM based on 100 PSIG inlet and 5 PSIG pressure drop.

## AUTO FILL DEVICE FOR LUBRICATORS

Speedaire's automatic fill device offers a field conversion to create an automatic filling system to keep lubricators full on a daily basis. To use on models 3JV86, 3JV88, 3JV90, 2Z459 and 6ZC30 you must order new bowl part #387-9442. To use on models 3JV80, 3JV82, 3JV84, 3JV76, 2Z458 and 1Z886 you must order new bowl part #384-4081. Call Grainger Parts Operations, 1-800-323-0620 (Fits all Speedaire lubricators except 2Z768, 3JV92-94, 5Z419, 2Z460, 4Z547, 6ZC26, 3JV14, 3JV27).

**No. 3JV58.** Shpg. wt. 0.1 lbs. List $54.28. Each ..... **$51.50**

## "PIGGYBACK" FILTER/REGULATORS

**Space Saving "Piggyback" unit** combines filter and regulator features to provide optimal performance in minimal space. Pressurized air flows through louvered deflector in a swirling pattern, with liquids and dirt falling into lower baffle where they are prevented from re-entering the air stream. Clean air passes through the element and poppet area to outlet port.

A Unit comes with a shatterproof polycarbonate bowl with manual drain, and 5 micron filter elements. Regulator is self-relieving style, with non-rising adjustment knob, and has an adjustable output of 2-125 PSI. Unit has two 1/8" NPT gauge ports, uses 1X802 pressure gauge.

B, C Units come with a 40 micron filter element, self relieving style regulator with T-handle adjustment. 2-125 PSI adjustable output range. All units come with two 1/4" (f) NPT gauge ports, and use No. 1X762 pressure gauge. B Unit comes with shatterproof polycarbonate bowl with metal guard and manual drain. C Unit comes with metal bowl with sight glass, and manual drain.

D, E Units are the same as A and B, and also include pressure gauge and mounting bracket.

No. 4Z031 Auto Drain can be used on all units, except Nos. 4Z030 and 5Z415.

(*) Polycarbonate bowls are not recommended for use in atmospheres containing chemicals such as acetone, benzene, carbon tetrachloride, ethylene dichloride, gasoline and toluene, and/or air compressor systems using synthetic fire-resistant lubricants. (†) CFM flow measured at 100 PSIG inlet adjusted to a set pressure of 90 PSIG and a 15 PSIG pressure drop. All regulators are self-relieving type. For replacement filter elements, see page 2916.

NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

# AIR LINE FILTER, REGULATOR AND LUBRICATOR COMBINATIONS

## A, B "PIGGYBACK" FILTER/REGULATOR AND LUBRICATOR COMBINATION UNITS WITH GAUGE AND BRACKET

"Piggyback" filter regulator and lubricator combination units offer reduced installation time and require less space. Units are piped together and include a pressure gauge and mounting bracket.

A Includes panel mounting nut and 5-micron filter.

B Includes 40-micron filter and metal bowl guard as standard. Key lock available, see page 2917.

## C, D FILTER REGULATOR AND LUBRICATOR COMBINATION UNITS WITH GAUGE AND MOUNTING BRACKET

Combination units offer reduced installation time. Units come with 40 micron filter element, relieving style regulators with T-handle adjustment, 2-125 PSI adjustable output pressure range, and manual drain as standard. Uses No. 1X762 pressure gauge. For key lock on regulator see page 2917.

C Standard with polycarbonate bowl and metal bowl guard.

D Standard with metal bowl with sight gauge.

## MICROMIST AIR LINE LUBRICATORS

Proportional oil delivery over wide range of air flow. Generates oil particles 5 microns and smaller downstream (up to 100 ft.) to lubricate systems with complex piping arrangements. Bypass gives wide operating range without excessive pressure drop.

## MIST AIR LINE LUBRICATORS

Wide operating flow range with minimal pressure drop. Precision needle valve oil feed adjustment. Can be filled under pressure. Generates oil particles of 50-80 microns in size (should be used within 15-20 feet.)

## AUTOMATIC FILTER DRAIN KIT

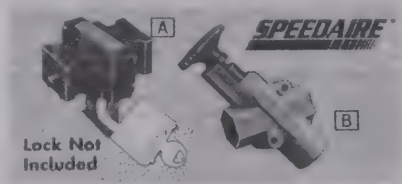
SPEEDAIRE®

Replacement Parts Available 1-800-323-0620™

**Converts manual drain on filters** to automatic drain operation. Made of sturdy plastic with built-in screen. Easy to install. Speedaire brand. (Fits all Speedaire air-line/oil filters except 3JV54, 3JV55, 6ZC24, 5Z415, 4Z030, 5Z419, 2Z766, 3JV32, 3JV33)

**No. 4Z031.** Shpg. wt. 0.1 lbs. List $26.67. Each ..... **$24.33**

## LOCKOUT VALVES



**Speedaire lockout valves** help you comply to OSHA regulations, as they relate to OSHA regulation 29 CFR Part 1910. This standard established the standards for Lockout/Tagout procedures as it relates to industrial equipment requiring service and/or repair.

A Straight slide operation offers very high flows with easy actuation. Speedaire lockout valves offer a unique 3-position slide construction, giving you a full open position, closed and exhausted, and a middle Slow Start condition. The Slow Start function allows the pressure into the system at a slow rate, reducing the possibility of valve mis-shifts and system shock. The valve can only be locked in the exhausted/closed position with a user supplied lock. The slide is manufactured in a bright red color for easy identification of function.

B Inline or surface mounted using two 11/32" mounting holes, these valves offer higher flows for total system applications. These valves offer a 1" exhaust port, in all sizes, for rapid exhaust flows for quick system relief. Rugged metal handles provide durable operation in a wide variety of industrial applications. This style of Speedaire valve is mounting interchangeable with Ross manual lockout valves and the 3/8" and 1/2" ISI brand. Painted safety yellow with red handles for high visibility.

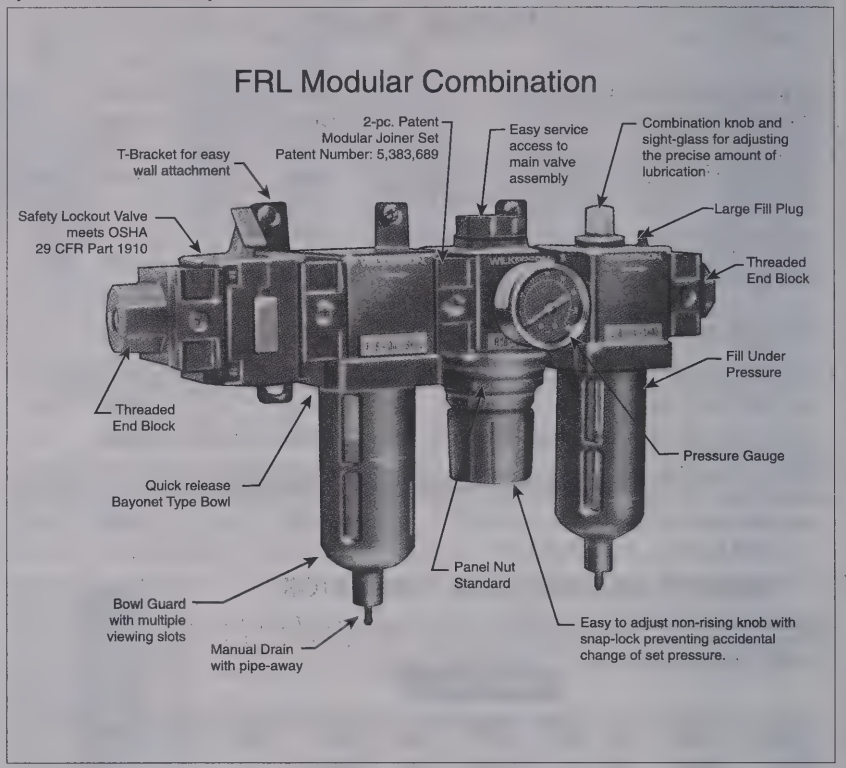
# WILKERSON MODULAR TERMINOLOGY



## MODULAR AIR LINE FILTERS, REGULATORS, LUBRICATORS & COMBINATION MODELS

WILKERSON
CORPORATION • ENGLEWOOD, CO. 80150

Wilkerson's modular FRL series employ a patented and time-saving method of connecting and replacing compressed air filters, regulators, lubricators, integral filter/regulator airsets, and FRL and FR+L combinations. Wilkerson also provides a comprehensive range of model options and accessory products that allows greater design flexibility for your specific application.

Wilkerson's FRL product line features a modular design that allows conventional in-line installation using pipe threads, or modular installation using the patented "joiner" clamp. The two-piece joiner clamp assembly provides easy installation and removal of FRL units, combination units and accessories without breaking the pipe connection.

Unit models are available in four body sizes - miniature (08), compact (18), standard (28), and jumbo (38), with threaded port sizes from 1/8" through 1" NPT. The product line provides exceptional high flow performance with minimum pressure losses.

### SAFETY LOCKOUT VALVES

The V08, V18, and V28 safety lockout valves help you conform to OSHA lockout regulation **OSHA 29 CFR Part 1910** governing equipment found in manufacturing and service industries, and where machinery requires maintenance, service, setup, or repair. The lockout valves are a manually operated, blade-type, 3-way valve. In the closed position, downstream air is exhausted to atmosphere. The valve blade can be locked in the closed position with a padlock.

### AIR LINE FILTERS

Feature a high-performance two-stage cleaning action that removes bulk liquid and solid particle contaminants. A non-corrosive, 5-micron-rated filter element with greater dirt holding capacity for longer service life is standard. Manual drain with pipe-away feature allows easy draining of collected contaminants. The filters feature a quick release bayonet type bowl, that comes with either a polycarbonate bowl with guard, or metal bowl with sight gauge. Automatic float drains are available as a separate option.

### COALESCING FILTERS

Wilkerson's ranges of coalescing filters are specifically designed for the removal of solid particles, water, and oil aerosols down to 0.5 micron. Each filter comes standard with a service life indicator that lets the user know when to change the filter element. The filters feature a quick release bayonet type bowl, that comes with either a polycarbonate bowl with guard, or metal bowl with sight gauge. Automatic float drains are available as a separate option.

Protection of components such as air valves, cylinders, as well as air conveyors, air gauging, air bearings, air control circuits, and paint equipment are several examples of specific end-use applications of this type of filter.

### AIR LINE REGULATORS

Regulators have a large, non-rising "pull to adjust/push to lock" adjustment knob for ease setting and maintaining desired pressure. Large main valve seat and precisely positioned aspirator provides high airflow capacity with steady pressure control and minimal pressure droop. A balanced valve provides superior and reliable regulation. Units are standard with two gauge ports that can be used as two additional regulated outlet ports. Regulator can be serviced without removal from the air line.

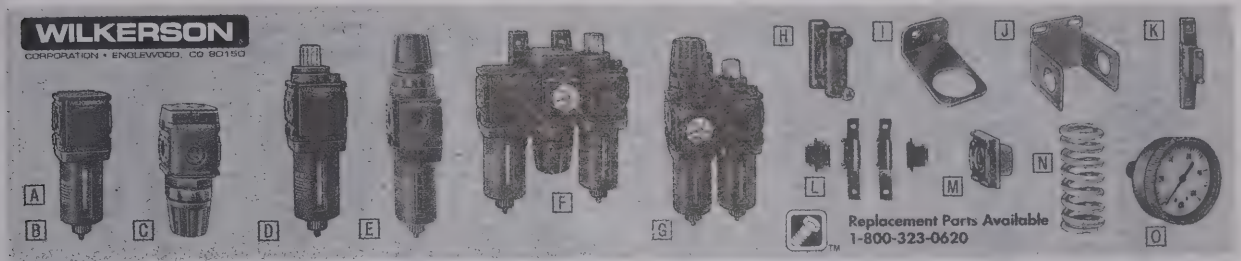
### AIR LINE LUBRICATORS

Lubricators are equipped with a unique flow-guide variable orifice that maintains a constant oil-to-air ratio regardless of changes in air flow. The sight dome is a combination oil drip rate adjustment knob and sight-glass for precisely setting the amount of lubrication required for the application. Other features include large fill port, siphon tube filter to provide clean lubricant downstream, quick release bayonet type bowl, that comes with either a polycarbonate bowl with guard, or metal bowl with oil level sight-gage, and manual drain. Unit can be filled with lubricant while pressurized.

### FILTER/REGULATOR AIRSETS

Filter/regulator integral combination unit incorporates all the features and high performance capabilities of the individual filter and regulator models into one space-saving package. The F/R model is available in all body sizes.

### FRL AND F/R+L COMBINATIONS



A comprehensive range of combination models integrates all the unique features, advanced functions and high performance of the modular FRL series into a compact, contemporary, and ready to mount assembly. The combination models are pre-assembled utilizing the modular T-bracket/joiner assembly to facilitate easy installation and mounting of the combination unit. Modular combination models come with a pressure gauge as a standard feature.

### ACCESSORIES

Listed along with each size/series, is a corresponding line of a accessories that include; joiner sets, end blocks, mounting brackets, automatic float drains, and pressure gauges.

# MINI "08" SERIES MODULAR AIR LINE FILTERS, REGULATORS, AND LUBRICATORS

### AIR LINE REGULATORS

- Air filters have 5-micron filter element
- Coalescing elements are 0.5 micron
- Manual drain
- Temp: Metal bowl - 175°F (79°C)
  Polycarb. bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 250 PSI
  Polycarb. Bowl - 150 PSI
- Bowl guards standard on polycarbonate units

### AIR LINE REGULATORS

- Adjustment from 0-125 PSI
- Non-rising adjustment knob
- 1/8" gauge port
- Panel nut included
- Max. Inlet Pressure - 300 PSI
  (Does not apply to combo units)
- Max. Temp. - 125°F (52°C)

### AIR LINE LUBRICATORS

- Temp: Metal bowl - 175°F (79°C)
  Polycarb. bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 250 PSI
  Polycarb. bowl - 150 PSI
- Bowl guards standard on polycarbonate units
- Integral sight dome and adjustment knob

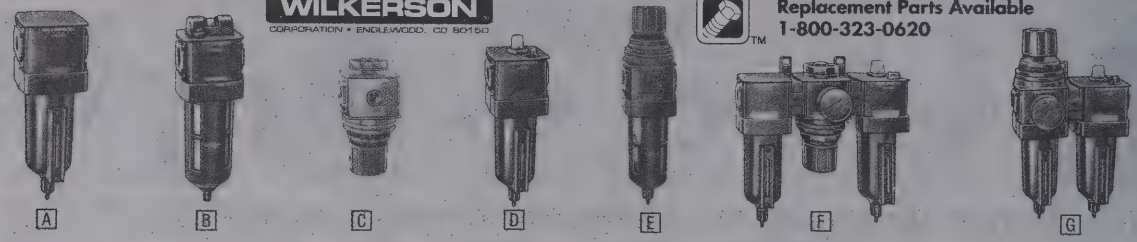
## SAFETY LOCKOUT VALVE

Wilkerson V Series Safety Lockout Valves conform to OSHA lockout regulations* governing equipment found in manufacturing and service industries, machinery requiring maintenance, setup or service.

The V Series valves are manually operated, slide-type valves. In the closed position, downstream air is exhausted to atmosphere. The valve slide can be locked in the closed position with user supplying a padlock.

Wilkerson's V08, V18 and V28 lockout valves are readily identifiable by the bright "OSHA" orange color of the slide mechanism. The orange color will satisfy OSHA's requirement that lockout devices be easily identifiable and standardized within the facility.



(*) OSHA 29 CFR Part 1910.

# STANDARD "28" SERIES MODULAR AIR LINE FILTERS, REGULATORS, AND LUBRICATORS

WILKERSON
CORPORATION • ENGLEWOOD, CO 80150

Replacement Parts Available
1-800-323-0620

## AIR LINE FILTERS

- Air filters have 5-micron filter element
- Coalescing elements are 0.5 micron
- Coalescing filters have filter service indicators
- Temp: Metal bowl - 175°F (79°C)
  Polycarb. bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 250 PSI
  Polycarb. Bowl - 150 PSI
  Oil Removal Coalescing Removal Filter (with Metal or Polycarb Bowls) - 150 PSI
- Bowl guards standard on polycarbonate units

## AIR LINE REGULATORS

- Adjustment from 0-125 PSI
- Non-rising adjustment knob
- 1/4" gauge port
- Panel nut included
- Max. Inlet Pressure - 300 PSI (Does not apply to combo units)
- Max. Temp. - 125°F (52°C)

## AIR LINE REGULATORS

- Temp: Metal bowl - 175°F (79°C)
  Polycarb. bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 250 PSI
  Polycarb. bowl - 150 PSI
- Bowl guards standard on polycarbonate units
- Integral sight dome and adjustment knob

## JUMBO "30" SERIES

### AIR LINE FILTERS

- Air filters have 5-micron filter element
- Coalescing elements are 0.5 micron
- Bowl guards standard on polycarbonate units
- Coalescing filters have differential pressure indicator
- Temp: Metal bowl - 175°F (79°C)
  Polycarb. Bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 200 PSI
  Polycarb. Bowl - 150 PSI

### AIR LINE REGULATORS

- Adjustment from 10-125 PSI
- Self-relieving
- Two 1/4" NPT gauge ports
- High flow capacity
- Max. Inlet Pressure - 300 PSI
- Max. Temp. - 175°F (79°C)

### AIR LINE LUBRICATORS

- Full view sight dome
- Fill under pressure
- Adjustable oil feed
- Temp: Metal bowl - 175°F (79°C)
  Polycarb. Bowl - 125°F (52°C)
- Max. PSI: Metal bowl - 200 PSI
  Polycarb. Bowl - 150 PSI

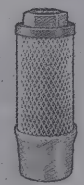
# MINI REGULATORS, BRASS FILTER/REGULATORS AND EXHAUST SILENCER MIST ELIMINATOR

No. 6Z952
Mini Regulator

No. 6B217
Brass Regulator



No. 6Z953
Brass Filter/Regulator

Exhaust Silencer Mist Eliminators

No. 4B508

No. 4B507

No. 4B416

### MINI REGULATOR

- 1/8" AND 1/4" NPT
- Adjustment from 5-125 PSI
- Small lightweight design
- Non-rising locking adjustment knob
- 1/8" NPT gauge port

### BRASS REGULATOR AND FILTER/REGULATOR

- 1/8" and 1/4" NPT
- 1/8" NPT gauge port
- Non-rising locking adjustment knob
- Includes panel nut
- Adjustment from 5-125 PSI
- Air only

### XMC EXHAUST SILENCER MIST ELIMINATOR

- Port sizes 1/2" NPT to 1½" NPT
- Flow capacity to 250 CFM
- Meets OSHA noise reduction requirements of <90dBA
- 1/4" slip-on drain tube fitting
- Vertical mounting only

(*) Ametek Brand

## IN-LINE LUBRICATOR

- Can be installed directly in inlet of air tool to produce a fine oil mist
- Mount in any position

Feature 1/4 oz. reservoir which holds enough lubricant to last an 8-hour shift. Cannot be filled while air pressure is on. No adjustments to tamper with; lubricates in any position. Maximum inlet port pressure is 200 PSI. Maximum temperature is 175°F. 22 CFM flow rating, Available in ¼ and ⅜" NPT female inlet and male outlet pipe connections. Wilkerson brand.

| Female Inlet (In.) | Male Outlet (In.) | Length (In.) | Hex (In.) | Maximum Pressure | Maximum Temp. (°F) | Wilkerson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| **1/4** | 1/4 | 3 | 1⅛ | 200 PSI | 175 | L01-02-M00 | **1A260** | $25.30 | **$19.13** | 0.2 |

## IN-LINE FILTER

- Lightweight • 200 PSI max.
- Flow capacity to 17 CFM at 100 PSI
- 5 Micron filter element • 1/4" NPT

**No. 6B290.** Shpg. wt. 0.1lbs. List $16.80. Each ..... **$11.96**

## Flow Control Valves

The flow control valve combines a needle valve and a check valve parallel to each other in one housing. This allows for free flow in one direction, and metered flow in the other. Metered flow is indicated by an arrow on the side of the housing. Flow control valves are used to control the speed of a cylinder or air motor. The valves are mounted so that the arrow is pointing away from the cylinder or motor, so that it is metering flow on the exhaust. Helpful hint, "When in doubt, meter out".

**Types of Flow Controls:**

**In-Line** - Either piped directly to the port(s) of cylinder/motor or on the air line. Example, No. 4A788 or 6ZC07.

**Right Angle** - Designed to screw directly on to the porting of cylinder/motor. Most compact method, and precise. Example, No 2F847.

**Exhaust Port** - Mount directly to the exhaust port on the directional control valve. Easier to make adjustment, also doubles as exhaust silencer. Least precise control. Example, No. 6X368

## Shuttle Valve

The shuttle valve is a 3-way valve which accepts either or both of two inputs and provides one output. If a tee were used in place of the shuttle valve, the air pressure from the right inlet port could escape through the left port and through the exhaust of another valve. Example, No. 2G635.

## Quick Exhaust Valve

The quick exhaust valve is a 3-way valve that provides quick release of exhaust air in a cylinder. The valve is used to achieve maximum cylinder speeds in double acting cylinders by reducing the restriction of the exhaust air. Example, No. 4KP81.

## Directional Control Valves

**3-Way, 2-Position directional control valve** contains three working ports, provides two flow paths, and has two operating positions. This type of valve is used on single acting cylinders or air system that require that the equipment not be under pressure when not energized. The valve can be set up in two configurations; Normally Passing and Normally Non-Passing.

A **Normally Passing** - In the valves normal position, port 1(generally the inlet port) is open or flows to port 2(generally the working port), and port 3(generally the exhaust port) is blocked. When the valve is shifted to the second position, port 1 is now blocked, and port 2 is open or exhausts to port 3. Example, No. 2G499.

B **Normally Non-Passing** - Port 1 is blocked, and port 2 is open or exhausting to port 3. When the valve is shifted to the second position, port 1 is open or flows to port 2, and port 3 is blocked. Example, No. 2G487.

Some 3-Way, 2-Position valves can be used for both normally passing and non-passing. Example, No. 2F893.

**4-Way Direction control valve** contains either four or five working ports (depending on the design), provides four flow paths, and is available in either 2 or 3 positions.

C **A 4-Way, 2-Position valve works as follows:**

In the normal position of the valve, port 1 is open or flows to port 2, port 3 is blocked, and port 4 is open or exhaust to port 5. When the valve is shifted to the second position, port 1 is now open or flows to port 4, port 5 is blocked, and port 2 is open or exhausts to port 3. Example, No. 2F985.

D and E **A 4-Way, 3-Position valve** works the same way accept it has a center neutral position where the inlet port 1 is blocked, and the two working ports 2 and 4 can be set up into two configurations of all ports blocked or cylinder port open. All ports blocked configuration means that in the neutral position all ports are blocked and the valve will not pass any air. In the cylinder ports open configuration, ports 2 and 4 are open or exhaust to ports 3 and 5. Example, No. 2G451.

**The valves can be shifted by four types of actuators; Manual, Mechanical, Pilot, or Solenoid:**

**Manual actuators** are any device which is controlled directly by the operator, and come in a wide range of styles from hand lever, push button, and foot. Example, Nos. 2F931, 2F933, or 2G525.

**Mechanical actuator** is any actuating device triggered by another mechanical drive, such as a roller cam or limit arm. Example, Nos. 2F895 or 2F919.

**Pilot actuator** receives a pneumatic signal from another valve to shift the spool in the valve. These valves are normally used as a power valve receiving their signals from smaller limit valves. Example, No. 2F957.

**Solenoid valves** receive an electrical current to the solenoid to shift the spool. Solenoid valves are available in two types: direct acting and solenoid pilot or pilot operated.

On direct acting solenoid valves the solenoid in mechanically connected to the main valve spool. When the solenoid coil is energized the spool is shifted due to mechanical connection. Example, No. 2G487.

**Solenoid pilot operated valves,** the solenoid is attached to a small pilot valve which when energized sends a pilot signal to end of the main spool shifting the spool. The advantages of the pilot valve are that it reduces the chance of solenoid burn-out if the valve spool should stick, and reduces the size of the valve since only a small solenoid is needed to open up the pilot port. Pilot operated valves do require a minimum inlet pressure so that the valve can shift. Example, Nos. 2G627, 2F985, and 2G585.

2-Position valves can either have manual actuator to shift the valve into both position or returned to the original position by some sort of spring force. 3-Position being the same with the neutral position being the center position.

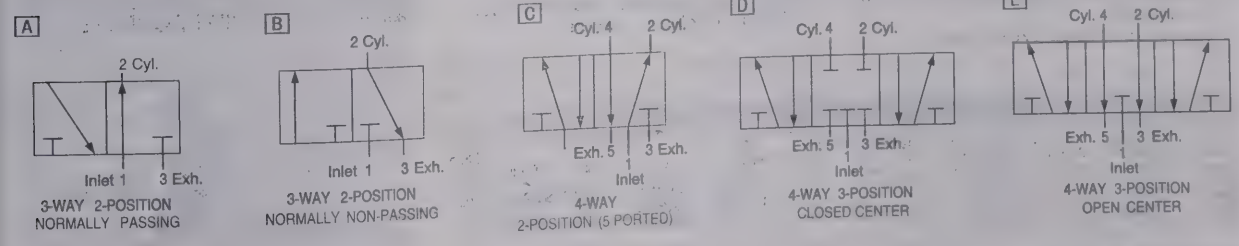
**Valve body configurations come in two types; Body Ported or Manifold:**

**Body ported** valves have threaded ports in the body of the valve to which plumbing connections are made.

**Manifold mounting** is a method of mounting several valves side-by-side using a common air supply.

## Cylinders

**Single acting cylinders** are any cylinder which uses air on only one stroke, and uses some other means, usually a spring, to move the piston on the other stroke or back to it's original position.



**Double acting cylinders** are cylinders designed to use air to extend and retract the piston.

**Bore** is the inside diameter of the cylinder.

**Stroke** is the length that the piston rod travels.

**Force** is the mechanical pressure that the piston can develop. Force can be calculated by F= Area x PSI.

# FLOW CONTROL VALVES

## FLOW CONTROL AIR VALVES

- Used in pneumatic systems to control actuator speed by acting as a restriction
- Brass body construction with stainless steel needles and ball check
- Two-stage needle provides fine adjustment over the first turns, and nominal adjustments over the last turns
- Set screw secures selected needle position
- Knurled adjustment knob
- Integral needle stop prevents accidental removal of needle from body
- Rated for 2000 PSI max. (non-shock)
- Parker brand

### FLOW CONTROL AIR VALVE SPECIFICATIONS AND ORDERING DATA

| NPT Thread (In.) | Cv* | Parker Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1/8 | 0.31 | PF 200B | 4A788 | $16.96 | $12.39 | 0.3 |
| 1/4 | 0.78 | PF 400B | 4A789 | 22.25 | 16.55 | 0.5 |
| 3/8 | 1.23 | PF 600B | 4A790 | 29.13 | 21.94 | 0.8 |
| 1/2 | 1.85 | PF 800B | 4A791 | 41.19 | 31.20 | 1.3 |

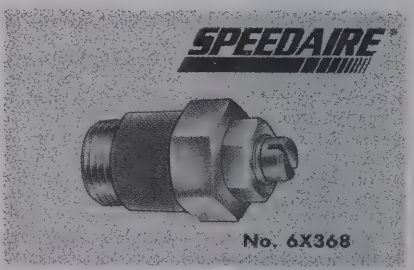
(*) Coefficient of volume: The amount of water in GPM at standard conditions, which will pass through the valve at full open with a 1 PSI pressure drop.

## THERMOPLASTIC FLOW CONTROL AIR VALVES

**Thermoplastic flow control valves** constructed of glass reinforced thermoplastic with zinc plated steel inserts in pipe ports. Four-stage needle for accurate and efficient cylinder speed control. Provides infinite control setting from full-close to full-open. Color coded micrometer and calibrated adjustment knob provides visual reference point for repetitive setting. Standard ring lock keeps adjustment from accidentally moving. Push down to lock, pull up to adjust. Pressure rating of 200 PSI. 0° to 200°F operating temperature. ARO brand.

### SPECIFICATIONS AND ORDERING DATA

| NPT Size (In.) | Aro Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/8 | F01 | 6ZC07 | $14.25 | $10.90 | 0.2 |
| 1/4 | F02 | 6ZC08 | 17.00 | 14.06 | 0.2 |
| 3/8 | F03 | 6ZC09 | 21.50 | 19.00 | 0.4 |
| 1/2 | F04 | 6ZC10 | 26.75 | 23.99 | 0.4 |

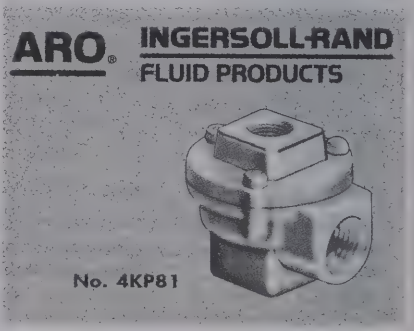


## EXHAUST PORT FLOW CONTROL

**Fits into exhaust port of valves or cylinders** to control speed. Adjustable orifice of port flow control throttles cylinder or valve exhaust and develops back pressure that acts to reduce speed of stroke. Solid, single piece body and screw construction and full size adjustment locking nut hold selected speed setting. Adjusting screw, body, and locking nut are brass. 0 to 250 PSI operating pressure. -65° to +300°F operating temperature.

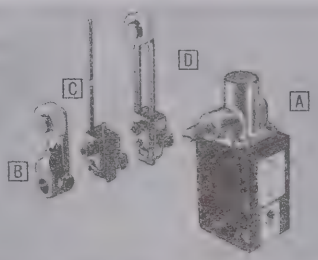
### SPECIFICATIONS AND ORDERING DATA

| Port Size (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 1/4 | 6X368 | $11.17 | $10.20 | 0.1 |
| 3/8 | 6X369 | 12.25 | 11.19 | 0.1 |
| 1/2 | 1A246 | 15.75 | 14.35 | 0.2 |



## QUICK EXHAUST VALVES

- Provides quick release of exhaust air at cylinder
- Speeds operation cycle time
- Eliminates need for large diameter piping or selector valves



### SPECIFICATIONS AND ORDERING DATA

| Inlet Port (In.) | Cylinder Port (In.) | Exhaust Port (In.) | Pressure Range (PSI) | Dimensions (In.) L | W | H | ARO Model | No. | List | Each | Shpg. Wt. |

## HEAVY-DUTY LIMIT VALVES

**ARO 2-position, 3-way valves** for position sensing in demanding applications. Valves can be plumbed as normally passing or normally non-passing, selector, or any 2-way function. Available with clockwise actuation, counterclockwise actuation or both. Operating head can be rotated to any of four positions for various applications. Prelubed, can be operated without air line lubrication. Composite body for tough environments like car washes and wash-down applications. 30 to 150 PSI operating pressure. Cv*=0.195. ARO brand.

## SHUTTLE VALVES

**ARO shuttle valves act as special check valves,** connecting two inputs so only one is "ON" at a time. Valves features two inlet ports and one outlet port. Check ball moves away from inlet port with the greatest pressure and against the port with the least pressure (minimum pressure differential of 10 PSIG necessary to effect shuttle change). ARO brand.

## FLOW CONTROL VALVES

**Right angle flow control valves** for mounting directly onto cylinder for precise control of cylinder speed. Adjust with screwdriver to increase or decrease speed. Rugged, all metal design includes nickel-plated brass body, anodized aluminum swivel and stainless steel spring for optimum corrosion resistance. Available in female threads (NPT) and convenient push-to-connect tube fittings.

Features dry thread sealant on male threads to eliminate need for piping tape. Full 360° rotation for tubing alignment. 0 to 150 PSI operating pressure range. 15 to 160°F temperature range. ARO brand.

## MINIATURE MANUAL AND MECHANICAL VALVES

**ARO 2 position, 3-way mini valves** for use in sensing position of moving machine components such as cylinders, slides, gates, or where small manual actuator is desired. Valve can be plumbed to perform as normally passing, normally non-passing, selector, or any 2-way function. Zinc die cast bodies and stainless steel spools for durability and corrosion resistance. 30 to 150 PSI operating pressure. Cv*=0.195. ARO brand.

## PNEUMATIC EXHAUST MUFFLERS

**Speedaire muffler-filters** diffuse air and noise from exhaust ports of valves, cylinders, and air tools. Constructed of a 40 micron porous sintered bronze element directly bonded to copper plated steel pipe thread fitting, reducing exhaust noise levels to acceptable OSHA requirements. 300 PSI max.

I Valve Stacking Kit

## MINIATURE DIRECT-ACTING SOLENOID VALVES

**3-Way, 2-Position electric-to-air interface valves** are solenoid-actuated with spring return and have sufficient flow for cylinders 1" diameter and below. Compact design allows valves to be pipe nippled directly to cylinder port. Suitable for air or inert gas. Can be assembled in stacks up to 6 valves. Coil can be rotated to meet application requirements. Rated for 100% duty cycle. Quick change design for easy replacement. Durable, lightweight aluminum extrusion body for good corrosion resistance. ARO brand.

## COILS AND CONNECTORS

**For pneumatic valves** when coil voltage other than 120 VAC or 12 VDC is required (see chart below). All coils are Class F, rated for 100% duty cycle applications at 122°F (50°C) ambient. Total coil rating is 311°F, which includes heat rise. AC or DC coils can be interchanged on same solenoid stem. One connector required for each coil. Each connector is its own junction box with molded connectors and gaskets to protect electrical connections. Design meets NEMA 4 classifications. ARO brand.

## STACKING KITS

**Kits for miniature solenoid valves** contain all necessary tie-rods, nuts, O-rings, plug and instructions for assembling miniature solenoid valves into valve stacks. Specify kit according to number of valves to be stacked. Valves sold separately. ARO brand.

**Sierra Valves** are 15mm wide directional valves for operating small bore pneumatic cylinders. 4-way, 5-ported, 2 position valves are available in single and double solenoid styles. Body ported and manifold mounted valves have 0.25 Cv* flow and fast signal response time of 14 milliseconds.

**Features standard one-touch override** which can be operated for non-locking action, or push-and-twist to lock with screwdriver. Lead wire and plug-in styles in 120 VAC or 24 VDC. Plug-in integrated circuitry guards against miswiring damage and provides surge protection. Maximum cycle rate of 120 cycles per minute, 22 PSI shift pressure. Current ratings: 120 VAC=16mA (in-rush), 11mA (holding); 24 VDC=67mA. Power consumption is 2.1/1.8VA 1.6W. ARO brand.

(*) Coefficient of Volume: The amount of water, in GPM, at standard conditions, which will pass through the valve at full open with a 1 PSI pressure drop. (**) 90 PSI supply, 15 PSI pressure drop.
(†) Order raceway ribbon, plug-in valve wire harness or plug-in valve raceway wire harness separately.

# ACCESSORIES FOR MINIATURE VALVES

## ACCESSORIES FOR SIERRA SUBBASE AND MANIFOLD MOUNT VALVES AND 1/8" PORT COMPACT VALVES

[A] **Single Station Subbase** for use where convenience of a subbase is desired for fast maintenance on a one valve station.

[B] **Manifold** for use in applications where valve manifolding is needed for 2-8 valves.

[C] **Gasketed Metallic Blanking Plate** caps unused manifold ports. Quick installation. One plate per unused valve station required.

[D] **Raceway Manifold Conversion Kit** turns manifold into 4-, 6-, or 8-station raceway manifold with installation of raceway terminal circuit board.

[E] **39" Raceway Ribbon Connector** facilitates wiring. Can be used for 4-, 6-, or 8-station raceways.

[F] **Raceway Ribbon Connector Break-Out Box** is a 26-station junction box that allows raceway manifold valves to be interfaced with a personal computer or other electronic command device by means of raceway ribbon listed above. Current rating: 3A DC. UL Voltage rating: 30 VDC.

[G] **Plug-In Valve Wire Harness** is an 18" two-wire harness pre-stripped at one end with a pin-type locking connector at other end. One harness per coil required when used on standard manifold or subbase.

[H], [I] **Plug-In Valve Raceway Wire Harness** has pin-type locking plug connector at one end and raceway plug at the other. Available for single solenoid valves (4½" length harness) or double solenoid valves (4½" and 12" length harnesses).

[J],[K],[L],[M] **Connectors and Coils** for compact (1/8" ports) valves are class F, rated for 100% duty cycle applications at 122° (50°C) ambient. Total coil rating is 311°F, including heat rise. AC or DC coils can be interchanged on same solenoid stem. One connector required for each coil. Each connector is its own junction box, with molded connectors and gaskets to protect electrical connections. Design meets NEMA 4 classifications. ARO brand.

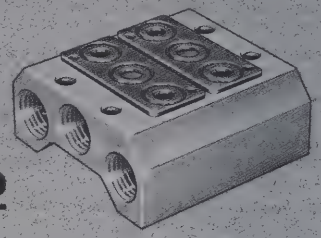
# 1/8" PORT COMPACT SOLENOID VALVES



SIERRA®

New

ARO®

INGERSOLL-RAND

FLUID PRODUCTS

Replacement Parts Available
1-800-323-0620

Body ported solenoid valves can be plumbed in-line or manifold-mounted (2 ,4 ,6, 8, 10, 12, 16 stations). Featuring ⅛" NPT ports and compact size, these valves are ideal where fast signal response (14 milli-seconds) with moderate flow (.5 avg. Cv 3-positions, 0.8 Cv 2-position) pressures are required. Feature standard one-touch override which can be operated for non-locking action, or push-and-twist to lock with screwdriver. Intergrated circuitry guards against miswiring damage and provides surge protection.

## INDUSTRIAL PNEUMATIC TECHNOLOGY

A training and reference manual for designers and users of pneumatic systems. Explains the basic principles and components found in typical industrial pneumatic, compressed air systems. Provides understanding of basic pneumatic principles and circuits that form an integral part of compressed air applications. Exercises at end of each chapter serve as summary of important points with answers provided in separate manual (included). 151 pages. Parker Bulletin 0275-B1.

**No. 5H566.** Shpg. wt. 1.0 lbs. List $24.27.
Each ..... **$23.37**

**THE RIGHT STUFF. RIGHT HERE. RIGHT NOW.**

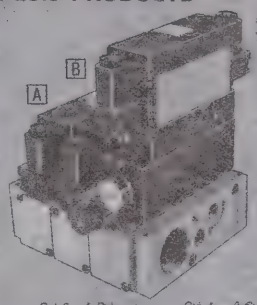
**It's more than just a slogan with Grainger. More than 78,000 products, most in stock and available for same day shipping, are available with a call to your local branch. And when you need product selection assistance, count on our trained personnel for fast, accurate answers to your technical questions.**

## HIGH FLOW SOLENOID VALVES FOR PLUG-IN MANIFOLD

**Genesis® 1/4" or 3/8"** valves feature plug-in electrical connections between valve and manifold to make valve easy to install. Plug-in design keeps all electrical wiring inside of unit and features "make first-break last" grounding contact pin. Complies with ISO 5599-2 for replacement of foreign-made valves that meet specification. Large one-piece bonded spool design for energy saving efficient air flow and positive shifting with lower system pressure.

Mechanical valve override makes machine setup and troubleshooting easy. Mounting/assembly hardware features stainless steel stacking pins that eliminate the need for tie rods or separate bolts.

**NOTE: Valves must be used with either 1/4" or 3/8" port manifold. Order manifold and accessories below.**



Indicators are standard equipment on valves. Valves are prelubed, can be operated without air line lubrication. Cv=1.2 average. 30 to 150 PSI operating pressure range. ARO brand

(*) Coefficient of Volume: The amount of water, in GPM, at standard conditions, which will pass through the valve at full open with a 1 PSI pressure drop.
(†) Dimensions are for a single valve and do not include manifold, end plate, regulator or speed control.

## ACCESSORIES FOR GENESIS VALVES

C Plug-In Style Manifold features a 5-pin plug that eliminates all external solenoid wiring. Body is powder coated for chip and scratch resistance.

D End Plate Kit features large raceway wiring channel for easy wiring. One kit required per stack.

E Sandwich Speed Control (optional) has low profile and offers quick installation, precise speed control, and a flush non-rising adjustment screw.

F 0 to 120 PSI Sandwich Style Regulator (optional) fits on valve and features front and rear gauge ports to match application requirements.

# COMPACT BODY-PORTED SOLENOID AND PILOT VALVES

## COMPACT BODY-PORTED SOLENOID AND PILOT VALVES

Body-Ported Alpha Valves are compact 4-way, 2- and 3-position valves for applications where only one valve is required. High flow capacity for use in packaging machines, indexing tables and industrial machines with power cylinders, motors, pumps and spray heads. For use with air or inert gas and vacuum with external pilot supply.

One piece balanced spool provides quick response of 600 cycles per minute and high flow. Bonded and precision ground urethane-to-aluminum spool for excellent wear resistance. 5-ported, 4-way valve enables use of speed controls at valve exhaust ports. Valves are prelubed, can be operated without air line lubrication. 50 to 150 PSI operating pressure range. Solenoid may be rotated in any direction. Coil connectors available, order separately below. ARO brand.

## COILS AND CONNECTORS FOR ALPHA VALVES

For use when coil voltage other than 120 VAC or 12 VDC is required (see chart below). All coils are Class F, rated for 100% duty cycle applications at 122°F (50°C) ambient. Total coil rating is 311°F, including heat rise. AC or DC coils can be interchanged on same solenoid stem. One connector required for each coil. Each connector is its own junction box, with molded connectors and gaskets to protect electrical connections. Design meets NEMA 4 classifications. ARO brand.

## MANIFOLD STYLE SOLENOID AND PILOT VALVES

**ALPHA Thin manifold valves** are compact 4-way, 2- and 3-position valves for applications where the convenience of a manifold is desired. Manifold valves offer easy valve clustering and valve removal for replacement. Valves allow for controlling multiple machine functions with individual valves from one location. High flow capacity for packaging machines, indexing tables and industrial machines with air cylinders, motors, pumps and spray heads. Can be used with vacuum with external pilot supply. **Minimum operating pressure of 50 PSI.**

**One piece balanced spool** offers quick response of 600 cycles per minute and high flow.

**Valves are prelubed**, can be operated without air line lubrication.

F **Valve Manifolds** available in 2,4,6, 8 and 10 valves.

G **Blanking Kit** blocks one manifold station, permitting odd number of valves to be assembled on manifold.

H **Dual Speed Control Kit** includes speed controls for both exhaust ports of a valve.

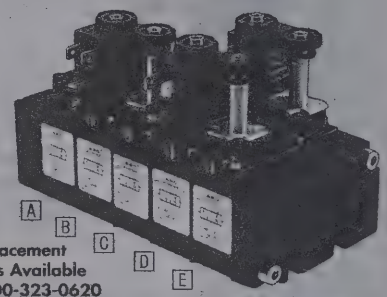
(*) Coefficient of Volume: The amount of water, in GPM, at standard conditions, which will pass through the valve at full open with a 1 PSI pressure drop. Figures shown are for 1/4" port. For External Pilot supply, order external solenoid supply kit #119306 from Grainger Parts Operations. Call 1(800) 323-0620.

# COMPACT, STACKING SOLENOID AND PILOT VALVES

## COMPACT STACKING SOLENOID AND PILOT VALVES

**ALPHA stacking valves** are 4-way, 2- and 3-position valves for applications requiring multiple valve banks without additional height of valve manifold. Control machine functions with individual valves from one location. High flow capacity for use with packaging machines, indexing tables and industrial machines with air cylinders, motors, pumps and spray heads can be used with vacuum with external pilot supply.



**One piece balanced spool** for quick response of 600 cycles per minute and high flow. Bonded and precision ground urethane-to-aluminum spool for wear resistance. Valves are prelubed, can be operated without air line lubrication. For use with air or inert gas. Solenoid can be rotated in any direction. Coil connectors available, order separately below. ARO brand.

•Order End Plate Kit separately see page 2943

## EXTERNAL PILOT SUPPLY KIT FOR ALPHA SERIES VALVES

Replacement Parts Available
1-800-323-0620

ARO®
INGERSOLL-RAND
FLUID PRODUCTS

No. 4HN96

**External pilot supply kit** is used on Alpha series valves in low pressure (below 50 PSI) or vacuum applications. Alpha series valves are a pilot supply design, which means they use air pressure to shift the spool in the valve. This pilot pressure, which is supplied internally through the valve from the valve inlet pressure, must be between 50-150 PSI for the valve to operate. The external pilot supply kit blocks off the internal pilot supply and allows for an external pilot supply pressure above 50 PSI. Kit includes separator plug and push-on 1/4" tubing connector. ARO brand.

**No. 4HN96.** Shpg. wt. 0.1 lbs. List $2.40. Each.....$2.29

**THE RIGHT STUFF. RIGHT HERE. RIGHT NOW.**

**It's more than just a slogan with Grainger. More than 78,000 products, most in stock and available for same day shipping, are available with a call to your local branch. And when you need product selection assistance, count on our trained personnel for fast, accurate answers to your technical questions.**

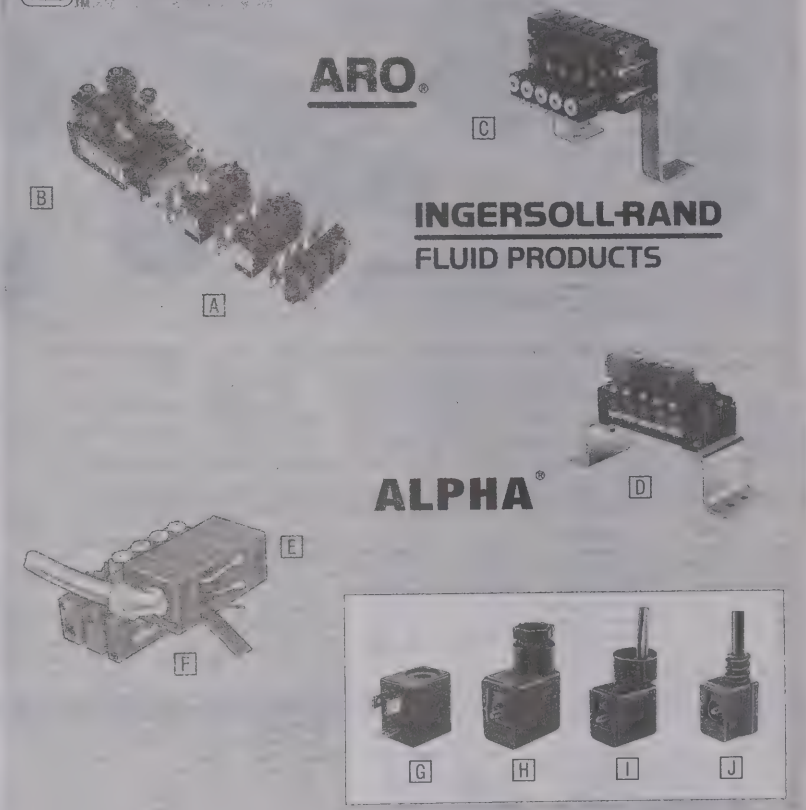
## ACCESSORIES FOR STACKING AND PILOT VALVES

[A] **End Plate Kit** includes two end plates, two cap screws and one gasket. Kit adds 1½" to length of valve stack. One end plate kit required per stack. ARO brand.

[B] **Isolator Plate** allows valve or section of valves within a stack to be isolated and operate on different pressure than the rest of stack. Gasket included. ARO brand.

[C] **Mounting Bracket.** Short "L" mounting bracket raises valve stack 3¾" above base. Tall "L" mounting bracket raises valve stack 7" above base. Each mounting bracket kit includes all hardware to mount valve stack to bracket. ARO brand.

[D] **Mounting Bracket.** Short "Z" mounting bracket raises valve stack 3" above base. Tall "Z" mounting bracket raises valve stack 6" above base. Each mounting bracket kit contains all hardware to mount valve stack to bracket. ARO brand.



[E] **Junction Box** required for each coil in stack when solenoid connectors are not used. Includes box, jumper wires, gasket, screw and roll pin. ARO brand.

[F] **Blank Junction Box** provides entrance for conduit fitting for a row of coils. Includes box, dust plug and roll pin. ARO brand.

## COILS AND CONNECTORS FOR ALPHA VALVES

[G] thru [J] **All coils** are Class F, rated for 100% duty cycle applications at 122° (50°C) ambient. Total coil rating is 311°F, including heat rise. AC or DC coils can be interchanged on same solenoid stem. One connector required for each coil. Each connector is its own junction box, with molded connectors and gaskets to protect electrical connections. Design meets NEMA 4 classifications. ARO brand.

# SOLENOID VALVES AND ANTI-TIE DOWN CONTROLS

## 1/2 & 3/4" PORT SOLENOID VALVES

**For applications where extra flow is needed.** 4-way, 2-position valves feature rugged construction aluminum sand cast bodies. Solenoid override provides easy means of setting up and troubleshooting circuits without power to the solenoids. Operating pressure range: solenoid/spring 50-150 PSI, solenoid/solenoid 20-150 PSI. Prelubed, can be operated without air line lubrication. Solenoid can be rotated in any direction. Class F, rated for 100% duty cycle applications at 122°F (50°C) ambient. Total coil rating is 311°F which includes heat rise.

One connector required for each coil. Each connector is its own junction box with molded connectors and gaskets to protect electrical connections. Design meets NEMA 4 classifications. See connector options below. ARO brand.

Additional coil voltages available on page 2943.

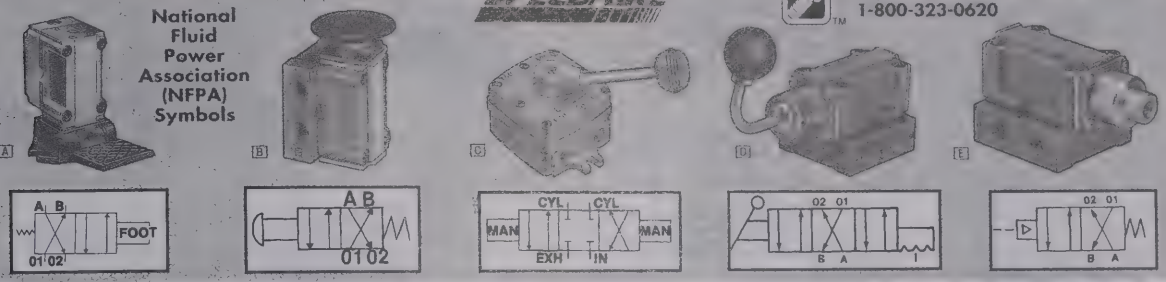
## TWO HAND ANTI-TIE DOWN CONTROLS

All-pneumatic,unitized control circuit designed to produce an output signal to machine only when it receives two concurrent signals from the push button valves at operator's station. Suited for industrial machines where it is desirable to monitor position of operator's hands throughout the hazardous portion of machine cycle.

No. 4HN74 unassembled package includes anti-tie down control box, 2 push button valves 21/4" dia., 10 ft. of 5/32" tubing, and fittings.

No. 4HN76 assembled package comes with all internal connections ready to install on machine. 21/4" Diameter. push buttons located on opposite ends of a single enclosure. External supply and output to machine made by 5/32" (4mm) instant tube fittings. Do not use on any revolutionary press.

WARNING: These provide only the anti-tie down logic function and not stroke limiting devices. On machines with full revolution clutches and/or where repeat cycles can occur, approved safety and/or single stroke devices must be used in conjunction with the anti-tie down units.



| Description | Pipe Size (In.) | Operating Pressure (PSI) | Dimensions (In.) L | W | H | ARO Model | Stock No. | List | Each | Shpg. Wt. |

# HIGH-FLOW MANUAL AIR VALVES

SPEEDAIRE®

Replacement Parts Available
1-800-323-0620

National Fluid Power Association (NFPA) Symbols

**Heavy-duty high-flow manual air valves are available in foot, palm button, hand, and air actuated types. 0 to 150 PSI operating pressure.**

## A No. 6X367 FOOT AND B No. 1A208 PALM BUTTON VALVES

**Four-way, Two-position**, direct operated, spring return, spool-poppet valves for use with air cylinders. Can be operated as two-way or three-way, open or close center.

All valve parts are corrosion resistant. Poppet in valve is integral with spool, which is only moving part. Spool and stainless steel return spring can be removed from valve body through the top.

**Foot valve No. 6X367** has pneumatically balanced mechanism with actuation free from effect of line pressure. Can be used for vacuum service to 28" Hg.

**Palm button valve No. 1A208** is actuated by pressing down on sturdy button. Can be used for vacuum service to 26" Hg.

## C Nos. 5A545, 6X366 AND 5A546 HAND THROTTLE VALVES

**Four-way, three-position**, rotary disc valve operates single or double acting cylinders. Cylinder speed or position can be precisely controlled by adjusting throttle. Forged bronze disc and cast iron surface are ground and lapped to provide leak proof seal. Air pressure from inlet port is confined beneath disc, making seal tighter as pressure increases, yet only requires 15 pounds of force to move lever at 100 PSI line pressure. Handle comes disassembled and mounts in any of four positions, 90° apart to meet any operator or machine requirement.

## D No. 5A543 HAND LOCKING DETENT VALVE

**Four-way, two position** spool valve is used to operate double acting cylinders. Valve may also be used as two or three-way valve. Locking handle maintains desired spool position by means of a detent. 28" Hg to 150 PSI operating pressure. 3/8" NPT.

## E No. 5A544 AIR PILOT CONTROL VALVE

**Four-way, two position** air pressure actuated valve for use with double acting cylinders. may also be used as a two or three-way valve used to operate double acting cylinders. May also be used as two or three-way valve. A minimum of a 30 PSI maintained signal will shift and hold spool in desired position. Loss of signal will shift spool back to original position by means of a spring. 28" Hg to 150 PSI operating pressure. 3/8" NPT.

(*) Coefficient of volume. The amount of water in GPM at standard conditions (60° specify gravity = 1) which will pass through the valve at full open with a PSI pressure drop.

## TECHNICAL REFERENCE HANDBOOK

By E.P. Rasis. This book meets the need for a textbook/reference book for laboratory and classroom that is also a reliable on-the-job reference source for workers in the industrial and technical trades. Covers mathematics, units of measurement, machine tool technology, mechanics, strength of materials, and machine elements. In easy-to-understand language, the Handbook presents practical skills for solving technical problems, as well as important new concepts that bring the reader up to date with the latest developments in industrial technology. More than 200 illustrations and graphs supplement the textual information. 232 pages, hard cover.

**No. 5H671.** Shpg. wt. 0.5 lbs. .....List $22.25.

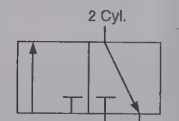
Each .....$24.71

No. 5H655

# 3-WAY MANUAL AND MECHANICAL VALVES



**ARO 1/8, 1/4 and 3/8-inch valves** for manual or mechanical operations in low to moderate flow applications such as small bore pneumatic cylinders. Available in 3- or 4-way, 2- or 3-position. Compact design for use as small power valve where space is limited. Durable aluminum extrusion body for good corrosion resistance. Valves are prelubed, can be operated without air line lubrication. Available with hand lever, palm button, roller cam, cam stem, foot pedal or treadle actuators.

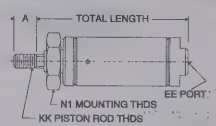
# STAINLESS STEEL BODY AIR CYLINDERS

- **Dimensionally interchangeable with leading manufacturers**
- **Type 304 stainless steel body**
- **Type 303 hard chrome-plated stainless steel piston rod**
- **250 PSI maximum operating pressure**
- **Pre-lubricated**
- **All single acting cylinders are spring loaded**



**Speedaire stainless steel body air cylinders** for pneumatic applications that do not require heavier duty, square head-tie rod cylinders. Available in eight popular bore sizes, 7/16", 9/16", 3/4", 1 1/16", 1 1/4", 1 1/2", 2" and 2 1/2". Single and double acting units available (2 1/2" bore are double acting only) in a variety of stroke lengths and mounting styles. **Cylinder is dimensionally interchangeable with leading manufacturers, allowing for model and mounting retrofit (see Interchange Guide).**

All units feature high-strength, double rolled Type 304 stainless steel body and aluminum alloy end caps. Piston rods are chrome-plated Type 303 stainless steel with rolled threads that are spin-riveted into aluminum alloy pistons for extended service life in high cycle applications. Sintered bronze bearing (except on Nos. 6W074-75, 6W087-88, 6W116-117 and 6W134-135) provides resistance to side load. Nitrile "U" cup piston and rod seals ensure low breakaway friction and leak free operation. Recommended for operating temperatures of -20° to 200°F.

**Note:** Nose mount units include mounting nut. Pivot mount units include stationary pivot pin (except 2" and 2 1/2" bores). Double end mount units include two mounting nuts. Pivot brackets, foot brackets and rod clevis ordered separately.

# COMPACT AIR CYLINDERS

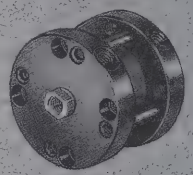
Speedaire compact, high-performance pneumatic cylinders are designed for use in clamping devices, parts ejection and injection molding machines, as well as many robotic circuits. 150 PSI maximum operating pressure. Attachable mounts are listed on opposite page.

**Corrosion resistant aluminum alloy heads and caps.**

**High strength tie rods** to insure compression on tube end seals.

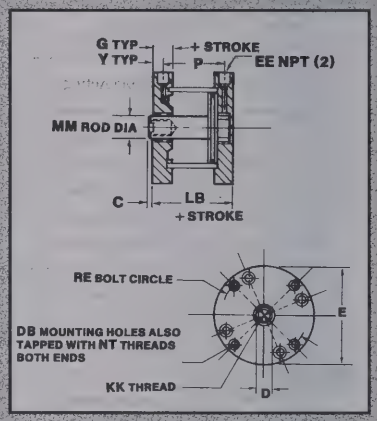
**Aluminum tube** is hard anodic coated on inside diameter for file hard (60RC) resistance to scoring and wear.

**Hard, chrome-plated piston rod** is ground and polished steel of 100,000 PSI minimum yield.



**Strong, lightweight aluminum alloy piston** has excellent wear characteristics against the hard coated ID tube.

**Quad ring seal** on piston and bushing combines positive sealing with minimal friction and long life



**Cast-iron, Teflon coated rod bushing** for maximum wear, permanent lubrication, and low friction.

**Piston is threaded to the rod** and retained with lock nut. Rod is then staked over the lock nut to ensure maximum cycle life.

# SMALL BORE TIE-ROD AND END MOUNTS

## SMALL BORE AIR CYLINDERS

SPEEDAIRE®

No. 1A424

**Designed for small bore applications,** these Speedaire double-acting pneumatic cylinders are made of durable aluminum and outperform the round, "throw-away" type cylinders. Unique design provides for easy repairability, bolt-thru mounting and the flexibility of attaching any one of six mounts (listed on opposite page) without removing bolts or need for retorquing. Available in 3/4" bore with 1/2 to 2" strokes and in 1⅛" bore with 1/2 to 3" strokes. **Polished chrome plated steel piston rods** have 100,000 PSI minimum yield. End caps are made of 40,000 PSI minimum yield 6061-T6 aluminum. Rod bushing is 30,000 PSI cast iron for maximum strength and Teflon coated for permanent lubrication and low friction.

**Tube is made of 35,000 PSI minimum yield aluminum alloy** and the I.D. is hard anodic coated for file hard (60RC) resistance to scoring and wear. Tube end seals are made of heat resistant fiber with nitrate base elastomer as a binder. Lightweight piston is made of 40,000 PSI minimum yield 6061-T6 aluminum and designed to work with hard coated ID of the tube.

Buna N lip type rod and piston seals provide low friction characteristics, positive sealing, and long life. Tie rods are made of high strength steel to maintain compression on tube end seals. Silver and black finish. Speedaire brand.

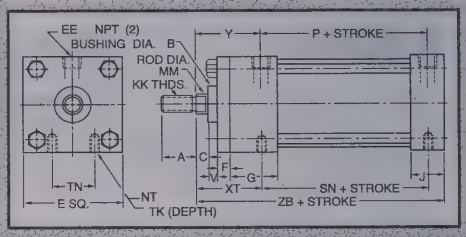
# TIE-ROD CYLINDERS



## LARGE BORE AIR CYLINDERS

No. 6X370

SPEEDAIRE®

- Meets all JIC and NFPA standards
- Permanently lubricated
- 250 PSI maximum operating pressure
- 400 PSI hydraulic (nonshock)
- Bottom flush mounting holes standard

**Heavy-duty double acting Speedaire cylinders** meet all Joint Industry Conference (JIC) and National Fluid Power Association (NFPA) standards. Unique design provides for easy addition of mounts without removing tie bolts or need for re-torquing. 8, 10, 12" stroke cylinders have adjustable cushion seals on both ends to absorb shocks, minimize noise and increase cylinder life. Seals are self-centering and pressure loaded for positive cushioning action. When pressure is reversed, the seal allows pressure to bypass and act on full piston area for fast breakaway.

**Constructed of lightweight, high tensile strength aluminum.** Polished chrome plated steel piston rods have 100,000 PSI minimum yield. Tie rods are of high strength steel and torqued to maintain compression on end seals. Buna N piston lip seals and urethane rod lip seals provide low friction characteristics and long life.

**Cylinders can be easily mounted** with optional brackets listed on opposite page. Silver and black finish. Speedaire brand.

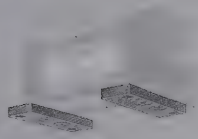
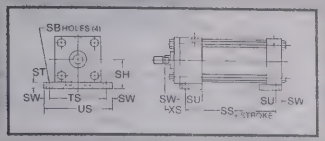
(*) 8, 10, and 12" stroke cylinders have cushion seals on both ends to absorb shocks.

## SPEEDAIRE SELF-ALIGNING COUPLERS



SPEEDAIRE®



- Designed to prevent binding of cylinder caused by misalignment
- Permits greater tolerance between center-line of cylinder and mating part
- Speedaire brand

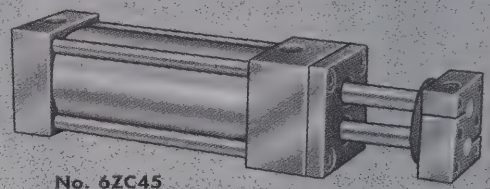
### SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE



Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

# NON-ROTATING ROD AIR CYLINDERS

**SPEEDAIRE**®

- Meets NFPA mounting standards
- Bottom flush (MS4) mounting holes standard
- 150 PSI operating pressure
- Permanently lubricated
- Adjustable cushions on 1½", 2" and 2½" bore sizes

No. 6ZC45

**Heavy-duty, double acting air cylinders** for applications requiring guided movement when it is critical that piston rod not rotate. Constructed with two piston rods instead of one, design prevents rods from twisting and turning off axis, providing user with reliable, repeatable linear motion without need for external guides. Cylinder bearing wear is also minimized by the non-rotating twin-rod design.

**Available in four bore sizes:** 1⅛", 1½", 2", and 2½". Standard stroke lengths are 1", 2", and 3" for the 1⅛" bore, and 2", 3", 4", and 6" for all other bore sizes. All bore sizes, except 1⅛", are equipped with adjustable cushions on both ends.

**Constructed of lightweight, high tensile strength aluminum.** Meets NFPA mounting standards. Piston rods are chrome plated, ground and polished steel rated for 100,000 PSI minimum yield. Tie rods are high strength steel and torqued to maintain compression on tube end seals. Rod bearing is heavy-duty, high load cast iron for durability and is easily removed. U-cup piston seals provide low friction characteristics and long service life.

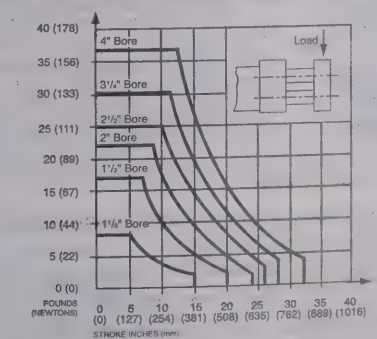
| 2 1/2 | 6ZC62 | 11.37 | 10.52 | 1.4 |

**Transverse Rod Deflection may be calculated by using the formula below**

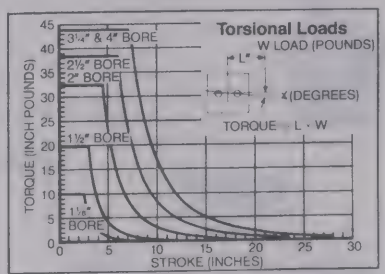
$$D = \frac{P \times S^3}{K}$$

Where: D = Deflection in inches
K = Constant
S = Stroke in inches
P = Load in pounds



| Bore (In.) | K Factor | K1 Factor |
|---|---|---|
| 1 1/8 | 9,000 | 34,450 |
| 1 1/2 | 19,800 | 84,650 |
| 2 | 236,100 | 551,250 |
| 2 1/2 | 593,000 | 1,345,820 |

**Torsional Rod Deflections may be calculated by using the formula below**

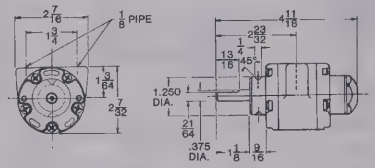


$$\text{Tangent of angle in degrees} = \frac{\text{Torque} \times S^3}{K_1 \times 4}$$

Where K = Constant
S = Stroke in in.
Torque = L x Wt. of load

**Transverse Loads**

**Torsional Loads**

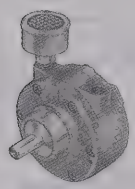


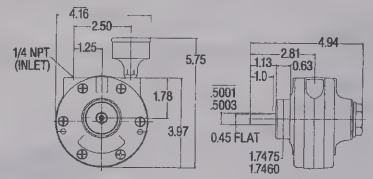
**The transverse and torsional load graphs shown are to be utilized as a guide-line with respect to the maximum load and stroke of each respective bore size.**

**Traverse or torsional loads placed on the cylinder will cause some deflection of the piston rods. Excessive deflection will adversely affect cylinder life and should be considered at the time initial application design.**

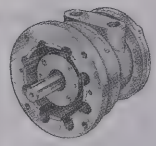
**Theoretical deflection of the piston rods in their extended position may be calculated by using the above formulas for either a traverse or torsional load.**

# AIR MOTORS AND GEARMOTORS

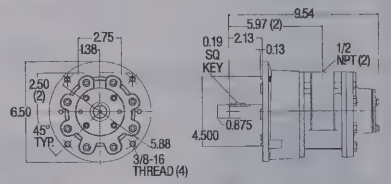




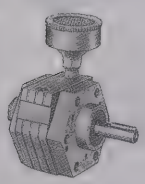
- Registered to ISO 9001
- Stall proof
- Variable speed
- Cast iron body
- Instantaneously reversible (except No. 6ZC93 which is counter clockwise only)

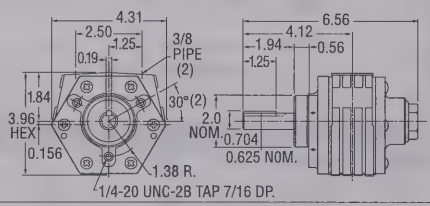


**(*) If greater torque and lower RPM are required, air motors may be converted to air gearmotors. Boston Gear, Winsmith and Dayton brands of C-face, right angle speed reducers are available. See index under Speed Reducers.**

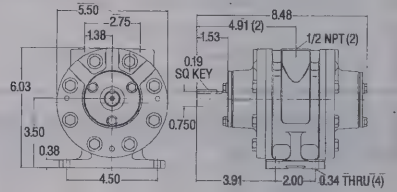


### No. 6ZC93 3/4 HP Air Motor

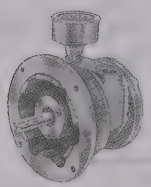


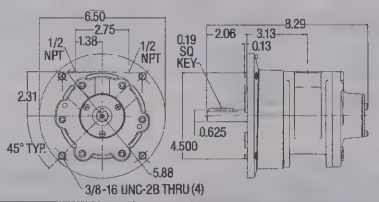


### No. 6ZC94 5 HP Air Motor*

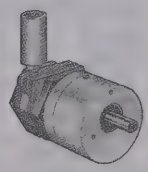


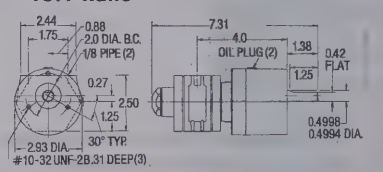
### No. 4Z231 1¾ HP Air Motor*



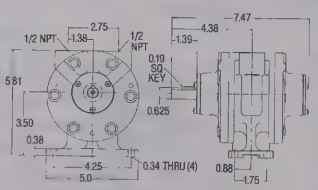


### No. 6ZC95 5 HP Air Motor

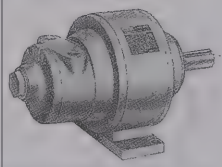


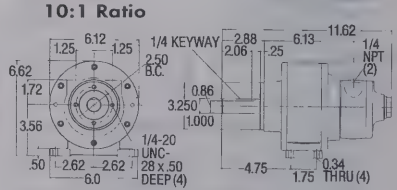


### No. 6ZC96 4 HP Air Motor*

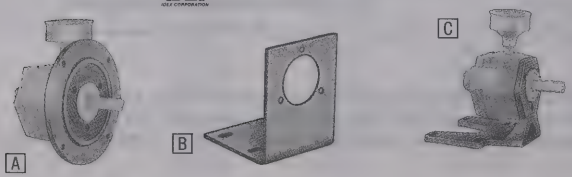


### No. 4Z412 1/3 HP Air Powered Gearmotor 15:1 Ratio





### No. 6ZC98 4 HP Air Motor



### No. 6ZC97 1½ HP Air Powered Gearmotor 10:1 Ratio

## MOUNTS FOR Nos. 4Z231, 4Z411, and 4Z412

GAST
A UNIT OF IDEX CORPORATION

**A NEMA 56C FRAME FLANGE MOUNT**

Cast iron flange mount for No. 4Z231.
**No. 6X889.** Shpg. wt. 3.3 lbs. List $49.98. Each.....**$42.65**

**B FOOT MOUNT**

Sturdy foot mount for use with Nos. 4Z411 and 4Z412.
**No. 5X372.** Shpg. wt. 0.6 lbs. List $17.34. Each.....**$14.81**

**C NEMA 56 FRAME FOOT MOUNT**

Cast aluminum foot mount for No. 4Z231.No. 6X8901.4
**No. 6X890.** Shpg. wt. 1.4 lbs. List $53.04. Each .....**$45.35**

GAST
A UNIT OF IDEX CORPORATION

## ROTARY VANE AIR MOTORS

**Gast air motors and gearmotors** are a compact, lightweight, dependable source of smooth, vibrationless power.

**Models will stop, start, and reverse (except No. 6ZC93 which is counter clockwise only) almost instantaneously** with use of a 4-way valve. Can continuously operate in extreme temperatures up to 250°F, as well as in wet and corrosive environments. With no heat build-up or electric sparking, air motors are an excellent alternative in applications that would normally require expensive explosion-proof motors. Stalling or overloading will not damage air motors.

**All units come with discharge muffler** to reduce noise. Gray metallic finish. Gast brand.

**Output speed and torque can be adjusted** through the use of an air regulator valve placed between air source and air motor. Requires little maintenance, as vanes are self-sealing and self-adjusting.

**Can be used in hundreds of continuous duty applications** including construction machinery, conveyors, hoisting, mixing, packaging, paint/finishing equipment; and to operate mechanical pumps in all industries.

## AIR POWERED GEARMOTORS

**Parallel shaft, air-powered gearmotors** provides same features and advantages of an air motor but at a higher torque and lower output speed range.

**Provide high torque with smooth start-up.** Torque increases and speed decreases in proportion to the ratio of the gear reducer selected. Geared speed reduction permits motor to operate at more efficient speeds, while providing better speed control under changing load and torque.

**Compact and lightweight in-line design** is ideal for applications where installation space is limited or where weight is a factor.

**Rated for continuous duty** and feature cast iron housing, high strength steel output shaft with key and plastic cover; tapered roller bearing; and hardened polished steel worm mating with forged, heat treated high manganese bronze worm gear. Supplied with AGMA #8 lubricant in gear chamber.

# INGERSOLL-RAND® PROFESSIONAL TOOLS

New

- For very high stall torque applications
- All motors have round keyed shaft
- 6 hole face mounting on all motors except No. 4Y423
- Instant starting, stopping and reversing eliminates the delays of motor speed up or slow-down periods

Safe operation in hazardous conditions, with no electrical sparks or hydraulic fluids.

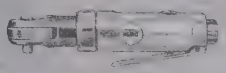
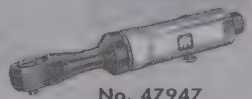
# AIR RATCHETS



## 1/4" DRIVE AIR RATCHETS

Dayton® INGERSOLL-RAND® PROFESSIONAL TOOLS



Installation & Service Available Contact Your Local Branch

Replacement Parts Available 1-800-323-0620

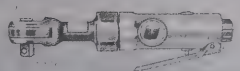
No. 4LG50

No. 4LG56

No. 4LG55

No. 4Z947

These small light-weight ratchets are ideal for running fasteners that are located in tight areas, such as in fenders or under dashboard work. Narrow drive heads also assist in getting in tight spaces. Ratchets feature ball detent for easy socket change, reversible operation, ball and needle bearing construction, and lever throttle for variable speed control, except 4Z947 which has push button throttle. Air ratchets should be used with impact sockets. Note: Look in index under "Sockets, Impact."



Nos. 4LG50, 4LG55, and 4Z947 ratchets have full size body for good torque producing capabilities for tightening and loosening fasteners.

Nos. 4LG56, and 6W379 compact body ratchets provide even more maneuverability in tight spaces.

## 3/8" DRIVE AIR RATCHETS

No. 4Z241

No. 5Z273

No. 4KR74

INGERSOLL-RAND® PROFESSIONAL TOOLS

No. 4KR76

**Ideal for running** fasteners in and out quickly. Ratchets feature ball detent for easy socket change, reversible operation, ball and needle bearing construction, and lever throttle for variable speed control, except 4KR76 which has push button throttle. Air ratchets should be used with impact sockets. Note: Look in index under "Sockets, Impact."

**No. 5Z273. Egonomic reactionless ratchet** features unique built-in ball and cam mechanism that eliminates torque reaction, which means no more bloody or bruised knuckles when working in tight areas. This ratchet also runs at 300 RPM, twice as fast as most other ratchets.

**No. 4LG51. Compact body ratchet** features the same body as No. 4LG50 1/4" ratchet, but with 3/8" drive for easy access into tight areas.

**No. 4Z780. Ratchet kit** includes 1V680 ratchet, 3" extension bar, 13/16" spark plug socket with neoprene insert, and 6 point sockets in the following metric and S.A.E. sizes: 9-14mm, 16mm, 17mm, 19mm, 3/8, 7/16, 1/2, 5/8, 11/16, and 3/4", and carrying case.

**No. 4Z241. General-duty ratchet** is constructed with double needle bearings, to promote long life.

**No. 4KR74. General-duty ratchet** features rear exhaust to direct air away form work area.

**No. 4KR76. Super-duty ratchet** can deliver up to 60 ft. lbs. of torque.

# AIR RATCHETS/ IMPACT WRENCH TERMINOLOGY

## 1/2" DRIVE AIR RATCHETS

Dayton® Replacement Parts Available 1-800-323-0620™

Installation & Service Available Contact Your Local Branch™

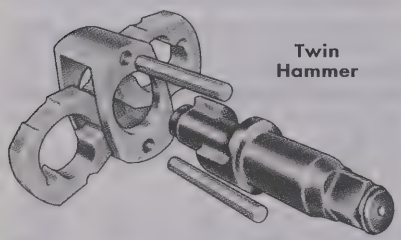
INGERSOLL-RAND® PROFESSIONAL TOOLS

No. 6W253 No. 4Y312 No. 4KR75 No. 4KR77

**Ratchets feature** ball detent for easy socket change, reversible operation, ball and needle bearing construction, and lever throttle for variable speed control, except 4KR77 which has push button throttle. Air ratchets should be used with impact sockets. **Note: Look in index under "Sockets, Impact."**

No. 6W253 Only true full body 1/2" wrench that can produce up to 90 ft. lbs. of torque.

**Nos. 4Y312, 4KR75, and 4KR77.** Same body as a 3/8" Ingersoll-Rand ratchet, but with 1/2" drive for easy access into tight areas. No. 4KR75 features rear exhaust to direct air away from work area.



**OPERATIONAL NOTE:** Air ratchets are not intended to break loose or tighten a fastener to a final torque rating. Breaking loose or final tightening should be performed with the air ratchet in the same manner as a hand ratchet. The air ratchet should only be used to run the fastener out or in. The high torque capabilities should be used when a fastener is rusted, some type of thread sealant was used, or self locking fasteners are being used.

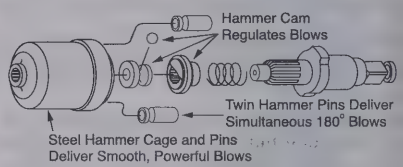
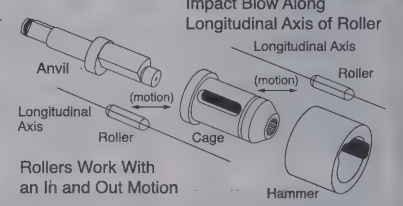
## IMPACT WRENCH MECHANISMS AND SOCKET RETAINER STYLES

**Twin Hammer**

A simplified, yet highly effective design that holds each of the reversible hammers in full engagement or disengagement with centrifugal force. The twin hammer mechanism delivers more power per pound, and is less sensitive to air pressure fluctuations than any other design.



- **Smooth, balanced blow**
- **High power-to-weight ratio**
- **Suitable for hard or soft-draw applications**



**Jumbo Hammer**

Similar in concept to the twin hammer mechanism, but employing a single hammer.

- **Simplified design**
- **Reversible hammers**
- **Direct drive**

**DynaPact® Pin Clutch Impact Mechanism**

**Roller Clutch Impact Mechanism**

No. 1V676

Universal Tool light-duty impact wrenches are economical tools, ideal for home shop or light maintenance, intermittent applications. **Note: For sockets, see index under "Sockets, Impact."**

**No. 1V678. 1/2" impact wrench** features jumbo hammer mechanism, one piece lightweight housing, rubber nose piece, oil bath lubrication, push button forward/reverse control, and multi-position power regulator.

**No. 4Z779. 1/2" impact wrench kit** includes a 1V678 1/2" impact wrench, 10 hardened forged steel six point sockets in 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16, 7/8, 15/16, and 1" sizes, and heavy-duty plastic carry case.

**No. 1V676. 1/2" impact wrench** features dynapact impact mechanism, steel impact housing, pressure feed lubrication for impact mechanism, push button forward/reverse control, and multi-position power regulator.

# 1/2" IMPACT WRENCHES

For impact mechanism terminology, see page 2964.

**No. 4Z543. 1/2" Dayton impact wrench** features Roller pin clutch impact mechanism, protective rubber jacket, push button forward/reverse control, and multi-position power regulator.

**No. 2Z853. 1/2" Dayton impact wrench** features roller pin clutch impact mechanism, protective rubber nose piece and rear rubber ring, push button forward/reverse control, and multi-position power regulator.

**No. 4LG57. 1/2" Dayton impact wrench** features roller pin clutch impact mechanism, steel impact housing, flip lever forward/reverse control, and multi-position power regulator.

**No. 5Z336. 1/2" Dayton extended anvil impact wrench** features roller pin clutch impact mechanism, 2" extended anvil, protective rubber nose piece and rear rubber ring, push button forward/reverse control, and multi-position power regulator.

**No. 4Z944. Ingersoll-Rand impact wrench** features twin hammer impact mechanism, steel impact housing, rear dial forward/reverse control with adjustable power in forward and full power in reverse, and handle exhaust.

**Nos. 2Z747 and 6Z917. Extended anvil Ingersoll-Rand impact wrench** features twin hammer impact mechanism, steel impact housing, pressure feed lubrication for impact mechanism, push button forward/reverse control, and multi-position power regulator. No. 6Z917 features a 2" extended anvil for use with flip sockets or reach into tight spots.

**No. 4Y348. Ingersoll-Rand impact wrench** features extra large motor for more torque, twin hammer impact mechanism, steel impact housing, pressure feed lubrication for impact mechanism, variable speed trigger, push button forward/reverse control, multi-position power regulator.

**Nos. 4Y343 and 4Y344. Ingersoll-Rand impact wrenches** are two of the most advanced impacts in the market today. Their unique, super strong composite housing and steel hammer case give the tool a lightweight, balanced and compact design. The innovative motor design and power management system deliver 600 ft. lbs. in reverse, and up to 4 position power regulator in forward that delivers up to 450 ft. lbs. of torque. The units feature twin hammer impact mechanism, one hand push button forward/reverse control, 360 degree swivel air inlet, and handle exhaust. No. 4Y344 features a 2" extended anvil.

**No. 4KR78. Ingersoll-Rand impact wrench care kit** contains 4 oz. impact hammer mechanism grease #115, grease gun, 4 oz. of air tool oil, and use and care instructions for the following IR 2131 series impact wrenches: 4Y343, 4Y344 and 3Y588.

**No. 4KR78.** Shpg. wt. 1.0 lbs.
List $19.95. Each.....$16.15

# IMPACT WRENCHES

## 1/2" IMPACT WRENCHES

For impact mechanism terminology, see page 2964

**No. 4TL86. Industrial-duty Dayton impact wrench** features contoured polyurethane grip, patented Silent-X exhaust for quiet operation, 3-step power regulator, steel hammer case, pin-type socket retainer, and thru-handle exhaust.

**No. 6Z830. Industrial-duty Dayton impact wrench** features dynapact impact mechanism, steel impact housing, three-position forward power regulator and full power in reverse, and through handle exhaust.

**Ingersoll-Rand** has three classifications for their **industrial-duty line** on impact wrenches; Standard-duty, Heavy-duty, and Super-duty.

**Standard-duty tools** are intended for less frequent use, involving lighter materials.

**Heavy-duty tools** are well suited to medium volume production or general maintenance and construction tasks, and offer a good balance between performance and economy.

**Super-duty Tools** are intended for high volume production or heavy maintenance and construction, where the ultimate performance and durability are required. These tools incorporate a number of unique added features, as well as the finest materials, bearings, and tight tolerances.

**No. 4Z942. 1/2" standard-duty Impact wrench** features twin hammer impact mechanism, steel impact housing, pressure feed lubrication for impact mechanism, push button forward/reverse control, and multi-position regulator.

**No. 3Y588. 1/2" standard-duty impact wrench's** unique, supper strong composite housing and steel hammer case give the tool a lightweight, balanced and compact ergonomic design. The innovative motor design and power management system deliver 600 ft. lbs. in reverse, and up to 4 position power regulator in forward that delivers up to 450 ft. lbs. of torque. The unit features twin hammer impact mechanism, one hand push button forward/reverse control, 360 degree swivel air inlet, and handle exhaust.

**No. 4Z254. 1/2" heavy-duty impact wrench** features twin hammer impact mechanism, steel impact housing, pressure feed lubrication for the impact mechanism, push button forward/reverse control, and multi-position regulator.

**No. 3Y583. 1/2" super-duty impact wrench** features Jumbo hammer impact mechanism, chrome plated steel impact housing, pressure feed lubrication for the impact mechanism, durable epoxy coated motor housing and handle, built-in lubricator for motor, integral muffler, push button forward/reverse control, and multi-position regulator.

**No. 3Y582. 1/2" super-duty impact wrench** features twin hammer impact mechanism, two-piece motor housing for easier maintenance, chrome plated steel impact housing, pressure feed lubrication for the impact mechanism, durable epoxy coated motor housing and handle, built-in lubricator for motor, integral muffler, push button forward/reverse control, and multi-position regulator.

**No. 4KR73. Impact wrench care kits** are for all Ingersoll-Rand impact wrenches that have pressure feed lubrication for the impact mechanism, except Nos. 4Y343, 4Y344, and 3Y588. Kit includes 4 oz. impact hammer mechanism grease #105, grease gun, 4 oz. of air tool oil, and use & care instructions for the following IR impact wrenches: 4Y342, 4Z623, 2Z747, 4Y348, 6W380, 4Y352, 4Y357, 4Y360, 4Z253, 3Y596, 4Y304, 4Z255, 4Y300, 4Z942, 4Z254, 3Y578, 4Y260, and 3Y576.

**No. 4KR73.** Shpg. wt. 1.0 lbs. List $19.94. Each ..... $16.15

# IMPACT WRENCHES

## 3/4" IMPACT WRENCHES

**Nos. 2Z855 and 6W251 General-duty Dayton 3/4" impact wrenches** feature: roller pin impact mechanism, push button forward/reverse control, multi-position power regulator, and protective rubber jacket. No. 6W251 features 6" extended anvil.

**Nos. 4KR79 and 1CH32. General-duty Ingersoll-Rand 3/4" impact wrenches** feature dual pin type mechanism, steel impact housing, oil bath impact lubrication, rear dial forward/reverse control, 3-position adjustable power regulator in forward and full power in reverse, 360 degree air inlet swivel, and handle exhaust.

**Nos. 6W380 and 3JD22. General-duty Ingersoll-Rand impact wrenches** feature jumbo hammer impact mechanism, pressure feed lubrication for impact mechanism, push button forward/reverse control, multi-position power regulator, and handle exhaust. No. 3JD22 features a 3" extended anvil.

**Nos. 4TN95 and 4TN96. 3/4" General-duty Ingersoll-Rand impact wrenches** feature jumbo twin hammer impact mechanism, pressure feed lubrication for impact mechanism, 3-position adjustable power regulator in forward and full power in reverse, 360 degree air inlet swivel.

**No. 6W252. Industrial-duty Dayton impact wrench** features Dynapact pin impact clutch mechanism, steel impact housing, 3 position power regulator, flip lever forward/reverse control, and 360° rotating side handle.

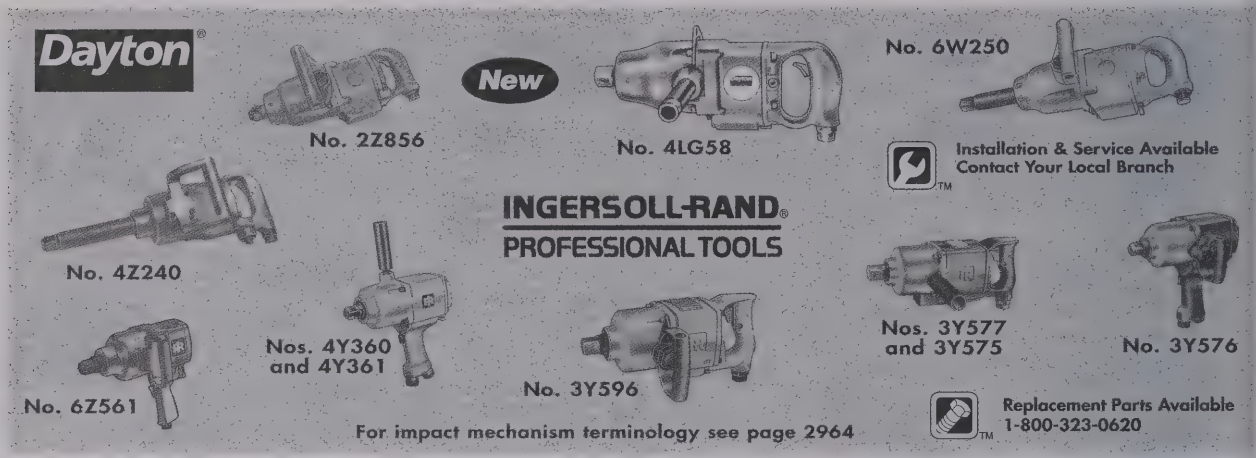
**Ingersoll-Rand** features two classifications for their industrial impact line, heavy-duty and super-duty.

**Heavy-duty tools** are well suited to medium volume production or general maintenance and construction task, and offer a good balance between performance and economy.

**Super-duty Tools** are intended for high volume production or heavy maintenance and construction, where the ultimate performance and durability are required. These tools incorporate a number of unique added features, as well as the finest materials, bearings, and tight tolerances.

**No. 4Z255. 3/4" Heavy-duty impact wrench** features jumbo impact mechanism, steel impact housing pressure feed lubrication for impact mechanism, push button forward/reverse control, and multi-position power regulator.

**No. 3Y581. 3/4" Super-duty impact wrench** features "D" grip rear handle, twin hammer impact mechanism, pressure feed lubrication for impact mechanism, chrome plated impact housing, integral muffler reduces operator fatigue, built-in lubricator, and durable epoxy coated motor housing and handle.



**Nos. 4TN98 and 4TP01. 3/4" Super-duty Ingersoll-Rand impact wrenches** feature jumbo twin hammer impact mechanism, 3-position power regulator in forward and full power reverse to handle rusted or weathered fastners, 360 degree air inlet swivel. No. 4TP01 "reverse bias" model delivers more torque in the reverse direction for the extra hard removal applications.

# IMPACT WRENCHES

## 1" IMPACT WRENCHES

For impact mechanism terminology see page 2964

**Nos. 2Z856 and 6W250. General-duty Dayton 1" impact wrenches** feature "D" grip handle, spade style dead handle, twin hammer impact mechanism, and flip lever forward/reverse control. No. 6W250 has 6" extended anvil.

**No. 4LG58. Dayton industrial-duty 1" impact wrench** features "D" grip handle, spade style dead handle, Jumbo hammer impact mechanism, flip lever forward/reverse control, and tool balancer slot.

**No. 6Z561. Ingersoll-Rand general-duty 1" impact wrench** features compact design for use in tight spaces, and adjustable power speeds with a 4-position power regulator.

**No. 4Z240. General-duty Ingersoll-Rand 1" impact wrench** features "D" grip handle, spade style dead handle, twin hammer impact mechanism, three-position power regulator, 360 degree air inlet swivel, and angle down exhaust.

**No. 4TN97. General-duty Ingersoll-Rand 1" impact wrenches** feature jumbo twin hammer impact mechanism, pressure feed lubrication for impact mechanism, 3-position regulator in forward and full power in reverse, 360 degree air inlet swivel.

**Nos. 4Y360 and 4Y361. General-duty Ingersoll-Rand 1" impact wrenches** feature twin hammer impact mechanism, pressure feed lubrication for impact mechanism, straight style dead handle, rear flip lever forward/reverse control, and multi-position power regulator. No. 4Y361 features a #5 spline shaft.

**Nos. 4TP02 and 4TN99. Industrial-duty Ingersoll-Rand 1" impact wrench** features jumbo twin hammer impact mechanism, pressure feed lubrication for impact mechanism, 3-position power regulator, push button forward/reverse control, 360 degree air inlet swivel.

**No. 3Y596. Industrial-duty Ingersoll-Rand 1" heavy-duty impact wrench features** "D" grip handle, spade style dead handle, twin hammer impact mechanism, pressure feed lubrication for impact mechanism, ductile iron impact housing, and flip lever throttle control.

**No. 3Y578. Industrial-duty Ingersoll-Rand 1" super-duty impact wrench** features "D" grip handle,(inside handle throttle) straight style dead handle, twin hammer impact mechanism, pressure feed lubrication for impact mechanism, flip lever forward/reverse control, two-piece motor housing, built-in lubricator for motor, epoxy coated finish, and built-in power regulator.

**Nos. 3Y576, 3Y577, and 3Y575. Industrial-duty Ingersoll-Rand 1"- 1½" super-duty impact wrenches** feature twin hammer impact mechanism, pressure feed lubrication for impact mechanism, flip lever for forward/reverse control, integral muffler, two-piece motor housing, built-in lubricator for motor, and epoxy coated finish. No. 3Y576 features pistol grip handle, spade style dead handle, and integral power regulator. Nos. 3Y577 and 3Y575 also feature "D" grip handle, and straight dead handle.

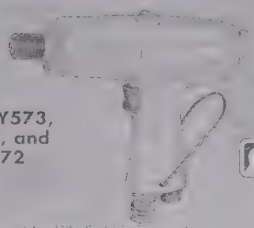
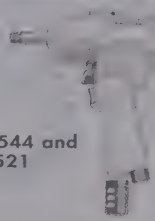
# PULSE TOOLS

## PULSE NUTRUNNERS/SCREWDRIVERS

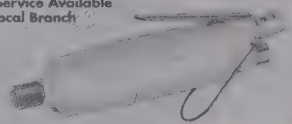


No. 3Y603



No. 3Y602

INGERSOLL-RAND
PROFESSIONAL TOOLS



Nos. 3Y573, 3Y586, and 3Y572

Replacement Parts Available
1-800-323-0620

Nos. 3Y544 and 3Y521

Installation & Service Available
Contact Your Local Branch

Nos. 3Y592 and 3Y585

- Improved balance and quiet operation
- Virtually no overtorquing in critical applications
- Two-speed trigger for precision starts and high speed rundown
- Excellent power-to-weight ratio
- Special cooling system contributes to longer mechanism life
- Reversible with a choice between pistol or straight handles and trigger or lever start
- Operate at 90 PSI maximum air pressure

### PULSE NUTRUNNER/SCREWDRIVER SPECIFICATIONS AND ORDERING DATA

| Torque Range Soft Draw (Ft.-Lb.) | Hard Slam† (Ft.-Lb.) | Free Speed RPM | Drive (In.) | Handle Type | Throttle Type | Avg. CFM†† | Avg. Length (In.) | Ingersoll-Rand Model | Stock No. | List | Each | Shpg. Wt. |

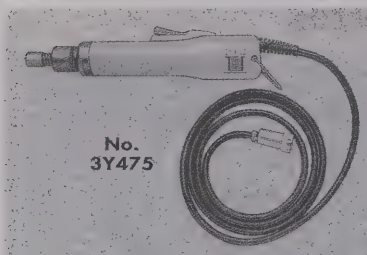
| **3-6** | 4-9 | 10,000 | 1/4 Q.C. | Straight | Lever | 3.0 | 9 | 100SQ1 | **3Y602** | 1174.66 | **1053.00** | 2.0 |
| **6-11** | 12-22 | 9000 | 1/4 Q.C. | Straight | Lever | 3.0 | 8½ | 180SQ1 | **3Y592** | 1314.64 | **1187.00** | 2.1 |
| **7-14** | 13-26 | 8000 | 1/4 Q.C. | Straight | Lever | 3.0 | 9 | 280SQ1 | **3Y585** | 1314.64 | **1187.00** | 2.1 |

**Note:** Torque ranges should be used as a guide only. For best performance use tools at mid-torque range. Final torque can vary depending on air pressure and type of joint. (*) Soft draw is based on fastener being hand tight and then tightened with no less than 720° rotation of the fastener. Hard Slam is based on fastener being hand tight and then tightened with no more than 30° rotation of the fastener. (††) Avg. CFM is based off of a 15 second run time.

## AUTOMATIC SHUT-OFF PULSE TOOLS

**New**

No. 3JD33



- An addition to the standard Power Pulse line from Ingersoll-Rand
- Shut-off models share advantages of the Power Pulse line, along with automatic shut-off capability
- All models are reversible drive pistol handle trigger style
- Faster rundown speeds with higher torque output

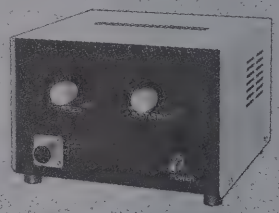
# INGERSOLL-RAND INDUSTRIAL ELECTRIC SCREWDRIVERS



INGERSOLL-RAND®
PROFESSIONAL TOOLS

Replacement Parts Available
1-800-323-0620™

Installation & Service Available
Contact Your Local Branch™

**Application:** For light-duty assembly applications where electric power is required
**Type:** 1/4" reversing.
**Switch:** Standard precision shut-off clutch for assembly applications where precise torque control is necessary
**Power:** Operate on 115VAC, no special power needed. Control module required for No. 3Y475
**Approvals:** UL Listed
**Features:** Dynamic motor brake to reduce torque reaction

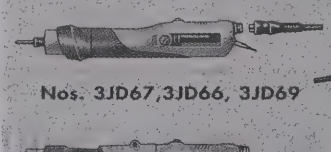
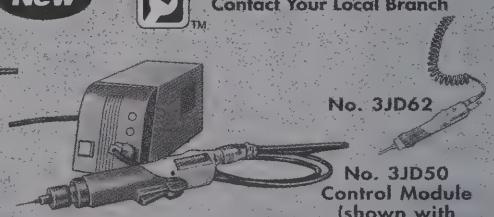
# VERSATEC™ ELECTRIC SCREWDRIVERS



**Latest innovative Line of Electric,** Light Duty, Precision Assembly Screwdrivers that sets new standards for ergonomics and operator convenience. Egg-shaped oval grip fits almost any size hand. Soft touch grip feels good and maintains a comfortable temperature. Contoured flange follows the shape of user's hand.



- **All Models UL Listed**
- **All Models Reversible, 1/4" Bit Size, no special power needed.**
- **Control Module required for Model Nos. 3JD52 and 3JD53. All models operate on 115V AC.**
- **All controls positioned for easy use by right or left-handed operators**
- **Exceptional performance at low sound levels**
- **Electric power cord easily detached from the tool by loosening threaded retainer**

# AIR SCREWDRIVERS

Replacement Parts Available
1-800-323-0620

## DIRECT DRIVE SCREWDRIVERS

**Nos. 6W262 and 6W263.** Dayton direct drive screwdrivers have a direct connection between the motor and bit, which stalls at completion of fastening. Both units include a quick change bit holder.

- **No. 6W262 produces up to 50 in.-lbs. of torque**
- **No. 6W263 produces up to 75 in.-lbs. of torque**
- **Reversible • 1/4" hex bit**

## PUSH-TO-START POSITIVE JAW CLUTCH SCREWDRIVERS

**Nos. 6W264 and 6Z666.** Dayton jaw clutch screwdrivers have a positive rolling impulse clutch that joins the motor and the bit through one clutch, separated by a light spring. The bit remains stationary for location purposes, until the operator pressure engages the jaw mechanism.

- **Pistol grip design**
- **No. 6W264 produces up to 30 in.-lbs of torque**
- **No. 6Z666 produces up to 50 in.-lbs. of torque**
- **For wood, sheet metal, and self-tapping screws**
- **Reversible • 1/4" hex bit**

## ADJUSTABLE CUSHION CLUTCH SCREWDRIVERS

**Nos. 6Z664, 6Z665, 6W265 and 6W266.** Dayton adjustable cushion clutch screwdrivers employ two clutch systems. An impulse clutch helps keep bit stationary for locating while the second adjustable clutch gives precise torque control.

- **Available in either pistol grip or straight handle design**
- **Nos. 6Z664 and 6Z665 have an adjustable torque range between 10-50 in.-lbs.**
- **Nos. 6W265 and 6W266 have an adjustable torque range between 10-75 in.-lbs.**
- **Nos. 6Z665 and 6W265 include lift bails for use with tool balancers**
- **For jobs with pre-drilled holes which require prescribed torque requirements**
- **Reversible**
- **1/4" hex bit**

### DIRECT DRIVE SCREWDRIVERS

- **Pistol handle with trigger start control**
- **Reversible operation**
- **1/4" quick change chuck**

Direct drive screwdrivers have a direct connection between the motor and bit, and stalls at completion of fastening. Designed for soft pull applications in wood and other material not requiring critical torque control. Applied torque is controlled by the operator and can be limited by regulating air line pressure.

| Torque Range Soft Draw (In.-Lbs.) | | Free Speed RPM | Handle Type | Throttle Type | Avg. CFM* | CFM† | Air Inlet (NPT) (In.) | Min. Hose Size (In.) | Length (In.) | I-R Model | Stock No. | List | Each | Shpg. Wt. |

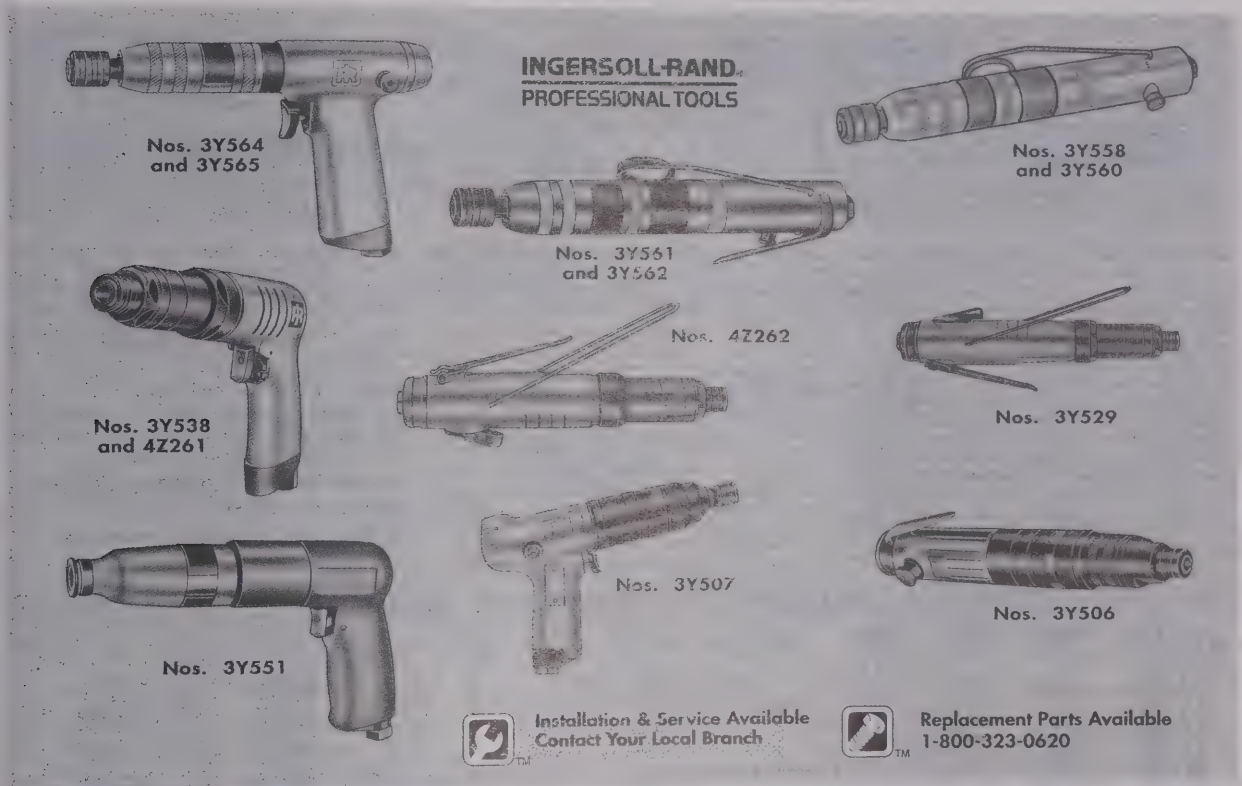
### POSITIVE JAW CLUTCH SCREWDRIVERS

**Nos. 3Y550, 3Y536 and 3Y532. Industrial-duty Ingersoll-Rand positive jaw clutch screwdrivers.**

**No. 3Y550 features:**

- **Ergonomic Skinsulate coating on the housing which helps insulate skin from cold metal housing; minimize vibration; protect tool as well as workpiece**
- **Reversible operation**
- **1/4" quick-connect change chuck**

**Nos. 3Y536 and 3Y532 feature:**



- **Pistol handle with trigger start control**
- **Reversible operation**
- **1/4" quick-connect change chuck**

Positive jaw clutch has two opposing clutch heads that are separated by a spring. Operator can start the motor and then press the tool toward the fastener to engage the clutch mechanism for faster operation in low torque operations and then start motor, then press toward the fasteners to engage the clutch mechanism for high torque application. Applied torque is controlled by the operator and can be limited by regulating air line pressure. Designed for applications where driving torque may exceed final seating torque as in wood and self-tapping applications.

# ADJUSTABLE CUSHION CLUTCH

**Adjustable cushion clutch** has steel balls between two indented plates. A spring pushes down on the top plate forcing down on the steel balls and bottom plate. Adjusting the spring tension higher increases torque output to the bit. Decreasing spring tension decreases torque output to the bit. When the fastener torque exceeds the spring tension on the balls, the clutch begins to slip and the bit stops turning. This operation makes it an excellent ergonomic selection for the operator, since little to no torque is transmitted back through to the operator.

These adjustable cushion clutch screwdrivers come in two different handle types which are pistol and straight handle. Straight handle units come standard with suspension bails for use with tool balancers.

Also, the adjustable cushion clutch screwdrivers come with three different operation controls which are trigger, lever, and push-to-start. Push-to-start models have no trigger button or lever arm to push On to start, rather the tool starts when the operator locates the tool on the fastener and pushes the tool toward the fastener; the tool automatically starts.

Some tools may include extra clutch springs to achieve the full torque range of the tool. All models come with a 1/4" quick change bit, and are reversible.

**No. 3Y551** features ergonomic Skinsulate coating on the housing which helps:

- **Insulate skin from cold metal housing**
- **Minimizes vibration**
- **Protects tool as well as workpiece**

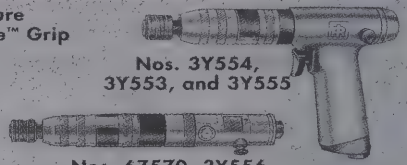
# AIR SCREWDRIVERS

## PRECISION SHUT-OFF CLUTCH



INGERSOLL-RAND® PROFESSIONAL TOOLS

Feature Skinsulate™ Grip

Installation & Service Available Contact Your Local Branch

Replacement Parts Available ™ 1-800-323-0620

**Adjustable precision shut-off clutch screwdrivers** have steel balls between two indented plates. A spring pushes down on the top plate forcing down on the steel balls and bottom plate. Adjusting the spring tension higher increases torque output to the bit. Decreasing spring tension decreases torque output to the bit. When the fastener torque exceeds the spring tension on the balls, the clutch slips and the top plate moves upward pushing on a rod that goes to the throttle valve disengaging it and stopping the tool instantly. Designed for critical fastening applications involving plastics, composites, or metals that require precise torque control.

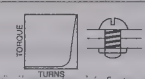
The advantages of the shut-off clutch are that it reduces air consumption, which over time will allow for the tool to pay for itself in energy consumption, and reduces torque reaction on the operator.

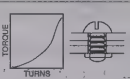
The shut-off clutch screwdrivers come in two different handle types; pistol and straight handle. Straight handle units come standard with suspension bails for use with tool balancers.

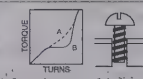
The shut-off clutch screwdrivers come with two different operation controls which are push-to-start, and trigger permit. Push-to-start models have no trigger button or lever arm to push On to start, rather the tool starts when the operator locates the tool on the fastener and pushes the tool toward the fastener; the tool automatically starts. Trigger permit units are similar to push-to-start, but require that the tool is pressed against the fastener, and the trigger is pulled to start the tool.

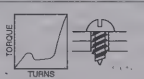
Some tools may include extra clutch springs to achieve the full torque range of the tool. All models come with a 1/4" quick change bit, and are reversible.

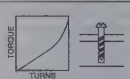
**Nos. 3Y547, 3Y548, 3Y549, and 3Y552** feature ergonomic Skinsulate coating on the housing which helps:











- **Insulate skin from cold metal housing**
- **Minimizes vibration**
- **Protects tool as well as workpiece**

INGERSOLL-RAND PROFESSIONAL TOOLS

No. 6Z586

No. 3Y520

No. 3Y524

No. 3Y514

Replacement Parts Available 1-800-323-0620™

### No. 6Z586 GENERAL-DUTY DAYTON STRAIGHT HANDLE DRILL

- Compact design makes it easy to get into tight spots
- Lever throttle with safety lock-off lever
- Jacobs® multi-craft quality chuck and key

### No. 4LG61 INDUSTRIAL-DUTY DAYTON PRODUCTION DRILL

- Ergonomically designed handle and trigger location help reduce operator fatigue
- Textured surface reduces operator grip force and tool slippage
- High/low grip allows for two hand positions
- Muffled through handle exhaust directs air away from work surface
- Jacobs® aircraft quality chuck and key

### No. 3Y520 GENERAL-DUTY INGERSOLL-RAND MAINTENANCE DRILL

- Powerful and economical
- Excellent for general purpose applications
- Comes with Jacobs® chuck and key

### INGERSOLL-RAND INDUSTRIAL-DUTY PRODUCTION DRILLS

- Double row ball bearings assure precise concentric holes
- Variable speed control allows slow speed starting and high speed for fast drilling
- Excellent power-to-weight ratio means less operator fatigue
- Ergonomically designed handle and trigger location help reduce operator fatigue
- High/low grip allows for two hand positions
- Jacobs® chuck and key included
- All drills non-reversible

All Ingersoll-Rand industrial duty drills except 3Y569 feature Skinsulate® coating on drill housing which provides the following ergonomic benefits:

- Insulates skin from cold metal housing
- Minimizes vibration
- Increases adhesion, while reducing grip force
- Protects tool as well as work piece

# AIR TOOLS

## 3/8" DRILLS

**No. 1V656. Light-duty Universal Tool 3/8" drill** is an economical alternative for home shop use or light maintenance applications. The drill features a Jacobs® chuck and key, variable speed trigger, and is reversible.

**General-duty 3/8" drills** are excellent for general maintenance, light production, and automotive work. All drills feature quality Jacobs® chuck and key, compact design which allows for two high/low hand positions, and light weight aluminum housings, except 6Z585, 6W246, and 6W245 which have nylon housings.

- **Nos. 1V656, 6ZC72 and 6Z918 are reversible**
- **No. 3JD39 features keyless chuck**
- **Nos. 6W245 and 6W246 are high speed 20,000 RPM drills***

*Note: Nos. 6W245 and 6W246 are not for use with cast wheels or attachments not rated for 20,000 RPM.

**Note: For drill bits, see index in back of catalog under "Drill Bits."**

# AIR DRILLS

## 3/8" DRILL

**No. 4TL88 Dayton reversible drill** features a 1/2 HP motor for increased speed and torque output. Contoured polyurethane grip provides increased comfort. Also has three-way planetary gearing for smooth operation, reverse switch for quick direction change, and a keyless Jacobs® chuck.

**No. 4LG62 Industrial-duty Dayton production drill** has an ergonomically designed handle and trigger location to help reduce operator fatigue. High/low grip allows for two hand positions while the textured surface reduces operator grip force and tool slippage. Muffled thru-handle exhaust directs air away from work surface. Also has Jacobs® aircraft quality chuck and key.

**Ingersoll-Rand industrial-duty production drills** feature double row ball bearings for precise concentric holes. Variable speed control allows slow speed starting and high speed for fast drilling. Excellent power-to-weight ratio means with ergonomically designed handle and trigger location mean less operator fatigue. High/low grip allows for two hand positions. Include Jacobs® chuck and key included. All drills are non-reversible, except No. 3Y535. No. 3Y539 features straight body for tool balancer applications.

**Skinsulate® coating on drill housing,** except No. 3Y539, insulates skin from cold metal housing and helps minimizes vibration. Also increases adhesion, while reducing grip force and protects tool as well as work piece.

**Note: For drill bits, see index in back of catalog under "Drill Bits."**

## RIGHT ANGLE DRILLS

**No. 6Z832 Dayton and No. 3JD41 Ingersoll-Rand general-duty 3/8" right angle drills** are ideal for general maintenance or automotive work where drilling in tight spaces is required. Both drills feature a quality Jacobs® chuck and key, lever throttle control, and are reversible.

**No. 3Y522 Industrial-duty Ingersoll-Rand 3/8" right angle drill** features infinitely variable speed trigger which allows slow speed starting and high speed drilling. Angle head may be rotated 360 degrees to allow ideal orientation with throttle. Ergonomically designed housing provides a secure surface for operator to grip and quality design ensures precision holes for critical applications.

**No. 3Y508 Ingersoll-Rand industrial-duty 1/2" right angle drill** features double row ball bearings which assures precise concentric holes. Variable speed control allows slow speed starting and high speed for fast drilling and high/low grip allows for two hand positions. Includes Jacobs® chuck and key.

**Note: For drill bits, see index in back of catalog under "Drill Bits."**

# AIR DRILLS

## 1/2" DRILLS

**No. 1V654. Light-duty Universal Tool 1/2" drill** is an economical alternative for home shop use or light maintenance applications. The drill features a Jacobs® chuck and key, geared for high torque, variable speed trigger, and is reversible.

**Nos. 4Z542 and 6ZC73. General-duty Dayton 1/2" drills** are ideal for the high torque applications, such as hole saw, reaming, and large bore wood bit. Both drills feature:

- **Quality Jacobs® chuck and key**
- **Side handle with 360 degree rotation**
- **Variable speed trigger**
- **No. 6ZC73 is reversible**

**No. 3Y518 General-duty Ingersoll-Rand 1/2" drill** is an economical alternative that features:

- **Dead man side handle**
- **Quality Jacobs® chuck and key**

**Nos. 3JD40 and 4Z239 General-duty Ingersoll-Rand 1/2" drills feature:**

- **Double reduction planetary gears for high torque capabilities**
- **Variable speed throttle control**
- **Built-in muffler with handle exhaust**
- **No. 3JD40 features keyless chuck**
- **No. 4Z239 features dead man side handle**

**Nos. 6Z657 and 5Z274 General-duty Ingersoll-Rand 1/2" drills feature:**

- **Double reduction planetary gears for high torque capabilities**
- **Variable speed throttle control**
- **Dead man side handle**
- **No. 5Z274 is reversible**

**Ingersoll-Rand industrial-duty production drills** feature double row ball bearings which assures precise concentric holes. Variable speed control allows slow speed starting and high speed for fast drilling. High/low grip allows for two hand positions. All drills include a Jacobs® chuck and key. All Ingersoll-Rand industrial drills feature Skinsulate® coating on drill housing.

- **No. 3Y531 is reversible**

**Note:** For drill bits, see index in back of catalog under "Drill Bits"

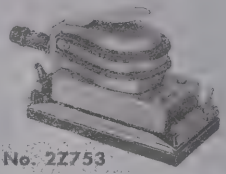
# ORBITAL SANDERS

**No. 4Z698. General-duty Dayton orbital sander** has comfortable palm grip and constant 3/16" orbit for extra fine finishes. Features a built-in regulator for variable speed operation and muffled rear exhaust. Positive locking abrasive clamps hold paper securely on foam pad. Sandpaper sheets must be cut to size.



**No. 2Z753. General-duty Ingersoll-Rand orbital sander** has a compact, contoured palm-grip and balance bearing design which almost eliminates vibration, giving the operator comfortable use of the tool. Features an automatic release throttle lever with positive stop action, built-in regulator for speed control, positive locking clamps that hold paper securely, and foam rubber pad. Sandpaper sheets must be cut to size.

**Note: For sandpaper, see index in back of catalog under "Abrasives, Sandpaper Sheets."**

# RANDOM ORBITAL SANDERS

**Palm-grip industrial finishing sander** for wood, plastic, metal, and fiberglass surfaces.

**Ergonomic design** reduces user fatigue, and is 10% lighter than previous ARO orbital sander models. Contoured lever throttle with low pivot point requires little downward pressure and allows excellent throttling control for "feathering" action.

**Random orbit action** and extremely low vibration produce a high-quality, no-swirl finish.

**5-inch dia. vinyl face pad** uses PSA (pressure-sensitive adhesive) sanding discs. **Note: For discs see index in back of catalog under "Sandpaper, PSA Disc."**

**Directional muffler** keeps exhaust air away from the operator.

- Swirl-free finish
- "Glove-like" lever grip
- Effortless speed control
- Lightweight

ARO

No. 5Z345

**ARO 2-YEAR LIMITED WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

# STRAIGHT-LINE SANDERS

**No. 4LG48. General-duty Dayton mini-straight line sander** features a small lightweight design for easier maneuverability.

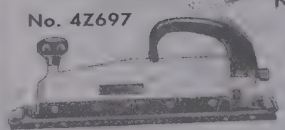
- 1" stroke length
- Only accepts PSA backed paper
- Heat treated valve, piston, and gears

**No. 4Z697. General-duty Dayton straight-line** sander feather-edges smoothly and easily without swirl marks or surface etching.

- Dual piston design
- 15/16" stroke is virtually vibration-free for higher productivity and less operator fatigue
- Pad accepts both clip-on and adhesive backed paper

**No. 6Z565. General-duty Ingersoll-Rand straight-line sander** is excellent for smoothing down body filler or shaping and leveling large flat areas.

- Smooth power from dual piston design, helps prevent stalling
- 1" stroke length
- Reload easily with quick action paper clamps



**Note: Both Nos. 4Z697 and 6Z565 use body file sanding sheets. See index in back of catalog under "Abrasives, Body File Sheets."**

# SANDERS

## DUAL ACTION (DA) SANDERS

Dual action or DA sanders unique dual action motion pad produces swirl-free finishes, which makes it ideal for feather edging, metal preparation, and finishing work on body filler. The units can also be used in a rotary motion which is used for fast material removal. All DA sanders feature a built-in regulator to control speed for greater control when sanding different materials, and come with a 6" foam backed pad which accepts PSA (Pressure Sensitive Adhesive) sandpaper. **Note: For sandpaper, see index in back of the catalog under, "Sandpaper, PSA Disc." For replacement backing pads, see index in back of catalog under, "Sanders, Backing Pads."**

**No. 1V658. Light-duty Universal Tool DA sander** is ideal for home shop or light maintenance jobs.

**Nos. 6W258, and 4Z405 Dayton, and Nos. 6Z563, and 4Y362 Ingersoll-Rand general-duty DA sanders** are ideal for auto body shop use, and commercial applications.

**No. 6W258. General-duty Dayton palm DA sander** is a very sleek, compact and lightweight sander used to access corners and tight work areas.

**Cyclone™ Series Random Orbital Sanders** have established new standards for ergonomic design, power, and speed in material removal applications. The Cyclone Series covers the full spectrum of applications in finishing metal, composite, and wood surfaces with three distinct versions: Cyclone Select Series, CycloVac™ Systems, and Cyclone Standard Series.

All models may be used in a totally dry air environment and are backed by a two-year limited warranty. Available with a full line of premium quality sanding pads and accessories.

- **Cyclone Select Series—lightweight, precision-molded composite housing with color-keyed grip rings that meet operator hand sizes. Available in non-vac and vac-ready**
- **CycloVac™ Systems—this version of the Select Series features a unique new self-generated vacuum-the most powerful and effective available**
- **Cyclone Standard Series—incorporate aluminum housings with textured comfort grips. Available in non-vac and vac-ready models**

(*) Non-vacuum sanders use PSA (Pressure Sensitive Adhesive) sandpaper. See index in back of catalog under Sandpaper, PSA Discs.(‡) CFM is based off of a 1 minute run time.

# SANDERS

## HIGH SPEED SANDERS

**High speed sanders** are good for light grinding of metals for preparation of body fillers, rust removal, or sanding large amounts of materials quickly. Light-duty and general-duty sanders all use fiber discs with 7/8" arbor hole X 4, 4½, and 5" diameter discs. **Note: For sanding disc, see index in back of catalog under "Abrasives, Fiber Discs."**

**No. 1V674. Light-duty Universal Tool high speed sander** features variable speed throttle, muffled exhaust, and includes 3, 4½, and 5½" diameter backing discs. Ideal for home shop and light maintenance use.

**No. 4Z778. Light-duty Universal Tool high speed sander kit** includes No. 1V674 sander, 3, 4½, and 5½" diameter backing discs, 6 abrasive discs in three popular grit sizes, 6" tie-on polish bonnet for light polishing, and carrying case.

**No. 6Z584. General-duty Dayton high speed sander** features an impact resistant nylon housing and handle, spring mounted trigger, and includes 3, 4½, and 5½" diameter backing pads.

**No. 4LG60. General-duty Dayton angle high speed sander** features a 1 HP motor, lever throttle with variable speed control, dead handle for increased operator control, rear exhaust, and 5" pad.

**No. 6Z566. General-duty Ingersoll-Rand high speed sander** features built-in power regulator and includes 3, 4½, and 5½" diameter backing pads.

**Nos. 3Y491 and 3Y494 industrial-duty Ingersoll-Rand Cyclone series high speed sanders.** Ergonomic design with a high profile flange that protects hand, along with low profile tilt throttle that provides protection from accidental start when set down. The exhaust direction can be switched easily from front to rear with no additional parts. Both units have a 1/4"-20 spindle. No. 3Y491 is rated up to a 2" sanding pad, and works with No. 3JD96 abrasive kit. No. 3Y494 is rated up to a 3" sanding pad, and works with No. 3JD97 abrasive kit.

Both units also work with Type-3 power lock backing pads and discs. **Note: See index in back of catalog under "Abrasives, Power-Lock Discs." For BearTex® Speed-Lok blending discs and backing pads, see index in back of catalog under "Abrasives, Bear-Tex Discs."**

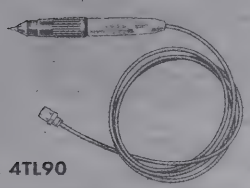
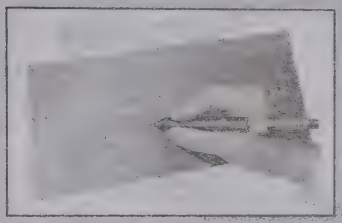
## ENGRAVING PENS



Dayton® New

INGERSOLL-RAND PROFESSIONAL TOOLS



Installation & Service Availa
Contact Your Local Branch

No. 6ZC75

No. 4TL90

Nos. 3Y479 and 3Y478

**No. 6ZC75. General-duty Dayton engraving pen** features long lasting carbide tip, variable speed regulator for precise control, and 5½ ft. air hose. Suitable for non-ferrous metals, tool steel, glass, ceramic, plastic, etc.

**Nos. 3Y479 and 3Y478. Industrial-duty Ingersoll-Rand engraving pens** feature zoom throttle which increases operator control while the variable speed allows the tool to be used on a variety of materials, from glass to steel. Steel housing dampens vibration, increasing operator comfort. No. 3Y478 kit includes flexible hose, three assorted styluses, and molded plastic case.

**No. 4TL90. Recoilless air scribe pen** features low vibration for precise work and reduces operator fatigue. Durable steel housing has a carbide-tipped stylus for long life and is lubrication free. Roll throttle allows precise power output adjustment. Excellent for metals, glass, ceramic and plastics.

## PENCIL GRINDERS

ARO®

No. 5Z344 Rear Exhaust

No. 5Z343 Front Exhaust

- Large, precision ball bearings
- Extremely flexible air hose
- Variable speed control
- Long service life
- Lightweight

**ARO 1-YEAR LIMITED WARRANTY**

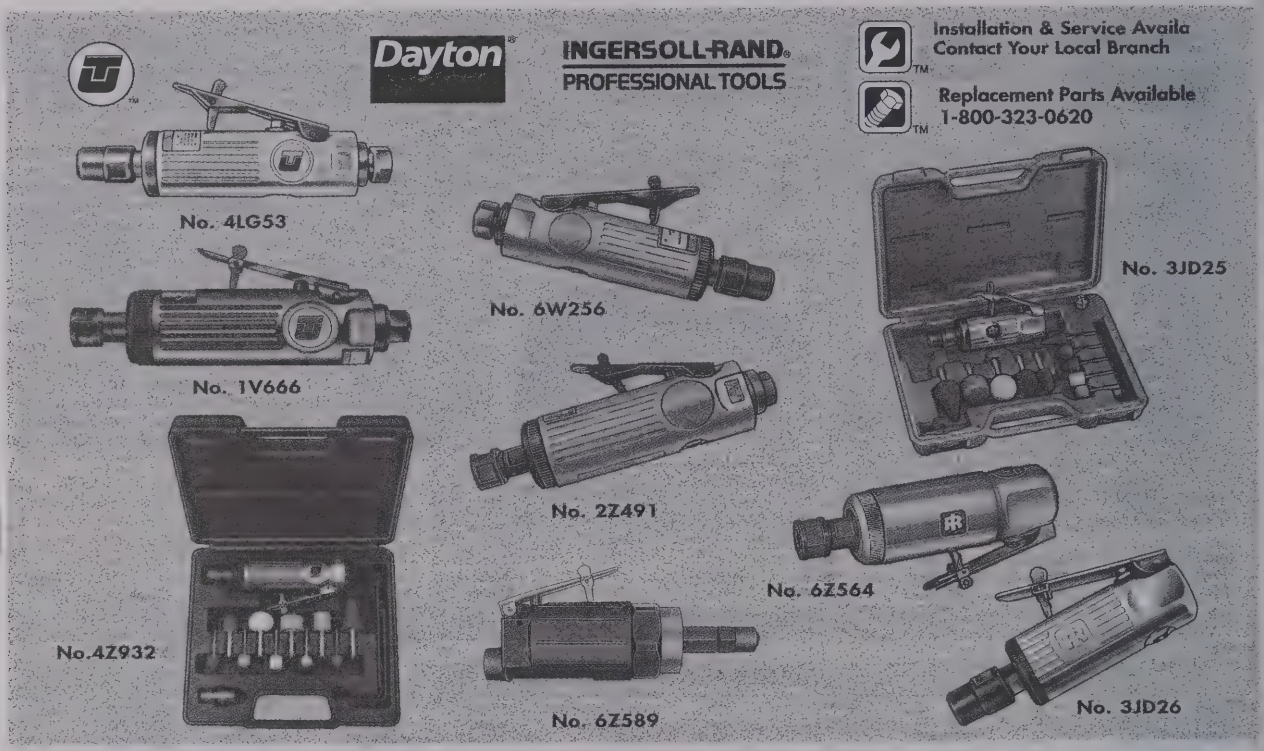
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**High-speed pencil grinders** are designed for precision grinding applications, and provide excellent finishing performance with carbide tooling. For carbide cutting tools see Index.

**Trim profile and lightweight design** for excellent maneuverability and reduced operator fatigue. Feature 1/8" capacity collect. Both units can use either carbide burrs or mounted grinding wheels. **Note: For carbide burrs, see index in the back of catalog under "Carbide, Burrs," or for mounted grinding wheels, under "Grinding, Mounted Points."** Note: Make sure that the wheel selected has the proper RPM rating and spindle size.

**Rotary vane motors** for smooth, powerful performance. Run quickly and quietly (60,000 RPM at only 77 dB), to maintain a comfortable work environment.

**No. 5Z344 rear exhaust model** features an overhose to channel exhaust away from the work and the operator. Unique plastic sleeve keeps housing warm to the touch. Large precision ball bearing supports the front spindle assembly. Weighs just 2.6 oz.—the lightest tool in its class.



**No. 5Z343 front exhaust model** keeps work surface free of chips and dust for clear visibility. Grooved housing offers firm grip and control. Steel housing provides rugged durability.

# DIE GRINDERS

**No. 4LG53. Light-duty Universal Tool mini-die grinder** is ideal for home shop or light maintenance use. Unit features variable speed lever throttle control, and a lock-off throttle that prevents accidental start-ups.

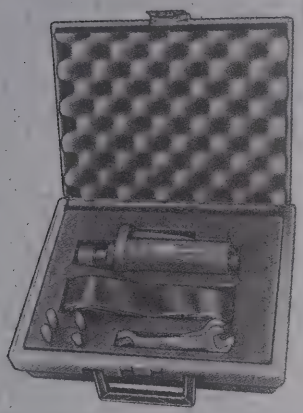
**Nos. 1V666 and 4Z932. Light-duty Universal Tool die grinders** are ideal for home shop or light maintenance use. No. 1V666 has a lock-off throttle that prevents accidental start-ups. No. 4Z932 die grinder kit includes the No. 1V666 grinder, 1/4 and 1/8" steel shank grinding stones, 1/8" collet adapter, and plastic carrying case.

**Nos. 3JD26 and 3JD25. Light-duty Ingersoll-Rand mini-die grinders** feature a 1/4 HP motor, ball bearing construction, self-locking lever throttle, compact design and includes collet wrench. 3JD25 die grinder kit includes a 3JD26 die grinder, an assortment of 1/4 and 1/8" grinding stones, 1/8" collet adapter, and plastic carrying case.

**No. 6W256. General-duty Dayton mini-die grinder** features a 1/3 HP motor, variable speed self-locking throttle, ball and needle bearing construction, and light weight compact body design.

**No. 2Z491. General-duty Dayton die grinder** features a 1/2 HP four vane motor, ball bearing construction, and variable speed lock-off throttle.

**No. 6Z589. General-duty Dayton die grinder** feature a lightweight and durable nylon housing, 1/2 HP four vane motor, ball bearing construction, and variable speed lock-off throttle.



**No. 6Z564. General-duty Ingersoll-Rand die grinder** features a 1/3 HP motor, ball bearing construction, variable speed self-locking throttle, and includes two collet wrenches.

All units can use either carbide burrs or mounted grinding wheels. **Note: For carbide burrs, see index in the back of catalog under "Carbide, Burrs," or for mounted grinding wheels, under "Grinding, Mounted Points."** Note: make sure that the wheel selected has the proper RPM rating and spindle size.

**Industrial-duty Ingersoll-Rand Cyclone die grinders** have innovated ergonomic design such as the unique D-shaped housing that makes it easier to grip and operate the tool. Advanced composites keep the housing from becoming cold to the touch, and reduces vibration so effectively, you can work steadily with less hand fatigue.

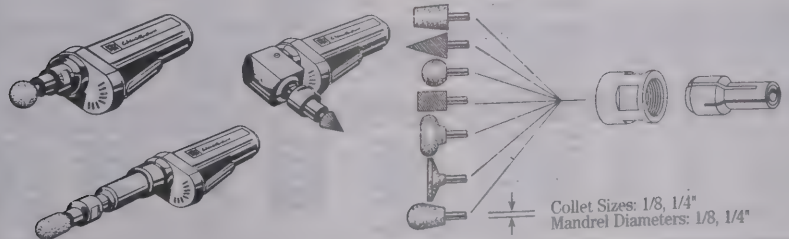
The unique high profile safety flange not only protects the operator's hand from the work, but also protects the throttle from accidental starts. Cyclone housings feature one-piece construction, with advanced composites molded over a steel liner. The patented flow ring offers the flexibility of front or rear exhaust without additional parts.

All grinders come standard with a 1/4" Erickson collet, and includes a collet body wrench and collet nut wrench.

**.35 HP grinders** are compact tools used for light material removal, cleaning rough castings, de-burring parts after machining, weld-cleaning, and other finishing tasks.

**.70 HP grinders** are for general finishing work and heavier material removal. Used for grinding, cleaning, and polishing.

**1 HP grinders** are for heavy material removal.



All units can use either carbide burrs or mounted grinding wheels. **Note: For carbide burrs, see index in the back of catalog under, "Carbide, Burrs," or for mounted grinding wheels, under "Grinding, Mounted Points."** Note: Make sure that the wheel selected has the proper RPM rating and spindle size.

## COLLET TYPE GRINDER TERMINOLOGY

**Grinder Safety Tips:** Always use eye protection. Use only recommended equipment and adapters. Inspect grinding wheels closely for any imperfections or damage such as cracks, pitting, or broken edges. Always make sure that the tool speed does not exceed the maximum operating speed marked on the wheel or wheel package. Use correct size guards, flanges, blotters, spindles, and mounting practices to ensure operator safety.

INGERSOLL-RAND PROFESSIONAL TOOLS

Nos. 3Y528 and 3Y525

No. 6Z667

Nos. 3Y484 and 3Y448

No. 3Y462

**No. 6Z667. General-duty Dayton extended die grinder** features a 1/2 HP four vane motor, ball bearing construction, collet wrenches, and variable speed lock-off throttle.

**Nos. 3Y484 and 3Y448. Industrial-duty Ingersoll-Rand Cyclone series extended die grinders** feature their unique ergonomic composite housing that helps reduce vibration and operator fatigue. The high profile safety flange protects operators hand and throttle from any accidental start-ups. Extension is constructed of steel. The tool can be easily changed from front to rear exhaust without any additional parts. Both grinders come with an Erickson collet and collet wrenches.

**Nos. 3Y528 and 3Y525. Industrial-duty Ingersoll-Rand Pro Series extended die grinders** feature a patented stainless steel motor controller that is maintenance and adjustment free, double-row ball bearings assure smooth operation. Exclusive grit rejection system keeps bearings clean, and has a built-in mist lubricator that automatically oils that motor during operation. Collet wrenches included.

All units can use either carbide burrs or mounted grinding wheels. **Note: For carbide burrs, see index in the back of catalog under "Carbide, Burrs," or for mounted grinding wheels, under "Grinding, Mounted Points."** Note: Make sure that the wheel selected has the proper RPM rating and spindle size.

INGERSOLL-RAND®
PROFESSIONAL TOOLS

No. 1V660

No. 6Z831

No. 3Y456 and 3Y454

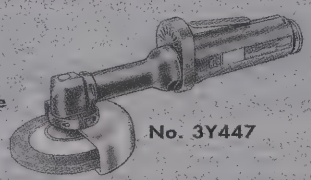
No. 3Y467 and 3Y468

**No. 1V660. Light-duty Universal Tool angle grinder** is ideal for home shop use or light maintenance. Grinder features safety lock-off on the lever throttle, front exhaust, safety guard, side handle, flanges and nut, spindle, and wheel nut wrenches.

**Nos. 4TP03, 6Z831. General-duty Dayton angle grinder** features safety lock-off on the lever throttle and includes safety guard, side handle, flanges, nut and wheel nut wrenches.

**Nos. 3Y456, 3Y454, 3Y467, and 3Y468. Industrial-duty Ingersoll-Rand cyclone series angle grinders** have innovated ergonomic design such as the unique D-shaped housing that makes it easier to grip and operated the tool. Advanced composites keep the housing from becoming cold to the touch, and reduce vibration so effectively, you can work steadily with less hand fatigue.

The unique high profile safety flange not only protects the operator's hand from the work, but also protects the throttle from accidental starts. Cyclone housings feature one-piece construction, with advanced composites molded over a steel liner. The patented flow ring offers the flexibility of front or rear exhaust without additional parts. All grinders come with wheel guard, flanges and nut, spindle, and wheel nut wrenches.



All Type 27 wheel angle grinders use a general purpose raised-hub wheel. Note: Grinding wheel selection is determined by wheel diameter, spindle size, and max. RPM. **Note: See index in the back of catalog under, "Grinding Wheels, Type 27."**

No. 3Y447

INGERSOLL-RAND®
PROFESSIONAL TOOLS

Nos. 3Y460 and 3Y461

**Nos. 3Y447, 3Y460, and 3Y461. Industrial-duty Ingersoll-Rand cyclone series angle grinders** feature their unique ergonomic composite housing that helps reduce vibration and operator fatigue. The high profile safety flange protects operators hand and throttle from accidental start-ups. Angle head is constructed of steel. The tool can be easily changed from front to rear exhaust without any additional parts. All grinders come with wheel guard, flanges and nut, and wheel nut wrenches. No. 3Y461 comes standard with side handle.

All Type 27 wheel angle grinders use a general purpose raised-hub wheel. Note: Grinding wheel selection is determined by wheel diameter, spindle size, and max. RPM. **Note: See index in the back of catalog under "Grinding Wheels, Type 27."**

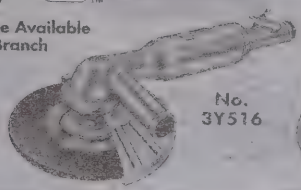
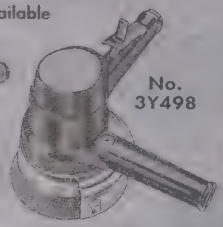
# GRINDERS, TYPE 27/28 WHEEL

Dayton®

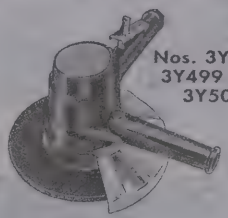


INGERSOLL-RAND PROFESSIONAL TOOLS

Replacement Parts Available 1-800-323-0620



Installation & Service Available Contact Your Local Branch



No. 6W257

No. 3Y516

No. 3Y498

Nos. 3Y500, 3Y499 and 3Y501

**No. 6W257. General-duty Dayton 7" angle grinder** features safety lock-off on the lever throttle, and includes safety guard, side handle, flanges and nut, spindle, and wheel nut wrenches.

No. 6W257 uses Type 27 depressed center wheel. Note: Grinding wheel selection is determined by wheel diameter, spindle size, and max. RPM. **Note: See index in the back of catalog under "Grinding Wheels, Type 27.**

**Industrial-duty Ingersoll-Rand Pro-Series Type 27 and 28 wheel grinders** all have the following features:

- **Powerful motors that produce high, efficient performance**
- **Patented stainless steel motor controller with the industry's only life time guarantee**
- **Self-locking throttle lever prevents accidental operation**
- **Integral steel guard provides extra strength for added operator protection**
- **Adjustable ergonomic side handles increase operator control on vertical models**
- **Built-in mist lubricator automatically oils motor each time the tool is used**

Nos. 3Y516, 3Y501, 3Y500 and 3Y499 all use either a Type 27 or 28 threaded wheel or plain hole depressed wheel. Note: Grinding wheel selection is determined by wheel diameter, spindle size, and max. RPM. Note: See index in the back of catalog under, "Grinding Wheels, Type 27 or Type 28." Grinders include wheel guard, flanges and nut for threaded depressed center wheels and for plain hole depressed center wheels.

No. 3Y498 uses a cup wheel, Type 6 or 11. Note: Grinding wheel selection is determined by wheel diameter, spindle size, and max. RPM. **Note: See index in the back of catalog under "Grinding Wheels, Toolroom."** No. 3Y498 comes with wheel guard, flanges, and wheel nut.

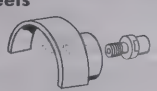
## GRINDING WHEEL TERMINOLOGY

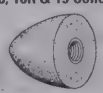


**Horizontal Grinders**

**Type 1 Straight Wheels**

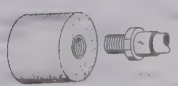
Wheel Sizes: 2, 3 & 6"

Wheel Sizes: 2, 3 & 4" Spindle Sizes: 3/8"-24



Spindle Sizes: 5/8, 3/8"-24

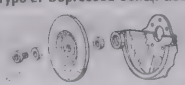
**Cone & Plug Wheel Grinders**



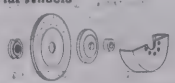
**Type 16, 17, 18, 18R & 19 Cone & Plug Wheels**

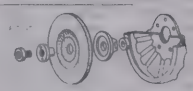
Wheel Sizes: 1-1/4" to 3" (max. dia.)

Spindle Sizes: 3/8"-24 & 5/8"-11



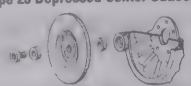
**Vertical & Angle Grinders**



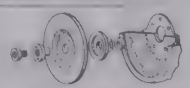


**Type 27 Depressed Center and Flat Wheels**

Threaded Wheel Sizes: 7 & 9" Type: Spindle Sizes 5/8"-11



Wheel Sizes: 3 & 4" Spindle Size: 3/8"-24

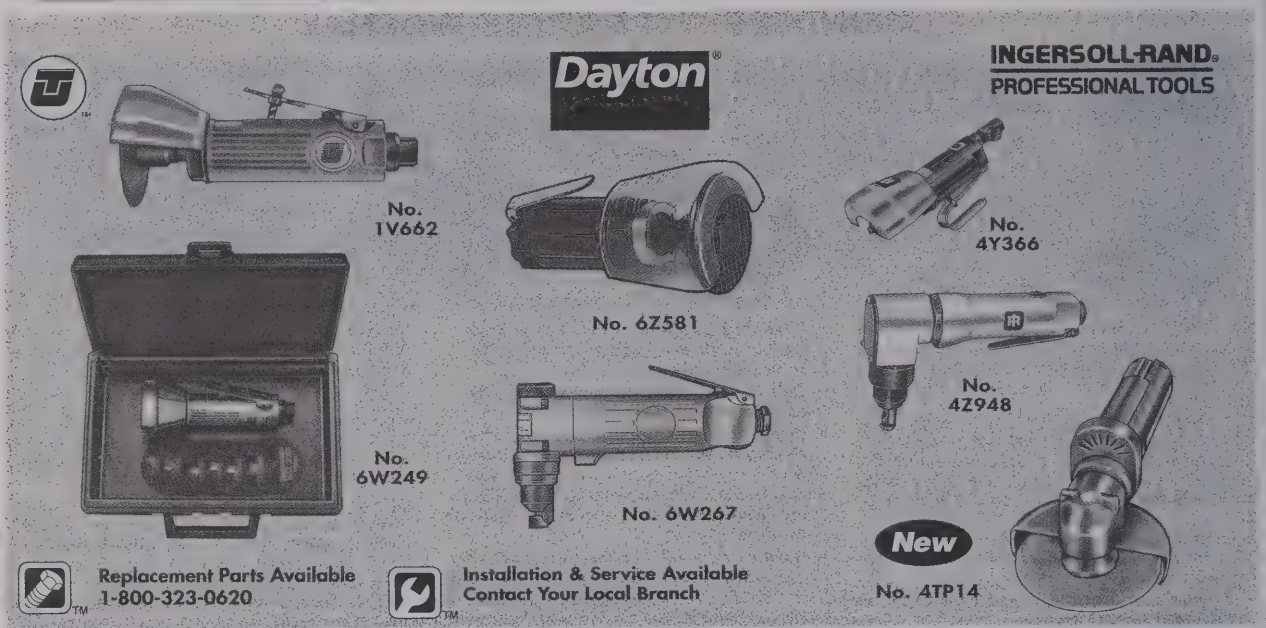


Non-Threaded Wheel Sizes: 7 & 9" Type: Spindle Sizes 5/8"-11

**Type 28 Depressed Center Saucer Wheels**

Threaded Wheel Sizes: 7 & 9" Type: Spindle Sizes 5/8"-11

Non-Threaded Wheel Sizes: 7 & 9" Type: Spindle Sizes 5/8"-11



**Type 6 & 11 Cup Wheels**

Wheel Sizes: 5 & 6" Spindle Sizes: 5/8"-11

WARNING: Always use eye protection. Use only recommended equipment and adapters. Consult parts bulletin for details. Do not use if actual tool RPM is greater than nameplate RPM. Check RPM each shift or upon changing accessory. For further safety information, consult ANSIB7.1 and ANSIB186.1.

# CUTTING TOOLS

## CUT-OFF TOOLS

**No. 1V662. Light-duty Universal Tool cut-off tool** is ideal for home shop or light maintenance use. Tool features steel guard, and safety lock-off lever on throttle to prevent accidental starts.

**No. 6W249. Light-duty Universal Tool cut-off tool kit** includes a 1V662 cut-off tool, eight cut-off wheels, and carrying case.

**No. 6Z581. General-duty Dayton cut-off tool** features a lightweight and sturdy nylon motor housing, clear shatter resistant polycarbonate guard that allows for better visibility, and safety lock-off lever on throttle to prevent accidental starts.

**No. 4Y366. General-duty Ingersoll-Rand cut-off tool** features metal guard that can be rotated 360°, flow control valve for speed control, and safety lock-off lever on throttle to prevent accidental starts.

**Nos. 4TP14 & 4TP27. Industrial-duty Ingersoll-Rand air cut-off tools** are ergonomically designed. Unique D-shaped housing that makes it easier to grip and operate. Composite housing reduces vibration and is not cold to the touch.

## AIR NIBBLERS

**Air nibblers** are ideal for cutting sheet metal, plasitc and aluminum without deforming the material. Used by body shops, sheet metal shops, air conditioning fabrications, plastic fabricators, heateing contractors, and machine shops.

**No. 6W267. General-duty Dayton air nibbler** features 4.5mm adjustable die guide and punch for cutting in different directions, and comes with spare punch.

**No. 4Z948. General-duty Ingersoll-Rand air nibbler** features lever throttle control. "Nibbles" up to 18 gauge thickness, at a rate of more than 6 ft. per minute.

**Note: For replacement reinforced cut-off wheels, see index in back of catalog under "Abrasives, Small Diameter Cut-Off Wheels."**

# AIR SHEARS, AIR FILE, AIR SAWS, AND RECIPROCATING SAW

## AIR SHEARS

Air shears are ideal for body shops, sheet metal shops, air conditioning fabricators, plastic fabricators, heating contractors, and machine shops.

**No. 6Z588. General-duty Dayton air shears** feature a light weight and durable nylon housing, and adjustable cutting head that allows for side or overhead work, as well as easy radial and contour cuts.

**No. 4Y413. General-duty Ingersoll-Rand air shear** cuts squares, angles, and circles. Has a heavy-duty cutting blade and makes cuts in cold rolled steel, aluminum, tin, and plastics.

Replacement blades for both the Dayton and Ingersoll-Rand air shears are available through Grainger Parts Operations.

## AIR FILE

**No. 4TL91 Recoilless Air File** features low vibration with high blow frequency for increased production and reduced operator fatigue. The 360° rotating throttle is ideal for use in confined areas and provides increased control for precision work. File has low air consumption and noise level, and uses standard 1/4" shank files. For use in foundries, die casting, mold/die maintenance, and pattern shops.

## RECIPROCATING AIR SAWS

Reciprocating air saws are ideal for cutting intricate shapes in all types of plastics, fiberglass, composite materials, aluminum, and sheet metal.

**No. 6Z663. General-duty Dayton mini-reciprocating air saw** features adjustable blade guard which aids in depth of cut, built in power regulator that controls speed, lever throttle has safety lock-off which prevents accidental starts when tool is set down. Includes five saw blades and wrench.

**No. 4TL84. Dayton mini-air saw** features an adjustable blade guard for depth of cut precision. Lightweight unit (just over 1 lb.) has a lever throttle with lock-off lever to prevent accidental starts. Includes five saw blades and wrench.

**No. 6W381. General-duty Ingersoll-Rand mini-reciprocating saw** features lever throttle control with safety lock-out lever and includes 6 replacement blades.

**Nos. 3JD27 and 3JD28 replacement blades** listed below, are used for No. 6Z663 Dayton saw and No. 6W381 Ingersoll-Rand saw.

**No. 6Z569. Industrial-duty Ingersoll-Rand reciprocating saw** features grip handle with self-locking throttle to prevent accidental starts, rotatable exhaust with muffler for quiet operation, heavy-duty thrust bearings for extended life, and built-in lubricator. Unit includes metal carrying case and an assortment of 4" and 6" blades.

**No. 6Z569** uses standard reciprocating saw blades. **Note: See index in back of catalog under "Saw Blades, Reciprocating."**

**No. 4TL89. Recoilless air saw** features advanced vibration dampening with high blow frequency for increased production and reduced operator fatigue. Power unit will not stall when cutting curves, and handle rotates 360° and locks in position. Backhead design prevents damage from excessive air pressure. Use for cutting sheet metal, autobody panels, duct work, and fiberglass.

No. 3Y589

No. 6ZF92

Needle scalers are great for removing rust, paint, dirt, and weld slag, on metal surfaces, even in tight spaces, corners, or curved surfaces.

**No. 6W247. General-duty Dayton pistol grip needle scaler** features lightweight and durable nylon housing, built-in regulator for speed control, and 19 heat treated needles, barrel and piston.

**No. 6W248. General-duty Dayton straight body needle scaler** features lightweight and durable nylon housing, built-in regulator for speed control, and 19 heat treated needles, barrel, and piston.

**No. 4TL87. General-duty Dayton straight body needle scaler** features a lever throttle for precise speed control, "J" slot adjustment for increased needle exposure and hardened steel construction for maximum durability. Includes a set of 19, 7" long needles. Tool can also be converted to B1 shank chisel scaler.

**No. 3JD20. General-duty Ingersoll-Rand needle scaler** features lever throttle and 19 heat treated needles and barrel.

**Nos. 4LG63, 4LG64, and 4LG65. Industrial-duty Dayton recoilless needle scalers** feature a patented ergonomic design that produces low vibration which reduces operator fatigue, and produces high blow frequency for increased production.

- **No. 4LG63. Recoilless straight body needle scaler comes with 18 heat treated needles and barrel.**
- **No. 4LG64. Recoilless pistol grip needle scaler comes with 19 needles.**
- **No. 4LG65. Recoilless pistol grip needle scaler comes with 28 needles.**

**No. 6ZH12. Industrial-duty Dayton pistol grip needle scaler** features a lightweight and compact design with ergonomic handle position, level throttle control, and 19 heat treated needles, barrel, and piston.

**No. 6ZF92. Industrial-duty Dayton straight handle needle scaler** features lightweight and compact design, lever throttle control, and 19 heat treated needles, barrel, and piston.

**Nos. 3Y593 and 3Y589. Industrial-duty Ingersoll-Rand straight body needle scalers** feature an adjustable bayonet type needle housing lock which allows adjustment without any special tools, lever throttle, and 19 heat treated needles and barrel. Tested and approved in accordance with MIL-S-2349A (ships).

**Note: For replacement needles see index in back of catalog under "Needle, Sets, Air Tool."**

# NEEDLE SCALER KITS, SCALERS

**No. 6Z833. General-duty Dayton needle/scaler kit** includes all pieces to convert from a needle scaler to a chisel scaler. Unit features lever throttle control for precise speed control, 19 heat treated needles and barrel, B1 style shank weld flux chisel, and plastic carrying case. Note: For replacement needles For replacement B1 style weld flux chisels, see index in back of catalog under "Chisels, Weld Flux."

**No. 3Y591. Industrial-duty Ingersoll-Rand needle/scaler kit** comes with a No. 3Y590 scaler, needle housing attachment, two sets of 19 needles, 5 and 7" long, one straight chisel, one flat chisel, one angle chisel, and vinyl carrying case. Note: For replacement needles For replacement IR style weld flux chisels, see index in back of catalog under "Chisels, Weld Flux."

**No. 4LG66. Industrial-duty Dayton recoilless chisel scaler** features a patented ergonomic design that produces low vibration which reduces operator fatigue and produces high blow frequency for increased production. All steel construction, compact design, and includes 3/4" carbide chisel No. 4LG36. Replacement chisels are listed in the ordering chart below.

**No. 6ZH13. Industrial-duty Dayton chisel scaler** features a built in quick change retainer, knurled body for improved grip, and lever throttle control. The unit uses Fuji style weld flux chisels. Note: For replacement Fuji style weld flux chisels, see index in back of catalog under "Chisels, Weld Flux."

**No. 3Y594 and 3Y590. Industrial-duty Ingersoll-Rand chisel scalers** feature a positive lock chisel retainer that makes it easy to quickly change chisels, and lever throttle control. **Note:** For replacement IR style weld flux chisels, see index in back of catalog under "Chisels, Weld Flux."

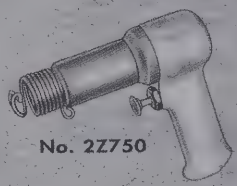
No. 6Z559



No. 3JD19

No. 6Z583

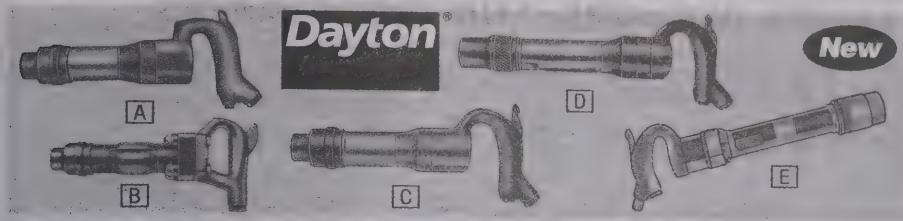
No. 1V668

Nos. 1V670 and 1V672

No. 3Y517

No. 2Z750

Nos. 3Y497 and 3Y496



Air hammers are ideal for chipping, general cutting of sheet metal, light exhaust work, scraping, and removal and separation of rivets or joints. The more blows per minute or smaller stroke length means that the tool will work faster. The less blows per minute or longer stroke length means more power from the tool. Note: When operating a hammer always be sure that the chisel is held securely against the work surface, and is never allowed to "free fire", or allow the chisel to strike the retainer. Light-duty hammers are ideal for home shop use or light maintenance use. General-duty are ideal for automotive, general maintenance, or light construction. Industrial-duty are ideal for construction, riveting, or production line use.

**All hammers use .401" shank chisels. Note: For replacement chisels, see index in back of catalog under "Chisels, Air Hammer." For replacement retainers and quick change retainers or replacement retainer springs, see index in back of catalog under "Chisel Retainer."**

- **All hammers feature a spring type chisel retainer, except No. 6Z583 which contains a patented safety chuck**
- **No. 6Z583 also features a lightweight, durable nylon handle**
- **No. 4Z777 light-duty Universal Tool hammer kit includes No. 1V672 hammer, one tapered punch chisel, panel cutter, flat chisel, spot weld splitter, and plastic carrying case**
- **No. 1V668 light-duty Universal Tool hammer kit includes No. 1V670 hammer, one tapered punch chisel, panel cutter, flat chisel, spot weld splitter, and plastic carrying case**
- **No. 3JD19 general-duty Ingersoll-Rand hammer kit includes No. 2Z750 hammer chisel set, and plastic carrying case**

More blows per minute, or smaller stroke length means that the tool will work faster. Fewer blows per minute or longer stroke length means more power from the tool. **Note:** when operating a chipper always be sure that the chisel is held securely against the work surface, and is never allowed to "free fire" or allow the chisel to strike the retainer. This practice could damage the retainer, and break the barrel.

A **Nos. 6W254 and 6W255. Dayton chipping hammers** feature one-piece forged handles, heat treated barrel and retainer for maximum durability, and grooved barrel with spring type retainer.

- **Nos. 6W254 and 6W255 use a .680" Round Shank/Oval collar chisel**

B **Nos. 3JT30, 3JT32, and 3JT34. Dayton 4-bolt chipping hammers** feature grooved barrel with spring type retainer, 4-bolt blackhead design eliminates handle loosening and breakage, variable speed trigger for ease of startup and better control, heat treated barrel and retainer for maximum durability and easier maintenance.

- **Nos. 3JT30, 3JT32, and 3JT34 use a .680" Round Shank/Oval collar chisel**

C **Nos. 4Z260, 6Z571, 3Y545, 3Y574, 3Y571, and 3Y546. Ingersoll-Rand chipping hammers** feature grooved barrel with spring type retainer, forged steel throttle handle, and special plated piston to reduce wear and extend life.

- **Nos. 4Z260, 6Z571, and 3Y545 use a .680" Round Shank/Oval collar chisel**
- **Nos. 3Y574, 3Y571, and 3Y546 use a .580" Hex Shank/Oval Collar chisel**

D **Nos. 3Y445, 3Y443, 3Y441, 3Y446, 3Y444, and 3Y442. Ingersoll-Rand chipping hammers** feature standard threaded barrel with rubber buffered retainer for more demanding applications, forged steel throttle handle, and special plated piston for reduced wear and extended life.

- **Nos. 3Y445, 3Y443, and 3Y441 use a .680" Round Shank/Round collar chisel**
- **Nos. 3Y446, 3Y444, and 3Y442 use .580" Hex Shank/Round collar chisel**

E **No. 3Y844. Ingersoll-Rand air buster percussion tool** features improved piston and shock-resistant material. Use for rivet busting and general demolition. Uses Jumbo 4-sided chisel tools.

**Note:** For chisels, see index in back of catalog under "Chisels, Air Hammer." For replacement grooved barrel spring type retainers, see index in back of catalog under "Chisel Retainers."

### DIGGERS

- All latch retainer type
- Light and medium weight for horizontal use
- Use for medium density earth and light demolition

### PAVING BREAKERS

- Promaxx™ Line of 60 and 90 lb. class of Standard and Vibration Reduced Flex-Handled Models
- More power, fewer parts than competitive models
- Spring-loaded anvil bushing keeps tool on work surface

### ROTARY JACKHAMMERS

- Promaxx™ Line of 35 lb. class Jackhamer™
- Standard and muffled models
- Ideally suited for both horizontal and vertical drilling projects
- Jack rods and carset bits available through Grainger Parts Operations

Replacement Parts Available 1-800-323-0620

## PRODUCTION TOOL BALANCERS

Aero-Motive production tool balancers provide convenient, economical tool support for a wide variety of production and assembly operations. Ergonomic design helps reduce risk of repetitive motion injury (i.e. carpal tunnel syndrome) and improves worker productivity. Balancers also prevent expensive tools from being dropped or knocked against work surface.

Units feature easy cable tension adjustment without tools, in-line alignment of hanger and tool hook, and maintenance free design. Balancers include 360° swivel. Convenient snap-type tool clip and high-impact composite housing. Nos. 6W202 and 6W204 also feature ratchet lock mechanism for performing multiple tasks.

## INDUSTRIAL TOOL BALANCERS

Aero-Motive tool balancers require only a light downward force to properly position the tool to the worker's task. By helping to control weight and movement the tools can be used with minimal effort for longer periods of time. The balancers can fatigue, and improve productivity. With balancers, workstations can be organized more efficiently by ensuring that the tools are always in the right place, yet suspended out of the way when not in use. Damage to tools can be prevented.

Balancer features: Rugged steel construction; permanent lubrication; easily replaceable, self-contained main spring; external tension adjustment that requires no special tools; 3/32" diameter stranded steel aircraft cable for 8' of travel.

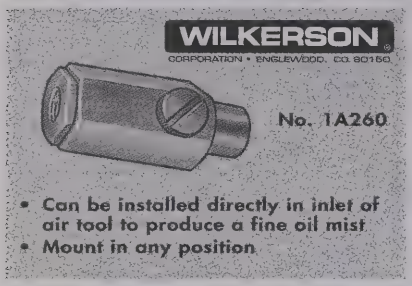
# AIR TOOL ACCESSORIES

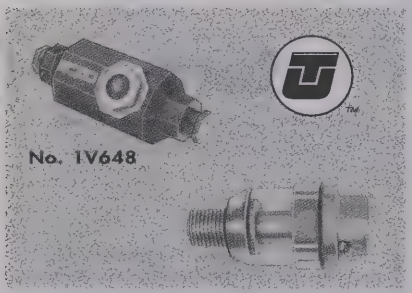


## REPLACEMENT NEEDLE SETS

**Replacement needle sets** for many brands of pneumatic needle scalers. Needles are heat treated steel for long life. Each set contains nineteen 1/8" (3mm) diameter needles.

**NEEDLE SETS ORDERING DATA**

| Length (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 5 | 6W206 | $14.20 | **$13.06** | 0.4 |
| 7 | 6W207 | 14.20 | **13.06** | 0.5 |



- Can be installed directly in inlet of air tool to produce a fine oil mist
- Mount in any position

## IN-LINE LUBRICATOR

Feature 1/4 oz. reservoir which holds enough lubricant to last an 8-hour shift. Cannot be filled while air pressure is on. No adjustments to tamper with; lubricates in any position. Maximum inlet port pressure is 200 PSI. Maximum temperature is 175°F. 3" long. 1⅛ hex. Available in 1/4 and 3/8" NPT female inlet and male outlet pipe connections. Wilkerson brand.

**IN-LINE LUBRICATOR SPECIFICATIONS AND ORDERING DATA**

## IN-LINE FILTER

**Speedaire pneumatic in-line filter** protects air tools such as impact wrenches, grinders and screwdrivers from damage due to impurities in the air line. Reduces downtime and prevents costly tool repair. 40 micron sintered bronze filter element gives minimum pressure drop. Lightweight all anodized aluminum housing. Compact enough to be installed directly in air tool inlet. Filter may also be used for fluids including oil and gasoline. Working pressure is 500 PSI. 1/4" NPT. Speedaire brand.

**No. 1A483.** In-line Filter. Shpg. wt. 0.1 lbs. List $4.70. Each ..... **$4.61**

## AIR TOOL OIL

Suitable for use with all air tools, air line lubricators, air hammers and pneumatic rock drills. Formulation provides an optimum balance of adhesiveness, yet emulsifiable enough to pick up moisture carried in the oil stream. Special metal wetting agents coat and protect metal from moisture. High EP characteristics protect tools even in tough mining, contractor and in-plant operations.

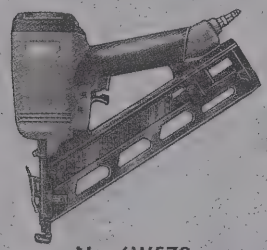
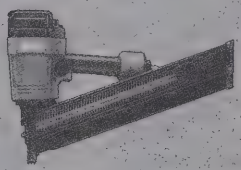
Brad Nailer

No. 6W571
2" Finish Nailer

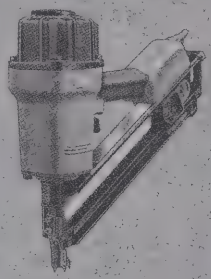


No. 4TT34

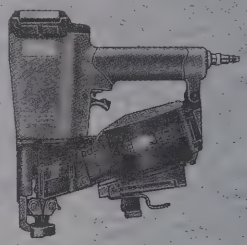


SENCO®
FASTENING SYSTEMS

New



Replacement Parts Available
1-800-323-0620



No. 6W570
2 1/2" Finish Nailer

No. 3LW90
Framing Nailer

No. 4TT35

No. 6W573
Roofing Coil Nailer

## BRAD NAILER

**No. 6W572** 1⅝" nailer for cabinet and furniture making, woodworking, on-site construction, and manufactured housing applications. Drives both slight-headed and medium-headed brads in a wide range of lengths. Oil-free design for no lubrication. Convenient carrying case.

## FINISH NAILERS

**No. 6W570** new oil-free nailer. 3 lbs. lighter with adjustable-depth-of-drive feature. Drives heavy-duty 15 gauge type brad-head finish nails from 1¼ to 2½" from trim, paneling, case goods, and face frames. 100 brad capacity. Oil-free design for no lubrication.

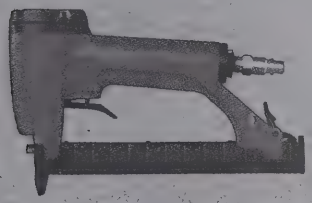
**No. 6W571** 2" nailer for light and heavy trim, molding, paneling, and stair applications. Countersinks or flush drives 1" to 2" true brad-head finishing nails without marring wood. Oil-free tool provides minimum maintenance with long service life.

## FRAMING NAILERS

**No. 3LW90** Construction framing nailer that **drives full round head nails only.** Used for framing decks, subflooring, sidewall sheathing, and roof decking. Drives smooth, ring, and full round head nails 2 to 3½" in length.

**Nos. 4TT34 and 4TT35.** Heavy-duty construction nailer for framing, truss building, subflooring, sheating, decking, siding, and fencing. Drives smooth, ring, and screw shank nails 2" to 3½" in length. Adjustable depth-of-drive control. Toe-nail safety grip studs to prevent slipping.

## ROOFING COIL NAILER



**6W573** nailer for fastening asphalt and fiberglass shingles. Drives full round-head roofing nails in lengths of 3/4 to 1½". High load 120 nail capacity minimizes production interruptions. Safety may be adjusted from 0 to 5/16" for precise depth-of-drive control. **NeverLube™ Design** - means no oil is required. **Adjustable Depth-of-Drive** - No tools are necessary to adjust drive depth to meet varying shingle roof configuration. **Straight-Drive™ Nail Alignment** - Simple "jaws" configuration promotes straight drive of nails, each time. Shorter nails (3/4, 7/8 and 1") can be driven without tumbling.

No. 6W574
Industrial Stapler

No. 3LW86
Roofing Stapler

No. 6W575
Wide Crown Stapler

## FINISH STAPLERS

**No. 3LW88** light-duty stapler for furniture, upholstering, home insulation, picture frames, and roofing felt. Drives C wire 3/8" crown, 3/8 to 5/8" in length. Oil-free design for no lubrication.

**No. 3LW89** narrow crown light-duty stapler drives A wire staples 3/8 to 1/2" in length. Also drives D wire 3/16" crown staples that are used in furniture, upholstering, home insulation, picture frames, and roofing felt. Oil-free design for no lubrication.

**No. 3LW91** finish and trim stapler with Neverlube™ feature which requires no lubrication. Drives 18 gauge L wire 1/4" crown staples 3/8 to 1½" in length. Lightweight yet powerful for molding, trim, lattice, soffits, and insulative sheathing. Oil-free design for no lubrication. Convenient carrying case.

**No. 6W576** for cabinet furniture and general woodworking applications. Drives 1/4" crown staples up to 1½" into hard woods. Stapler requires no lubrication and has only two moving O-rings, 1" lip reaches into tight spaces. Oil-free design for no lubrication.

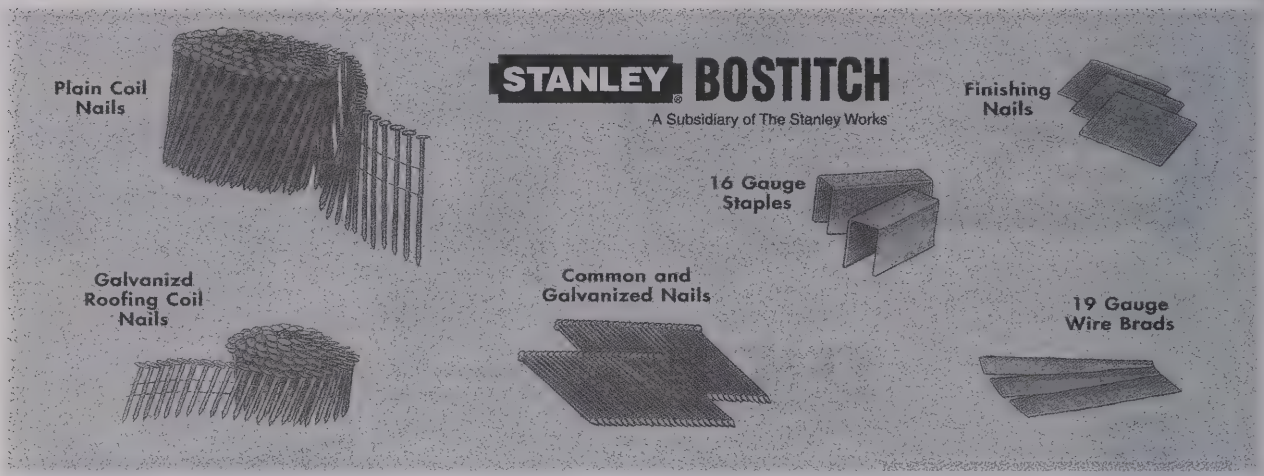
## INDUSTRIAL STAPLERS

**No. 3LW84** weighs only 5.1 lbs and is best in class power to weight ratio. Fewer moving parts means repair is minimal and easy. The SNS45 drives 7/16" crown staples in eight lengths of staples from 1" to 2"; features and adjustable depth of drive for consistent drive and also a comfort grip handle. Multi-purpose tool suited for on-site and manufactured housing, furniture frames, boxes, crates and pallets.

**No. 6W574** heavy-duty stapler for construction, packaging, and furniture. Drives 16-gauge, 7/16" crown staples from 1¼ to 2" from sheathing, flooring, decking, pallets, crates, and furniture frames. Holds over 140 staples.

## WIDE CROWN STAPLERS

**No. 3LW86** construction stapler drives 1" wide crown staples for shingles, lathing, and insulation. Drives staples 1/2 to 1¼" in length.



**No. 6W575** for general industrial applications such as lath wire attachment, insulation attachment, furniture and cabinet assembly, and carton-to-skid attachment. Drives 16-gauge 1" wide crown staples in various lengths. Oil-free design for no lubrication.

# AIR NAILERS AND STAPLERS

**Bostitch fasteners are for use with pneumatic nailers, staplers, and tackers.** They are collated in sticks or coils for fast, easy loading. Nos. 5W013 thru 5W015 come in coils of 300 nails. Nos. 5W016 thru 5W018 come in coils of 250 nails. Nos. 5W011, 5W012, and 2W762 thru 2W764 come in coils of 120 roofing nails. Nos. 2W801, 2W802, and 2W803 are finishing nails. Nos. 2W804, 2W805, and 2W806 are 19 gauge wire brads with brown colored heads and come 100 brads per stick.

**Synthetic film coating** on nail shanks and staple legs is friction activated when fastener is driven into wood and solidifies as fastener is set to provide added holding power. Bostitch brand.

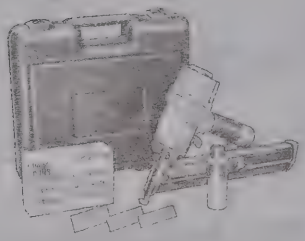
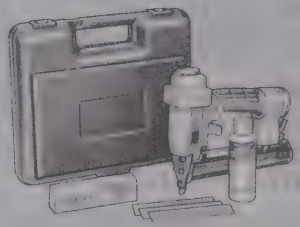
No. 4Z931 Coil-Fed Nailer

No. 4Z782 Coil Roofing Nailer



No. 6Z668 Framing Nailer



STANLEY BOSTITCH

A Subsidiary of The Stanley Works

Replacement Parts Available 1-800-323-0620

No. 5Z278 Finish Nailer

No. 4Z903 Brad Tacker

Bostitch pneumatic nailers and staplers are used for construction and industrial applications. Heavy-duty construction is lightweight for minimum operator fatigue.

Features include: quick-load, high capacity magazine, quick cycling and simplified air valving system. Operates at pressures as low as 60 PSI.

Nailer and staplers incorporate contact trip for rapid operation. Allow operator to depress trigger continuously and tap the gun tip for fast actuation. Steep-pitch magazine on nailer Nos. 4Z407 and 6Z668 concentrates weight at point of impact. 3/8" NPT air inlet and 3/8" I.D. recommended hose size, except 1/4" on No. 4Z782.

**No. 4Z931 Coil-Fed Nailer** is lightweight and easy to handle in high volume builder and contractor applications. Uses easy-to-load coils of 250 to 300 nails. Drives 1½ to 3¼" length full size, full head, plain ring and screw shank nails.

**No. 4Z782 Coil-Fed Roofing Nailer.** Drives full head, galvanized coil roofing nails, 120 nails per coil will nail down a full bundle of shingles per loading. One piece, one step loading with long-life carbide steel contact parts. Comfort grip handle and replaceable anti-slip rubber frame protector. Accommodates 3/4, 7/8, 1, 1¼, 1½, and 1¾" nails.

**No. 6Z668 Framing Nailer** is a lightweight, state-of-the art tool for framing, deck building and pallet-making. This high-performance, stick-fed, contact-trip unit can accommodate 2 to 3½" nails. Magazine capacity 75 to 105 nails.

**No. 5Z278 Finish Nailer Kit.** Compact yet powerful enough for construction applications. Aluminum alloy components are light and durable. Exclusive "Dial-A-Depth" adjustment precisely controls nail penetration. Sequential trip operation assures precise nail placement. Angled magazine for fast loading. Nonmarring foot prevents scratches in finished or soft wood. Drives 1¼-2½" finish nails. Kit includes: carrying case, oil, and fasteners.

**No. 4Z903 Brad Tacker Kit.** Features molded comfort grip & fast rear-loading with anti-jam magazine. Narrow nose for accurate fastener placement. Drives 19 gauge brads 5/8" through 1⅜". 100 brad capacity. Kit includes: carrying case, oil, and fasteners.

# DAYTON AIR STAPLERS AND NAILERS

- **Dayton Air Staplers and Nailers for industrial, construction and commercial applications.**
- **Ergonomic designed nailers and staplers let you work longer with less fatigue.**
- **Sure-grip rubber handle for improved control and comfortable handling even during extented use**

## STAPLERS

**No. 6W526 1/4" Crown Stapler** is used for paneling, molding or industrial use in manufacturing furniture. Slanted cylinder with longer nose to allow operator to reach tight areas. Unique combination trigger for rapid contact firing or easy to operate sequential mode. Includes an adjustable exhaust cap to deflect air in any direction, blow-molded storage case, and top load magazine to hold (120) 18 gauge staples 1/2" to 1" long. Operating pressure 60 to 100 PSI.

**No. 6W528 1/2" Crown Stapler** is ideal for insulation installers, furniture makers, upholsters, and carpenters. Slanted cylinder with longer nose to allow operator to reach tight areas. Unique combination trigger for rapid contact firing or easy to operate sequential mode. Includes an adjustable exhaust cap to deflect air away from work piece, blow-molded storage case, and bottom load magazine to hold (120) 20 gauge staples 3/8" to 1" long. Operating pressure 60 to 100 PSI.

**No. 6W527 1/2" Crown Heavy Duty Stapler** is used for sheathing, decking or industrial applications in furniture, cabinets or decking. Three-position switch for rapid contact firing, sequential mode or lock mode. Includes an adjustable exhaust cap to deflect air away from work piece. Magazine capacity of (150) 16 gauge staples 1¼" to 2" long. Operating pressure 70 to 110 PSI.

**No. 6W529 1" Crown Heavy Duty Stapler** is used for sheathing, and industrial cabinet making. Three-position switch for rapid contact firing, easy to use sequential mode or lock mode. Includes an adjustable exhaust cap to deflect air in any direction. Magazine holds (150) 16 gauge staples from 1" to 1½" long. Operating pressure 70 to 110 PSI.

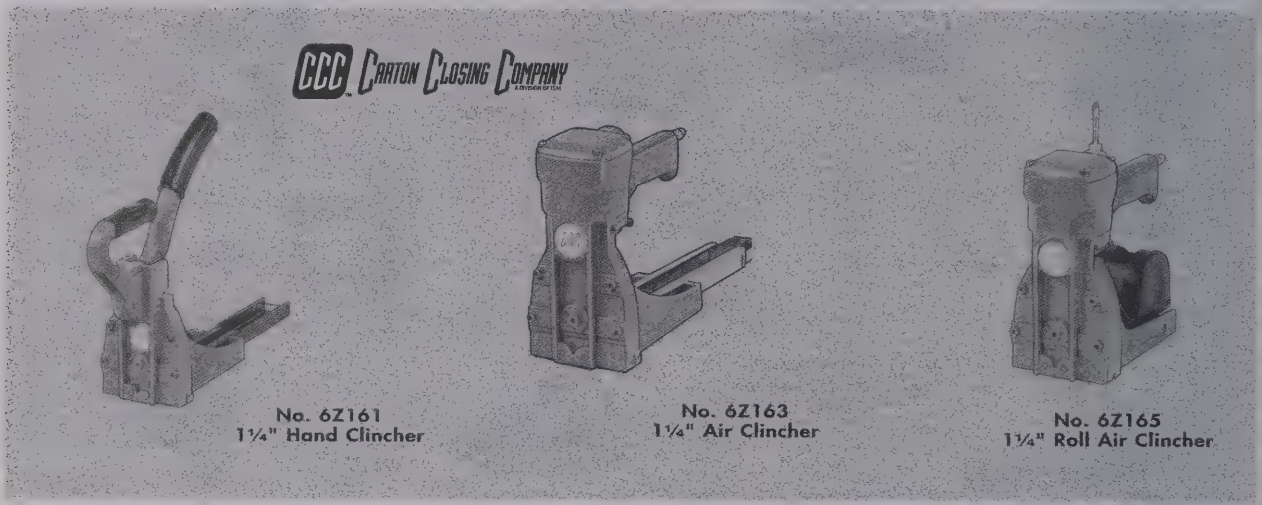
## NAILERS

**No. 6W530 18 Gauge Brad Nailer** is ideal for window and door trim, paneling, cabinet and furniture making. Unique combination trigger for rapid contact firing or easy to operate sequential mode. Slanted cylinder with longer nose to allow operator to reach tight areas. Includes an adjustable exhaust cap to deflect air in any direction, blow-molded storage case, and top load magazine. Hold (110) 18 gauge brads 3/8" to 1¼" long. Operating pressure 60 to 100 PSI.

**No. 6W531 16 Gauge Finish Nailer** is used for trim, molding, base boards, furniture and cabinet making. Combination trigger for rapid firing, easy to operate sequential mode or lock mode. Drives nails from 3/4" to 2½" long. Easy top loading magazine is completetly enclosed and holds (100) 15 gauge nails. Includes blow-molded storage case. Operating pressure 70 to 110 PSI.

**No. 6W533 15 Gauge Angle Finish Nailer** for trim, molding, furniture and cabinet making. Angle magazine allows nailing in tight spaces, such as toenailing and corners. Quick rear loading magazine holds up to 120 nails.Operating pressure 60 to 110 PSI.

**No. 6W532 Angle Framing Nailer** used for house framing, truss building, sub-flooring, decking, pallet and crate making. Angle magazine allows nailing in tight spaces, such as toenailing and corners. Includes auto-stop firing that prolongs tool life by locking when magazine is empty. Large magazine holds up to 100 plain, ring and scew shank nails. Operating pressure 70 to 110 PSI.



**No. 6W534 Roofing Nailer** drives full-headed coiled roofing nails from 3/4" to 1¾" long. Hardened contact top inserts reduce wear caused by applying roof shingles. Magazine holds 120 nails. Operating pressure 70 to 110 PSI.

# CARTON CLOSING STAPLES

## AIR AND MANUAL STAPLERS AND STAPLES

No. 6Z161
1¼" Hand Clincher

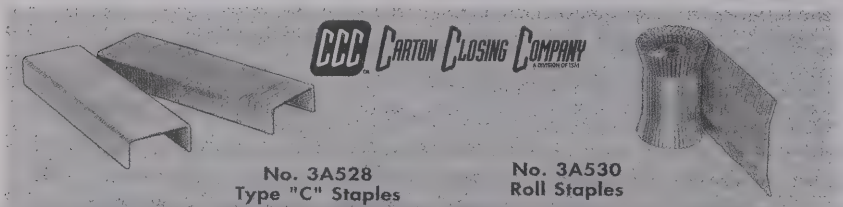
No. 6Z163
1¼" Air Clincher

No. 6Z165
1¼" Roll Air Clincher

- **Staple penetration is controlled easily with minor manual adjustments. Provides either full or blind depth penetration and either loose or tight clinch**
- **Readily removable magazine permits easy clearance without use of tools**
- **Efficient design of units ensures minimum air consumption**

Reliability, versatility and economy describe this line of pneumatic and manual packaging staplers. The Roll Air Clincher, with its staple capacity ten times that of ordinary staplers, is preferred by packaging professionals in high volume packaging applications. The Air Clincher is a practical choice because of its reduced size and weight; the Hand Clincher is a dependable, no-maintenance stapler. Carton Closing Corp. brand.

**Hand Clinchers** are manual staplers capable of closing thousands of cartons without maintenance. The new two-handle design permits a more accurate positioning of stapler on carton surface and minimizes the effort required to clinch staple. 1¼" stapler No. 6Z161 uses "C" staples; 1⅜" stapler No. 6Z162 uses "A" staples.



**Air Clincher** is the workhorse of the packaging industry. Its pneumatic system speeds carton closing operations. Air pressure: 80 PSI; air consumption: 0.08 cu ft. 1¼" stapler No. 6Z163 uses "C" (1¼" crown) staples; 1⅜" stapler No. 6Z164 uses "A" (1⅜" crown) staples.

**Roll Air Clincher** is a high production roll stapler with a capacity of 1000 staples. Performs up to 250 carton closings without needing to be reloaded yet, is the lightest roll stapler on the market. Air pressure: 80 PSI; air consumption: 0.08 cu. ft.

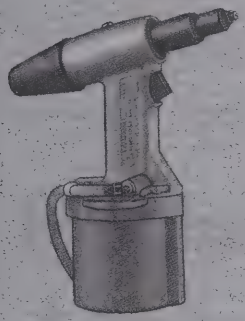
## REPLACEMENT STAPLES

No. 3A528
Type "C" Staples

No. 3A530
Roll Staples



"C" staples have a crown width of 1¼" and wire size of 0.035 x 0.076"; "A" staples have a crown width of 1⅜" and wire size of 0.035 x 0.090". Both come in 5/8" leg lengths, and are interchangeable with other brand staples such as International Staple and Machine, Container Corp and Salco. "A" and "C" staples come in sticks of 50. Roll staples have a crown width of 1¼" and wire size of 0.035 x 0.076". They are 5/8" long and come 1000 per roll.

## PRODUCTION AIR RIVETER

**POP®** FASTENERS

- "Standard of the Industry"
- Nosepieces set 1/8", 5/32", 3/16", and 1/4" open-end blind rivets
- 3000 lbs. pulling force
- Air/hydraulic design
- Lightweight construction

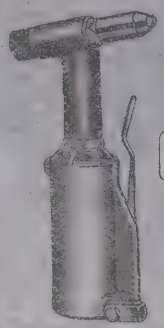
No. 6ZC22

**90-DAY LIMITED WARRANTY**

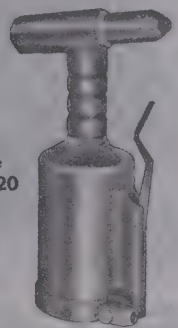
Pop Fasteners warrants riveter for 90 days. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**The Pop PRG540 is a high production air/hydraulic riveter** designed for assembly applications. Riveting can be performed with minimum effort on the part of the operator and fastenings are always uniform regardless of operator's strength. Riveter includes hardened steel jaws and nosepieces that set 1/8", 5/32", 3/16", and 1/4" open-end blind rivets.

**Quick exhaust air valve** rapidly returns pulling piston for high speed assembly. Pistol grip and trigger controlled air valve for easier operation. Attached lightweight air hose is connected to tool mid-line for balance and operator comfort when setting rivets in any position. 85 maximum PSI. Rated at 3000 lbs. pulling force. All cast-aluminum construction and polymer seals for long life and trouble-free service. 4½ lb. lightweight construction makes tool easy to handle. 7½L x 11³⁄₁₆"H. 4¾" diameter. Pop Tool brand.



**NOTE: A wide selection** of steel and aluminum rivets available; see Index under Rivets.



**No. 6ZC22.** Shpg. wt. 5.5 lbs. List $770.00. Each.....$755.00▲

- For use with aluminum rivets only
- Includes 1/8", 5/32", and 3/16" nose piece sets
- Features safety grip on housing
- Rated at 2000 lbs. pulling force

### No. 4Z512 AIR RIVETER

- For use with aluminum rivets only
- Includes 3/16" and 1/4" nose piece sets
- Rated at 3200 lbs. pulling force

**SPECIFICATIONS AND ORDERING DATA**

| Blind Rivet Diameters (In.) | Overall Length (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/8, 5/32, 3/16 | 11¾ | 4Z913 | $354.20 | $211.50 | 3.5 |
| 3/16, 1/4 | 12¼ | 4Z512 | 770.50 | 542.00 | 5.0 |

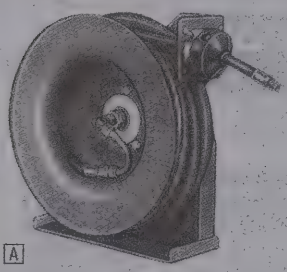
## CAULK MASTER AIR POWERED CAULKING GUNS

- Up to 5 times faster than manual caulking guns
- Produces consistent, professional quality beads
- Lightweight for easy, fatigue free application
- Twist lock retainer for fast loading of cartridges
- No. 6W225 features high impact barrel for 10.5 oz. cartridge, pistol grip handle, and 2 ft. hose with 1/4" (M)NPT fitting
- No. 3KD95 features high impact barrel for 10.5 oz. cartridge, plastic barrel and adapter for 30 oz. cartridge, pistol grip handle and 2 ft. hose with 1/4" (M)NPT fitting
- 0-70 PSI operating range
- No. 6W225 holds 10.5 oz. (1/10 gal.) cartridge
- No. 3KD95 holds 10.5 oz. (1/10 gal.) and 30 oz. (1 qt.) cartridge

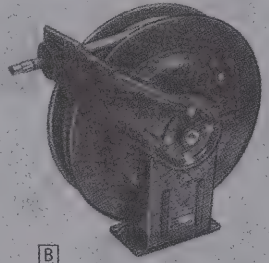
No. 6W225

For use with 10.5 oz. (1/10 gal) cartridges only

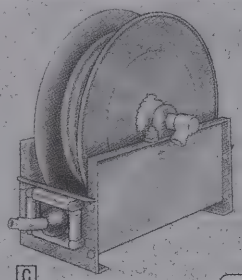
No. 3KD95



For use with both 10.5 oz. (1/10 gal.) cartridges and 30 oz. (1 qt.) cartridges



Valox is a registered trademark of GE Plastics



**SPECIFICATIONS AND ORDERING DATA**

| Cartridge Size | Caulk Master Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 10.5 oz. | PG100 | 6W225 | $43.48 | $41.50 | 2.0 |
| 10.5 oz. and 30 oz. | PG151 | 3KD95 | 88.50 | 87.00 | 2.0 |

# AUTOMATIC RETRACTABLE HOSE REELS

A

B

C

Replacement Parts Available
1-800-323-0620

- **Vibration proof, self-locking latch maintains desired length of hose**
- **Permanently lubricated bearings and swivels make units ideal for wall, floor, ceiling, or truck mounting**
- **Maximum temperature 150°F**

Low Pressure (300 PSI) hose reels are suitable for air and water applications. All low pressure hose reels have Buna-N seals except 3Z875 and 5Z026 which have Viton seals.

**No. 5Z026 accommodates hoses for air**, water, fuel oil, and certain chemicals compatible with Viton seals. Has capacity for 75 ft. of 1/2" or 3/4" I.D. hose, or 50 ft. of 1" hose. A 3/4" hose bumper is included.

**Low pressure (300 PSI) under the bench reels, Nos. 4HK86, and 4HK87** are smaller capacity reels for all general air and water applications. Reels can be mounted conveniently in out of the way locations for improved safety, convenience, and productivity.

**Stainless steel hose reels, Nos. 6Z784, 6Z785, and 6Z786 low pressure (500 PSI)** are ideal for low-pressure general air, water, solvent and chemical transfer applications in food processing, pre-rinse, washdown, chemical transfer, and industrial solvent handling markets. Also suitable for offshore and on-board marine applications where the harsh environment of salt spray requires the use of stainless steel hose reels. Complete with Viton seals, stainless steel swivel, and main shaft. Hose capacity on 6Z784 is 35ft. of 3/8", 6Z785, 50 ft. of 1/2", 6Z786 75 ft. of 3/4".

**Medium-pressure (2250 and 2000 PSI) hose reels** have S.A.E. 100R1, 1-wire braid hose. Suitable for motor oil, transmission fluid, gear oil, and hydraulic fluid transfer applications.

**High-pressure (4000 and 5000 PSI) hose reels** have S.A.E. 100R2, 2-wire braid hose for high pressure grease, or petroleum applications.

## MOTOR-DRIVEN HOSE REELS

**Motor-driven electric hose reels** have rugged construction and large storage capacity. For a variety of applications including: lawn care, pest control, grounds maintenance, steam cleaning, tree spraying, as well as most industrial applications.

**All bolted unitized construction—no welds.** Reel frame, spool, and drum are heavy-gauge steel with powder coat red finish.

**Full flow swivel is nickel plated** and equipped with Viton O-ring seals. Motor mounts on either end of reel. Chain and sprocket are partially shrouded for added protection.

**Friction lock with tension adjustment** prevents "bird nesting" of hose. Reels are shipped completely assembled. Hose not included.

**Operating temperature range: -20 to 250°F.**

**Maximum working pressure: 3000 PSI.**

**Nos. 5Z339 and 5Z340** have 12 Volt DC motors for mobile applications.

**No. 5Z341** has 115 Volt AC explosion-proof motor for industrial applications.

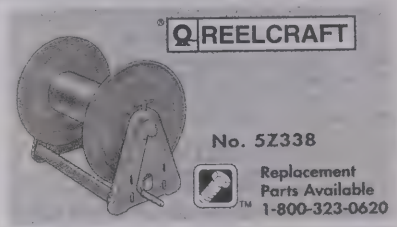
## HEAVY-DUTY HAND CRANK HOSE REELS

**Heavy-duty hand crank hose reel** features unitized, all-bolted construction with heavy-gauge steel reel frame, spool and drum.



**Adjustable spool rotation drag** eliminates backlash when dereeling hose, while spool lock pins prevent spool rotation when not in use.

**Full flow rotary swivels** allow permanent attachment to supply line.

**Other features include** vibration-proof fasteners and 4 main bearing supports, nickel-plated swivel with Viton O-ring seals, and durable powder coated red finish.

**Reels are shipped completely assembled** and ready to install. Hose not included.

Operating temperature: -20 to +250°F.

## WELDING HOSE REELS

**Oxygen/acetylene hose reels Nos. 4Z701, and 4Z702.** Reels only are UL Listed for use with oxy-acetylene welding and cutting equipment only. Oxygen line and gas line have separate input connections to provide added safety. Twin-line hoses meet R.M.A. and C.G.A. Type V.D. grade R specifications for flame resistance and burst strength.

**Reel No. 4HK93** is UL Listed and ideal for applications requiring longer lengths of hose and will accommodate up to 100 ft. of twin welding hose. For use with oxy-acetylene and other gases that require a grade T specification. Hose not included. (50' welding hose No. 4LG87, and 100' welding hose No. 4LG88 sold separately, see page 3021). UL Listed (MH12273). Reelcraft brand.

## PORTABLE REEL CART FOR No. 4Z934

**Portable reel cart** offers the convenience of reel portability. Features include; rugged 1" square tubular steel frame, durable baked on powder coat finish, 1/2" diameter steel axle, 8" semi-pneumatic rubber tires, high grade pregreased sealed ball bearings for long service life and easy rolling. Reel cart will accommodate Stock No. 4Z934 hose reel listed above. Cart and reel sold separately. Reelcraft brand (600263-1)

**No. 4HK92.** Portable Reel Cart.
Shpg. wt. 21.0 lbs. List.....$81.81.
Each .....**$78.80**

# MULTIPURPOSE HOSE

- **Certified 4:1 safety factor (burst to working pressure)**
- **Resists checking, cracking and fading normally caused by sunlight exposure**
- **Flexible to -20°F**
- **Highly resistant to kinking**
- **20% less weight per foot than comparable rubber hoses**
- **Made in USA**
- **Bulk reels are maximum of 2 pieces (90% are one piece). If 2 pieces, minimum length is 50 ft.**
- **If coupling, use crimped-on fitting only. Reusable fitting not recommended**
- **Pressure ratings shown are at 72°F. Ratings decrease as temperatures increase. Do not exceed ambient temperatures of 120°F**

## 200 PSI GENERAL PURPOSE-AIR HOSE

Tube and cover made of PVC reinforced with polyester. Provides reliable service in normal use. Hose made in whole, or part from recycled material

## 250 PSI HYDRO-AIRE® AIR HOSE

Hose has greater strength, durability, and flexibility than standard duty air hoses. Do not expose to oils, ozone, or elevated pressures. Hose made in whole or part from recycled materials.

## 300 PSI THERM-O-BLUE® AIR HOSE

Provides optimum strength while remaining lightweight and flexible at low temperatures. Compounded prime tube formulated to resist lubricating oils. Smooth, nonmarking cover drags easily over most surfaces while resisting external abrasions.

swan®

## GOODYEAR GORILLA™ BRAND PREMIUM HOSE

**Premium-quality multipurpose Gorilla™ brand hose** comes in coupled assemblies and uncoupled bulk lengths for heavy-duty, demanding applications found in manufacturing, construction, agriculture, mining, and petroleum industries. Tube is made with patented oil-resistant Chemi-gum® synthetic rubber, reinforced with Flexten® fiber yarn to resist bending and pressure stresses. Cover is made with tough abrasion and oil-resistant Carbryn® synthetic rubber. Compatible with oil, alkalies, paraffin, grease, salt solutions, as well as many solvents and chemicals. Certified 4:1 safety factor (burst to working pressure). Assemblies have steel (hydraulic type) couplings. Bulk Hose can use Dixon "Boss" Fittings or "Air King" Universal Couplings found on page 3029.

**WARNING: "Air King" Universal Couplers are only rated up to 110 PSI, check application before use.**

# AIR AND MULTIPURPOSE HOSE

**Speedaire 150 PSI Air & Multipurpose Hose** features an EPDM tube and is designed for the transfer of air, water and mild chemicals. It is specially designed to provide the best value in low pressure industrial, construction, and agricultural applications. RMA Class C (limited) oil resistant tube. Temperature range is -20° to 190° F. Available in 25' and 50' assemblies or bulk lengths. Quick disconnect couplers for assembled hose can be found on page 3022. Bulk hose can use Speedaire fittings found on page 3020 or Dixon "Boss" Fittings/"Air King" Universal Couplings found on page 3029. **WARNING: "Airking" Universal Couplers are only rated up to 110 PSI, check application before use.**

- **Constructed of the highest quality materials to provide superior life**
- **Handles a much wider range of temperatures than thermoplastic hose**
- **Certified 4:1 Safety Factor (burst to working pressure)**

Multipurpose
Air Hose

# HEAVY-DUTY AIR & MULTIPURPOSE HOSE

**Constructed with a Nitrile oil resistant tube** and heavy-duty reinforcement. For air, water, and mild chemical applications that require a heavy-duty, oil resistant hose. Designed for superior life in even the toughest applications. RMA Class A (high) oil resistant tube cover. Temperature range is-20° to 180° F. Available in 25' and 50' assemblies coupled with (M) NPT crimped fittings each end, or bulk lengths. Quick disconnect couplers for assembled hose can be found on page 3029. Bulk hose can use Speedaire fittings found on page 3020 or Dixon "Boss" Fittings/"Air King" Universal Couplings found on page 3029.

**WARNING: "Airking" Universal Couplers are only rated up to 110 PSI, check application before use.**

- **Constructed of the highest quality materials to provide superior life**
- **Handles a much wider range of temperatures than thermoplastic hose**
- **Certified 4:1 Safety Factor (burst to working pressure)**
- **Hose is non-conductive**
- **RMA Class A tube and cover**

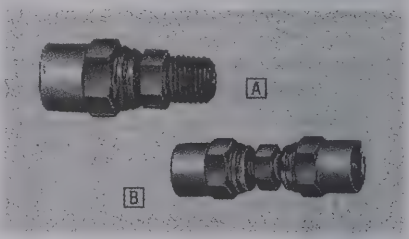
(*) 5 packages of ten.

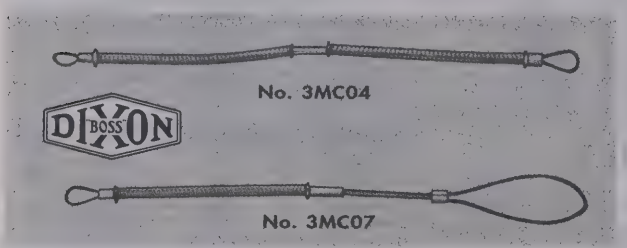
### HOSE CRIMPER

Used with Speedaire hose barbs and ferrules, this portable or workbench mounted crimper secures standard brass ferrules onto general purpose or heavy-duty air, liquid, and material hose, for a complete, permanent hose assembly. Self-contained cast-iron unit has 6 hardened steel dies for crimping 1/4"-1 braid through 1/2"-2 braid air hose. Positive camming action at end of lever stroke gives powerful leverage for one-hand operation.



**No. 6Z072.** Shpg. wt. 10.0 lbs. List ..... $174.50.
Each ..... $136.15

## REUSABLE HOSE FITTINGS



Reusable, screw-on brass fittings are field installable using two standard wrenches. Makes smooth projection-free professional hose assemblies. Male ends fit all air tools, menders make quick repairs. 250 PSI max. Speedaire brand.

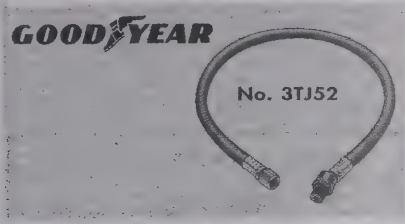
## "WHIPCHEK" SAFETY CABLES



- Helps prevent hose whip in cases of accidental separation of coupling or clamp device
- Maximum working pressure 200 PSI for air only
- Must be installed in fully extended position (no slack)
- Accepted by OSHA, U.S. Army Corp. of Engineers, Bureau of Mines

### WHIPCHECK SAFETY CABLE

# INDUSTRIAL HOSE ASSEMBLIES

## SNUBBER HOSE

**Snubber (whip) hose** is a short length of heavy-duty hose used to connect an impact wrench, air hammer, or other pneumatic tool to a main air hose. The snubber hose absorbs shock, vibration, and abrasion that could otherwise damage the main length of hose. Nitrile oil-resistant tube and cover. Maximum working pressure—300 PSI. Certified 4:1 safety factor. Temperature range is -20° to 180° F.

**Stock Nos. 3JT52 and 3JT53** have brass 1/4" (M) NPT swivel x 1/4" (F) NPT fittings.

**Stock No. 3JT54** has brass 1/2" (M) NPT x 1/2" (M) NPT fittings.

| Hose Size I.D. (In.) x Length (In.) | Hose O.D. (In.) | Color | Working Pressure (PSI) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 1/4 x 30 | .54 | Black | 300 | 3JT52 | $9.60 | $8.00 | 0.3 |
| 3/8 x 30 | .69 | Black | 300 | 3JT53 | 10.80 | 9.00 | 0.6 |
| 1/2 x 24 | .86 | Black | 300 | 3JT54 | 8.40 | 7.00 | 0.5 |

## POLYURETHANE COIL AIR HOSE

- Will not mar or scratch surfaces
- Kink resistant
- 8" and 16" straight pigtail ends

**Non-abrasive, durable, 95 durometer flexcoil** is ideal for applications in assembly and finishing areas where hoses come in contact with finished painted surfaces. Excellent flexibility for automated assembly, robotics, and packaging machinery applications. Chemical, gasoline, oil, oxygen, and ozone resistant. -40 to 180°F temperature range. Max. working pressure 125 PSI @ 75°F, burst pressure 375 PSI @ 75°F*. Reusable 1/4" M(NPT) rigid fitting hose on one end with 1/4" M(NPT) swivel fitting on other end. Transparent blue color. Freelin-Wade brand.

(*) Based on 3:1 safety factor at 75°F. If hose is used in temperatures above 75°, it should first be tested for safety purposes in that environment. Hose burst pressure decreases significantly at higher temperatures.

| Hose Size I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/4 x 4 | 3/8 | 6ZC99 | $23.49 | $17.85 | 1.4 |
| 1/4 x 6 | 3/8 | 6ZF01 | 25.61 | 18.70 | 0.4 |

| 1/4 x 20 | 3/8 | 6ZF00 | 40.67 | 30.00 | 1.0 |

## NYLON COIL AIR HOSE

**Freelin-Wade nylon coil air hose** assemblies for use with air tools, cylinders and other pneumatic equipment in production and assembly operations. Self-storing hose retracts to coil 1/30 of maximum length. Extruded from heavy-duty Nylon. Tough and abrasion resistant. Oil, grease, and moisture resistant. 170 PSI maximum working pressure, -40 to 200°F temperature range. Safety yellow color. Reusable male rigid fitting on one end, reusable male swivel fitting on other. Coil spring guards on both ends. Freelin-Wade brand

| Hose I.D. (In.) | Total Length (Ft.) | Usable Length (Ft.) | Fittings (M)NPT (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 1/4 | 12 | 9 | 1/4 | 2Z252 | $20.15 | $11.70 | 0.5 |

## TWIN-LINE WELDING HOSE

**Goodyear twin-line welding hose** is flexible and highly kink resistant. Heavy-duty cover resists the deteriorating effects of oils, acids, alkalis, and other liquids. Meets or exceeds (RMA/CGA specifications) for welding hose.

**Gemini Grade R** is made with EPDM tube reinforced with 1-ply high tensile spiral for maximum burst strength. Wide web separates easily and evenly, yet has strength to resist tears. Oxygen line is color-coded green; acetylene line red. 9/16" 18-UNF 2B thread fittings. Available in 25 and 50 foot lengths. Goodyear brand.

**Gemini Grade T** is a premium quality welding hose produced to stringent specifications. Provides safe and reliable use with most welding fuel gasses. Constructed with Chemivic™ cover which is oil resistant and provides abrasion resistance in extreme welding conditions. 9/16" 18-UNF 2B thread fittings. Available in 50 and 100 foot lengths. Goodyear brand.

**WARNING: The use of certain fuel gasses may damage welding hose and lead to fires and explosions.**

| Hose Size I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Max. (PSI) | Stock No. | List | Each | Shpg. Wt. |

# AIR LINE QUICK COUPLERS AND PLUGS

## DynaQuip INDUSTRIAL INTERCHANGE QUICK COUPLERS

DynaQuip couplers provide quick, positive air line connections for all types of pneumatic tools and equipment. Simple to use, the swivel action connection prevents kinking and twisting hoses. Meets dimensional and interchangeability requirements of MIL-C-4109F. When disconnected, coupler body valve shuts off air flow and automatically opens valve when recoupled. Maximum pressure: 235 PSI. Meet ISO 6150.

| Body Size (In.) | Maximum Air Flow* |
|---|---|
| 1/4 | 15 S.C.F.M. |
| 3/8 | 30 |
| 1/2 | 50 |

(*) 90 PSI inlet and 2 PSI drop.

### QUICK CONNECT COUPLERS SPECIFICATIONS AND ORDERING DATA

### SLEEVE TYPE COUPLER

**Sleeve type coupler** requires pull back on sleeve to connect and disconnect plug. Steel construction with zinc plating.

**FEMALE NPT COUPLER** Used on end of hose or pipe.

| Connection Size, NPT (In.) | Body Size (In.) | DynaQuip Model | Stock No. | List | Each | Shpg. Wt. |

# AIR LINE QUICK CONNECT COUPLERS AND PLUGS

## SAFETY EXHAUST COUPLER

**Zero pressure connections** allows bleeding off of downstream air before tool is disconnected, eliminating the hazard of flying or snaking air hose (plugs can fly at speeds up to 75 MPH with conventional couplers). Unique twist lock design incorporated into the sleeve action prevents the plug from being released until the air has been bled off between the plug and the tool.

**Ported design provides up to 30% greater air flow** compared to standard couplings. Air tools operate more efficiently because of the reduced pressure drop across the coupling. Working pressure 500 PSI (34 bar).

**FEMALE COUPLER** Used on F/R/L, compressor, or end of hose.

| Connection Size, NPT (In.) | Body Size (In.) | DynaQuip Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1/4 | 1/4 | DC040 | 6A685 | $12.95 | $12.15 | 0.2 |

## UNIVERSAL PNEUMATIC QUICK COUPLERS

**DynaQuip universal quick couplers** accept the 3 most popular plug interchange styles; industrial interchange (MIL-C-4109), ARO 210 interchange, and automotive (Tru-Flate) interchange. Universal coupler features push-to-connect action, high flow valve for maximum efficiency, an anti-snag sleeve design to prevent accidental disconnection, a zinc dichromate finish for extra corrosion protection, and Buna-N seal. Constructed from steel, these couplers are rated to 150 PSI working pressure. Fit all 1/4" connection size plug series shown above and on previous page.

# MULTI-PURPOSE HOSE

## PUSH-ON HOSE

GOODYEAR

No clamps, ferrules, or crimping devices needed

No. 5W553

CONSTRUCTION:
Tube: Chemigum™ (ORS)
Reinforcement: Synthetic cord
Cover: Black, smooth-finish Chemivic™

- Easy fitting installation, no clamps, ferrules, or crimping needed
- Push-on hoses provide excellent fitting retention
- Certified 4:1 safety factor (burst to working pressure)
- Dimensionally stable, minimum shrinkage
- Hose will handle air, water, lubricating oils
- Available in black, blue, or green
- Manufactured in the USA by the Goodyear Tire and Rubber Company

**Goodyear Acala™ multipurpose push-on hose** is designed with exclusive spiral reinforcement that provides exceptional fitting retention in "push-on" self-coupling applications. Synthetic cord is laid at a precisely controlled angle. The higher the pressure, the more tightly hose grips the fitting. Rated for a 250 PSI working pressure with a 4:1 safety factor. Temperature rating: -20°F to 180°F. Hose can handle air, water, oil, grease, sprays, and many solvents.

**Goodyear Insta Grip I premium multipurpose hose** for use at working pressures up to 300 PSI. Seamless, heat and oil resistant tube, reinforced with one braid of high strength synthetic yarn laid at the most effective angle for maximum strength and coupling holding ability. Cover is weather, abrasion, and oil resistant Carbryn (high ORS, RMA designation Class A), MSHA approved. Temperature rating: -40°F to 200°F. Insta Grip I will handle: air, water, lubricating oils and antifreeze.

## PUSH-ON HOSE FITTINGS FOR GOODYEAR, ACALA, AND INSTA GRIP HOSE

SPEEDAIRE®

New

Push-on brass hose barbs lock securely on push-on hose. They provide a secure lock without additional crimping devices—unlike standard hose barbs, which require crimped ferrule or clamp to secure barb to hose. Fitting is simply inserted manually into hose end. The higher the pressure through hose, the tighter fitting is gripped. Hose assemblies and repairs can be made at job site since no assembly equipment is needed. Can only be used with push-on style hose.

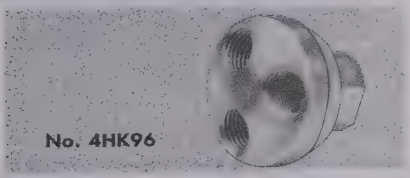
# AIR LINE ACCESSORIES

## HANSEN/ARO 210 STYLE COUPLERS AND PLUGS

No. 5A256



No. 5A259

- Automatic push-type couplers and plugs provide positive air line hookup with a quick snap of the retaining pins
- For 1/4", one-way shut-off operation
- Instant, air-tight connections
- Socket sleeve guard protects against accidental disconnect
- Buna-N seals are oil and solvent resistant
- Couplers rotate 360° to prevent hose twisting and kinking
- Sold in 2 and 3-piece convenience packages

**SPECIFICATIONS AND CONSTRUCTION**
**Maximum inlet pressure: 250 PSIG**
**Valve: Celcon®**
**Seals: Buna-N**
**Body: Zinc-plated steel**

## 3-WAY HOSE MANIFOLDS

No. 4HK96

DynaQuip 3-way coupling manifolds add versatility to your compressed air systems. Simplify multiple tool operations. Allow 3 work stations to use the same air supply. Each manifold accepts 3 quick couplers or outlet hoses. Manifold has female NPT inlet and 3 female NPT outlets.

**DynaQuip**

## NON-MAR AIR TOOL SWIVEL FITTINGS

- Ideal for chip and scratch reduction
- Improved maneuverability and ergonomics when using air tools and spray guns
- Lightweight plastic encapsulated aluminum body

Lightweight fittings connect portable air tools to an air line with a universal joint that swivels 360° at two locations. This allows the air hose to remain vertical at all times, reducing operator fatigue, repetitive motion trauma and fitting chafe. Male end fits directly into air inlet of tool and female end connects to quick coupler or hose fitting. Fittings allow high flow capacity with low pressure drop. Not for use with percussion tools. Maximum working pressure is 150 psi.

**DynaQuip**

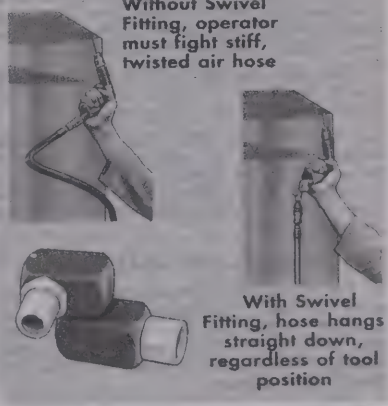
## CLIP-ON BLOW GUN KIT

- 5" angled nozzle
- Handle pressure controls air flow
- Zinc plated finish

**Clip-on blow gun kit** attaches to Schrader-type right angle air chuck (No. 4X787) without tools. 5" nozzle is angled for ease of use. Handle pressure provides instant control of air flow. Designed for consistent fit and alignment with air chuck. Kit includes screw-in sports ball filler and lung saver tip for filling air mattresses, inflatable pools, etc. Zinc plated finish. Made in USA. Air Works brand (#2735).

**No. 6ZF43.** Shpg. wt. 0.5 lbs. List .....$9.95. Each .....**$7.19**

## AIR TOOL SWIVEL FITTINGS



**Swivel fittings improve maneuverability and ergonomics** of handling air tools and spray guns. 360° swivel at two locations allows air hose to drop straight to floor, regardless of tool position. Reduces operator stress, fatigue and risk of repetitive motion injuries (i.e. carpal tunnel syndrome).

**For use with drills, screwdrivers,** grinders, polishers, sanders, spray guns and all other air operated tools.

**Not for use with percussion tools.** Fitting may be threaded directly into air inlet of tool or into standard quick disconnect coupler. Ingersoll-Rand brand.

Redesigned new 1/4" non-marring composite housing 6ZF41 has 32% more air flow capacity than the original model.

## HEAVY-DUTY BOOSTER BLOW GUNS AND ACCESSORIES

- Leakproof, rustproof brass valve
- Polished nickel-plated body
- Contoured design for user comfort
- Thumb lever with plastisol grip
- 1/4" (F)NPT inlet
- Large hanging hook
- Low noise levels

A **No. 2X492 non restricted blow gun** for applications where full air line pressure is needed. Can be used where compliance with OSHA SAFETY ACT is NOT required. NOTE: In order to conform with OSHA Regulations, inlet pressure should not exceed 30 PSI.

B and C **Nos. 6W181 and 5X786 self-relieving safety-type blow guns.** Nozzle relief vent holes and built-in flow restrictors limit maximum dead-ended nozzle tip pressure to less than 30 PSI when used with maximum inlet pressure of 150 PSI. Meets OSHA regulations section 1910.242(b) for pressure relief and 1910.95 for noise level. No. 6W181 uses a specially designed nozzle that creates air screen for effective chip guarding.

### OSHA SAFETY NOZZLES

Self-relieving nozzles have lateral holes that provide pressure relief if the nozzle tip is deadended. Meets OSHA regulations section 1910.242(b) for pressure relief and 1910.95 for noise level.

D **No. 4TL14 standard safety nozzle** is used in general blowing and drying applications. Made of brass.

E **No. 4TL19 air screen safety nozzle** reduces dust and chip flyback. Made of brass.

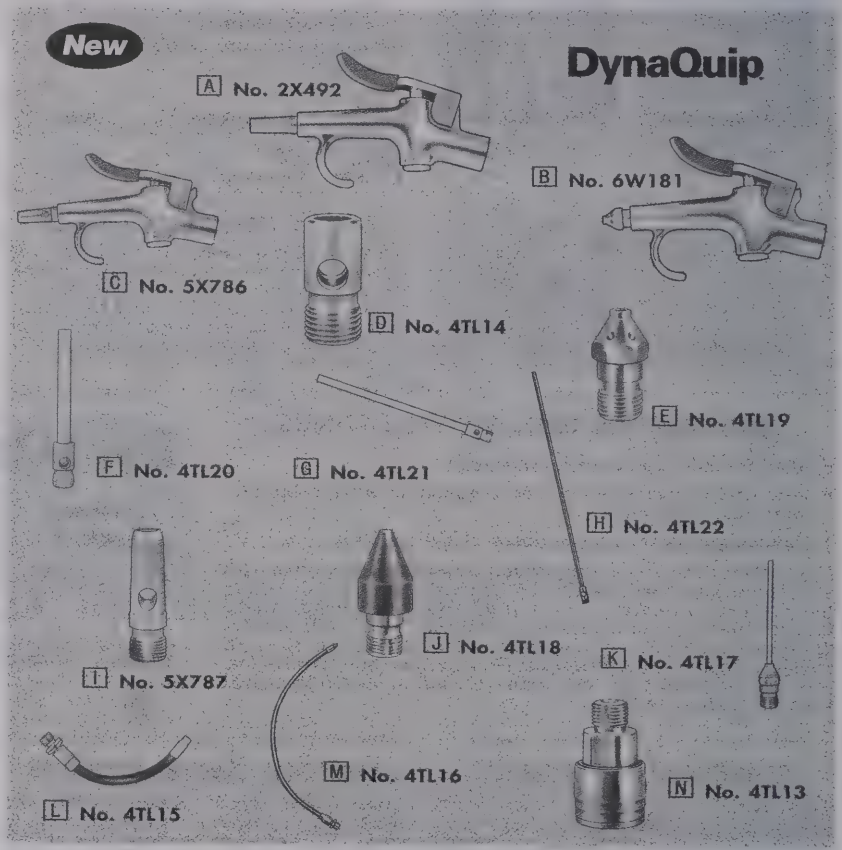
F, G, and H **Nos. 4TL20, 4TL21, and 4TL22 extension safety nozzles** are used for extending reach in difficult areas. Zinc-plated with brass base and copper tube.

I **No. 5X787 blow gun safety nozzle** converts standard DynaQuip blow gun No. 2X492 and most other makes to self-relieving, safety-type blow guns.

### NON-SELF-RELIEVING NOZZLES

The following are not self-relieving styles and should only be used on air lines regulated to 30 PSI or less.

J **No. 4TL18 rubber tip nozzle** protects delicate surfaces from being scratched and provides a tight seal for blowing out fluid lines. Made of rubber coated brass.



K **No. 4TL17 needle tip nozzle** provides a fine flow of air to clean in tight places. Made of brass with stainless steel tube.

L and M **Nos. 4TL15 and 4TL16 flexible extension nozzles** are used in hard-to-reach areas and can be bent and curved to direct air flow to where it is specifically needed. Zinc-plated with brass base and vinyl coated copper tube.

### QUICK CHANGE ADAPTER TIP

N **No. 4TL13 quick change adapter tip** allows user to switch nozzles easily. The tip attaches to the end of any DynaQuip blow gun and accepts all DynaQuip nozzles, except the 4" and 12" (4LT15 & 4LT16) flexible extensions.

**HELPFUL GUIDES TO TERMINOLOGY AND TECHNICAL DATA ARE PROVIDED FOR MANY OF OUR PRODUCTS. SEE PAGES AT BACK OF CATALOG**

# QUICK-CHANGE BLOW GUN KIT AND NOZZLE KIT

**LIFETIME WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

No. 5A258 contains five nozzles and heavy-duty blow gun

No. 6W180 contains nozzles only

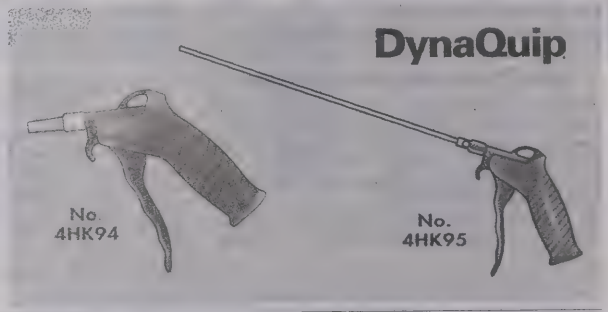
DynaQuip

**No. 5A258 Quick Change blow gun kit includes the following nozzles: 6" extension safety nozzle; high-flow safety nozzle; air screen safety nozzle; rubber tip nozzle* and needle tip nozzle***

(*) Non-safety type nozzles. Inlet pressure should not exceed 30 PSI.

- **U.S. patented, quick-change design uses push-type quick coupler for instant nozzle changes**
- **Blow gun combines quick-change design with features of blow guns on page 3026**

**Blow Gun Kit** contains five of the most popular nozzles for industrial and automotive uses. Unique quick-change feature allows user to switch nozzles quickly and easily. Kit contains lever-operated heavy-duty blow gun with patented quick-change coupler; high-flow safety nozzle; 6" extension safety nozzle; rubber-tip nozzle; needle tip nozzle; and air screen safety nozzle. Clear vinyl, compartmented snap storage pouch included. DynaQuip brand.



**No. 5A258**. Blow Gun Kit. Shpg. wt. 0.7 lbs. List $25.98. Each.....**$18.85**

**No. 6W180 Blow Gun Nozzle Kit** contains all nozzles shown with No. 5A258 listed above, but does not include blow gun. Nozzles can be used with Nos. 2X492, 5X786, 6W181, and 5A258.

**No. 6W180**, Blow Gun Nozzle Kit. Shpg. wt. 0.2 lbs. List $9.99. Each .....**$9.50**

# PISTOL STYLE SAFETY BLOW GUNS

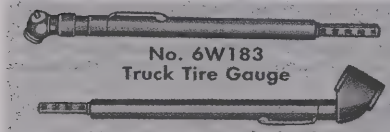
**Pistol grip blow guns** are ergonomically designed for operator comfort and safety. Made from durable, lightweight nylon which helps insulate cold air. Valve mechanism, nozzle inlet fitting, and hose inlet fitting are made from machined brass for strength. Lever style trigger mechanism allows variable air flow to cover all types of jobs. Blow guns have 1/4" female NPT inlet and are rated to a maximum of 125 PSI inlet pressure. Meets OSHA regulations section 1910.242(b) for pressure relief and 1910.95 for noise level. Both models are equipped with safety style nozzles that reduce tip pressure to 30 PSI or less when dead-ended. DynaQuip brand.

| Inlet NPT (In.) | Description | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/4 | High flow safety | 4HK94 | $14.50 | $13.19 | 0.3 |
| 1/4 | 12" extension safety | 4HK95 | 16.20 | 14.17 | 0.4 |

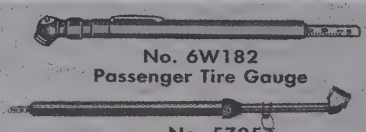
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

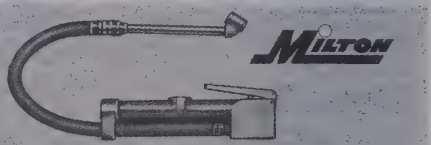
Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# TIRE GAUGES AND INFLATORS



## ADJUSTABLE POCKET BLOW GUN





**Adjustable pocket blow gun** features easy two finger full air control adjustment. Fits directly into 1/4" Speedaire industrial standard coupler. No adapters needed. Aluminum body with pocket clip. Milton brand(115).

**No. 6W178.** Shpg. wt. 0.1 lbs. List $8.90. Each ..... **$6.19**

## MILTON TIRE INFLATORS/GAUGES

### TRUCK TIRE GAUGE

Features four-sided two-color indicator bar calibrated in 2 lb. PSI and 20 kPa increments. Range of 20 to 120 PSI and 120 to 820 kPa. Chrome/nickel plated brass construction with pocket clip and deflator tab. Milton brand (925).

**No. 6W183.** Truck Tire Gauge. Shpg. wt. 0.1 lbs. List $8.08. Each..... **$5.84**

### DUAL CHUCK TRUCK TIRE GAUGE

Features four-sided nylon indicator bar calibrated in 2 lb. PSI and 20 kPa increments. Range of 20 to 120 PSI and 120 to 820 kPa. Useful where valve stems are hard to reach. Plated brass body construction. Milton brand (927).

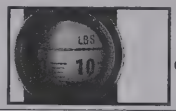
**No. 6W179.** Dual Chuck Truck Tire Gauge. Shpg. wt. 0.1 lbs. List $12.55. Each..... **$8.56**

### PASSENGER TIRE GAUGE

Features four-sided nylon indicator bar calibrated in 1 lb. PSI and 10 kPa increments. Range of 5 to 50 PSI and 40 to 350 kPa. Chrome/nickel plated brass construction with pocket clip and deflator tab. Milton brand (921).

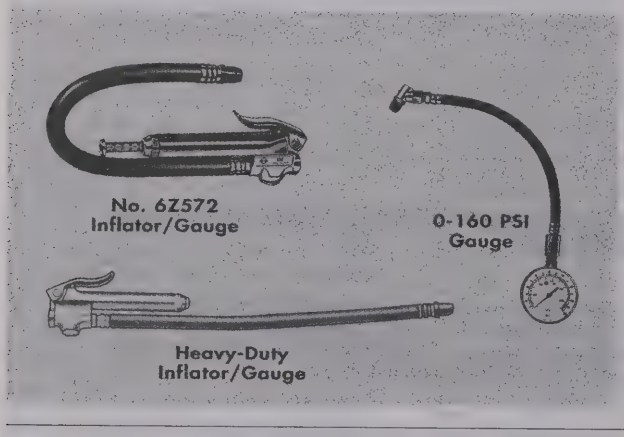
**No. 6W182.** Passenger Tire Gauge. Shpg. wt. 0.1 lbs. List $8.25. Each ..... **$5.67**

### HEAVY-DUTY DUAL CHUCK TRUCK TIRE GAUGE



Features extra long nylon indicator bar precision calibrated in 2 lb. PSI and 20 kPa increments. Range of 10 to 160 PSI and 80 to 1100 kPa. Rugged chrome/nickel plated brass unit with master gauge accuracy. Rated for heavy-duty shop service. Milton brand (976).

**No. 5Z257.** Heavy-Duty Truck Tire Gauge. Shpg. wt. 0.7 lbs. List $26.35. Each..... **$18.93**



### TIRE INFLATOR/GAUGE

Easy to read magnifying lens enlarges pressure scale for accurate readings. Dual-head chuck allows access to inside dual wheels. Inflator is completely sealed and weather protected for durability. Two-pound graduations from 10 to 120 PSI. Durable die-cast zinc body. Factory tested for accuracy. 1/4" NPT inlet. Milton brand (506).

**No. 5Z256.** Tire Inflator/Gauge. Shpg. wt.1.5 lbs. List $70.90. Each ..... **$47.80**

**Tire inflator/gauge has magnified dial lens to enlarge reading area of scale**

## TIRE INFLATORS/GAUGES

**Passenger car tire inflator/gauge** features a compact, sturdy design. Chrome-plated castings with all brass internal parts. Solid brass bayonet type dial has extra large markings. Calibrated 10-90 PSI in 2 PSI increments. Includes 12" hose with straight-on tapered chuck. 1/4" NPT inlet. Amflo brand.

**Heavy-duty tire inflator/gauge** has a 12" hose with swivel dual-foot truck chuck. Heavy-duty chrome-plated castings. Protective vinyl sleeve over dial tube. Plated steel handle is riveted to body. Solid brass bayonet type dial can be read from any angle. Calibrated 10-120 PSI in 2 PSI increments. 1/4" NPT inlet.

**Dual-range master tire pressure gauge** includes a swivel tapered chuck for all types of tires, chrome-plated fittings for durability, and a button valve to bleed off excess pressure. Dual calibrations: 0-160 PSI in 2 PSI increments (black); 0-1100 kPa in 20 kPa increments (red).

| Description | MFr's Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Inflator/Gauge** | 150 | **6Z572** | $30.42 | **$28.50** | 1.0 |
| **H.D. Inflator/Gauge** | 101 | **6Z573** | 43.31 | **40.55** | 1.5 |
| **6-160 PSI Gauge** | 980-160 | **6Z574** | 44.15 | **36.65** | 1.2 |

control devices inc.

## AIR CHUCKS

DynaQuip

### BRASS AIR TANK VALVE

Filler valve for use with pumps and compressors. 1/8" (M) NPT. 1[Z\x]"L. 150 PSI max. Control Devices brand.

**No. 1X361.** Shpg. wt. 0.1 lbs. List $1.75. Each..... **$1.60**

### RIGHT ANGLE AIR CHUCK

Heavy-duty brass plated aluminum chuck. 1/4" (F) NPT. DynaQuip brand.

**No. 4X787.** Shpg. wt. 0.1 lbs. List $2.10. Each..... **$1.85**

### STRAIGHT BODY AIR CHUCK

Tapered head permits easy access. 1/4" (F) NPT. DynaQuip brand.

**No. 4X673.** Shpg. wt. 0.2 lbs. List $2.36. Each..... **$2.06**

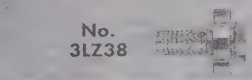
# BOSS & UNIVERSAL STYLE COUPLINGS

## "BOSS" STYLE FITTINGS



- Used with air, water, fluid petroleum, and chemicals
- Constructed of steel bar stock
- Fittings can be used in steam applications if "Boss" clamps are used

| Hose x NPT Size (In.) | Dixon Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2 x 1/4 | MS8X4 | 3LZ76 | $4.40 | $3.86 | 0.2 |
| 1/2 x 3/8 | MS8X6 | 3LZ77 | 4.40 | 3.86 | 0.2 |
| 1/2 x 1/2 | MS1 | 3LZ70 | 3.50 | 3.09 | 0.2 |
| 1/2 x 3/4 | MS8X12 | 3LZ75 | 10.00 | 8.83 | 0.5 |
| 3/4 x 1/2 | MS12X8 | 3LZ73 | 8.75 | 7.71 | 0.3 |
| 3/4 x 3/4 | MS6 | 3LZ74 | 5.85 | 4.92 | 0.4 |
| 3/4 x 1 | MS12X16 | 3LZ72 | 13.50 | 11.90 | 0.5 |
| 1 | MS11 | 3LZ71 | 8.80 | 7.82 | 0.6 |

## "EZ BOSS" GROUND JOINT COUPLINGS

- Coupler makeup: Hose shank stem, female thread wing nut, male wing nut thread x female NPT spud
- When used with Boss clamps, recommended for steam service up to 450°F

| Size (In.) | Dixon Model | Stock No. | List | Each | Shpg. Wt. |

| | 1 | 1 15/16 | 2 1/8 | 21 | B15 | 3LZ06 | 11.25 | 9.88 | 1.8 |

Boss Clamps need to be sized up to both I.D. and O.D. of hose.

## "AIR KING" UNIVERSAL COUPLINGS

"Air King" universal couplings have a sexless common head design that eliminates mismatched fitting and allows direct connection between any two fittings from 1/4" to 1". Just push and a quarter turn to connect and disconnect. RATED FOR AIR SERVICE ONLY, UP TO 110 PSI. The use of an "Air King" safety clip, included with each coupling, or nylon lanyard retainer is recommended to assure that "Air King" universal coupling will not come apart, and guarantees that they are properly connected.

- Constructed of malleable iron
- Same gasket, safety clip, and lanyard for all coupling sizes
- Gasket temperature range: -20°F–160°F
- WARNING: Never use any "Air King" coupling for steam service!

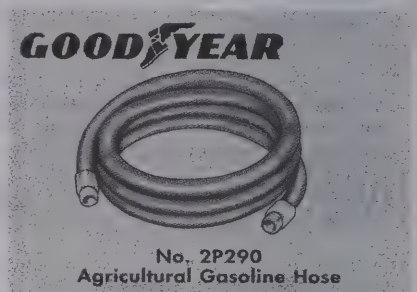
# DEFINITE PURPOSE HOSE ASSEMBLIES

## AGRICULTURAL SPRAY HOSE

**Horizon™ agricultural spray hose** is a general-purpose air and water hose. Resists a variety of chemicals (including Monsanto's "Lasso") used in farm spray applications. Reinforced with synthetic fabric. EPDM synthetic rubber tube and cover (black) provide strength and flexibility. Handles working pressures from 150 to 250 PSI. Temperature range: -20° to 190°F. Fittings: nylon 3/4" (M)NPT on both ends. Goodyear brand.

| Hose I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Max. Pressure (PSI) | Max. Temp. (°F) | Fittings | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **1 x 12** | 1.441 | 250 | 190 | Nylon | **2P291** | $29.40 | **$25.70** | 6.0 |



No. 2P291
Agricultural Spray Hose

## AGRICULTURAL GASOLINE HOSE

**Multi-use type for dispensing gasoline,** grease, kerosene, and petroleum oils from farm and barrel type pumps where UL listing is not required. High tensile reinforcement adds durability and good handling characteristics. Chemigum™ rubber tube offers high resistance to petroleum products. Black Chemivic™ synthetic rubber cover resists abrasion, sun, and weathering. Reinforced with synthetic cord. Fittings: Dichromate/steel 3/4" (M)NPT on both ends. Goodyear brand.

| Hose I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Max. Pressure (PSI) | Fittings | Stock No. | List | Each | Shpg. Wt. |

No. 2P290
Agricultural Gasoline Hose

## GASOLINE PUMP HOSE

**Pacer™ softwall hose** is an economical alternative to hardwall hose. Handles all types of gasoline, oil, and petroleum-based products. Strong synthetic textile cord reinforcement gives hose excellent resistance to internal pressure. Highly resistant to abrasion and weathering. UL Listed. Static bonded for grounding purposes. Tube and cover (black) are synthetic rubber. Fittings: chrome/brass 3/4" (M)NPT on both ends.

**Flexsteel™ hardwall hose** is reinforced with wire braiding for greater strength, durability, and crush-resistance than softwall hose. Retains its shape even after vehicle run-over. Hose handles all types of gasoline, oil, and petroleum based products, and is extremely resistant to swelling, softening, and flaking. Black synthetic rubber tube and cover. 3/4" (M)NPT chrome/brass fittings on both ends. UL Listed. Goodyear brand.

### PACER™ SOFTWALL HOSE

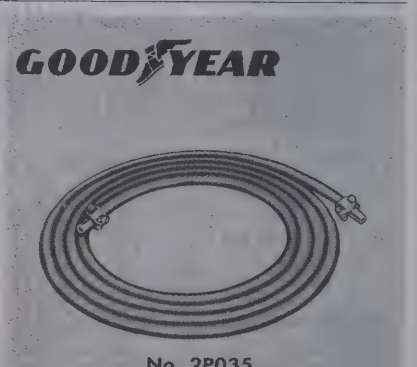
No. 2P289
Softwall Gasoline Pump Hose

## STEAM HOSE



**Flexsteel 250™ steam hose** is designed for cleaning, heat control, fire prevention, purging, thawing, blow-out service, steam pumps and hoists in open-end or permanent installation operations. Reinforced with double wire braid (1/2" one wire braid). Black cover and tube are synthetic rubber. Bulk hose can use Dixon "Boss" Fittings and Clamps, found on page 3029 Assembled hose fittings are clamped. Goodyear brand.

# PRESSURE WASHER, STEAM CLEANER AND WASHDOWN HOSE

## PRESSURE WASHER HOSE

- **Constructed of the highest quality materials to provide superior life**
- **Resistant to the effects of hot water and cleaning solutions**
- **Available in coupled assemblies**
- **Certified 4:1 Safety Factor (burst to working pressure)**
- **Manufactured in the USA by the Goodyear Tire & Rubber Company**

**Goodyear Neptune 1500 hose** is designed for pressure washer equipment up to 1500 PSI. Features a high tensile, braided textile reinforcement that will not rust. Nitrile tube and abrasion resistant neoprene cover (both RMA: Class B oil resistance). Temperature range: 0 to 200° F. Available in coupled assemblies with one each, (M) NPT and swivel (M) NPT crimped fittings.

| Hose I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Max. (PSI) | Max. Temp. (°F) | Cover Color | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **1/4 x 25** | 0.63 | 1500 | 200 | Black | **2P768** | $42.00 | **$34.95** | 3.0 |

| **3/8 x 50** | 0.75 | 1500 | 200 | Black | **3JT35** | 85.00 | **69.00** | 11.0 |

**Goodyear Neptune 3000 hose** is designed for use on pressure washers with working pressures of up to 3000 PSI. Special tube and cover compound is resistant to the effects of hot water (up to 250° F) and the cleaning solutions used in the pressure water industry. Constructed with a wire braid enforcement, Neptune 3000 is designed for strength and flexibility. Blue Neptune 3000 features a non-marking cover for carpet cleaning applications. Both the tube & cover are oil resistant (RMA Class B oil resistance). Temperature range is 0 to 250° F. Available in coupled assemblies with one each, (M) NPT and swivel (M) NPT crimped fittings.

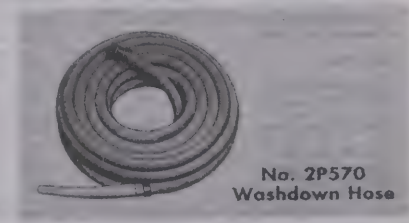
**Goodyear Neptune 4500 hose** is specially designed for use on pressure washer with working pressures up to 4500 PSI. Complies with UL 1776 standards which require a 2" shroud (bend restrictor) on the trigger end of the hose. Unique tube & cover compound that resists the effects of hot water (250° F) and the cleaning solutions used in pressure washers. The two wire braid construction handles pressures of up to 4500 PSI, yet it is more flexible and lighter weight than standard two wire braid hoses. Neptune 4500 has a nitrile tube and an abrasion resistant neoprene cover (both RMA Class B oil resistance). Temperature range is 0 to 250° F. Available in coupled assemblies with (M) NPT crimped fittings both ends.



| Hose I.D. (In.) x Length (Ft.) | Hose O.D. (In.) | Cover Color | Max. (PSI) | Max. Temp. (°F) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **3/8 x 50** | 0.69 | Black | 4500 | 250 | **3JT42** | $122.00 | **$101.45** | 15.0 |
| **3/8 x 100** | 0.69 | Black | 4500 | 250 | **3JT41** | 239.00 | **194.25** | 30.0 |

**Goodyear Whitewater pressure washer/steam cleaner hose** is designed for use on either steam cleaner machine or combination steam cleaner/pressure washer machines. The heat resistant tube is designed to handle the chemicals used in pressure washer and steam cleaner applications (RMA Designation: Class B Oil Resistance). Whitewater has a one wire braid construction. Reduced flex fatigue and improved safety with a 2" shroud (bend restrictor). Available in coupled assemblies with (M) NPT crimped fittings both ends. Handles hot water up to 250° F at 3000 PSI (2500 PSI on 1/2")(4:1 Safety Factor). Handles steam up to 325° F at 350 PSI (10:1 Safety Factor).

## WASHDOWN HOSE

**White "Creamery" washdown hose** efficiently and hygienically handles cleaning of equipment typically found in food plants, dairies, paper mills, and other industrial operations. Special EPDM tube and cover compound allows the use of extremely hot water for easy clean-up. Cover is pin-pricked for heat dissipation. Hose has tapered nozzle at one end, and a 3/4" long shank brass female fitting, double-banded on the other end. Garden hose threads.

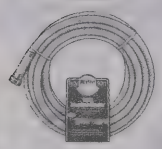
# WATER HOSE

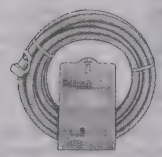
## FLATLINE® REINFORCED VINYL HOSE

For pools, patios, campers, boats and RV's. USFDA-listed tube materials for drinking water safety. Drains automatically. Coils flat for storage. Non-corrosive nylon GRIPPER® couplings.



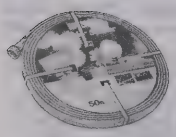
## COUNTRY CLUB® RT PROFESSIONAL DUTY HOSE

1" I.D., premium PVC hose. Flexible and lightweight. Industrial knit reinforcing for 450 PSI burst strength. For turf and nursery applications. Brass couplings.



## CONTRACTOR HOSE

Heavy-duty PVC construction for strength, flexibility, and abrasion resistance. Industrial style reinforcing. Brass couplings.



## WEATHER MASTER® REINFORCED VINYL HOSE

Strong 5-ply construction. All-weather tube. Dual reinforcing for excellent kink resistance. Non-corrosive nylon GRIPPER® coupling.

## EARTH QUENCHER® SOAKER HOSE

Drip irrigation style watering hose. Uses up to 70% less water than spray watering. Can be buried for direct underground soaking. Resists mold, fungal growth. Smooth cover.

## SPRINKLER SOAKER® TRIPLE TUBE HOSE

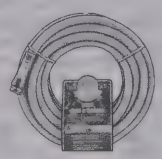
100% vinyl hose for wide-area spraying or direct ground soaking. With stripes up, it waters like gentle rain; stripes down for soaking. Color blends with landscape. End coupled for connecting hoses in series.

## COMMERCIAL DUTY REINFORCED RUBBER HOSE

Rubber cover resists oil, chemicals, abrasion, and weather. Withstands extensive hot water (200° F) use. Industrial knit reinforcing delivers 600 PSI burst pressure. Brass couplings.

## HOT WATER REINFORCED RUBBER HOSE

Withstands hot water use up to 200°F. Heavy-duty construction for maximum abrasion resistance. Industrial style reinforcing. Crush-resistant brass couplings.



## PREMIUM REINFORCED RUBBER HOSE

Heavy-duty, all rubber construction. Handles hot water up to 160° F. High grade tube for great pressure capacity and flexibility. Dual radial reinforcing for maximum burst strength and kink resistance. SEAL-TITE™ brass coupling with permanent O-ring for leak proof use.

## PERFECT GARDENER® RUBBER/ VINYL REINFORCED HOSE

Special grooves in tube assure water flow even if hose is kinked. Premium rubber /vinyl striped cover for all-weather use. Dual spiral/knit reinforcing for high burst strength. Crush-resistant, machined brass couplings.

## SOFT & SUPPLE® RUBBER/VINYL HOSE

Heavy-duty 5-ply construction. Rubber/ vinyl cover provides excellent handling and flexibility. All-weather PVC inner tube offers optimum water pressure capacity. Dual reinforcing for maximum kink resistance.

## GOODYEAR RUBBER WATER SUCTION HOSE

**Plicord™ Water suction and discharge hose** handles light to medium-duty suction applications. Balanced construction of synthetic fiber and wire helix reinforcements provides strength without weight or stiffness. Tube and cover (black) are compounded with synthetic rubber to resist internal abrasion, and provide the external toughness to resist abrasion, cuts, and gouges. Assembled units come with aluminum shank coupling with (M)NPSM threads, and aluminum shank coupling with brass pin-lug swivel and (F)NPSM threads. Gasket included. Bulk hose can be used with Dixon "Andrews" style cam and groove coupling. "King" short shank coupling, or combination nipple. Either double bolt or band clamps are recommended. Goodyear brand.

## GOODYEAR RUBBER WATER DISCHARGE HOSE

**Plicord™ water discharge hose** is especially suited for jobs where mobility is important. Lightweight and flexible for easy installation in fixed-position operations. Black Plioflex synthetic rubber tube and cover provide high resistance to abrasion, aging and weathering. Synthetic fabric reinforcement is mildew and moisture resistant. Assembled hose has Aluminum shank coupling with (M)NPSM threads and aluminum shank coupling with brass lug-pin swivel and (F)NPSM threads. Gasket included. Bulk hose can be used with Dixon "Andrew" style cam and groove coupler or "King" short shank coupler and combination nipple. Either double bolt or band clamps are recommended. Goodyear brand.

## TIGERFLEX PVC WATER SUCTION HOSE

**Green PVC hose** is designed for water suction and discharge in construction and septic tank cleaning operations. Also used in general industrial and agricultural applications where mild chemical resistance is required. 50% lighter than conventional hose made for the same service. Especially suited to outdoor applications because it remains flexible at temperatures from 15 to 150°F. Flexes 90° without kinking. Cover and tube is constructed of green PVC compound and reinforced with rigid PVC helix. Fittings: aluminum shank coupling with (M)NPSM threads, and aluminum shank coupling with brass pin-lug swivel and (F)NPSM threads. Gasket included. Tigerflex brand.

## SINGLE-JACKET FIRE HOSE

**Single-jacket 100% polyester hose** is recommended for emergency fire protection in industrial environments. Does not require drying, and is immune to mildew and rot.

**Ideal for applications where hose is stored in swing wall reels** for prolonged periods of time. Rubber lined for smooth water flow and extra strength. (Do not use on pin racks).

**300 PSI proof test/150 PSI service test.** Brass male coupling on one end; female swivel on other end. **50 ft. lengths.** FM Listed. National Fire Hose Division, Snap Tite Hose, Inc. brand

| Size (In.) | NHT TPI | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|

## SINGLE-JACKET PIN RACK FIRE HOSE

**Single-jacket, synthetic hose** is a lightweight, compact, easy to handle, thermoplastic lined hose which is provided **pre-folded** for use in pin rack storage. Designed to be totally immune to deterioration from mildew and rot. Replaces unlined linen hose foot for foot. Can easily be re-folded after use.

**500 PSI proof test/250 PSI service test.** Brass male coupling on one end; female swivel on other end. NST threads (9 TPI). UL and FM Listed. National Fire Hose Division, Snap Tite Hose, Inc. brand.

## FIRE HOSE SWING WALL REELS & PIN RACKS

**Swing wall reels** have red finish, all steel construction, compact design that provides fast easy deployment with collapsible hose. Pivot mount allows reel to swing to proper angle. Open sides for fast hose drying.

- **No. 4KR25 holds 1½" hose x 150 ft. length**
- **No. 4KR26 holds 1½" hose x 300 ft. length**

**Swing wall reel assembly** consists of: Nos. 4KR25 or 4KR26 reel, No. 4KR36 angle valve, No. 4KR28 nipple, and optional No. 4KR24 reel cover.

**Pin rack** is constructed of heavy gauge steel, with red finish. Rack only accepts single jacket pin rack fire hose.

No. 4LL10 pin rack holds 50, 75, and 100 ft. lengths of 1½" hose. No. 4KR28 rack nipple has 1½" (M)NPT x 1½" (M)NST threads. No. 4KR29 wall mount bracket for pin rack.

**Pin rack valve mount assembly** consists of: No. 4LL10 pin rack, No. 4KR28 rack nipple, and No. 4KR36 angle valve.

**Pin rack wall mount assembly** consists of: No. 4LL10 pin rack, No. 4KR29 wall mount bracket, No. 4KR28 rack nipple, and No. 4KR36 angle valve. Optional pin rack cover, No. 4KR27 for valve or wall mount assemblies.

**No. 4KR36 brass angle valve** has 1½ x 1½" female NPT threads. Max. 300 PSI. UL listed and FM approved. New York City Board of Standards and Appeals approved.

(*) GHT to NPT adapters, see index in back of catalog under Couplings, Hose.

# HIGH VELOCITY, HIGH VOLUME AIR MOVERS

No. 6F594

Used as either exhauster or amplifier for the dispersing of fumes or for ventilating confined areas in refineries, chemical plants, utilities, fabrication shops, ship yards, and other industrial areas.

- Explosion proof (when properly grounded)
- Aluminum inlet housing
- Only setup required is air supply line from compressor, plant air, or steam supply
- Galvanized steel diffusers
- No blind rivets. Stainless steel cap screw nuts for easy maintenance
- High static pressure capacity allows long runs of flexible duct on outlet diffuser so confined areas not accessible by unit can be reached with a blower hose (available below)
- Made in USA; Universal Tool brand

(*) Air flow and consumption based on 80 PSI air pressure. Maximum inlet pressure 150 PSI.

# UTILITY BLOWER HOSE FOR AIR MOVERS

FEDERAL HOSE®

Shown with Air Mover

Hose—Air Mover Sold Separately

Used with portable blowers and fans for fume removal or ventilating enclosed areas. Also used with portable evacuators for smoke removal in manholes, tanks, or other confined spaces.

- Moves large volumes of air with low friction loss
- Compressable—from 15 feet to 11 inches—saves space on repair and emergency trucks
- Spring loaded steel helix assures hose retains its size when flexed and smoothly extends to full length when removed from storage
- Abrasion protected with vulcanized wear-strip designed to withstand everyday, on-the-job abuse
- Fire resistant vinyl on polyester fabric
- Safety yellow color
- Includes sewn cuff, belt and buckle on each end for fast, easy connection

# INDUSTRIAL DUCTING HOSE

FEDERAL HOSE®

E141605

Two-ply, strip wound hose made of neoprene coated polyester fabric reinforced with carbon steel wire helix. Flexible, with good abrasion resistance and high tensile strength. For use in air movement to transport dust, fumes, smoke, odors, wood chips, cold and hot air. Operating temperature range of -40° to 250°F continuous (300°F intermittent). Resistant to most chemical fumes. UV resistant. Recognized by UL Laboratories Flame Retardancy test to UL-94-V0. Not recommended for garage exhaust. 25 ft. lengths. Black color

## SPECIFICATIONS AND ORDERING DATA

# CAM AND GROOVE COUPLINGS

Precision machined to rigid tolerances, these fittings feature durable stainless steel cam arm pins that will not rust or bind for greater strength and safety. Suitable for most water, dry bulk, petroleum, and chemical applications. Cam and Groove couplers and adapters are produced to interchange with all product produced to Milc-27487F. Working pressures: 250 PSI up to 2", 125 PSI for 3", and 100 PSI for 4". Dixon brand. WARNING: Not recommended for air service or compressed gas. Threaded end has male NPT thread. Example; 2" nipple has 2" NPT thread and fits 2" I.D. hose.

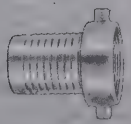
## "KING" COMBINATION NIPPLES

- Male NPT threaded hose ends, made from tubular stock, to fit straight end hose
- Combination nipples are recommended for low pressure suction and discharge service
- Threaded end has male NPT thread, same size as hose.

Example: 2" nipple has 2" NPT threads and fits 2" I.D. hose

- Not recommended for pressures exceeding 100 PSI on hose 3" and over
- Not intended for compressed air
- Uses double bolt or band clamps



No. 3LZ85

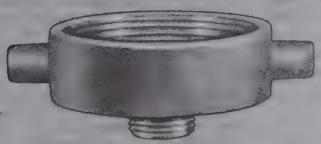
## "KING" STEEL SHORT SHANK COUPLING

- Complete set of straight threaded pin lug swivel nut female and male hose ends to fit straight end hose
- The most common fitting in use by contractors for low cost, low pressure, suction and discharge hose connections
- For use with water and other compatible liquids
- Not recommended for pressures exceeding 100 PSI on hose 3" and over
- 3LZ24 and 3LZ17 allow for direct connection to most fire equipment and hydrants for low cost, low pressure, suction and discharge hose connections
- Uses double bolt or band clamps
- WARNING: Not recommended for air service or compressed gas

No. 4KR30



No. 3LZ23

### "KING" STEEL SHORT SHANK COUPLING SPECS AND ORDERING DATA

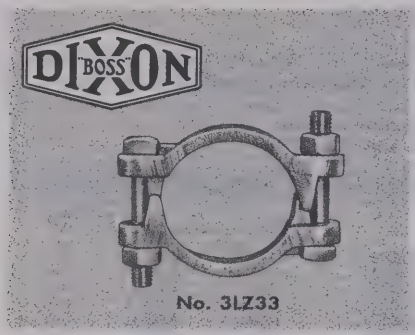
## BRASS HYDRANT ADAPTERS

- Allows the connection of hose of a different size, or thread, to the most common fire hydrant thread, 2 1/2" male NST (NH).
- Cast brass pin lug design
- WARNING: Not recommended for air service or compressed gas



No. 3LZ40

### BRASS HYDRANT ADAPTERS SPECIFICATIONS AND ORDERING DATA

| Size and Description (In.) Female | Male | Dixon Model No. | Stock No. | List | Each | Shpg. Wt. |

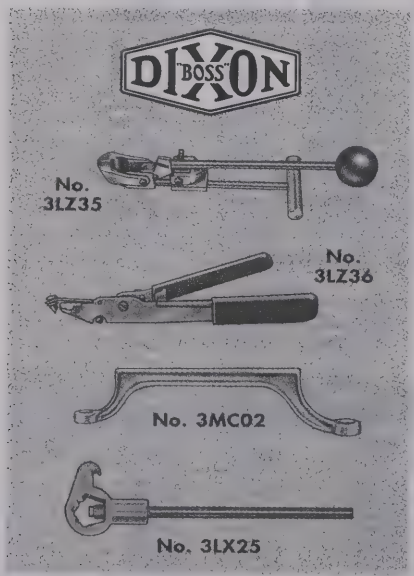
## BAND CLAMPS

- I.D. size is clamp I.D. Must be greater than hose O.D.
- Double wrapped for firm and easy locking
- Galvanized or stainless steel
- Install with Nos. 3LZ35 or 3LZ36 tools shown below
- Sold in packages of 10



### GALVANIZED STEEL BAND CLAMPS

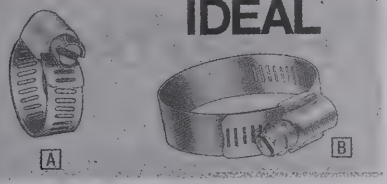
## BAND CLAMP TOOLS

- For installing band clamps pictured above
- No. 3LZ35 is used for high-production clamping
- No. 3LZ36 economic alternative for intermittent use

**No. 3LZ35.** F100 Clamp tool. Shpg. wt. 2.9 lbs. List $270.60. Each.....**$228.75**

**No. 3LZ36.** F40 Clamp tool. Shpg. wt. 1.7 lbs. List $88.90. Each.....**$75.10**



## SPANNER/HYDRANT WRENCHES

**No. 3MC02 double end combination pin lug and No. 3MC03 4" spanner wrench** fit pin lugs found on common suction and discharge couplings. Use the smaller end for 1½" and 2", and the larger end for 2½" and 3". Also fits pin lugs in these sizes for fire hose couplings. 3MC03 fits 4" pin lugs.

**No. 3LX25 heavy-duty adjustable hydrant wrench** and spanner adjusts to fit pentagon nuts up to 1¾" from point to flat, and notched to fit 1¼" square hydrant nut. Spanner for pin or rocker (sensible) lug couplings sizes 1½" through 6". Plated malleable iron head with 7/8" plated steel handle, with overall length, 18".

| Size (In.) | Dixon Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1½, 2, 2½ & 3 | SW153 | 3MC02 | $14.00 | $12.31 | 0.9 |
| 4 | SW40 | 3MC03 | 12.00 | 10.56 | 1.3 |
| 1½–6 | 189 | 3LX25 | 38.70 | 32.40 | 4.6 |

## IDEAL

- Interlocked construction for maximum anti-shear protection
- No spot welds or staking to prevent corrosion, rupture and clamp failure
- Rectangular band slots permit higher loads over conventional crescent shaped slots
- Standard clamps with wider bands (Key B) have more sealing area over conventional 1/2" bands

### A STEPLESS EAR CLAMPS

**Stepless ear clamps** guarantee a 360° seal by using a patented tongue and groove design; leave no steps, gaps, or unbridged parts on the inner circumference of clamp. Clamps are made of 304 AISI stainless steel. Built-in spring action permits clamp to "breath" without loosening, eliminating need to retighten. Oetiker brand.

### B 2-EAR HOSE CLAMPS

**Medium pressure clamps** are easily applied by positioning clamp on hose and firmly squeezing each ear with pincers (sold separately below). One-piece design for positive clamping action and a tamperproof seal. Comes in your choice of zinc plated or stainless steel. Oetiker brand.

### C 2-EAR HOSE CLAMP KIT

Kit contains: No. 4E607 straight jaw pincer; 15 each 5/16", 7/16", 1/2", 9/16", 5/8", and 15/16" zinc plated 2-ear clamps; and 12 each 3/4" and 7/8" zinc-plated 2-ear clamps. Packed in a compartmented box.

***New!*** **No. 4TX96.** Hose Clamp Kit (SK1098). Shpg. wt. 27.0 Lbs. List $55.00. Each.....$47.15

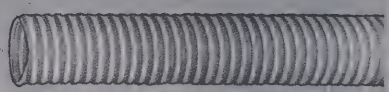
### JAW PINCERS

Used for closing ear clamps. Constructed of forged steel. Available in straight jaw model No. 4E607 for normal use and side jaw model No. 4E608 for use in confined areas with tool held parallel to application.

**No. 4E607.** Straight Jaw Pincer (14100082). Shpg. wt. 0.8 lbs. List $20.20. Each.....$19.56

**No. 4E608.** Side Jaw Pincer (14100083). Shpg. wt. 0.6 lbs. List $24.24. Each.....$23.74

# PVC FOOD HOSE AND FITTINGS



## NUTRIFLEX LIGHTWEIGHT FOOD HOSE

- Handles virtually all types of liquid food and dry bulk materials
- Up to 30% lighter than comparable hoses
- Handles pressure, vacuum, and gravity flow applications
- Corrugated wall construction for maximum flexibility and strength
- Smooth inner bore surface provides high flow rates and easy cleaning
- Non-contaminating. Will not impart or retain odors or affect taste.
- Conforms to FDA, USDA, and 3-A Sanitary Standards

### LIGHTWEIGHT FOOD HOSE ORDERING DATA

## NUTRIFLO HEAVY-DUTY FOOD HOSE

- Ideal for almost every type of dry bulk or liquid food handling
- Handles pressure, vacuum, and gravity flow applications
- Lightweight for ease of handling
- Heavy duty PVC construction handles higher pressures and provides long life in demanding applications
- Smooth inner bore surface provides high flow rates and easy cleaning
- Non-contaminating. Will not impart or retain odors or affect taste.
- Conforms to FDA, USDA, and 3-A Sanitary Standards
- Clear PVC construction allows visual monitoring of flow

## 316 STAINLESS STEEL "KING" COMBINATION NIPPLES

- Male NPT threaded hose ends, made from tubular stock, to fit straight end hose
- Combination nipples are recommended for low pressure suction and discharge service
- Not recommended for pressures exceeding 100 PSI on hose 3" and over
- Not intended for compressed air
- Uses band clamps or double bolt clamps

# TUBING AND TUBING CUTTERS

**A** **PVC clear flexible tube** features a service temperature range of +25°F(-4°) to +150°F (+65°C). Non-toxic food and beverage grade. FDA approved CFR Title 21 parts 170 to 199. Applications: beverage dispensing units, laboratory, and water drainage lines.

Note: if used in conjunction with push-to-connect fitting, a tube support is recommended.

**B** **PVC braided flexible tube** food and beverage grade features a service temperature range of +25°F (-4°C) to +150°F (+65°C). FDA certified CFR Title 21 parts 170 to 199. NSF certified under Standard 51.Potable Water approval. 3-A sanitary standard as product contact surfaces for dairy equipment. Applications: potable water transfer lines, and air & water lines.

**C** **Polyurethane clear light blue tube** features a temperature range of -68°F to +140°F. No need for tube support when used with push-to-connect fittings. Highly abrasion resistant and non-marking. Provides resistance to algae growth. Applications: air & water lines, robotics, car wash, and painting equipment.

**D** **Polyethylene tube** features a service temperature range of -100°F (-73°C) to +200°F (93°C). Linear low density polyethylene tube. Greater resistance to stress cracking caused by chemical, soaps, solvents, and oils. Applications: food processing, air lines, and water lines.

**E** **Nylon tube** features a service temperature range of -60°F to +200°F. Low moisture absorption. Excellent abrasion resistance. Applications: air, coolant, and fresh & salt water.

(*) Working pressure decreases as temperature increases. (†) Bend radius is defined as the radius of a bent section of hose/tube measured to the innermost surface of the curved portion, in normal conditions at room temperature.

## KWIKCUT HOSE, TUBING, AND PLASTIC PIPE CUTTER

- **Cuts plastic tubing, rubber non-wire reinforced hose, schedule 40 PVC pipe through 1" I.D.**
- **Fast, clean cut, no burrs**
- **Blade closes into its own handle**
- **High carbon Teflon® coated steel blade for fast cuts and long life**

| Overall Length (In.) | Dawn Indus. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **8.5** | T100 | **4HL90** | $30.50 | **$16.75** | 3.0 |

## SNIP TUBE CUTTER

- **Cuts PVC, braided PVC, nylon, polyethylene, polyurethane tubing through 5/8" O.D.**
- **Fast, clean, square cuts**
- **Easy to carry**
- **Durable long non-replaceable lasting blade**

| Overall Length (In.) | Anderson Brass Model | Stock No. | List | Each | Shpg. Wt. |

# PUSH-IN FITTINGS

## JG Super Speedfit® PUSH-IN FITTINGS

- Use with PVC tube, polyethylene, nylon, polyurethane, brass, copper, mild steel tubing. (Not recommended for stainless steel tube, or braided PVC tube).
- Temperature- Air: -14°F to +167°F (-25°C to 75°C), Water: 33°F to 140°F (1°C to 60°C)
- Faucet connector for drinking water/ice maker connections, reverse osmosis
- Approvals include: NSF 51 approved for potable water, FDA for food handling, and Water Quality Association

No special tools for assembly. Insert tube until tubing bottoms into fitting. To disconnect tubing, push collet against body. Ideal for dispensing foodstuffs, potable fluids, and compressed air. Maximum pressure, 150 PSI.

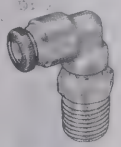
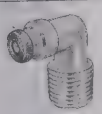
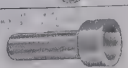
# PARKER PRESTOLOCK® FITTINGS







**Compact, one-piece brass fittings** are for use with polyethylene, nylon, or soft metal tubing. Designed for low-pressure circuits, where fast assembly, disassembly, reassembly are important.

**No special tools are need for assembly**—just insert the tube inside the fitting until it bottoms. Push in the release collar to disengage the radial-claw stainless steel grab ring, and tubing can be pulled out. It's instant and simple. Fittings can be assembled and disassembled repeatedly without impairing the Nitrile O-ring seal. No support ferrules or ID tube supports required.

**Note:** For use only with air, water, oil, and nonreactive gases. Do not use where accidental separation of tube and fitting could cause injury. Not recommended for continuous-pressure cycling applications.

**Pressure Range:** Vacuum to 300 PSI. Vacuum applications depend on temperature and tubing type.

**Temperature Range:** 0 to 150°F.
